

# Protect Yourself and Others From Mpox

## **Get your two-dose mpox (monkeypox) vaccine.**

It is never too late to get the second dose.

To find a vaccination site, visit [nyc.gov/vaccinefinder](https://nyc.gov/vaccinefinder).

## **Do not have sex or other intimate contact if you or your partners have a new rash or sores, feel sick, or were recently exposed to mpox.**

Ask your partners whether they have mpox symptoms and about their recent sexual history.

**Frequently wash your hands, bedding, towels and other shared items.** Sex toys should be washed after each use.

**Talk to your health care provider about testing, pain management and treatment if you have symptoms you think could be mpox.**

If you do not have a provider, call **311** to get connected to care.
