<sup>3</sup> The sick call triage hotline is always available to people during all lock out hours. An emergency lock in would not prevent access to the hotline unless access to phones had been restricted as a part of the emergency lock in measure. Nevertheless, emergency lock ins do not prevent medical services and anyone with a medical need can still access the clinic during an emergency lock in.

	Non-Housing Area	Slashing/Stabbing	1
		UOF Investigation	1
RNDC	GP	UOF Investigation	4
	Non-Housing Area	Slashing/Stabbing	1

<sup>4</sup> Pursuant to local law 164, a continuous lock-in as used in this report refers to any period of time during which incarcerated individuals are confined to their cells or beds due to the combination of an emergency lock-in and either a scheduled lock-in or a lock-in extension, or both. For the purposes of this data metric, these 24-hour lock-in periods are continuous lock-ins, including both scheduled lock-ins and emergency-lock-in periods.

In comparison to the previous four reporting periods, department-wide lockdowns remained the same. The number of facility emergency lock-ins stayed remained about the same. The number of lock-in extensions remained increased. The number of partial emergency lock-ins remained about the same. The number of mandated services interrupted increased and the number of continuous lock-ins exceeding 24 hours remained about the same.
