Site Code: 57373

Site Description: "Location: The 19th Street Development site is located along 11th Avenue, between 18th and 19th Streets. Site Features: The site is primarily comprised of a large multi-story office building with underground parking. Current Zoning/Use(s): The site is zoned commercial, industrial and is used as office space. Surrounding parcels are a combination of commercial and residential uses. The nearest residential area is within 500 feet to the east. Past Use of the Site: The site is one parcel of numerous parcels that comprise the former West 18th Street Gas Works site. Prior to remediation and redevelopment, the Site contained a two-story brick structure that served as a mid- to long-term truck parking garage and small fenced vacant lot in the SW corner. Geology and Hydrogeology: The site consists of urban fill material, silty sands with some gravel, and a clayey silt layer with varying amounts of organic material. The clayey silt layer varies in depth from approximately 11 feet below ground surface (bgs) to 28 feet bgs and is approximately 30 feet thick. Groundwater is encountered at depths between 6 and 8 feet bgs, and generally flows to the west. "

Env Problem: "Prior to Remediation: Based upon investigations completed at the site, the primary contaminants of concern at the site include Benzene, Toluene, Ethylbenzene and Xylene (BTEX), as well as Polycyclic Aromatic Hydrocarbons (PAHs). The impacted soils mainly were found above 15 feet bgs, with the higher concentrations of BTEX and PAHs where Non-Aqueous Phase Liquid (NAPL) was seen. Groundwater was also impacted with BTEX, PAHs and/or phenolic constituents concentrations exceeding ambient water quality criteria. Post-remediation: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were benzene, toluene, ethylbenzene, and xylene (BTEX), and PAHs in soil and groundwater. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil and groundwater is being managed under a site management plan."

Health Problem: "Direct contact with contaminants in the soil is unlikely because the majority of the site is covered with buildings and pavement. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The on-site building has a sub-grade parking garage that is partially below the natural groundwater level and incorporated a vapor barrier into its construction. A ventilation system installed in the garage inhibits the accumulation of soil gases within the building. "

**BROWNFIELDS:**

Name: 19TH STREET DEVELOPMENT SITE  
Address: 80 11TH AVENUE  
City,State,Zip: NEW YORK, NY 10011  
Program: BCP  
Site Code: 57373  
Acres: 0.680  
HW Code: C231017  
SWIS: 3101  
Town: New York City  
Record Added Date: 04/05/2004  
Record Updated Date: 11/05/2021  
Update By: JEBROWN  
Site Description: "Location: The 19th Street Development site is located along 11th Avenue, between 18th and 19th Streets. Site Features: The site is primarily comprised of a large multi-story office building with underground parking. Current Zoning/Use(s): The site is zoned commercial, industrial and is used as office space. Surrounding parcels are a combination of commercial and residential uses. The nearest residential area is within 500 feet to the east. Past Use of the Site: The site is one parcel of numerous parcels that comprise the former West 18th Street Gas Works site. Prior to remediation and redevelopment, the Site contained a two-story brick structure that served as a mid- to long-term truck parking garage and small fenced vacant lot in the SW corner. Geology and Hydrogeology: The site consists of urban fill material, silty sands with some gravel, and a clayey silt layer with varying amounts of organic material. The clayey silt layer varies in depth from approximately 11 feet below ground surface (bgs) to 28 feet bgs and is approximately 30 feet thick. Groundwater is encountered at depths between 6 and 8 feet bgs, and generally flows to the west. "

**Env Problem:**

"Prior to Remediation: Based upon investigations completed at the site, the primary contaminants of concern at the site include Benzene, Toluene, Ethylbenzene and Xylene (BTEX), as well as Polycyclic Aromatic Hydrocarbons (PAHs). The impacted soils mainly were found above 15 feet bgs, with the higher concentrations of BTEX and PAHs where Non-Aqueous Phase Liquid (NAPL) was seen. Groundwater was also impacted with BTEX, PAHs and/or phenolic constituents concentrations exceeding ambient water quality criteria. Post-remediation: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were benzene,

Health Problem: toluene, ethylbenzene, and xylene (BTEX), and PAHs in soil and groundwater. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil and groundwater is being managed under a site management plan."

"Direct contact with contaminants in the soil is unlikely because the majority of the site is covered with buildings and pavement. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The on-site building has a sub-grade parking garage that is partially below the natural groundwater level and incorporated a vapor barrier into its construction. A ventilation system installed in the garage inhibits the accumulation of soil gases within the building. "

Date Record Added: 06/08/2012  
Date Rec Updated: 12/06/2019  
Updated By: LSZINOMA  
Site Description: "Location: The 17th Street Development Project site encompasses the entire block between 17th and 18th Streets, and between 10th and 11th Avenues in the lower west side of Manhattan. Site Features: The site contains two residential towers with commercial space on the first floor and subsurface parking. The main distinguishing feature is a former elevated rail line that cuts across the eastern edge of the site, which was recently converted to use as a city park, High Line Park. Current Zoning/Use(s): This 1.75 acre site is currently zoned for commercial/residential. Surrounding Uses: The surrounding land use is historically commercial, but new residential development has been proceeding rapidly in recent years. Past Use of the Site: This site is one parcel in the larger Consolidated Edison W 18th Street Former Manufactured Gas Plant (MGP) site, ID No. V00530. Most of the gas making and purification facilities of the MGP were located on this parcel. Prior to its use as an Manufactured Gas Plant, the property experienced very little development, consisting of the

construction of five houses which were torn down after about 20 years to make room for expansion of the MGP operations. The plant began distribution of coal gas in November 1834 and operated continuously until it shut down in 1901 or 1902. In 1932, the railroad acquired the property. Some of the buildings were razed and a rail yard was built. The remaining buildings were used for other uses. Later, the tracks were removed, the remaining buildings razed and the site used as a parking lot. In the 1950s an automobile fueling and service station was built on the west end of the site. In the 1980s the service station was demolished and since then the site has been used exclusively as a parking lot. 17th Street Development Corporation is the BCP Volunteer for this block/site only. The remainder of the former MGP site remains under the Con Edison Voluntary Cleanup Agreement. Site Geology and Hydrogeology: Between 50 and 80 feet of unconsolidated materials overlie schist bedrock at the site. The fill deepens significantly from east to west. Overburden consists of three distinct stratigraphic units. The top unit is fill, generally highly permeable, ranging from 13 to 45 feet thick. The upper 5 to 10 feet of fill contains significant man-made materials and the remnants of former structures and debris. Below that fill is mostly fine to medium or fine to coarse sand with trace brick, ash wood fibers and concrete. Buried in the fill along the western border of the site is timber cribbing that formed the shoreline and bulkhead at one time. Below the fill is a Silty-Clay Unit which forms a low permeability aquitard. Water and other liquids such as coal tar do not readily pass through this layer. It varies in thickness from 40 feet to as little as 2 feet. Below the Silty-Clay Unit is the Sand Unit, a moderately permeable aquifer ranging from 20 to 40 feet thick. Permeability is far greater in a horizontal direction than vertical. The water table is located approximately 9 feet bgs and is nearly flat. Flow is generally toward the Hudson River to the west. In some areas, groundwater flow is influenced by man-made factors such as the Hudson River bulkhead, sheet pile walls, utilities, and by various man-made flows such as leaking water lines, drains, sewers, and building dewatering systems."

Env Problem:

"Nature and Extent of Contamination: Remediation, which is complete, was a combination of shallow excavation and removal between 3 and 7 feet over the entire site, in-situ solidification of the middle third of the site, and containment with the installation of a sealed sheet pile wall keyed into a confining clay-silt layer in the western third of the site. Remaining behind are: 1) very minor contamination under the High Line (eastern part of the site), inaccessible due to extensive High Line foundations and 2) significant mobile tar contained by the sheet pile wall and the underlying confining clay-silt layer. In this western third of the site, coal tar continues to slowly accumulate and is collected from 4 collection wells and removed from the site. Special Resources Impacted/Threatened: Before the remediation, which cut off any offsite migration of contaminants via groundwater, manufactured gas plant (MGP) contamination appears to have migrated from this property primarily to the north and west, but has not been observed in the Hudson River 160 feet to the west of the site. Off-site groundwater and/or soil gas contamination will be addressed as part of the overall remedy for the larger West 18th Street MGP site. "

Health Problem:

"People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Direct contact with contaminated soil is unlikely since it

is located under pavement. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying or nearby buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Although no buildings currently occupy the site, future site development is likely to include at least one structure and the potential for soil vapor intrusion will be evaluated. Any concerns related to soil vapor intrusion in nearby buildings will be addressed under the voluntary agreement for the West 18th Street MGP Site."

Current Zoning/Use(s): This 1.75 acre site is currently zoned for commercial/residential. Surrounding Uses: The surrounding land use is historically commercial, but new residential development has been proceeding rapidly in recent years. Past Use of the Site: This site is one parcel in the larger Consolidated Edison W 18th Street Former Manufactured Gas Plant (MGP) site, ID No. V00530. Most of the gas making and purification facilities of the MGP were located on this parcel. Prior to its use as an Manufactured Gas Plant, the property experienced very little development, consisting of the construction of five houses which were torn down after about 20 years to make room for expansion of the MGP operations. The plant began distribution of coal gas in November 1834 and operated continuously until it shut down in 1901 or 1902. In 1932, the railroad acquired the property. Some of the buildings were razed and a rail yard was built. The remaining buildings were used for other uses. Later, the tracks were removed, the remaining buildings razed and the site used as a parking lot. In the 1950s an automobile fueling and service station was built on the west end of the site. In the 1980s the service station was demolished and since then the site has been used exclusively as a parking lot. 17th Street Development Corporation is the BCP Volunteer for this block/site only. The remainder of the former MGP site remains under the Con Edison Voluntary Cleanup Agreement. Site Geology and Hydrogeology: Between 50 and 80 feet of unconsolidated materials overlie schist bedrock at the site. The fill

deepens significantly from east to west. Overburden consists of three distinct stratigraphic units. The top unit is fill, generally highly permeable, ranging from 13 to 45 feet thick. The upper 5 to 10 feet of fill contains significant man-made materials and the remnants of former structures and debris. Below that fill is mostly fine to medium or fine to coarse sand with trace brick, ash wood fibers and concrete. Buried in the fill along the western border of the site is timber cribbing that formed the shoreline and bulkhead at one time. Below the fill is a Silty-Clay Unit which forms a low permeability aquitard. Water and other liquids such as coal tar do not readily pass through this layer. It varies in thickness from 40 feet to as little as 2 feet. Below the Silty-Clay Unit is the Sand Unit, a moderately permeable aquifer ranging from 20 to 40 feet thick. Permeability is far greater in a horizontal direction than vertical. The water table is located approximately 9 feet bgs and is nearly flat. Flow is generally toward the Hudson River to the west. In some areas, groundwater flow is influenced by man-made factors such as the Hudson River bulkhead, sheet pile walls, utilities, and by various man-made flows such as leaking water lines, drains, sewers, and building dewatering systems."

Env Problem:

"Nature and Extent of Contamination: Remediation, which is complete, was a combination of shallow excavation and removal between 3 and 7 feet over the entire site, in-situ solidification of the middle third of the site, and containment with the installation of a sealed sheet pile wall keyed into a confining clay-silt layer in the western third of the site. Remaining behind are: 1) very minor contamination under the High Line (eastern part of the site), inaccessible due to extensive High Line foundations and 2) significant mobile tar contained by the sheet pile wall and the underlying confining clay-silt layer. In this western third of the site, coal tar continues to slowly accumulate and is collected from 4 collection wells and removed from the site. Special Resources Impacted/Threatened: Before the remediation, which cut off any offsite migration of contaminants via groundwater, manufactured gas plant (MGP) contamination appears to have migrated from this property primarily to the north and west, but has not been observed in the Hudson River 160 feet to the west of the site. Off-site groundwater and/or soil gas contamination will be addressed as part of the overall remedy for the larger West 18th Street MGP site. "

Health Problem:

"People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Direct contact with contaminated soil is unlikely since it is located under pavement. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying or nearby buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Although no buildings currently occupy the site, future site development is likely to include at least one structure and the potential for soil vapor intrusion will be evaluated. Any concerns related to soil vapor intrusion in nearby buildings will be addressed under the voluntary agreement for the West 18th Street MGP Site."

Site Description: "Location: The 17th Street Development Project site encompasses the entire block between 17th and 18th Streets, and between 10th and 11th Avenues in the lower west side of Manhattan. Site Features: The site contains two residential towers with commercial space on the first floor and subsurface parking. The main distinguishing feature is a former elevated rail line that cuts across the eastern edge of the site, which was recently converted to use as a city park, High Line Park. Current Zoning/Use(s): This 1.75 acre site is currently zoned for commercial/residential. Surrounding Uses: The surrounding land use is historically commercial, but new residential development has been proceeding rapidly in recent years. Past Use of the Site: This site is one parcel in the larger Consolidated Edison W 18th Street Former Manufactured Gas Plant (MGP) site, ID No. V00530. Most of the gas making and purification facilities of the MGP were located on this parcel. Prior to its use as an Manufactured Gas Plant, the

property experienced very little development, consisting of the construction of five houses which were torn down after about 20 years to make room for expansion of the MGP operations. The plant began distribution of coal gas in November 1834 and operated continuously until it shut down in 1901 or 1902. In 1932, the railroad acquired the property. Some of the buildings were razed and a rail yard was built. The remaining buildings were used for other uses. Later, the tracks were removed, the remaining buildings razed and the site used as a parking lot. In the 1950s an automobile fueling and service station was built on the west end of the site. In the 1980s the service station was demolished and since then the site has been used exclusively as a parking lot. 17th Street Development Corporation is the BCP Volunteer for this block/site only. The remainder of the former MGP site remains under the Con Edison Voluntary Cleanup Agreement. Site Geology and Hydrogeology: Between 50 and 80 feet of unconsolidated materials overlie schist bedrock at the site. The fill deepens significantly from east to west. Overburden consists of three distinct stratigraphic units. The top unit is fill, generally highly permeable, ranging from 13 to 45 feet thick. The upper 5 to 10 feet of fill contains significant man-made materials and the remnants of former structures and debris. Below that fill is mostly fine to medium or fine to coarse sand with trace brick, ash wood fibers and concrete. Buried in the fill along the western border of the site is timber cribbing that formed the shoreline and bulkhead at one time. Below the fill is a Silty-Clay Unit which forms a low permeability aquitard. Water and other liquids such as coal tar do not readily pass through this layer. It varies in thickness from 40 feet to as little as 2 feet. Below the Silty-Clay Unit is the Sand Unit, a moderately permeable aquifer ranging from 20 to 40 feet thick. Permeability is far greater in a horizontal direction than vertical. The water table is located approximately 9 feet bgs and is nearly flat. Flow is generally toward the Hudson River to the west. In some areas, groundwater flow is influenced by man-made factors such as the Hudson River bulkhead, sheet pile walls, utilities, and by various man-made flows such as leaking water lines, drains, sewers, and building dewatering systems."

Env Problem:

"Nature and Extent of Contamination: Remediation, which is complete, was a combination of shallow excavation and removal between 3 and 7 feet over the entire site, in-situ solidification of the middle third of the site, and containment with the installation of a sealed sheet pile wall keyed into a confining clay-silt layer in the western third of the site. Remaining behind are: 1) very minor contamination under the High Line (eastern part of the site), inaccessible due to extensive High Line foundations and 2) significant mobile tar contained by the sheet pile wall and the underlying confining clay-silt layer. In this western third of the site, coal tar continues to slowly accumulate and is collected from 4 collection wells and removed from the site. Special Resources Impacted/Threatened: Before the remediation, which cut off any offsite migration of contaminants via groundwater, manufactured gas plant (MGP) contamination appears to have migrated from this property primarily to the north and west, but has not been observed in the Hudson River 160 feet to the west of the site. Off-site groundwater and/or soil gas contamination will be addressed as part of the overall remedy for the larger West 18th Street MGP site. "

Health Problem:

"People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by

the site. Direct contact with contaminated soil is unlikely since it is located under pavement. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying or nearby buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Although no buildings currently occupy the site, future site development is likely to include at least one structure and the potential for soil vapor intrusion will be evaluated. Any concerns related to soil vapor intrusion in nearby buildings will be addressed under the voluntary agreement for the West 18th Street MGP Site."

Surrounding Uses: The surrounding land use is historically commercial, but new residential development has been proceeding rapidly in recent years. Past Use of the Site: This site is one parcel in the larger Consolidated Edison W 18th Street Former Manufactured Gas Plant (MGP) site, ID No. V00530. Most of the gas making and purification facilities of the MGP were located on this parcel. Prior to its use as an Manufactured Gas Plant, the property experienced very little development, consisting of the construction of five houses which were torn down after about 20 years to make room for expansion of the MGP operations. The plant began distribution of coal gas in November 1834 and operated continuously until it shut down in 1901 or 1902. In 1932, the railroad acquired the property. Some of the buildings were razed and a rail yard was built. The remaining buildings were used for other uses. Later, the tracks were removed, the remaining buildings razed and the site used as a parking lot. In the 1950s an automobile fueling and service station was built on the west end of the site. In the 1980s the service station was demolished and since then the site has been used exclusively as a parking lot. 17th Street Development Corporation is the BCP Volunteer for this block/site only. The remainder of the former MGP site remains under the Con Edison Voluntary Cleanup Agreement. Site Geology and Hydrogeology: Between 50 and 80 feet of unconsolidated materials overlie schist bedrock at the site. The fill deepens significantly from east to west. Overburden consists of three distinct stratigraphic units. The top unit is fill, generally highly permeable, ranging from 13 to 45 feet thick. The upper 5 to 10 feet of fill contains significant man-made materials and the remnants of former structures and debris. Below that fill is mostly fine to medium or fine to coarse sand with trace brick, ash wood fibers and concrete. Buried in the fill along the western border of the site is timber cribbing that formed the shoreline and bulkhead at one time. Below the fill is a Silty-Clay Unit which forms a low permeability aquitard. Water and other liquids such as coal tar do not readily

pass through this layer. It varies in thickness from 40 feet to as little as 2 feet. Below the Silty-Clay Unit is the Sand Unit, a moderately permeable aquifer ranging from 20 to 40 feet thick. Permeability is far greater in a horizontal direction than vertical. The water table is located approximately 9 feet bgs and is nearly flat. Flow is generally toward the Hudson River to the west. In some areas, groundwater flow is influenced by man-made factors such as the Hudson River bulkhead, sheet pile walls, utilities, and by various man-made flows such as leaking water lines, drains, sewers, and building dewatering systems."

Env Problem: "Nature and Extent of Contamination: Remediation, which is complete, was a combination of shallow excavation and removal between 3 and 7 feet over the entire site, in-situ solidification of the middle third of the site, and containment with the installation of a sealed sheet pile wall keyed into a confining clay-silt layer in the western third of the site. Remaining behind are: 1) very minor contamination under the High Line (eastern part of the site), inaccessible due to extensive High Line foundations and 2) significant mobile tar contained by the sheet pile wall and the underlying confining clay-silt layer. In this western third of the site, coal tar continues to slowly accumulate and is collected from 4 collection wells and removed from the site. Special Resources Impacted/Threatened: Before the remediation, which cut off any offsite migration of contaminants via groundwater, manufactured gas plant (MGP) contamination appears to have migrated from this property primarily to the north and west, but has not been observed in the Hudson River 160 feet to the west of the site. Off-site groundwater and/or soil gas contamination will be addressed as part of the overall remedy for the larger West 18th Street MGP site. "

Health Problem: "People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Direct contact with contaminated soil is unlikely since it is located under pavement. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying or nearby buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Although no buildings currently occupy the site, future site development is likely to include at least one structure and the potential for soil vapor intrusion will be evaluated. Any concerns related to soil vapor intrusion in nearby buildings will be addressed under the voluntary agreement for the West 18th Street MGP Site."

Site Code: 58929

Site Description: "Location: The 17th Street Development Project site encompasses the entire block between 17th and 18th Streets, and between 10th and 11th Avenues in the lower west side of Manhattan. Site Features: The site contains two residential towers with commercial space on the first floor and subsurface parking. The main distinguishing feature is a former elevated rail line that cuts across the eastern edge of the site, which was recently converted to use as a city park, High Line Park. Current Zoning/Use(s): This 1.75 acre site is currently zoned for commercial/residential. Surrounding Uses: The surrounding land use is historically commercial, but new residential development has been proceeding rapidly in recent years. Past Use of the Site: This site is one parcel in the larger Consolidated Edison W 18th Street Former Manufactured Gas Plant (MGP) site, ID No. V00530. Most of the gas making and purification facilities of the MGP were located on this parcel. Prior to its use as an Manufactured Gas Plant, the property experienced very little development, consisting of the construction of five houses which were torn down after about 20 years to make room for expansion of the MGP operations. The plant began distribution of coal gas in November 1834 and operated continuously until it shut down in 1901 or 1902. In 1932, the railroad acquired the property. Some of the buildings were razed and a rail yard was built. The remaining buildings were used for other uses. Later, the tracks were removed, the remaining buildings razed and the site used as a parking lot. In the 1950s an automobile fueling and service station was built on the west end of the site. In the 1980s the service station was demolished and since then the site has been used exclusively as a parking lot. 17th Street Development Corporation is the BCP Volunteer for this block/site only. The remainder of the former MGP site remains under the Con Edison Voluntary Cleanup Agreement. Site Geology and Hydrogeology: Between 50 and 80 feet of unconsolidated materials overlie schist bedrock at the site. The fill deepens significantly from east to west. Overburden consists of three distinct stratigraphic units. The top unit is fill, generally highly permeable, ranging from 13 to 45 feet thick. The upper 5 to 10 feet of fill contains significant man-made materials and the remnants of former structures and debris. Site Description: "Location: The 17th Street Development Project site encompasses the entire block between 17th and 18th Streets, and between 10th and 11th Avenues in the lower west side of Manhattan. Site Features: The site contains two residential towers with commercial space on the first floor and subsurface parking. The main distinguishing feature is a former elevated rail line that cuts across the eastern edge of the site, which was recently converted to use as a city park, High Line Park. Current Zoning/Use(s): This 1.75 acre site is currently zoned for commercial/residential. Surrounding Uses: The surrounding land use is historically commercial, but new residential development has been proceeding rapidly in recent years. Past Use of the Site: This site is one parcel in the larger Consolidated Edison W 18th Street Former Manufactured Gas Plant (MGP) site, ID No. V00530. Most of the gas making and purification facilities of the MGP were located on this parcel. Prior to its use as an Manufactured Gas Plant, the property experienced very little development, consisting of the construction of five houses which were torn down after about 20 years to make room for expansion of the MGP operations. The plant began distribution of coal gas in November 1834 and operated continuously until it shut down in 1901 or 1902. In 1932, the railroad acquired the property. Some of the buildings were razed and a rail yard was built. The remaining buildings were used for other uses. Later, the tracks were removed, the remaining buildings razed and the site used

as a parking lot. In the 1950s an automobile fueling and service station was built on the west end of the site. In the 1980s the service station was demolished and since then the site has been used exclusively as a parking lot. 17th Street Development Corporation is the BCP Volunteer for this block/site only. The remainder of the former MGP site remains under the Con Edison Voluntary Cleanup Agreement. Site Geology and Hydrogeology: Between 50 and 80 feet of unconsolidated materials overlie schist bedrock at the site. The fill deepens significantly from east to west. Overburden consists of three distinct stratigraphic units. The top unit is fill, generally highly permeable, ranging from 13 to 45 feet thick. The upper 5 to 10 feet of fill contains significant man-made materials and the remnants of former structures and debris. Below that fill is mostly fine to medium or fine to coarse sand with trace brick, ash wood fibers and concrete. Buried in the fill along the western border of the site is timber cribbing that formed the shoreline and bulkhead at one time. Below the fill is a Silty-Clay Unit which forms a low permeability aquitard. Water and other liquids such as coal tar do not readily pass through this layer. It varies in thickness from 40 feet to as little as 2 feet. Below the Silty-Clay Unit is the Sand Unit, a moderately permeable aquifer ranging from 20 to 40 feet thick. Permeability is far greater in a horizontal direction than vertical. The water table is located approximately 9 feet bgs and is nearly flat. Flow is generally toward the Hudson River to the west. In some areas, groundwater flow is influenced by man-made factors such as the Hudson River bulkhead, sheet pile walls, utilities, and by various man-made flows such as leaking water lines, drains, sewers, and building dewatering systems."

Env Problem: "Nature and Extent of Contamination: Remediation, which is complete, was a combination of shallow excavation and removal between 3 and 7 feet over the entire site, in-situ solidification of the middle third of the site, and containment with the installation of a sealed sheet pile wall keyed into a confining clay-silt layer in the western third of the site. Remaining behind are: 1) very minor contamination under the High Line (eastern part of the site), inaccessible due to extensive High Line foundations and 2) significant mobile tar contained by the sheet pile wall and the underlying confining clay-silt layer. In this western third of the site, coal tar continues to slowly accumulate and is collected from 4 collection wells and removed from the site. Special Resources Impacted/Threatened: Before the remediation, which cut off any offsite migration of contaminants via groundwater, manufactured gas plant (MGP) contamination appears to have migrated from this property primarily to the north and west, but has not been observed in the Hudson River 160 feet to the west of the site. Off-site groundwater and/or soil gas contamination will be addressed as part of the overall remedy for the larger West 18th Street MGP site. "

Health Problem: "People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Direct contact with contaminated soil is unlikely since it is located under pavement. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying or nearby buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Although no buildings currently occupy the site, future site

development is likely to include at least one structure and the potential for soil vapor intrusion will be evaluated. Any concerns related to soil vapor intrusion in nearby buildings will be addressed under the voluntary agreement for the West 18th Street MGP Site."

DEC Region: 2  
DER Facility ID: 188548  
DEC Memo: "Prior to Sept, 2004 data translation this spill Lead\_DEC Field was SANGESLAND 11/17/99 Call from Mark Turoff - Environmental consultant hired to work this job. pager 917-525-3087 cell 917-750-1843 Mr. Turoff requested an extension in time until late December. Sangesland asked several specific questions about what was being done on the site now (new tenant moving in?) Are there any other tanks on the site? will the tank be removed or abandoned in place? Mr. Turoff knew nothing. Sangesland asked him to answer these questions and plan what needed to be done. Submit that in writing and then PERHAPS the actual work could be postponed until late Dec. '99 11/26/99 - Mr. Turoff sent a letter dated 11/22/99 requesting an extension of deadline date. NONE of the information requested in 11/17/99 telephone conversation was submitted in this letter. Mr. Turoff requested a written extension of the deadline, but since he did not submit what was requested, no such letter will be sent out. 12/6/99 - Call from owner saying Trinity Consulting was on site chopping open the floor .... (no notification was made to DEC about this work).... Sampling will be done 12/7/99 early AM 12/7/99 - Six GeoProbe borings were pushed down to 10' - 12' to bedrock. Sangesland was on site for the first 4 borings - all appeared clean. Borings will be sent in for testing. If the results come back clean, the site will be closed out. 12/29/99 - Trinity sent in data from several soil borings. After Sangesland left the site on 11/7/99 another tank was found in the garage. This new tank was a clean motor oil storage tank used to put into cars during service. Borings were done around this one also. All borings were tested to EPA 8270. All results were below detection limits except for 1 taken near the fill line of the used motor oil tank. The one high sample had the following values: (Eco Test Lab) all below 300 ug/kg except: Fluoranthene = 420 Pyrene = 380

**S106719717**

Benzo(a)anthracene = 440 Chrysene = 440 Benzo(b)fluoranthene = 500  
Benzo(k)fluoranthene = 500 DEC status on this site is NOT closed, but  
it will be listed as inactive with no further action required. Since  
the source is gone and the contamination was just around the fill  
line and not wide spread, DEC direction is to have the tanks filled  
and taken out of service. Over time natural attenuation should  
remediate the site. In it's expected use as an art gallery with a  
concrete floor, this should have no impact on either health or  
environment. In the future if the use of the property changes, this  
issue may need to be addressed again. 1/11/2000 - Vinnie Lovari from  
Island Tank (718-967-9424) was given permission to open up the tanks,  
recheck size and then closed them out in place. PBS Registration  
paperwork will be sent after the work is done. 1/26/2000 - Spill  
event is closed out."

Remarks: "TANK IN GROUND FOUND TO BE LEAKING-NO FURTHER INFO AT THIS TIME. "

DEC Memo: "09/19/11-Hiralkumar Patel. 2:49 PM:- left message for Greg at GC Environmental. 2:52 PM:- spoke with Scott at Lawrence Environmental and Greg at GC Environmental. GC environmental performed a tightness test as part of potential property sale. site has one 4,000 gal #6 oil AST which is about 10% underground. supply/return lines runs aboveground in building. fill line runs underground below the sidewalk and then runs aboveground in the building. during test, Greg observed a tell-tale line from tank, but they could not find other open end of tell-tale line. Scott Smith Lawrence Environmental Group LLC. Ph. (212) 682-2001 09/21/11-Hiralkumar Patel. 1:51 PM:- left message for Scott. 2:29 PM:- received message from Scott. 09/23/11-Hiralkumar Patel. 12:53 PM:- spoke with Scott. he mentioned that Lawrence environmental was hired by James Bush. he asked to contact James for property owner's contact information. 1:03 PM:- left message for James. James Bush Ph. (212) 977-5000 09/23/11-Hiralkumar Patel. 11:31 AM:- spoke with James. James mentioned that his company is planning to buy this property and they are dealing with broker. as part of possible property transcation, they did Phase I report and found some issues. so they hired Lawrence environmental, who did soil borings and tank test. James asked to contact Paul at Eastern Consolidated. Paul Nigido \*\*broker\*\* Eastern Consolidated Ph. (212) 499-7700 alternate addresses: 364-370 W 18th Street, 112-126 9th Ave PBS #: 2-256552. as per PBS record, site has one 4,000 gal #6 oil AST in contact with soil. tank was installed in Apr. 1940. other spill: 0905371. spill was reported by tenant due to petroleum odors in building. DEC Vought inspected site and found no problem. case closed. 1:07 PM:- spoke with Ben Haghani, property owner. informed him about tank test failure. he mentioned that they already corrected the problem. he doesn't know much but will send update after talking to person who is handling this issue. FRG 9th Avenue LLC. \*\*property owner\*\* 380 Madison Avenue, Suite 2401 New York, NY 10017 Attn.: Ben Haghani Ph. (212) 922-1220 Ext. 303 email: ben@fortunarealtygroup.com 1:47 PM:- sent TTF to Mr. Haghani. letter emailed to Mr. Haghani. case assigned to DEC Falvey. 10/13/11-Hiralkumar Patel. 3:42 PM:- received call from Mark Cherchio (212-922-1220 Ext. 303) from management. he mentioned that the tank failed the tightness test because of old tell-tale line. they have cut that line and now system is tight. asked Mark to submit letter from contractor confirming reason for tank test failure and passing test result. 10/31/11-Hiralkumar Patel. received letter report from Mr. Cherchio including tank test results. based on submitted information, case closed."

building super Jose Lopez (ph:914-490-0806) who when informed of the odor complaint, immediately referred that the call most likely came from Apt 3K (Rick) who was repeatedly calling various city agencies with numerous complaints. Lopez also mentioned that Rick was in current litigation with landlords of building. Vought noticed no odors in lobby of building. Vought inspected basement and found minor spill (12 patch of stained concrete) by oil burners and noted speedy dry was already applied to spill. No odors in basement. Also no observable spills or odors in secondary containment room of 4000-gallon #2 fuel oil AST (registered as in contact with soil). Spill closed by Vought due to no odors, very minor spill on concrete. 11/16/09-Vought-Received call from Richard Saler(917-414-7379) who was inquiring as to status of above spill. Rick mentioned numerous toxic hazards to his building including illegal venting from new sandwich shop, mold, fire hazard from stored oil and adjacent electrical supply (note that fuel oil has very high flashpoint and presents minor explosion hazards). Rick noted that three large of drums of oil were formerly stored in a room with a half door and there was a large oil spill there and suggested that Vought missed room during last site visit. Rick also mentioned that NYCDOH was onsite but would not provide Vought contact information for NYCDOH representative despite repeated requests and said that he would only provide it to Vought if additional site visit was performed. Vought discussed that if source of initial complaint was known than Department would have responded immediately back in August to have NYCDOH site visit to ensure health and safety of residents. Rick mentioned that he was made report to NYC Department of Investigations due to his lack of satisfaction with NYCDOH. Vought informed DEC Austin of second complaint. Rick will send pictures to Vought with spill and stated that door was closed at time of DEC Site visit. Vought arranged site visit for 11/17 at 10am during which NYCDEP rep would be onsite also arranged by Rick. Rick mentioned that there were presently no odors in his apartment. Vought called Jose and informed him of DEC site visit and requested that he leave room with half door open. Jose noted that room with half door was room that Vought inspected on 8/10/09. 11/17/09-Vought-Site visit by Vought with Richard and NYCDOH Eric Joseph (212-442-3372)from unit of P. Stallbohm. Joseph indicated that this was his second time responding to site and meeting with Richard. Richard indicated that building was being impacted by food odors from Subway sandwich shop. NYCDOH Joseph inspected Subway sandwich shop and inquired as to ventilation system. No sources of petroleum in Subway Sandwich shop. Vought requested to inspect residence of Richard for vapors and Richard declined request and said that there were no petroleum odors in his apartment . Vought inquired as to pictures of spill he said yesterday he had and he stated that he could not find them . Vought noted no odors in hallway of building or in basement hallway. Vought requested that Richard show Vought specific room where spill was because he stated Vought missed room on last inspection. Vought inspected room with Richard and NYCDOH Joseph and room was same room that was subject of inspection (and 12 oil stain on poured concrete floor) as last site visit on 8/7/09. No additional signs of spillage from last site visit and no petroleum vapors. NYCDOH Joseph confirmed that during his prior visit he performed PID survey of basement and found no odors. No additional cracks or routes of entry to subsurface. Vought explained results of inspection to Richard and spill will remain closed. See edocs for photos of site visit. "

DEC Memo:

"need to contact either jeff bohlen at envirotrack (631-471-1500) or Jerome Kung at verizon (212-338-6754) to determine what work is being done on the site. No letter has been sent yet. 06/21/05-SR// Spoke with jeff Bohlen(516-807-8983). He will forward all necessary documents to DEC. 10.07.05 Sharif is currently reviewing the subsurface investigation report submitted by Envirotrac. 3/20/06- DEC Piper reviewed tank closure report. As per report and database, there are two historic spills at the property, 9007995 and 9314833. In 1994, two 4K gasoline UST's were removed, and two 3K gasoline UST were installed. Samples collected from the limits of the excavation detected petroleum impacted soils in the vicinity of these USTs. Additionally, 8- 550 gal USTs are located in the basement of the property. These tanks were allegedly closed along w/ the two 4K gal USTs. SVOC's were detected exceeding NYSDEC TCLP guidance values. Spills 9007995 and 9314833 were closed on 8/6/96 after receipt of tank closure reports for the 2 4K USTs and 8- 550 USTs. In June-August 2005, seven (7) MWs were installed on site. Lab analytical revealed VOC's , SVOC's, and metals above TAGM 4046. Note: the groundwater was determined to be slightly to moderately saline. From Jan 6- 11, 2006, Envirotrac removed the two 3K gasoline USTs that

were installed in 1994 and constructed of double wall fiberglass. A total of six (6) endpoint samples were collected from the excavation. With the exception of the West sidewall in which 226 ppb of benzene was detected, no other VOC's were detected above TAGM 4046. Additional excavation was performed in the area of the two- 4K UST remote fills and the two- 3K UST remote fills. Analytical results suggest that VOC's were not present above TAGM 4046, however SVOC's were. In addition to the sampling performed in reference to the UST's, soil samples were collected at the base of the Truck Elevator Shaft where it was determined that VOC's and SVOC's were detected above TAGM 4046, due to a bad seal. To minimize any future impact, the seals were replaced and vegetable oil was used in place of pet. based hydraulic oil. As per the report, the property is currently in negotiations to be sold. This party reportedly plans on razing the building and excavating to bedrock. ~45 feet bgs. In the meantime Envirotrac recommends quarterly sampling of the MW network. Referred to K. Tang 3/21/06 - reviewed the tank closure report. Soil and GW contamination is minimal, max GW VOCs is ~200 ppb and only one side wall sample is slight above TAGM 4046. Spill closed. - KST"  
"DURING SOIL BORINGS FOUND OIL IN GROUND."

as Block 706, Lot 1 in New York City's tax records and consists of a 37,800 square-foot (1.020 acre) rectangular-shaped vacant parcel. The surrounding urban area consists primarily of retail and commercial business. The Amtrak Railroad tunnel (and easement) runs through the northwest corner of the site. Current Zoning/uses: This site was designated as C6-3 on the NYC Zoning Map 8b which is a general central commercial district. This site is also an e-designation requiring NYCDEP approval. In January 2005, this site was rezoned as part of the City-led Hudson Yards District to allow for commercial and residential uses. The NYC MTA constructed a permanent entrance in the middle of this BCP site for the 34th Street Station of the No.7 Subway Extension. Historic Use: From 1890 to 1962, the site was used for commercial, residential, and manufacturing including a wagon house, black smith shop, electrical supplies and a warehouse. In 1973, the most recent business that covered the entire site was a 2-story commercial communications facility including numerous petroleum underground storage tanks (USTs). Six petroleum spills have occurred at this site between 1990 and 2007. Site Geology and Hydrogeology: The site is approximately 25 feet above mean sea level. Groundwater is 17 feet to 32 feet below ground surface. Surface water and groundwater flow is towards the Hudson River which is approximately 1,500 feet to the west of the site. The subsurface soil profile consists of urban fill overlying sand and silt deposits. Bedrock is located between 15 and 25 feet below grade. Between 2007 and 2012, all soil above bedrock was removed and replaced with clean fill. 12/19/12-DEC signed the Certificate of Completion for this site."

Env Problem:

"Remediation at the site is complete. Prior to remediation, the primary contaminant of concern was low level petroleum (diesel/gasoline) in soil and in shallow groundwater."

Health Problem:

"No site-related contaminants of concern were identified beyond the boundaries of the site, therefore no exposure pathways exist."

DEC Region: 2  
DER Facility ID: 284732  
DEC Memo: "Prior to Sept, 2004 data translation this spill Lead\_DEC Field was SANGESLAND Sent TTF letter to consultant: Maria Ramirez, GZA, 65 Willowbrook Blvd, Wayne, NJ 07470 11/5/2003 Sangesland spoke with Maria Ramirez at GZA. She says the building is converting to natural gas and the 10,000 gal tank will be abandoned in place. Tank is below the basement floor under an electrical utility room. They cleaned out the tank and found holes in the top 1/3 of the tank. They will take borings through the bottom of the tank to determine if the area is contaminated. 12/4/2003 e-mail message from Maria Ramirez said the soil borings through the bottom of the tank would take place around 12/12/03. 12/11/2003 Sangesland reviewed a submittal from Maria Ramirez of GZA dated Nov 19, 2003. This outlined the the work discussed above and stated that 4 holes will be drilled through the bottom of the tank and samples will be collected for testing (if possible-it may be in cement). If the samples are clean, the tank will be abandoned in place with foam. 12/22/2003 Sangesland spoke with Fran Schultz of GZA about this site. They made 4 holes in the bottom and sides of this tank and hit cement. Water is entering the tank. To date approx 700 gal of water has entered the tank. They believe the water is from a broken water main. Sangesland asked GZA to test the water for VOC and SVOC. GZA said they would also test for Floride and Clorine to determine if this water is city tap water or groundwater. If the water samples come back clean, then GZA will prepare an arguement that the tank is in a subbasement vault. All records of the building (blueprints) are gone (they were in 7 World Trade Center). There are lots of utilities nearby. The tank is being abandoned in place. GZA will request closure of the spill number. 3/15/2004 Sangesland reviewed a report from Maria Ramirez of GZA. Based on the description of the tank location (below ConEd electrical equipment), the drilling of holes through the bottom and sides of the tank (all into cement), results of water tests on the water that came into the tank after drilling (no petroleum but did have Floride & Chlorine). Based on all of this information, the DEC will allow GZA to go ahead with abandonment of the tank. After proper abandonment is complete, GZA will submit a final report with a request for spill closure. 11/14/05 - Larry Alden - Reviewed file and concur with assessment of Sangesland (3/15/04). Reviewed PBS# 2-606121, which showed that 10,000-gallon tank was closed in-place on 7/8/04. With absence of any contamination, and tank subsequently closed, this spill can be closed."

Remarks: "failed a tightness test but could not isolate a specific pipe - test was performed as part of a closure."

Spiller Phone: (646) 468-4409  
Spiller Extension: Not reported  
DEC Region: 2  
DER Facility ID: 467379  
DEC Memo: "8/20/15 TJD Teleconference with building super (Mr. Sampson 646.468.4409) - he states there is an active leak from 10K AST in sub-basement. Tank failed a tightness test earlier in the day. Tank bottom is reported to be in direct contact with soil and shallow groundwater is reported to be impacted. Product in sump. DeMeo dispatched AH Secondary (Zhune) for inspection and facilitation of an immediate pump-out of leaking tank system pending repairs and passing retest. 8/20/15-Zhune responded to this spill. Met Superintendent Mr. Sampson. As per Mr. Sampson he noticed oil spill in the tank room and adjacent rooms and he notified his supervisor. During my inspection I observed a pool of oil in the tank room, oil in the floor of the adjacent rooms (boiler room and a Jeen room) and oil in two drains. The manager of the building hired Riteway. Riteway will pump out the tank and will clean the spill. 8/21/15-Mr. Sampson emailed pictures and the following email: Rite way pump out all the Oil out of the tank and the Tank room to there are Coming back today to do A isolation test and clean up more. 9/4/15-Zhune called Mr. Sampson. Mr. Sampson said Rite Way cleaned the tank room, the oil outside the tank room and the oil in the sump. They will come back to complete the cleanup but the building need to repair a water leak. They found out the line was leaking. They are in the process to get the permit to repair the line. They found the tank in good condition. 9/9/15-David Chan sent the following email The site has been cleaned up, we remediated in total approximately 5 drums, and pumped out about 2000 gallons of oily water (there was very little oil, it was mostly water, I believe the water was a pre-existing condition there). The leak was a faulty fill (it was repaired by others). I am waiting for documentation. Once I have everything prepared I will send over. 9/17/15-David Chan sent the following email Riteway will be performing the repairs to the fill line. We are scheduled to begin the work this coming Monday on 9/21/2105. 9/28/16-Robert Hill sent the following email. Riteway Tank replaced the fill line at 305 7 Avenue, NYC. All the lines were above ground. Can I put oil back into the tank or do I need to perform a system test. Please let me know ASAP. My customer would like to fill their tank. 10/19/15-Riteway sent the spill closure report dated 10/5/15. the letter stated the tank was pumped out and the oily water in the room was vacuumed up. the two (2) drains and one (1) sump was pumped out and cleaned with bio-degradable degreaser as well. Riteway proceeded to trouble shoot the issue by isolating the tank and testing the lines. The tank only passed the test. The cause of the spill was a slow leak on a faulty fitting on the fill line. The fill line is above ground and the tank room floor is sound concrete. Riteway Tank Maintenance Corp performed the repairs to the fill line. The entire area was remediated until free from contamination. A total of 2500 gallons of liquid and 6 drums of impacted material was remediated. the site is cleaned. Spill closed."

Remarks: "Test failure. Observed wet leak. Repair being planned. Cleanup is pending."

Updated By: SNBOLLER  
Site Description: "Location: The Site is located in an urban area of New York County (Manhattan) on the east side of 10th Avenue between W. 16th and W. 17th Streets (the site does not include the building on the southeast corner of 10th Ave. and W. 17th St.). Site Features: The former site features include several buildings and a paved parking lot. The site buildings were unused and were demolished. Past Uses: The most recent uses of the Site include a warehouse for electrical construction equipment; an electrical contractor area; a vehicle garage and outdoor parking area; an outdoor garden supplies store; a restaurant; auto body shop; and classroom space for a theater company. Prior uses include various freight and automobile uses, with underground fuel storage tanks, and unspecified manufacturing. Surrounding uses include multi-story residential buildings with and without lower-level commercial uses, parking, and playgrounds. The High Line , an elevated rail line which was used in the past for freight and is now unused, is to the west of and partially over the western end of the site (with aerial easement). An investigation pertaining to the removal of underground storage tanks occurred in the early 1990's. A Phase I and limited Phase II Environmental Site Assessment was performed in 2004. Operable Units: For remedial purposes, the site was divided into two Operable Units (OUs). An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. Operable Unit 1 (OU1) is the eastern portion of the site which is fully occupied by the new residential building. Operable Unit 2 (OU2) is the High Line area that extends along 10th Avenue and the western portion of 16th Street. Site Geology and Hydrogeology: The generalized subsurface profile consists of urban fill overlying sand, with bedrock at depths between 40 and 70 feet below grade (ft-bg). The fill consisted of brown and grey, coarse to fine sand, some silt, gravel and brick fragments. Fill thickness ranged from about four to twelve feet. The thickness of the lower coarse to fine sand and gravelly sand ranges from 31 to 47 feet. The upper medium to fine sand extends typically to depths of about 20 ft-bg. Bedrock was encountered below the sand and consists of moderately fractured, medium-hard mica schist and moderately fractured, hard pegmatite. Bedrock was found at depths ranging from about 21 to 77 ft-bg. Bedrock is shallowest at the east end of the Site and slopes downward to the west toward the Hudson River. The net groundwater flow is to the west, toward the Hudson River. Depth to groundwater is 10 to 14 ft-bgs. "

Env Problem: "Nature and Extent of Contamination Prior to Remediation: Soil - Based on the investigations conducted at the site, the primary contaminants of concern were related to the past uses of petroleum, and to historic fill which was present across the entire site. The site soils were contaminated with volatile organic compounds (VOCs) related to petroleum (benzene, toluene, ethylbenzene, xylene, naphthalene) and, to a much lesser degree with chlorinated solvents (e.g. tetrachloroethene). Contaminants also included semi-volatile organic compounds of petroleum origin. Exceedances of applicable standards, criteria and guidance for soil were identified. Groundwater - Petroleum-related volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOCs) were present at elevated levels of concentration in groundwater throughout the Site. Concentrations of VOCs above Class GA Standards included chloroform, BTEX compounds and methyl-tert butyl ether (MTBE). SVOCs were prevalent at concentrations above NYSDEC regulatory levels in the groundwater in the southern and western portions of the Site and included dibenzofuran, 2-methylnaphthalene and naphthalene. The VOCs and SVOCs appear to be related to the prior use of the Site for vehicle fueling and repair. Iron, magnesium, manganese and sodium, common earth minerals, were detected in concentrations exceeding groundwater standards in all of the filtered groundwater samples. Soil Vapor - During the remedial investigation, VOCs were detected across the Site in subsurface soil gas samples, as well as in the one ambient air sample. The highest concentration of VOCs was found at soil gas sample location FLS-4, collected at soil boring FLS-4. PID readings in boring FLS-4 peaked at 1,684 parts per million (ppm) at a depth of 16 ft-bg. Post Remediation: Remediation at the Site is complete. Prior to remediation, the primary contaminants of concern were petroleum related VOCs in soil and groundwater. Remedial actions have successfully achieved the site specific soil cleanup objectives. Residual contamination in the soil, groundwater and sub-slab vapor are being managed under a Site Management Plan. As part of the remediation, the petroleum contaminated soil and the historic fill was excavated from OU-1 and disposed of at regulated facilities. Groundwater was treated on site, and the clean effluent was discharged to the New York City sewer under a permit. The contaminated soil and groundwater in OU-2 were remediated through injection of ORC (Oxygen Release Compound) into the underlying groundwater and subsoil. The top one foot of soil in OU-2 was removed through excavation. A Track 4 cleanup was achieved for the site. Engineering and Institutional Controls have been instituted to manage the residual contamination. These controls have been memorialized in the Environmental Easement that has been recorded in the New York County Clerk's office. The Certificate of Completion was issued on October 6, 2008. "

Health Problem: "Public water is provided to the area, thereby preventing exposures to groundwater. The remedial action work plan for the site calls for the removal of contaminated soil from the site prior to construction of a residential building on-site. Soil gas is contaminated by chlorinated solvents that are likely due to an off-site source. The site owner will include measures in the building construction to prevent soil vapor migration into the building."

Date Record Added: 10/15/2008  
Date Rec Updated: 12/31/2021  
Updated By: SNBOLLER  
Site Description: "Location: The Site is located in an urban area of New York County (Manhattan) on the east side of 10th Avenue between W. 16th and W. 17th Streets (the site does not include the building on the southeast corner of 10th Ave. and W. 17th St.). Site Features: The former site features include several buildings and a paved parking lot. The site buildings were unused and were demolished. Past Uses: The most recent uses of the Site include a warehouse for electrical construction equipment; an electrical contractor area; a vehicle garage and outdoor parking area; an outdoor garden supplies store; a restaurant; auto body shop; and classroom space for a theater company. Prior uses include various freight and automobile uses, with underground fuel storage tanks, and unspecified manufacturing. Surrounding uses include multi-story residential buildings with and without lower-level commercial uses, parking, and playgrounds. The High Line , an elevated rail line which was used in the past for freight and is now unused, is to the west of and partially over the western end of the site (with aerial easement). An investigation pertaining to the removal of underground storage tanks occurred in the early 1990's. A Phase I and limited Phase II Environmental Site Assessment was performed in 2004. Operable Units: For remedial purposes, the site was divided into two Operable Units (OUs). An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. Operable Unit 1 (OU1) is the eastern portion of the site which is fully occupied by the new residential building. Operable Unit 2 (OU2) is the High Line area that extends along 10th Avenue and the western portion of 16th Street. Site Geology and Hydrogeology: The generalized subsurface profile consists of urban fill overlying sand, with bedrock at depths between 40 and 70 feet below grade (ft-bg). The fill consisted of brown and grey, coarse to fine sand, some silt, gravel and brick fragments. Fill thickness ranged from about four to twelve feet. The

Env Problem:

thickness of the lower coarse to fine sand and gravelly sand ranges from 31 to 47 feet. The upper medium to fine sand extends typically to depths of about 20 ft-bg. Bedrock was encountered below the sand and consists of moderately fractured, medium-hard mica schist and moderately fractured, hard pegmatite. Bedrock was found at depths ranging from about 21 to 77 ft-bg. Bedrock is shallowest at the east end of the Site and slopes downward to the west toward the Hudson River. The net groundwater flow is to the west, toward the Hudson River. Depth to groundwater is 10 to 14 ft-bgs. "

"Nature and Extent of Contamination Prior to Remediation: Soil - Based on the investigations conducted at the site, the primary contaminants of concern were related to the past uses of petroleum, and to historic fill which was present across the entire site. The site soils were contaminated with volatile organic compounds (VOCs) related to petroleum (benzene, toluene, ethylbenzene, xylene, naphthalene) and, to a much lesser degree with chlorinated solvents (e.g. tetrachloroethene). Contaminants also included semi-volatile organic compounds of petroleum origin. Exceedances of applicable standards, criteria and guidance for soil were identified. Groundwater - Petroleum-related volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOCs) were present at elevated levels of concentration in groundwater throughout the Site. Concentrations of VOCs above Class GA Standards included chloroform, BTEX compounds and methyl-tert butyl ether (MTBE). SVOCs were prevalent at concentrations above NYSDEC regulatory levels in the groundwater in the southern and western portions of the Site and included dibenzofuran, 2-methylnaphthalene and naphthalene. The VOCs and SVOCs appear to be related to the prior use of the Site for vehicle fueling and repair. Iron, magnesium, manganese and sodium, common earth minerals, were detected in concentrations exceeding groundwater standards in all of the filtered groundwater samples. Soil Vapor - During the remedial investigation, VOCs were detected across the Site in subsurface soil gas samples, as well as in the one ambient air sample. The highest concentration of VOCs was found at soil gas sample location FLS-4, collected at soil boring FLS-4. PID readings in boring FLS-4 peaked at 1,684 parts per million (ppm) at a depth of 16 ft-bg. Post Remediation: Remediation at the Site is complete. Prior to remediation, the primary contaminants of concern were petroleum related VOCs in soil and groundwater. Remedial actions have successfully achieved the site specific soil cleanup objectives. Residual contamination in the soil, groundwater and sub-slab vapor are being managed under a Site Management Plan. As part of the remediation, the petroleum contaminated soil and the historic fill was excavated from OU-1 and disposed of at regulated facilities. Groundwater was treated on site, and the clean effluent was discharged to the New York City sewer under a permit. The contaminated soil and groundwater in OU-2 were remediated through injection of ORC (Oxygen Release Compound) into the underlying groundwater and subsoil. The top one foot of soil in OU-2 was removed through excavation. A Track 4 cleanup was achieved for the site. Engineering and Institutional Controls have been instituted to manage the residual contamination. These controls have been memorialized in the Environmental Easement that has been recorded in the New York County Clerk's office. The Certificate of Completion was issued on October 6, 2008. "

Health Problem:

"Public water is provided to the area, thereby preventing exposures to groundwater. The remedial action work plan for the site calls for

**WEST 17TH STREET AND 10TH AVENUE (Continued)**

**S109321176**

Site Code: 59118

Site Description: "Location: The Site is located in an urban area of New York County (Manhattan) on the east side of 10th Avenue between W. 16th and W. 17th Streets (the site does not include the building on the southeast corner of 10th Ave. and W. 17th St.). Site Features: The former site features include several buildings and a paved parking lot. The site buildings were unused and were demolished. Past Uses: The most recent uses of the Site include a warehouse for electrical construction equipment; an electrical contractor area; a vehicle garage and outdoor parking area; an outdoor garden supplies store; a restaurant; auto body shop; and classroom space for a theater company. Prior uses include various freight and automobile uses, with underground fuel storage tanks, and unspecified manufacturing. Surrounding uses include multi-story residential buildings with and without lower-level commercial uses, parking, and playgrounds. The High Line, an elevated rail line which was used in the past for freight and is now unused, is to the west of and partially over the western end of the site (with aerial easement). An investigation pertaining to the removal of underground storage tanks occurred in the early 1990's. A Phase I and limited Phase II Environmental Site Assessment was performed in 2004. Operable Units: For remedial purposes, the site was divided into two Operable Units (OUs). An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. Operable Unit 1 (OU1) is the eastern portion of the site which is fully occupied by the new residential building. Operable Unit 2 (OU2) is the High Line area that extends along 10th Avenue and the western portion of 16th Street. Site Geology and Hydrogeology: The generalized subsurface profile consists of urban fill overlying sand, with bedrock at depths between 40 and 70 feet below grade (ft-bg). The fill consisted of brown and grey, coarse to fine sand, some silt, gravel and brick fragments. Fill thickness ranged from about four to twelve feet. The thickness of the lower coarse to fine sand and gravelly sand ranges from 31 to 47 feet. The upper medium to fine sand extends typically to depths of about 20 ft-bg. Bedrock was encountered below the sand and consists of moderately fractured, medium-hard mica schist and moderately fractured, hard pegmatite. Bedrock was found at depths ranging from about 21 to 77 ft-bg. Bedrock is shallowest at the east end of the Site and slopes downward to the west toward the Hudson River. The net groundwater flow is to the west, toward the Hudson River. Depth to groundwater is 10 to 14 ft-bgs. "

Env Problem: "Nature and Extent of Contamination Prior to Remediation: Soil - Based on the investigations conducted at the site, the primary contaminants of concern were related to the past uses of petroleum, and to historic fill which was present across the entire site. The site soils were contaminated with volatile organic compounds (VOCs) related to petroleum (benzene, toluene, ethylbenzene, xylene, naphthalene) and, to a much lesser degree with chlorinated solvents (e.g. tetrachloroethene). Contaminants also included semi-volatile organic compounds of petroleum origin. Exceedances of applicable standards, criteria and guidance for soil were identified. Groundwater - Petroleum-related volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOCs) were present at elevated levels of concentration in groundwater throughout the Site. Concentrations of VOCs above Class GA Standards included chloroform,

BTEX compounds and methyl-tert butyl ether (MTBE). SVOCs were prevalent at concentrations above NYSDEC regulatory levels in the groundwater in the southern and western portions of the Site and included dibenzofuran, 2-methylnaphthalene and naphthalene. The VOCs and SVOCs appear to be related to the prior use of the Site for vehicle fueling and repair. Iron, magnesium, manganese and sodium, common earth minerals, were detected in concentrations exceeding groundwater standards in all of the filtered groundwater samples. Soil Vapor - During the remedial investigation, VOCs were detected across the Site in subsurface soil gas samples, as well as in the one ambient air sample. The highest concentration of VOCs was found at soil gas sample location FLS-4, collected at soil boring FLS-4. PID readings in boring FLS-4 peaked at 1,684 parts per million (ppm) at a depth of 16 ft-bg. Post Remediation: Remediation at the Site is complete. Prior to remediation, the primary contaminants of concern were petroleum related VOCs in soil and groundwater. Remedial actions have successfully achieved the site specific soil cleanup objectives. Residual contamination in the soil, groundwater and sub-slab vapor are being managed under a Site Management Plan. As part of the remediation, the petroleum contaminated soil and the historic fill was excavated from OU-1 and disposed of at regulated facilities. Groundwater was treated on site, and the clean effluent was discharged to the New York City sewer under a permit. The contaminated soil and groundwater in OU-2 were remediated through injection of ORC (Oxygen Release Compound) into the underlying groundwater and subsoil. The top one foot of soil in OU-2 was removed through excavation. A Track 4 cleanup was achieved for the site. Engineering and Institutional Controls have been instituted to manage the residual contamination. These controls have been memorialized in the Environmental Easement that has been recorded in the New York County Clerk's office. The Certificate of Completion was issued on October 6, 2008. "

Health Problem: "Public water is provided to the area, thereby preventing exposures to groundwater. The remedial action work plan for the site calls for the removal of contaminated soil from the site prior to construction of a residential building on-site. Soil gas is contaminated by chlorinated solvents that are likely due to an off-site source. The site owner will include measures in the building construction to prevent soil vapor migration into the building."

City,State,Zip: MANHATTAN, NY 10011  
Program: BCP  
Site Code: 59118  
Acres: 1.213  
HW Code: C231040  
SWIS: 3101  
Town: New York City  
Record Added Date: 09/07/2004  
Record Updated Date: 10/29/2018  
Update By: JHOCONNE  
Site Description: "Location: The Site is located in an urban area of New York County (Manhattan) on the east side of 10th Avenue between W. 16th and W. 17th Streets (the site does not include the building on the southeast corner of 10th Ave. and W. 17th St.). Site Features: The former site features include several buildings and a paved parking lot. The site buildings were unused and were demolished. Past Uses: The most recent uses of the Site include a warehouse for electrical construction equipment; an electrical contractor area; a vehicle garage and outdoor parking area; an outdoor garden supplies store; a restaurant; auto body shop; and classroom space for a theater company. Prior uses include various freight and automobile uses, with underground fuel storage tanks, and unspecified manufacturing. Surrounding uses include multi-story residential buildings with and without lower-level commercial uses, parking, and playgrounds. The High Line , an elevated rail line which was used in the past for freight and is now unused, is to the west of and partially over the western end of the site (with aerial easement). An investigation pertaining to the removal of underground storage tanks occurred in the early 1990's. A Phase I and limited Phase II Environmental Site Assessment was performed in 2004. Operable Units: For remedial purposes, the site was divided into two Operable Units (OUs). An operable unit represents a portion of a remedial program for a site that for

Env Problem:

technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. Operable Unit 1 (OU1) is the eastern portion of the site which is fully occupied by the new residential building. Operable Unit 2 (OU2) is the High Line area that extends along 10th Avenue and the western portion of 16th Street. Site Geology and Hydrogeology: The generalized subsurface profile consists of urban fill overlying sand, with bedrock at depths between 40 and 70 feet below grade (ft-bg). The fill consisted of brown and grey, coarse to fine sand, some silt, gravel and brick fragments. Fill thickness ranged from about four to twelve feet. The thickness of the lower coarse to fine sand and gravelly sand ranges from 31 to 47 feet. The upper medium to fine sand extends typically to depths of about 20 ft-bg. Bedrock was encountered below the sand and consists of moderately fractured, medium-hard mica schist and moderately fractured, hard pegmatite. Bedrock was found at depths ranging from about 21 to 77 ft-bg. Bedrock is shallowest at the east end of the Site and slopes downward to the west toward the Hudson River. The net groundwater flow is to the west, toward the Hudson River. Depth to groundwater is 10 to 14 ft-bgs. "

"Nature and Extent of Contamination Prior to Remediation: Soil - Based on the investigations conducted at the site, the primary contaminants of concern were related to the past uses of petroleum, and to historic fill which was present across the entire site. The site soils were contaminated with volatile organic compounds (VOCs) related to petroleum (benzene, toluene, ethylbenzene, xylene, naphthalene) and, to a much lesser degree with chlorinated solvents (e.g. tetrachloroethene). Contaminants also included semi-volatile organic compounds of petroleum origin. Exceedances of applicable standards, criteria and guidance for soil were identified. Groundwater - Petroleum-related volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOCs) were present at elevated levels of concentration in groundwater throughout the Site. Concentrations of VOCs above Class GA Standards included chloroform, BTEX compounds and methyl-tert butyl ether (MTBE). SVOCs were prevalent at concentrations above NYSDEC regulatory levels in the groundwater in the southern and western portions of the Site and included dibenzofuran, 2-methylnaphthalene and naphthalene. The VOCs and SVOCs appear to be related to the prior use of the Site for vehicle fueling and repair. Iron, magnesium, manganese and sodium, common earth minerals, were detected in concentrations exceeding groundwater standards in all of the filtered groundwater samples. Soil Vapor - During the remedial investigation, VOCs were detected across the Site in subsurface soil gas samples, as well as in the one ambient air sample. The highest concentration of VOCs was found at soil gas sample location FLS-4, collected at soil boring FLS-4. PID readings in boring FLS-4 peaked at 1,684 parts per million (ppm) at a depth of 16 ft-bg. Post Remediation: Remediation at the Site is complete. Prior to remediation, the primary contaminants of concern were petroleum related VOCs in soil and groundwater. Remedial actions have successfully achieved the site specific soil cleanup objectives. Residual contamination in the soil, groundwater and sub-slab vapor are being managed under a Site Management Plan. As part of the remediation, the petroleum contaminated soil and the historic fill was excavated from OU-1 and disposed of at regulated facilities. Groundwater was treated on site, and the clean effluent was discharged to the New York City sewer under a permit. The

contaminated soil and groundwater in OU-2 were remediated through injection of ORC (Oxygen Release Compound) into the underlying groundwater and subsoil. The top one foot of soil in OU-2 was removed through excavation. A Track 4 cleanup was achieved for the site. Engineering and Institutional Controls have been instituted to manage the residual contamination. These controls have been memorialized in the Environmental Easement that has been recorded in the New York County Clerk's office. The Certificate of Completion was issued on October 6, 2008. "

Health Problem: "Public water is provided to the area, thereby preventing exposures to groundwater. The remedial action work plan for the site calls for the removal of contaminated soil from the site prior to construction of a residential building on-site. Soil gas is contaminated by chlorinated solvents that are likely due to an off-site source. The site owner will include measures in the building construction to prevent soil vapor migration into the building."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead\_DEC Field was KOLLEENY TYREE REMOVED A 550-GALLON STEEL SINGLE-WALLED EMERGENCY GENERATOR DIESEL TANK. SOIL HAD PETROLEUM ODOR AND SHEEN. CONTAMINATED SOIL WAS OVER-EXCAVATED AND STOCKPILED; POST-EXCAVATION SAMPLES WERE TAKEN. J. KOLLEENY OF DEC SPOKE WITH LAURIE JODICE OF TYREE ON 4/12/01; SHE WILL FORWARD COPY OF CLOSURE REPORT WHEN AVAILABLE. ACCORDING TO LJ, MOST CONTAMINATION WAS REMOVED AND THE SOIL LEFT IN THE PIT WAS RELATIVELY CLEAN. THE TANK LOCATION WAS VERY CLOSE TO WHERE O'BRIEN-KREITZBERG IS INSTALLING AN SVE SYSTEM TO REMEDIATE GASOLINE CONTAMINATION. KOLLEENY WILL FOLLOW UP TO ENSURE THAT RESIDUAL CONTAMINATION FROM THE EMERG. GEN. TANK (IF ANY) IS ADDRESSED, EITHER BY THE SVE SYSTEM OR IN SOME OTHER WAY. This spill is referred to spill # 9512583 and is closed today by II (01/10/05)."

Remarks: "WHEN TANK WAS REMOVED THERE WAS AN ODOR OF PETROLEUM. [SEE DEC NOTES.]"

Spiller Address: 2900 FLATBUSH AVENUE  
Spiller Company: 001  
Contact Name: BOB KREUZER  
DEC Memo: "Prior to Sept. 2004 data translation this spill Lead\_DEC Field was KOLLEENY URS did site investigations and initially proposed installing a dual-phase extraction system to address soil and GW contamination. However, site facility had inadequate electrical service to support a high-vacuum DPE system, so in early 2000 they proposed installing an SVE system for soil and ORC injection for dissolved-phase GW contamination. DEC approved plan in May 2000; work begun on SVE system in late 2000. However, when ORC injection wells were installed in Feb. 2001, free product was found in injection wells (under building, which is on pillars). URS performed IRM on wells. SVE system started up in Oct. 2001 and operated until June 2002, when it was shut down due to break in conveyance piping. URS did add'l investigation to delineate free product, and in April 2003 they proposed installing a GW recovery system to address free product and dissolved-phase GW contamination, and expanding SVE system. DEC approved this plan in July 2003. URS submitted a Design Analysis Rpt for remedial plan in Feb. 2004; DEC approved DAR in June 2004. 7/21/05: DEC reviewed Documentation for Letter of Agreement submitted by URS with SVE/Air Stripper Data Sheets and supporting calculations, and issued a letter on 7/21/05 authorizing discharges of treated vapors from the expanded SVE system and treated air stripper off-gas from the groundwater recovery system. - J. Kolleeny 03/14/07: Reviewed System Performance Monitoring Report for October 2006 through January 2007 by URS Corp., dated Feb. 12, 2007. Soil vapor extraction (SVE) and groundwater extraction & treatment (GWET) systems were started up on Oct. 25, 2006. SVE system consists of one horizontal extraction well and two horizontal ventilation trenches; GWET consists of 3 groundwater extraction wells. Franklin Co. is contractor operating/maintaining the systems. Performance monitoring data indicate that contaminants are being extracted from soil and groundwater and the systems should continue to operate. GW monitoring event in June 2006 showed free product in two wells (injection wells IW-6 and IW-12), and dissolved-phase contamination in two wells (IW-10, with 8,843 ppb, and IW-13, with 5,872 ppb total VOCs, resp.). In Jan. 2007 GW event, only two wells were sampled, BW-4 and MW-4, both ND; other wells were dry or inaccessible. Changed spill priority status to P2. - J. Kolleeny On 3/14/07, new gasoline spill was reported (#0613411). Delivery overfill event, 4 ft. of product found in well (extraction well GEW-01, according to Jane Staten of URS), and UST manway was full of gasoline also. Franklin Co., who reported spill, have arranged for vac truck to pump out manway and well. Any residual impacts will be addressed by remedial systems and tracked under this spill number. - J. Kolleeny 07/23/07: Reviewed System Performance Monitoring Report for Feb. thru April '07 by URS, dated 6/8/07 (in eDocs). Report summarizes performance data for on-site SVE and GW treatment systems, plus GW monitoring data. PID monitoring of SVE vapor effluent gave reading of 621 ppm on 4/18/07, corresponding to benzene concentration of 12.4 ppm - above discharge limit in Stip Agreement. System was shut down and carbon was changed out, system re-started on 5/4/07. Vapor effluent sampling of GW system air stripper was in compliance. GW was sampled on Jan. 4, 2007; only two wells in sampling program were sampled, others were either inaccessible or dry. Results showed were ND for two wells sampled, however, this was before result spill 0613411, which report states

**S105054624**

was caused by a break in gasoline fill line; Franklin Co. installed a direct fill on tank, by-passing damaged fill line. Sampling of GW extractions wells in Feb. and March '07 showed big increased in recovered contaminants in March: GEW-1 went from 210 ug/L total VOCs to 30,900 ug/L; GEW-2 went from 20 ug/L to 800 ug/L, and GEW-3 went from 985 ug/L to 32,070 ug/L total VOCs, suggesting impacts from fill line break, and indicating system is recovering elevated levels of contaminants from GW. Report concludes SVE and GWE systems must continue to operate. - J. Kolleeny 08/17/07: Reviewed System Performance Monitoring Report for May-July '07 by URS, dated 8/7/07 (in eDocs). Report notes that benzene concentrations in SVE system effluent have increased, due to recent spill(s) of fresh gasoline from damaged fill line to active UST; even though benzene level has not exceeded discharge limit, as precaution Franklin Co. will change out the vapor phase carbon. Report also notes that due to presence of free product in GW recovery wells, they've had to shut down GWET system so product doesn't foul carbon. I sent email to Afsar Samani of DDC, cc's to Jerry Aliberti of DDC, Jane Staten & Harvey Roberts of URS, stating: I have reviewed System Performance Monitoring Report for May-July 2007, dated August 7, 2007. Report notes that, due to presence of large quantities of free product in on-site groundwater extraction wells (from recent spills related to damaged fill line to active gasoline UST), groundwater extraction and treatment (GWET) system has been shut down. I am concerned that without GWET system operating to exert hydraulic control over local groundwater flow, dissolved-phase groundwater contaminant plume, and perhaps free product as well, may migrate off-site, potentially impacting neighboring property. Therefore, I request that DDC and URS take whatever steps are feasible to expedite recovery of free product at site, so that GWET system can be re-activated as soon as possible. Also, discussed this in email exchange with Jane Staten, who stated: URS is scheduled to visit site with vac truck this coming Tuesday. If we feel effort is successful, we will continue with weekly visits until it is determined they are no longer necessary or effective. - J. Kolleeny 11/19/07: Reviewed URS's System Performance Monitoring Report for August-October 2007, dated 11/12/07 (in eDocs). Report states that GWET system had been shut down because free product was getting into system and causing discharge to sewer to exceed NYCDEP standards, but now they've restarted system just using GEW-2 and GEW-3, since GEW-1 seems to be well that's pulling in product. Report states that benzene vapor discharge from SVE system is in compliance, but effluent had high PID reading on 10/30/07, so they changed out carbon. GW samples were collected from several monitoring, vent & injection wells on 8/2/07, and from GWET wells on 8/31/07; results show high levels of VOCs in several wells, including extraction wells and MW-6. Well gauging consistently shows 3+ feet of product in MW-7, small amts. of product in several other wells. URS is conducting vac truck visits every 2 weeks to recover product. I called Jane Staten of URS and asked why wells MW-3 & MW-5 weren't sampled, she thinks one or both are under an emergency generator; she'll look into it and get back to me. I asked if MW-6 can be used as a GW extraction well; she said it's only a 1-inch diameter well because it was installed by Geoprobe, under elevated part of building. I asked if spill buster pump could be installed in MW-7, she said she would look into it. Also asked if URS field personnel could check sump on top of new UST to see if it's still collecting product during fuel deliveries, Jane said she'd ask them to check. - J. Kolleeny 12/26/07: On 12/19/07,

sent email to Jane Staten of URS asking if their field personnel had checked tank top sump for presence of product; on 12/26/07 Jane replied: Our field technician checked tank sumps at Midtown South on 11/29/07. One sump was dry and other contained a little water. There was no evidence of gasoline. Based on this, I closed spill case 0705553. - J. Kolleeny 03/20/08: Reviewed System Performance Monitoring Report for Nov. '07 through Jan. '08 by URS, dated 2/8/08 (in eDocs). Report presents O&M data for SVE & GWET systems, concluding that systems are removing elevated levels of contaminants from soil and GW, and will continue operating. Also notes that product levels from spill involving new UST's sump and/or fill port in March '07 (sp. nos. 0705553, 0702185, 0702402) are decreasing, showing effectiveness of GWET and periodic vac truck visits. However, report was submitted prior to new reported spill 0712091 (2/15/08), where large product thicknesses were suddenly and inexplicably observed in well GEW-01 and several monitoring wells, which caused temp. disruption in operation of GWET system, since product was getting into air stripper. (Tracking of that spill is ongoing.) Report states that SVE system was shut down for 2 weeks during monitoring period to change out vapor phase carbon. GW sampling was performed on 11/5/07, but samples were only collected from BW-5, MW-3, MW-4, VW-2 and VW-4; VW-4 had total VOCs of 737 ug/L, up from 44 ug/L in Aug. '07; some wells with hi TVOCs in Aug. weren't sampled in Nov. (like IW-13); plume fig. for Nov. '07 shows free product in GEW-01, MW-7 and MW-8, not clear why MW-6 wasn't sampled (gauging table indicates it had 0.05 ft. of product on 11/15/07, but wasn't gauged on 11/05/07. All product data is made irrelevant by spill 0712091. - J. Kolleeny 03/28/08: Received email from Jane Staten of URS on 3/27/08, with attached table showing well gauging data from 1/17/08 to 3/14/08 (in eDocs). Data show product in GEW-01 has decreased, from 3.18 ft. on 2/25/08 to 0.0 ft. on 3/3/08, to 0/15 ft. on 3/14/08; however, product in MW-6 seems not to be going away, with 3.75 ft. on 3/14/08; MW-7 went from 0.30 ft. on 2/25/08 to 0.07 ft. on 3/3/08 to 0.44 ft. on 3/14/08. Jane also reported that spill buster pump in GEW-01 is operating and URS has instructed contractor to restart GW extraction pumps. - J. Kolleeny 06/11/08: At direction of my supervisor Vadim Brevdo, closed spill 0712091 at this site (for free product [gasoline] detected in GW extraction well and monitoring wells) to consolidate with this spill (9512583), under which remediation of subsurface petroleum contamination at this site is being tracked. See Caller Remarks, DEC Remarks and documents in eDocs in spill no. 0712091 for further info about that spill and response actions. - J. Kolleeny 09/11/08: Reviewed System Performance Monitoring Reports for Feb.-April '08 and May-July '08 (both in eDocs). Both reports state that SVE and GWET systems at site are removing elevated levels of contaminants from soil and GW, and that free product thickness msmts continue to decrease, showing effectiveness of GWET system and periodic vac truck visits. Worst wells for free product have been GWE-1, MW-6 and MW-7; as of last gauging event on 7/22/08, GWET had no measurable product, MW-6 had 0.04 ft., and MW-7 had 0.18 ft. As of 7/29/08 GW sampling event, worst wells for dissolved phase contam are GEW-2 with 960 ug/L total VOCs (mostly BTEX) and VW-04 with 936 ug/L total VOCs (mostly MTBE). - J. Kolleeny 01/20/09: Reviewed System Performance Monitoring Report for Aug. - Oct. 2008, dated 12/5/08 (in eDocs). Rpt states that SVE and GWET systems at site are removing elevated levels of contaminants from soil & GW. As of Oct. '08 sampling event, worst dissolved-phase

**S105054624**

well was GEW-1, which had 14,455 ug/L total VOCs (last reporting period, had free product); 2nd worst dissolved-phase in GEW-2, with 634 ug/L total VOCs. Rpt also states that product thickness msmts continue to decrease, showing effectiveness of GWET system and vac truck visits, but data do not support this. Six wells had free product in Oct. '08, with worst wells being MW-6 and MW-7; those wells started August with almost no product (0.04 ft. and 0.13 ft., resp.) but on 8/29/08 jumped up to 1.96 ft. and 1.06 ft., resp., and stayed around these thicknesses for rest of reporting period, ending with 1.96 ft. and 1.44 ft., resp., on 10/20/08. Rpt states that URS visited site 8 times during period to recover free product with peristaltic pump, recovering about 12.5 gallons of product. I sent email to Jane Staten of URS: I've been looking through Midtown South monitoring report for Aug.-Oct. '08 (dated 12/5/08), and noticed that Table 9 - GW Elevation/Product Thickness Measurements seems to show significant rebound of product thicknesses in MW-6 and MW-7 starting on 8/29/08. Do you have any thoughts or ideas about what could have caused this? Were thicknesses in these two wells steadily decreasing before this reporting period, or do these appear to be typical fluctuations for these wells? Also, have we already discussed why URS is using peristaltic pump to recover product rather than vac truck - is it primarily for cost considerations, or does it have to do with recharge rates for wells or something along those lines? - J. Kolleeny 01/22/09: Received email from Jane Staten of URS responding to my email of 1/20/09: Based on water/product levels we have recorded, product thickness appears to be affected by water levels, i.e., lower the water, greater the product thickness. We are using peristaltic pump for couple of reasons. First, there is access problem at site. Vac truck is too big to use driveway so it sits on street and hose runs up driveway. According to our field personnel, it is difficult for truck to find spot to 'sit' and when hose runs up driveway, it causes police grief because they have to drive around it. Second, wells are only 1-inch in diameter. Vac truck uses small hose which is lowered into well and well is almost immediately evacuated. Same process occurs with peristaltic pump, i.e., small tube is lowered into well and well is evacuated, so vac truck really provides no advantages. Cost was not a consideration. - JK 03/24/09: Reviewed System Perf Monitoring Rpt for Nov.'08 - Jan.'09 by URS, dated 3/4/09 (in eDocs). Rpt states that effluent of GWET system exceeded NYCDEP limits for discharge to sanitary sewer, system was shut down. Franklin Co. will install liquid-phase carbon unit to polish GW prior to discharge to sewer, sometime in 2nd Quarter '09. Rpt further states that GW and SVE systems removed elevated contam concentrations from soil and GW, and that approx. 6 gals of product was recovered from 5 on-site wells using peristaltic pump. GW samples were collected from wells VW-04, GEW-01, GEW-02 and GEW-03 on Jan. 5, '09; remaining wells were not sampled because they were dry or exhibited free product or had an obstruction. Of wells sampled, worst contam was in GEW-01 with 17,140 ug/L total VOCs (up from 14,455 ug/L in Oct.'08) and GEW-03 with 12,244 ug/L total VOCs (had free product in Oct.'08). Free product thickness continued to increase in MW-7, with 2.73 ft. on 1/5/09 and 2.64 ft. on 1/6/09. - JK 08/11/09: Reviewed Syst Perf Mon Rpt for Feb.-April '09 by URS, dated 5/27/09 (in eDocs). Rpt states GWET system was shut down during rpt period due to effluent exceeding NYCDEP discharge stds; rpt says Franklin Co. has installed activated carbon units to polish GW prior to discharge, and GWET system will be re-started in June '09. SVE system operated

**S105054624**

without interruption during rpt period, removing elevated contam concentrations from vadose zone. Approx. 7 gals of free product were recovered via peristaltic pump. GW samples were collected from 14 wells in April '09; hottest wells were GEW-1 with 24,980 ug/L total VOCs, MW-8 with 24,454 ug/L TVOCs, GEW-3 with 7,735 ug/L TVOCs, and IW-15 with 3,334 ug/L TVOCs. Free product thickness fluctuated ranging from 0 to 0.56 ft in MW-06, from 0.91 to 3.53 ft in MW-07, and from 0.01 to 0.68 ft in MW-09. Four other wells showed traces of product. - JK 12/16/09: Reviewed Syst Perf Mon Rpt for May-July '09 by URS, dated 9/9/09 (in eDocs). Rpt states GWET system was re-started on 6/3/09 and removed elevated levels of contaminants. SVE system operated without interruption during rpt period, but removed fewer contaminants from vadose zone during this rpt period. URS attributes this to construction activities related to removal/replacement of 4,000-gal gasoline UST. System's vapor discharge was in compliance. Approx. 5 gals of free product were recovered via peristaltic pump. GW sample was collected from GWET-1 on 7/9/09, result showed 151 ug/L total VOCs; other wells either had product or were obstructed by construction activities, so were not sampled. Wells MW-6 and MW-7 had most free product, averaging 0.28 ft and 0.69 ft, resp. during rpt period. - J. Kolleeny 12/17/09: Reviewed Syst Perf Mon Rpt for Aug.-Oct.'09 by URS, dated 11/24/09 (in eDocs). Rpt states SVE system operated throughout rpt period, removing more contaminants from vadose zone since construction activities associated with removal/replacement of 4k gasoline UST were completed. Vapor discharge was in compliance. GWET system removed elevated contam levels during this rpt period. Approx. 3 gals of free product were recovered via peristaltic pump from wells MW-7 and MW-9; overall product levels seem to be decreasing. GW samples were collected from 3 wells on 10/19/09; other wells either had product or were dry, so were not sampled. Well MW-6 had 38,573 ug/L total VOCs, and IW-15 had 25,628 ug/L TVOCs. - J. Kolleeny 04/13/10: Reviewed Syst Perf Mon Rpt for Nov.'09 - Jan.'10 by URS, dated 3/3/10 (in eDocs). Rpt states SVE and GWET systems operated throughout rpt period, removing contaminants from subsurface and GW. Vapor discharges were in compliance. GWET system removed elevated contam levels during this rpt period. Approx. 2.4 gals of free product were recovered by peristaltic pump from wells MW-7 and MW-9; MW-7 had 0.19 ft of product on 1/6/10 and 0.22 ft product on 1/19/10. Influent to GWET system from 3 extraction wells was sampled on Nov. 4 & Dec. 2, 2009 and on Jan. 16, 2010: GEW-01 had total VOCs of 8,946 ug/L, 5,537 ug/L and 54,490 ug/L, resp; GEW-02 had tVOCs of 130 ug/L, 122 ug/L and 1,530 ug/L, resp.; and GEW-03 had 7,263 ug/L, 5,710 ug/L and 2,729 ug/L, resp. GW sample taken from IW-15 on 1/6/10 had 12,885 ug/L tVOCs (down from 25,628 ug/L in Oct.'09) and sample from MW-6 had 29,410 ug/L tVOCs (down from 38,645 ug/L in Oct.'09). Other wells either had product or were dry, so weren't sampled. - JK 09/23/10: Reviewed Syst Perf Mon Rpt for Feb.-April 2010 by URS, dated 6/23/10 (in eDocs). Rpt states that SVE system operated throughout rpt period; GWET system was off briefly on two occasions but restarted immediately during maintenance visits. Both systems removed elevated levels of VOCs from subsurface, and vapor discharges were in compliance. Well gauging showed only traces of product (0.01 ft) in wells GEW-01 and GEW-03; no measurable product was collected by system. GW samples collected in April 2010 showed decreases in extraction wells vs. Jan. 2010 event (tho still elevated, in 1,000-2,000 ug/L total VOC range), but 2 mon wells that haven't been

sampled in a while had high levels of VOCs: MW-6 had 9,051 ug/L tVOCs, MW-8 had 5,731 ug/L tVOCs. System operation and GW Mon will continue. - J. Kolleeny 01/10/11: Reviewed Syst Perf Mon Rpt for May-July 2010 by URS, dated 9/1/10 (in eDocs). Rpt states that on-site GWET & SVE systems are continuing to remove contaminants from subsurface; treated water and vapor discharges were in compliance with stds. Well MW-07 saw rebound in free product thickness, with 0.94 ft on 6/10/10 and 0.32 ft on 7/26/10; well MW-09 had trace of product in early May 2010, no product detected in June or July. About 2 gals of free product were removed from wells MW-07 and MW-09 using a peristaltic pump. GW sampling on 8/10/10 showed worst dissolved contam in well MW-06, which had 46,126 ug/L total VOCs (up from 9,051 ug/L in April 2010, extraction well GEW-1, which had 4,168.5 ug/L tVOCs (up from 1,634 ug/L in April 2010), and extraction well GEW-3, which had 1,399 ug/L tVOCs (down from 1,533 ug/L in April 2010); well MW-08 was obstructed and was not sampled. System operation and GW monitoring will continue. - J. Kolleeny 05/30/11: Reviewed Syst Perf Mon Rpt for August-October 2010 by URS, dated 2/16/11 (in eDocs). Rpt states that on-site GWET & SVE systems are continuing to remove contaminants from subsurface; treated water and vapor discharges were in compliance with stds. Rpt also states that URS is implementing several system modifications to improve performance, including conversion of existing horizontal ventilation well (VW-10 thru VW-13) to also function as an extraction well, and conversion of existing extraction well SVE-01A to also function as a ventilation well, to allow for increased flexibility in configuring system to extract from one or both sides of contaminated area. Well MW-07 had less free product during August & September, but rebounded to 1.63 ft on 10/21/10; well MW-09 had no measurable product during most of monitoring period but had 0.01 ft on 10/21/10. About 1.5 gals of free product were removed from wells MW-07 and MW-09 using a peristaltic pump. GW sampling on 10/21/10 showed worst contam in well MW-06 with 23,516 ug/L total VOCs (down from 46,126 ug/L in Aug. 2010) and well MW-08 with 2,677 ug/L tVOCs (was not sampled in Aug. 2010, but had 5,731 ug/L in April 2010); extraction wells GEW-1 had 870 ug/L tVOCs (down from 4,169 ug/L in Aug. 2010) and GEW-3 had 329 ug/L tVOCs (down from 1,399 ug/L in Aug. 2010). System operation and GW monitoring will continue. - J. Kolleeny 08/25/11: Reviewed Syst Perf Mon Rpt for November 2010 thru January 2011 by URS, dated 6/18/11 (in eDocs). Rpt states that on-site GWET & SVE systems are continuing to remove contaminants from subsurface, and that URS has completed several system modifications to improve contaminant recovery and system operation. Treated GW and recovered soil vapor discharges were in compliance with stds. Only well MW-07 had measurable free product, with 1.62 ft on 1/5/11 and 0.12 ft on 1/19/11; approx 1.5 gals of product were removed by peristaltic pump. GW sampling on 1/5/11 showed worst wells were MW-06 with 23,062 ug/L total VOCs (down a little from 23,516 ug/L in Oct. 2010), MW-8 with 5,083 ug/L tVOCs (up from 2,677 ug/L in Oct. 2010) and IW-10 with 3,368 ug/L tVOCs (was not sampled in Oct. 2010). System operation and GW monitoring will continue. - J. Kolleeny 12/02/11: Reviewed Syst Perf Mon Rpt for Feb.-April 2011 by URS, dated 9/7/11 (in eDocs). Rpt states that on-site GWET & SVE systems are continuing to remove contaminants from subsurface; treated GW and recovered vapor discharges were in compliance with stds. Only well MW-07 had measurable LNAPL, with 0.60 ft on 4/4/11 and 0.21 ft on 4/27/11; approx 1.75 gals of product were removed by peristaltic pump. GW sampling on 4/4/11 showed decreases

in contam in worst wells: MW-06 had 9,198 ug/L total VOCs (down from 23,062 ug/L in Jan. 2011), MW-8 had 2,923 ug/L tVOCs (down from 5,083 ug/L in Jan. 2011); however, GEW-1 had 1,591 ug/L tVOCs (was not sampled in Jan. 2011 but had 870 ug/L in Oct. 2010). Rpt includes tank inventory / comparison with DEC PBS records; these show that four 550-gal gasoline USTs were removed in mid-1990s or earlier, but location of these USTs is unknown. URS will continue to evaluate UST history and how it may have impacted on-site soil & GW. System operation and GW mon will continue. - JK 03/14/12: Reviewed Syst Perf Mon Rpt for 3rd Quarter 2011 by URS, dated 12/20/11 (in eDocs). Rpt states that on-site GWET & SVE systems continue to remove contam from subsurface. Only well had measurable LNAPL, but levels increased, with 0.78 ft on 6/6/11 and 0.65 ft on 7/18/11; approx 1.5 gals of product were removed by peristaltic pump. GW sampling on 7/18/12 showed worst contam in MW-6 with 12,569 ug/L total VOCs (up from 9,198 ug/L in April 2011), and MW-8 with 3,513 ug/L tVOCs (up from 2,923 ug/L in April 2012); well GEW-1 had 107 ug/L tVOCs, down significantly from 1,591 ug/L in April 2011. Rpt includes tank inventory and states that URS will continue to evaluate UST history and how it may have impacted on-site soil & GW. System operation and GW mon will continue. - J. Kolleeny 07/06/12: Received email from Kevin Shanahan of URS Corp: Jon, Next week we will be sending you/posting a rpt for Midtown South site which contains a work plan to collect soil samples at site. Purpose of soil sampling is to determine if SVE system was successful in remediating unsaturated soil. When you review rpt you may want to look at photo DSC05412 (attached) [in eDocs image folder as UST\_AreaAfterBackfilling] to better understand limitations with drilling near new tank system. We are calling for 12 boring locations beneath building and one south of tank (foreground). - J. Kolleeny 07/12/12: Reviewed Syst Perf Mon Rpt for 4th Quarter 2011 by URS, dated 3/22/12 (in eDocs). Rpt states that treated GW and recovered soil vapor discharges were in compliance with stds. Free product was detected in well MW-7 at thicknesses ranging from 0.15 ft to 0.24 ft, and on one occasion in well MW-9 at 0.01 ft; approx 1.25 gals of product were removed by peristaltic pump. GW sampling on 10/10/11 showed worst contam in MW-6 with 7,294 ug/L total VOCs (down from 12,569 ug/L in July 2011), and MW-8 with 3,822 ug/L tVOCs (up a little from 3,513 ug/L in July 2011); injection well IW-15 had 932 ug/L tVOCs (had not been sampled since Jan. 2011, when it had 156 ug/L tVOCs), and GEW-1 had 114 ug/L tVOCs (up slightly from 107 ug/L in July 2011). Rpt includes UST inventory, states that URS will continue to evaluate UST history and how it may have impacted on-site soil & GW. System operation & GW mon will continue. Rpt seems to be missing several data tables (e.g., GW data table, well gauging data table). I sent email to Kevin Shanahan of URS requesting that rpt be re-issued with missing tables. - JK 07/17/12: Received email from Leng Ung of URS with attached pdf of revised 4th Quarter 2011 system performance monitoring rpt, with all data tables included (in eDocs). - J. Kolleeny 07/17/12: Reviewed Syst Perf Mon Rpt - 1st Quarter 2012 by URS, dated 7/11/12 (in eDocs). Rpt states that vapor and water discharges from SVE and GWET systems were in compliance with discharge limits. Free product was detected in one well, MW-7, at thicknesses up to 0.36 ft; 1.25 gals of product were recovered by peristaltic pump. GW sampling on 1/9/12 showed worst dissolved contam in wells MW-6, with 7,160 ug/L total VOCs (down a little from 7,294 ug/L in Oct. 2011) and MW-8, with 2,060 ug/L tVOCs (down from 3,822 ug/L in Oct. 2011). Rpt states that

URS will continue to operate SVE and GWET systems, but that systems are starting to show reduced benefit, with contam concentrations in recovered media reaching asymptotic conditions. Based on low vapor recovery by SVE system, URS recommends collecting confirmation soil samples from treatment area to determine if further soil remediation is needed. Rpt includes work plan for confirmation soil borings, proposing 13 borings laid out in a grid. I contacted Kevin Shanahan of URS and asked that work plan be revised to include historical soil data and that boring locations be modified to target specific areas where soil contam was detected in past; asked that confirmation soil boring work plan be revised and re-submitted as brief, separate document (rather than revising and re-submitting as part of 1st quarter 2012 monitoring rpt). He agreed to revise and re-submit work plan as requested. - JK 08/06/12: On 8/3/12, received revised Proposed Work Plan for Confirmation Soil Sampling by URS, dated 7/31/12 (in eDocs). Plan proposes 7 soil borings in area of known vadose zone soil impacts, to evaluate remedial progress by SVE system and need for continued operation of SVE system. I sent letter (in eDocs) to Afsar Samani of DDC, cc's to Mehrzad Asbagh of DDC, Kevin Shanahan & Harvey Roberts of URS, approving plan but requesting two add'l soil borings and drilling of one proposed boring as close as possible to former boring SB-10. - J. Kolleeny 09/10/12: Reviewed System Performance Monitoring Rpt - 2nd Quarter 2012 by URS, dated 8/30/12 (in eDocs). Rpt states that SVE and GWET systems operated continuously thru quarter, and that vapor & water discharges from SVE and GWET systems were in compliance with discharge limits. Free product was detected in well MW-7, at thicknesses up to 0.34 ft; 1.5 gals of product were recovered by peristaltic pump. GW sampling on 4/23/12 showed MW-6 had 6,835 ug/L total VOCs (down from 7,160 ug/L in Jan. 2012), MW-8 had 2,497 ug/L tVOCs (up from 2,060 ug/L in Jan. 2012), GEW-1 had 133 ug/L tVOCs (up from 60 ug/L in Jan. 2012). Rpt concludes that URS will continue to operate remedial systems; however, systems are showing indications of reduced benefit, with concentrations of recovered soil vapors and GW sampling results reaching asymptotic conditions. Rpt notes that DEC approved confirmation soil sampling plan in Aug. 2012 and that sampling is scheduled for 3rd quarter 2012. - J. Kolleeny 06/06/13: Reviewed System Performance Monitoring Rpt - 3rd & 4th Quarters 2012 by URS, dated 1/16/13 (in eDocs). Rpt states that SVE system was found off on arrival on 7/6/12 because the electrical switch had been turned off; system was restarted during same visit; and GWET system was off on arrival on 8/29/12 due to an air stripper alarm; air stripper was cleaned, alarm re-set and system re-started. Vapor discharges from both systems were in compliance with discharge limits. Free product was detected in well MW-7, from 0.05 ft to 0.42 ft; product was recovered with peristaltic pump on 12 visits, URS will continue product recovery at least monthly. GW sampling on 7/16/12 and 10/10/12 showed significant dissolved impacts persist in wells MW-6 and MW-8: MW-6 had 8,675 ug/L total VOCs in July 2012 (up from 6,835 ug/L in April 2012) and increased to 9,795 ug/L in Oct. 2012; MW-8 had 4,007 ug/L tVOCs in July 2012 (up from 2,497 ug/L in April 2012) and increased to 6,944 ug/L in Oct. 2012. Soil sampling in Oct. 2012 showed significant residual vadose zone soil contam in boring S-09 near north end of easternmost horizontal SVE well, with 151,920 ug/kg total VOCs; two other borings had significant contam in saturated zone (S-04 with 218,380 ug/kg tVOCs and S-05 with 194,330 ug/kg tVOCs). Rpt states that URS will investigate whether SVE system can

S105054624

be modified to more effectively target remaining area of soil contam. URS will continue to operate both SVE and GWET systems, and will evaluate options to improve systems' effectiveness; twice monthly product recovery and quarterly GW sampling will continue. - J. Kolleeny 09/25/13: Reviewed System Performance Monitoring Rpt - 1st & 2nd Quarters 2013 by URS, dated 7/17/13 (in eDocs). SVE and GWET systems operated throughout rpt period, and vapor discharges were in compliance with discharge limits. Free product was detected in well MW-7 from 0.04 to 0.6 ft; product was recovered with peristaltic pump on 8 visits. GW sampling on 1/8/13 and 4/3/13 showed MW-6 had 58 ug/L total VOCs in Jan. 2013 (anomalous decrease from 9,795 ug/L in Oct. 2012) and rebounded to 7,156 ug/L in April 2013, while MW-8 had 6,656 ug/L tVOCs in Jan. 2013 (down from 6,944 ug/L in Oct. 2012), and decreased to 1,025 ug/L tVOCs in April 2013. Rpt concludes that soil & GW impacts at site are decreasing but remain high enough to warrant further remedial actions. URS will continue quarterly GW sampling, manual product recovery and operation of SVE & GWET systems, and will continue to evaluate options to improve and/or replace remedial systems to more effectively address remaining areas of contam. - J. Kolleeny 01/30/14: Reviewed System Performance Monitoring Rpt for 3rd & 4th Quarter 2013 by URS, dated 1/17/14, rcvd on 1/28/14. SVE & GWET systems operated throughout rpt period; vapor discharges were in compliance with discharge limits. Well gauging on 8 visits during rpt period showed up to 0.21 ft of LNAPL in well MW-7 and up to 0.04 ft in MW-9; ~1.75 gals of product were recovered from MW-7 and ~1.25 gals were recovered from MW-9, using a peristaltic pump. GW sampling in July 2013 showed well MW-6 had 10,623 ug/L total VOCs (up from 7,156 in April 2013) and well MW-8 had 6,044 ug/L tVOCs (up from 1,025 ug/L in April 2013). GW sampling in Oct. 2013 showed well MW-6 had 4,621 ug/L tVOCs and well MW-8 had 1,708 ug/L tVOCs. Based on persistence of product and high VOC levels at site, rpt makes proposals to better evaluate site conditions and improve effectiveness of on-site remedial systems. Specifically, URS recommends: (1) advance 3 new soil borings to evaluate current soil conditions, (2) over-drill existing monitoring wells MW-6, MW-7, MW-8 and MW-9 (1 diameter wells) and replace with 4 diameter wells for improved product recovery and to allow for future remedial actions (e.g., placement of absorbent or ORC socks, extraction by vac truck, and/or surfactant injections to desorb contaminants from soil), (3) install 5 new 4 diameter mon wells to better delineate areas of product and dissolved contam, (4) install addtl 6 diameter GW extraction well in area of greatest contam, (5) redevelop 3 existing extraction wells to improve GW recovery, and (6) possibly inject surfactants to enhance soil remediation. Based on results of 3 new soil borings, URS may implement proposed modifications to on-site SVE system. Once product in wells MW-7 & MW-9 has been addressed, URS proposes to shut down existing GW extraction wells GEW-1, GEW-2 & GEW-3 and operate only new extraction well GEW-4 to determine its radius of influence; after review of resulting data, addtl extraction wells will be brought on-line. After speaking with Kevin Shanahan of URS about proposals, I sent letter (in eDocs) approving proposals to Afsar Samani of DDC, cc's to Marcy Asbagh of DDC, Kevin Shanahan and Harvey Roberts of URS, noting that before doing any surfactant injections, work plan must be submitted for DEC review/approval. - J. Kolleeny 09/29/14: Reviewed System Performance Mon Rpt for 1st & 2nd Quarter 2014 by URS, dated 6/25/14 (in DecDocs). Rpt states that SVE system vapor discharge and air stripper

**S105054624**

off-gas were in compliance during mon period, based on both PID screening and sample analysis by lab. GW recovery wells GEW-1, GEW-2 & GEW-3 continue to operate and recover GW. In addition, URS visited site 10 times during rpt period to gauge wells and recover LNAPL; well MW-7 had product every visit except 4/23/14, with thicknesses up to 0.21 ft, and they recovered ~2.25 gals during period. Rpt states that, as proposed by URS and approved by DEC, URS will overdrill existing one-inch wells MW-6, MW-7, MW-8 & MW-9 and replace with 4-inch wells, plus they will install five addtl wells in this area to better delineate product plume. GW sampling was performed in January and April 2014. Jan. 2014 results showed well MW-6 had 5,142 ug/L total VOCs (up from 4,621 ug/L in Oct. 2013) and MW-8 had 5,908 ug/L tVOCs (up from 1,708 ug/L in Oct. 2014). April 2014 results showed well MW-6 declined to 4,453 ug/L tVOCs; MW-8 was not sampled due to vehicle parked over well. Operation of SVE and GWET systems, GW sampling and LNAPL recovery will continue at site. - J. Kolleeny 09/30/14: Reviewed Request for Soil Vapor Extraction System Shutdown by URS, dated 9/10/14 (in DecDocs). Rpt notes that monitoring of on-site SVE system s vapor influent indicates that system has reached limit of effectiveness and is no longer recovering measurable quantities of HC vapors. Rpt also notes that soil data indicate system has effectively treated vadose zone soil contamination and that remaining soil impacts at site are located mainly in saturated soil zone, which is not targeted by SVE system. Ergo, URS requests approval to suspend operation of SVE system and prepare system for long-term shutdown. System will remain on-site and URS will evaluate future site data to determine if resuming system operation is warranted. In meantime, other remedial activities at site operation & modification of GWET system, product recovery, GWET system performance monitoring, and quarterly GW sampling will continue. I sent letter (in DecDocs) approving system shutdown to Afzar Samani of DDC, cc's to Merhazad Asbagh of DDC, Kevin Shanahan and Harvey Roberts of URS. - J. Kolleeny 03/12/15: Reviewed System Performance Monitoring Rpt for 3rd & 4th Quarter 2014 by URS, dated 1/9/15 (in DecDocs). Rpt states that operation of on-site SVE system terminated on 10/1/14. As for GWET system, results of PID monitoring of air-stripper vapor effluent were ND during rpt period, and lab analysis of effluent air sample was ND for benzene, so system vapor discharge was in compliance. Sampling of GWET system GW influent showed system is recovering low levels of dissolved VOCs (up to 90 ug/L total VOCs). Well gauging and product recovery were performed 8 times during rpt period; product was detected in well MW-7 each time, with greatest thickness of 0.36 ft; about 2 gals total product recovered. GW sampling was performed in July and Oct. 2014; results showed well MW-6 had 3,234 ug/L tVOCs in July 2014 (down from 4,453 ug/L in April 2014) and increased to 4,406 ug/L tVOCs in Oct. 2014; well MW-8 had 4,264 ug/L tVOCs in July 2014 (not sampled in April 2014; had 5,908 ug/L tVOCs in Jan. 2014) and decreased to 1,046 ug/L tVOCs in Oct. 2014. Rpt states that URS will over-drill existing 1-inch wells MW-6, MW-7, MW-8 & MW-9 and replace with 4-inch wells, and will install 5 addtl mon wells in this area to better delineate LNAPL plume. Also, an addtl GW extraction well will be installed within dissolved-phase plume, existing extraction wells will be re-developed, and URS may apply surfactants to subsurface to enhance soil remediation. Qtrly GW monitoring, GWET system operation and manual product recovery efforts will continue, and URS will evaluate need for surfactant applications or other remedial actions; they will

prepare/submit work plan prior to doing any add'l remedial actions.

- JK 03/12/15: I emailed Kevin Shanahan of AECOM to note that 3rd & 4th quarter 2014 rpt does not include any SVE system monitoring data for 3rd quarter (system was permanently shut down on Oct. 1st, 2014). He sent table with SVE monitoring data for Aug.-Sept. 2014 (July 2014 data were included in System Shutdown Request Letter rpt). Table in DecDocs as brief.

- JK 05/21/15: Reviewed System Performance Monitoring Rpt for First Quarter 2015 by URS, dated 4/10/15 (in DecDocs). Rpt states that URS is planning to add a 4th GW extraction well to GWET system, install add'l monitoring wells, and re-install some wells with larger diameter casings to enhance remediation and monitoring at site. PID screening and lab sampling of GWET system's air stripper vapor effluent showed air discharge is in compliance. Recovery of free product from well MW-7 with peristaltic pump was performed 4 times during quarter, for total of ~1 gal removed; highest product thickness measured was 0.18 ft. During GW sampling in Jan. 2015, well MW-8 was not sampled because access to well was obstructed. Sampling results for 1/13/15 showed well MW-6 had 2,665 ug/L total VOCs (down from 4,406 ug/L in Oct. 2014), well MW-9 had 11,316 ug/L tVOCs (not sampled in April, July or Oct. 2014), and extraction well GEW-1 had 148 ug/L tVOCs (up from 47 ug/L in Oct. 2014). Sampling of influent to GW treatment system on 1/7/15 showed influent from GEW-1 had 165 ug/L tVOCs, GEW-2 had 6 ug/L tVOCs, and GEW-3 had 56 ug/L tVOCs. Rpt states that URS will continue quarterly GW monitoring/sampling, continue manual LNAPL recovery, continue operation of GWET system & proceed with enhancements to system (install'n of new extraction well and re-development of existing extraction wells), proceed with installing new mon wells and replacing several narrow-diameter wells, and continue to evaluate need for surfactant injections or other remedial actions to address residual free product and saturated soil zone contamination.

- J. Kolleeny 07/23/15: Reviewed System Performance Monitoring Rpt for 2nd Quarter 2015 by URS dated 6/2/15 (in DecDocs). Rpt covers period 1/29/15 to 4/29/15 as 2nd qtr 2015. Rpt states that URS plans to add a 4th GW extraction well to GWET system, install add'l monitoring wells, and re-install some wells with larger diameter casings to enhance remediation & monitoring at site. PID screening and lab sampling of GWET system's air stripper vapor effluent showed air discharge is in compliance. LNAPL was removed from well MW-7 3 times during quarter using a peristaltic pump; well had up to 0.32 ft of LNAPL; ~0.75 gals were recovered. GW influent samples from GWET system extraction wells show system is recovering low levels of VOCs. GW sampling in April 2015 showed well MW-6 had 3,445 ug/L total VOCs (up from 2,665 ug/L in Jan. 2015), well MW-8 had 248 ug/L tVOCs (up from 148 ug/L in Jan. 2015), well MW-9 had only 0.8 ug/L tVOCs (down from 11,316 ug/L in Jan. 2015; this well has periodically had LNAPL, most recently in March 2014). URS will continue quarterly GW monitoring & sampling, manual LNAPL recovery, and operation of GWET system (proceeding with system enhancements in 3rd quarter 2015); in addition, URS will proceed with installing new mon wells and replacing several narrow wells, and will continue to evaluate need for surfactant injections or other remedial actions to address residual free product and saturated soil zone contamination.

- J. Kolleeny 10/30/15: Received email from Kevin Shanahan of URS/AECOM: Jon, Envirotrac is performing routine O&M for existing GW pump & treat system. They are also constructing system enhancements over next few months. Today we were informed that GW extraction pump in

**S105054624**

GEW-02 is broken. GEW-02 is lowest producing well at site, is located outside of plume and is being replaced by new extraction well GEW-04 in November. We wanted to make you aware that GW extraction at GEW-02 is no longer happening and that new extraction well should be drilled and functional by end of year. I sent email reply: Kevin, Thanks for letting me know. I agree it doesn't make sense to try to repair or replace pump in GEW-02, considering its location outside plume and its historically low yield. Please continue to keep me posted and let me know when new extraction well GEW-04 has been installed. - J. Kolleeny 11/23/15: During quarterly DDC Consent Order Status Meeting on 11/19/15, Harvey Roberts of URS related that a local citizen had contacted NYPD and URS to complain about noise generated by on-site GW recovery system. URS had modifications made to system, resulting in decrease of ~15 decibels (a significant noise decrease); however, citizen continued to make complaints. Mr. Roberts conducted a test in which he turned off system and asked citizen if there was any difference in noise, citizen said no difference, suggesting system may not be source of noise perceived as bothersome. When Roberts pointed out that system had been off when he had asked for noise evaluation, citizen remained skeptical and continued to maintain that system is source of noise problem. At meeting, I asked if system GW influent contains significant levels of dissolved contaminants. Kevin Shannahan of URS/AECOM responded that VOC levels in system influent are very low. I suggested shutting down GWET system until new recovery well is installed in heart of plume, since system is currently recovering minimal hydrocarbons and shutting it temporarily might resolve noise complaints. URS/AECOM said they would look into shutting down system. On 11/23/15, I received email from Harvey Roberts: Jon, Per your suggestion at last week's Quarterly Status Meeting, URS has instructed Envirotrac, Midtown South Pct remediation system operator, to shut treatment system while they modify system. Envirotrac plans to shut system tomorrow during its regularly scheduled O&M visit. System operation will resume in late Jan. 2016 when modifications have been completed. I sent email reply: Harvey, Thanks for letting me know. I'm assuming that latest GW data show contaminant plume confined to site. If there is a sampling event before system modifications have been completed in Jan. 2016 and GW data show that plume is migrating off site, it may be necessary to re-start system before mods are completed, to re-establish hydraulic control. - JK 12/10/15: Reviewed System Performance Monitoring Rpt for 3rd Quarter 2015 by URS, dated 9/1/15 (in DecDocs). Rpt seems to cover period from 4/29/15 thru 7/29/15 as 3rd qtr of 2015. Rpt states that URS will add a 4th GW extraction well to GWET system, install add'l monitoring wells, reinstall several existing wells with larger diameter casings, and take steps to reduce noise emanating from system. PID screening & lab sampling of system's vapor discharge showed compliance with DEC stds. URS visited site 4 times during rpt period, detecting LNAPL in well MW-7 each time, at thicknesses up to 0.83 ft. ~1 gal of LNAPI was recovered. GW sampling on 7/20/15 showed well MW-6 had 3,178 ug/L total VOCs (down from 3,445 ug/L in April 2015), well MW-8 had 1,665 ug/L tVOCs (up from 248 ug/L in April 2015), well MW-9 had 2,398 ug/L tVOCs (up from 0.8 ug/L in April 2015). Rpt notes that well MW-9 last had LNAPL in March 2014, and that GW samples from MW-9 have shown highly fluctuating tVOCs. Rpt states that, in addition to system mods & well install'ns mentioned above, URS will continue to evaluate need for surfactant injections or other remedial actions to address saturated soil contam. URS will

continue quarterly GW monitoring & LNAPL recovery efforts. - JK 03/21/16: Reviewed System Performance Monitoring Rpt for 4th Quarter 2015 by URS, dated 12/2/15 (in DecDocs). Rpt covers period from 7/30/15 to 10/28/15 as 4th qtr 2015. PID screening & lab sampling of GWET system's vapor discharge showed compliance with DEC stds. URS visited site 3 times during rpt period, detecting LNAPL in well MW-7 each time, up to 0.94 ft in thickness; ~1 gal of LNAPL was recovered. GW sampling on 10/7/15 showed well MW-6 had 3,378 ug/L total VOCs (up from 3,178 ug/L in July 2015), well MW-8 had 1,222 ug/L tVOCs (down from 1,665 ug/L in July 2015), well MW-9 had 5,541 ug/L tVOCs (up from 2,398 ug/L in July 2015). Rpt states that on 10/28/15, GW pump in extraction well GEW-02 malfunctioned; URS contacted DEC and it was agreed that since well is outside main plume and has historically had low yield, it would not be worth repairing or replacing pump; system continues to operate with two recovery wells, GEW-01 and GEW-03, until new recovery well GEW-04 is installed and brought on line. URS will install 4th recovery well, install addtl monitoring wells and replace several existing 1-inch wells with 4-inch wells (according to approved plan). They will also continue to evaluate need for surfactant injections, and will continue quarterly GW monitoring & LNAPL recovery efforts. - J. Kolleeny 05/31/16: Reviewed System Performance Monitoring Rpt for 1st Quarter 2016 by URS, dated 4/7/16 (in DecDocs). Rpt covers period from 10/29/15 to 1/18/16 as 1st qtr 2016. Based on PID screening of GWET system's vapor influent/effluent, it appears system discharge complied with DEC stds (system was shut down on 11/24/15, prior to quarterly air sampling, in prep for reinstall'n of wells and modifications to GWET system). In Nov. 2015, well MW-7 had 0.28 ft of LNAPL; during Dec. 2015 & Jan. 2016, well was not gauged as access to well was obstructed at those times. Approx 0.25 gal of LNAPI was recovered from MW-7. GW sampling was performed on 1/18/16; wells MW-6, MW-7 & MW-8 were not sampled because they were in process of being reinstalled as larger wells. Well MW-9 had 3,988 ug/L total VOCs (down from 5,541 ug/L in Oct. 2015); well GEW-1 had 53 ug/L tVOCs (up from 40 ug/L in Oct. 2015). Rpt states that subcontractor EnviroTrac is in process of implementing remedial system modifications approved by DEC, including install'n of addtl delin wells and an addtl GW extraction well; this work is expected to be completed in early 2016, at which point operation of GWET system will resume. URS will continue quarterly GW sampling and manual product recovery. - J. Kolleeny 09/07/16: Reviewed System Performance Monitoring Rpt for 2nd & 3rd Quarters 2016 by URS, dated 8/11/16 (in DecDocs). Rpt covers period from Jan. 19 thru July 22, 2016 as 2nd & 3rd quarters of 2016.) Rpt summarizes recent modifications at site that were proposed by URS and approved by DEC in Jan. 2014 - they over-drilled & replaced 1-inch wells MW-6, MW-7 & MW-8 with 4-inch wells (MW-9 could not be over-drilled as planned, so new well MW-15 was installed nearby), installed four new wells MW-10, MW-11, MW-13 & MW-14 (proposed well MW-12 was not installed due to subsurface obstruction, MW-13 was moved to west to compensate), installed addtl extraction well GEW-4; in addition, they plan to redevelop extraction wells GEW-1 and GEW-3 to ensure proper functioning (GEW-2 consistently show no contam, so it won't be redeveloped.) GWET, shut down since 11/24/15, was re-started with new extraction well on 8/3/16. During rpt period, free product was detected in well MW-7/7R (0.03 ft in MW-7 in March, 0.08 ft in MW-7R in April 2016) and in well MW-15 (0.02 ft in April 2016). Absorbent socks were placed in MW-7R and MW-15 in April, and were replaced in

**S105054624**

June 2016 as both socks were 100% saturated. GW sampling in April 2016 showed well MW-6R had 18,434 ug/L total VOCs, well MW-8R had 1,981 ug/L tVOCs, well MW-10 had 1,410 ug/L tVOCs, and well MW-11 had 8,359 ug/L tVOCs. GW sampling in July 2016 showed MW-6R decreased to 7,150 ug/L tVOCs, MW-8R decreased to 1,591 ug/L tVOCs, MW-10 increased to 1,959 ug/L tVOCs, and MW-11 decreased to 2,892 ug/L tVOCs. URS will continue manual product recovery, quarterly GW sampling, and operation/monitoring of GWET system; they'll also continue to evaluate need for surfactant injections or other actions to address residual LNAPL and saturated soil contam, and will submit a work plan for DEC approval before implementing any add'l remedial actions. - JK 03/24/17: Reviewed System Performance Monitoring Rpt for 4th Quarter 2016 by URS, dated 12/22/16 (in DecDocs). Rpt discusses 2016 modifications to GW extraction & treatment system at site (mainly install'n & operation of add'l extraction well GEW-4). URS estimates total gals of GW collected by each well during rpt period as: GEW-1 ~9,233 gals, GEW-3 182 gals, GEW-4 3,840 gals. Extraction wells GEW-1 and GEW-3 operated from 9/27 thru 10/6, and were then shut off to determine influence of GEW-4 when pumping on its own. GW samples from extraction wells taken by EnviroTrac (subcontractor) on 10/11/16 showed GEW-1 had 240 ug/L total VOCs, GEW-3 had 5,725 ug/L tVOCs, GEW-4 had 5,917 ug/L tVOCs. Samples collected by URS on 10/5/16 showed GEW-1 had 224 ug/L tVOCs, GEW-3 had 60 ug/L tVOCs, and GEW-4 had 23,293 ug/L tVOCs. Rpt states these data indicate that new well GEW-4 was installed in area with highest dissolved impacts as intended. Samples of vapor effluent from air stripper and GW discharge to NYC sewer were in compliance. No free product was detected in 3 site visits this quarter, but absorbent socks in wells MW-7R & MW-15 were replaced on each visit. GW sampling on 10/5/16 showed well MW-6R had 4,581 ug/L tVOCs (down from 7,150 ug/L in July 2016), well MW-8R had 1,201 ug/L tVOCs (down from 1,591 ug/L in July 2016), well MW-10 had 2,819 ug/L tVOCs (up from 1,959 ug/L in July 2016), well MW-11 had 348 ug/L tVOCs (down from 2,892 ug/L in July 2016). Rpt states that GW & soil contam in saturated & smear zones remain high enough to warrant continued remediation, and small amts of free product remain in a small area of site. URS concludes that data from newly installed wells have better delineated GW impacts, showing plume is limited to 40 ft by 50 ft area. URS will continue quarterly GW monitoring, continue manual product recovery, optimize GWET system ops, and continue to evaluate need for surfactant injections or other remedial action. They also propose to remove wells that are consistently dry from GW monitoring program (IW-3, IW-10, IW-13, IW-15, VW-02 & VW-04), and to decommission a number of 1-inch injection wells (IW-1 thru IW-5A, IW-11, IW-12, IW-14, IW-16 thru IW-18), which are often dry and/or are located near existing monitoring wells. I sent email (in DecDocs) to Jerry Aliberti of DDC, cc's to March Asbagh of DDC, Kevin Shanahan and Harvey Roberts of URS/AECOM, approving these recommendation. - J. Kolleeny 06/15/17: Reviewed System Performance Monitoring Rpt for First Quarter 2017 by URS, dated 3/30/17 (in DecDocs). Rpt covers period from Oct. 2016 thru Jan. 2017. During this period, extraction wells GEW-1 & GEW-3 were not operating & did not recovery any GW; GEW-4 recovered 15,320 gals (155 gpd). Sampling of influent to GWET system in Nov. & Dec. 2016 and Jan. 2017 showed total VOCs ranged from 726 ug/L to 2,3339 ug/L in GEW-1, from 1,029 ug/L to 3,285 ug/L in GEW-3, and from 1,441 ug/L to 3,282 ug/L in GEW-4. Sampling of system discharge to NYC sewer system showed effluent was in

compliance with NYCDEP discharge criteria. GW samples collected from extraction wells on 1/17/17 showed no VOCs in GEW-1 or GEW-2, GEW-3 had 9.5 ug/L of MTBE, and GEW-4 had 8,147 ug/L tVOCs. URS visited site 3 times during quarter to gauge wells & recover LNAPL, but no LNAPL was detected in any wells; however, absorbent socks in MW-7R & MW-15 continue to collect LNAPL. Socks were replaced in Nov. 2016. GW sampling on 1/17/17 showed well GEW-4 had 8,147 ug/L tVOCs (down from 23,293 ug/L in Oct. 2016), well MW-6R had 104 ug/L tVOCs (down from 4,581 ug/L in Oct. 2016), well MW-10 had 289 ug/L tVOCs (down from 2,819 ug/L in Oct. 2016), well MW-11 had 257 ug/L tVOCs (down from 348 ug/L in Oct. 2016); wells MW-8R & MW-15 were not sampled due to vehicles parked over wells. URS will continue quarterly GW monitoring, product recovery by absorbent socks (or other methods as appropriate), operation of GWET system, evaluation of need for surfactant injections or other remedial actions to address residual LNAPL and saturated zone soil impacts, and will decommission 11 injection wells DEC approved for removal from GW monitoring program.

- JK 07/24/17: Reviewed System Performance Monitoring Rpt for Second Quarter 2017 by URS, dated 6/13/17 (in DecDocs). Rpt covers period from 1/19/17 thru 4/27/17. Rpt states that GWET system operated in compliance with benzene air emission limit, based on weekly PID screening of sir stripper influent & effluent showing no detections and on quarterly samples of vapor influent & effluent showing no VOCs detected. During this quarter, system operated using only new extraction well GEW-4, which recovered 14,130 gals of GW (143 gpd). Monthly GW samples from extraction wells showed that on Feb. 23, 2017, GEW-1 had 924 ug/L total VOCs, GEW-3 had 1,621 ug/L tVOCs, GEW-4 had 1,862 ug/L tVOCs; on March 29, 2017, GEW-1 had 852 ug/L tVOCs, GEW-3 had 1,517 ug/L tVOCs, GEW-4 had 1,906 ug/L tVOCs; on April 27, 2017, GEW-1 had 698 ug/L tVOCs, GEW-3 had 1,458 ug/L tVOCs, GEW-4 had 1,929 ug/L tVOCs. Monthly samples of effluent from GWET showed system discharge was in compliance with NYCDEP criteria. Quarterly GW sampling on 4/13/17 showed well GEW-4 had 9,799 ug/L tVOCs (up from 8,147 ug/L in Jan. 2017), well MW-6R had 130 ug/L tVOCs (up from 104 ug/L in Jan. 2017), well MW-10 had 115 ug/L tVOCs (down from 289 ug/L in Jan. 2017), well MW-11 had 509 ug/L tVOCs (up from 257 ug/L in Jan. 2017). No measurable LNAPL was reported for this quarter, but LNAPL continued to be recovered by absorbent socks installed in wells MW-7R and MW-15; socks in MW-15 were replaced each month during this quarter. URS will: continue quarterly GW monitoring, continue product recovery by absorbent socks and/or other methods as appropriate, optimize GWET system for more continuous pumping to maintain/increase GW capture zone, evaluate need for surfactant injections or other actions to address residual LNAPL & saturated zone soil impacts, decommission eleven injection wells, repair leak in carbon vessel T-501 or replace unit, heat trace & insulate exposed section of discharge pipe from GWET to DEP sewer system.

- J. Kolleeny 01/08/18: Reviewed System Performance Monitoring Rpt for Third Quarter 2017 by URS, dated 9/15/17 (in DecDocs). Rpt covers period from 4/28/17 to 7/26/17. Based on PID readings and air sampling data, on-site GWET system operated in compliance with benzene air discharge limit. During quarter, extraction well GEW-1 recovered 5 gals, GEW-3 recovered 0 gals, GEW-4 recovered 10,523 gals (117 gpd). GW influent samples from extraction wells showed that on 5/26/17, GEW-1 had 94 ug/L total VOCs, GEW-3 had 349 ug/L tVOCs, GEW-4 had 1,770 ug/L tVOCs; on 6/30/17, GEW-1 had 77 ug/L tVOCs, GEW-3 had 857 ug/L tVOCs, GEW-4 had 1,835 ug/L tVOCs; on

**S105054624**

7/26/17, GEW-1 had 164 ug/L tVOCs, GEW-3 had 672 ug/L tVOCs, GEW-4 had 1,452 ug/L tVOCs. Treated GW discharge from GWET system complied with NYCDEP criteria. There were no system shutdowns this quarter. Three well gauging events showed no LNAPL detected in any wells this quarter (absorbent socks were removed from MW-7R & MW-15 on 5/24/17 to see if LNAPL would collect, but no measurable product was observed). GW sampling on 7/26/17 showed well GEW-4 had 11,327 ug/L tVOCs (up from 9,799 ug/L in April 2017), well MW-6R had 384 ug/L tVOCs (up from 131 ug/L in April 2017), well MW-7R had 16,886 ug/L tVOCs (not sampled in April 2017, Jan. 2017 or Oct. 2016 due to LNAPL in well), well MW-9 had 2,540 ug/L tVOCs (not sampled previous 3 quarters), well MW-10 had 151 ug/L tVOCs (up from 115 ug/L in April 2017), well MW-11 had 316 ug/L tVOCs (down from 509 ug/L in April 2017), well MW-15 had 65,257 ug/L tVOCs (not sampled due to LNAPL in Jan. & April 2017, or Oct. 2016), well GEW-1 had 92 ug/L tVOCs (up from 10 ug/L in April 2017). URS will continue quarterly GW monitoring, use absorbent socks for LNAPL recovery from affected wells, optimize GWET system, evaluate need for surfactant injections, turn on pump in well GEW-1, decommission 11 injection wells, replace liquid-phase carbon adsorbers, insulate exposed section of discharge pipe from GWET to DEP sewer system. - JK 04/05/18: Reviewed System Performance Monitoring Rpt for Fourth Quarter 2017 by URS, dated 1/23/18 (in DecDocs). PID monitoring & lab sampling of GWET system air stripper's vapor influent & effluent showed no VOCs detected in either, so system's benzene discharge is in compliance. Monthly sampling of GWET system's treated water discharge showed compliance with NYCDEP discharge criteria. GWET system recovered 37,950 gals of GW during rpt period (7/26 - 10/31/17). Monthly sampling of GW influent from each extraction well (on 8/31, 9/28 & 10/31/17) showed total VOCs ranged from 13 ug/L to 607 ug/L in GEW-1, from 16 ug/L to 886 ug/L in GEW-3, and from 149 ug/L to 1,309 ug/L in GEW-4; highest VOC levels were seen in Aug. 2017, with decreases in Sept. & Oct. 2017 partly attributable to increased capture zone after bringing GEW-1 back on line. Well gauging showed no LNAPL detected in any wells this quarter. GW sampling on 10/30/17 showed well GEW-1 had 143 ug/L tVOCs (up from 92 ug/L in July 2017), well GEW-3 had 8 ug/L tVOCs (up from 6 ug/L in July 2017), well GEW-4 had 5,736 ug/L tVOCs (down from 11,327 ug/L in July 2017), well MW-6R had 191 ug/L tVOCs (down from 384 ug/L in July 2017), well MW-7R had 11,243 ug/L tVOCs (down from 16,886 ug/L in July 2017), well MW-8R had 220 ug/L tVOCs (not sampled in July 2017, had 5 ug/L tVOCs in April 2017), well MW-9 had 78 ug/L tVOCs (down from 2,540 ug/L in July 2017), well MW-10 had 1,346 ug/L tVOCs (up from 151 ug/L in July 2017), well MW-11 had 3,693 ug/L tVOCs (up from 316 ug/L in July 2017), well MW-15 had 57,704 ug/L tVOCs (down from 65,257 ug/L in July 2017). Rpt states that following DEC's 3/24/17 approval, 7 injection wells were decommissioned on 10/2/17 (4 other injection wells approved for decommissioning could not be located & are presumed paved over during past construction work). Rpt states that URS will continue quarterly GW monitoring, continue manual product recovery from affected wells using absorbent socks, continue to optimize GWET system, continue to evaluate need for surfactant injections or other actions to address product & saturated soil contam, and will repair flow meters/totalizers for GEW-1 & GEW-4. - J. Kolleeny 06/05/18: Reviewed System Performance Monitoring Rpt for First Quarter 2018 by URS, dated 3/13/18 (in DecDocs). Rpt covers period from 11/01/17 thru 1/31/18. PID screening & lab sampling of GWET system air stripper

**S105054624**

discharge showed virtually no VOCs detected in vapor stream, no benzene in effluent, so discharge was in compliance with DEC stds. Monthly sampling of GWET system's treated water discharge showed compliance with NYCDEP discharge criteria. GWET system (extraction wells GEW-1 & GEW-4) recovered total of 80,692 gals of GW during rpt period, going by summing flows from extraction wells, or going by discharge flow meter, system recovered 61,786 gals of GW; URS states that discharge flow meter is more likely accurate, and speculates that mineral deposition in piping from extraction wells or in flow meters could cause erroneous readings; contractor (EnviroTrac) is scheduled to disassemble and clean piping system in Feb. 2018. Monthly sampling of GW influent from each extraction well showed total VOCs ranged from 6 ug/L to 20 ug/L in GEW-1, from 9 ug/L to 51 ug/L in GEW-3, and from 123 ug/L to 683 ug/L in GEW-4; highest tVOCs for each extraction well were from Jan. 2018 sampling event. Gauging of wells showed a sheen in MW-7R on 1/31/18 (absorbent sock was replaced), and MW-15 had 0.03 ft of LNAPL on 12/28/17 and 0.01 ft on 1/31/18; socks were replaced both times. GW sampling on 1/31/18 & 2/1/18 showed well GEW-3 had 14 ug/L tVOCs (had 8 ug/L in Oct. 2017), well GEW-4 had 6,829 ug/L tVOCs (up from 5,736 ug/L in Oct. 2017), well MW-6R had 119 ug/L tVOCs (down from 191 ug/L in Oct. 2017), well MW-8R had 103 ug/L tVOCs (down from 220 ug/L in Oct. 2017), well MW-9 had 93 ug/L tVOCs (up from 78 ug/L in Oct. 2017), well MW-10 had 1,028 ug/L tVOCs (down from 1,346 ug/L in Oct. 2017), well MW-11 had 17,814 ug/L tVOCs (up from 3,693 ug/L in Oct. 2017). Wells MW-7R & MW-15 were not sampled due to LNAPL; well GEW-1 could not be accessed. Rpt states that URS will continue quarterly GW monitoring, continue manual product recovery from affected wells using absorbent socks, continue to optimize GWET system, and continue to evaluate need for surfactant injections or other actions to address product & saturated soil contamination. - J. Kolleeny 10/11/18: Reviewed System Performance Monitoring Rpt for 2nd Quarter 2018 by URS dated 7/31/18 (in DecDocs). Rpt covers 2/1/18 thru 4/25/18. Rpt states that screening of air stripper vapor discharge showed no PID readings, and lab sampling of vapor influent & effluent on 4/11/18 showed no benzene (or other VOCs) detected, so GWET system was in compliance with air stds. Sampling of system's treated GW discharge showed compliance with NYCDEP criteria. Only extraction wells GEW-1 and GEW-4 operated this quarter. Monthly sampling of GW influent from each extraction well showed total VOCs ranged from 18 to 29 ug/L in GEW-1, from 29 to 147 ug/L in GEW-3, and from 30 to 2,522 ug/L in GEW-4. Well gauging on 4/6/18 showed a petroleum sheen in wells MW-7R and MW-15; both wells contain absorbent socks which are not yet fully saturated. GW sampling on 4/16 & 4/15/18 showed well GEW-1 had 452 ug/L total VOCs (not sampled in Jan. 2018 due to obstruction; had 143 ug/L tVOCs in Oct. 2017), well GEW-3 had 6 ug/L tVOCs (down from 14 ug/L in Jan. 2018), well GEW-4 had 15,533 ug/L tVOCs (up from 6,829 ug/L in Jan. 2018), well MW-6R had 3 ug/L tVOCs (down from 119 ug/L in Jan. 2018), well MW-8R was ND (had 103 ug/L tVOCs in Jan. 2018), well MW-9 had 15 ug/L tVOCs (down from 93 ug/L in Jan. 2018), well MW-10 had 3,079 ug/L tVOCs (up from 1,028 ug/L in Jan. 2018), well MW-11 had 12,695 ug/L tVOCs (down from 17,814 ug/L in Jan. 2018); wells MW-7R and MW-15 were not sampled due to presence of sheen (~0.001 ft of LNAPL). Rpt states that URS will continue quarterly GW monitoring, continue manual product recovery from affected wells using absorbent socks, continue to optimize GWET system, and continue to evaluate need for surfactant injections or other actions to

address product & saturated soil contamination. - J. Kolleeny 12/20/18: Reviewed System Performance Monitoring Rpt for Third Quarter 2018 by URS dated 11/5/18 (in DecDocs). Rpt covers 4/26/18 thru 7/26/18. Rpt states that system air stripper vapor influent & effluent PID readings were all zero, except on 7/20/18 when effluent measured 0.10 ppmv; 2% estimated benzene concentration would be 0.002 ppmv, which is well below emission limit of 2.0 ppmv. Lab analysis of vapor influent/effluent collected on 8/15/18 showed no benzene or other VOCs detected, so GWET system was in compliance with air stds. Sampling of system's treated GW discharge showed compliance with NYCDEP criteria. Only extraction wells GEW-1 and GEW-4 operated this quarter; GEW-1 recovered 72,207 gals of GW, GEW-4 recovered 3,941 gals. Rpt states that no measurable LNAPL or sheen was observed in any wells this quarter; absorbent socks in wells MW-7R & MW-15 were 75% saturated and replaced on 7/30/18. GW sampling on 7/30/18 showed well GEW-1 had 230 ug/L total VOCs (down from 452 ug/L in April 2018), well GEW-3 had 16 ug/L tVOCs (up from 6 ug/L in April 2018), well GEW-4 had 20,027 ug/L tVOCs (up from 15,553 ug/L in April 2018), well MW-6R was ND (had 3 ug/L tVOCs in April 2018), well MW-8R had 59 ug/L tVOCs (was ND in April 2018), well MW-9 had 64 ug/L tVOCs (up from 15 ug/L in April 2018), well MW-10 had 3,732 ug/L tVOCs (up from 3,079 ug/L in April 2018), well MW-11 had 9,378 ug/L tVOCs (down from 12,695 ug/L in April 2018). Rpt states that wells MW-7R and MW-15 were not sampled due to product (?). Rpt states that URS will continue quarterly GW monitoring, continue manual product recovery from affected wells using absorbent socks, continue to optimize GWET system, evaluate need for addtl wells to south of MW-10 & MW-11 to better delineate plume, and continue to evaluate need for surfactant injections or other actions to address product & saturated soil contamination. - J. Kolleeny 03/07/19: Reviewed System Performance Monitoring Rpt for Fourth Quarter 2018 by URS dated 1/16/19 (in DecDocs). Rpt covers 7/27/18 thru 10/23/18. On-site GWET system air stripper vapor influent & effluent PID readings were all zero this quarter. Lab analysis of system vapor influent & effluent samples collected on 10/23/18 showed influent had 57 ppbv total volatiles (all MTBE), and effluent was ND; no benzene was detected, system was in compliance with DEC air stds. System's treated GW discharge was in compliance with NYCDEP criteria. Extraction wells GEW-1 and GEW-4 operated this quarter; GEW-1 collected 59,684 gals, GEW-4 collected 4,473 gals. Gauging of wells showed product sheen in well MW-15 in Oct. 2018; absorbent socks have been placed in MW-15 and MW-7R. GW sampling on 10/10/18 showed well MW-7R had 2,921 ug/L total VOCs (was not sampled for past several quarters due to LNAPL), well MW-9 had 92 ug/L tVOCs (up from 64 ug/L in July 2018), well MW-10 had 3,176 ug/L tVOCs (down from 3,732 ug/L in July 2018), well MW-11 had 2,758 ug/L tVOCs (down from 9,378 ug/L in July 2018), well GEW-1 had 160 ug/L tVOCs (down from 230 ug/L in July 2018), well GEW-4 had 19,134 ug/L tVOCs (down from 20,027 ug/L in July 2018). Rpt states that URS will continue quarterly GW monitoring, continue manual product recovery from affected wells using absorbent socks, continue to optimize GWET system, evaluate need for addtl wells to south of MW-10 & MW-11 to better delineate plume, and continue to evaluate need for surfactant injections or other actions to address product & saturated soil contamination. Also, URS will lower pump on set-point for P-104 in extraction well GEW-4 from 12 ft to 14 ft bgs, and will monitor & record pump cycle frequencies and durations before and after adjusting set-point. - J. Kolleeny 06/17/19: Reviewed System

Performance Monitoring Rpt for First Quarter 2019 by URS dated 5/2/19 (in DecDocs). Rpt covers 10/24/18 thru 1/31/19. On-site GWET system air stripper vapor influent & effluent PID readings were all zero this quarter, and no VOCs were detected in lab samples of system vapor influent & effluent samples, so system vapor discharge was in compliance with DEC air standards. System's GW effluent was in compliance with NYCDEP criteria. During rpt period, GW extraction well GEW-1 recovered 48,419 gals and GEW-4 recovered 4,712 gals, which is less than previous quarter due to frequent high water alarm shutdowns. EnviroTrac cleaned air stripper influent strainer and reduced flow from EQ tank to air stripper. Problem seems to be resolved, as system operated without shutting down from 1/3/19 to 1/31/19 (end of rpt period). No measurable LNAPL was detected this quarter, but sheen was observed in MW-15 in Jan. 2019 and absorbent socks in both MW-15 and MW-7R were partly saturated with LNAPL. GW sampling on 1/14/19 showed well MW-7R had 1,168 ug/L total VOCs (down from 2,921 ug/L in Oct. 2018), well MW-10 had 1,149 ug/L tVOCs (down from 3,176 ug/L in Oct. 2018), well MW-11 had 70 ug/L tVOCs (down from 2,758 ug/L in Oct. 2018), well GEW-1 had 185 ug/L tVOCs (up from 160 ug/L in Oct. 2018), well GEW-4 had 3,242 ug/L tVOCs (down from 19,134 ug/L in Oct. 2018). Rpt notes that all wells have shown significant decrease in tVOCs over last several quarters. Based on data, URS will continue: quarterly GW monitoring, manual product recovery from affected wells using absorbent socks, optimizing GWET system, performing scheduled quarterly & semiannual system maintenance, and evaluating need for surfactant injections or other actions to address product & saturated soil contamination. - JK

08/21/19: Reviewed System Performance Monitoring Rpt for Second Quarter 2019 by URS dated 8/1/19 (in DecDocs). Rpt covers 2/1/19 thru 4/23/19. On-site GWET system air stripper vapor influent & effluent PID readings were zero this quarter except on 3/6/19, when influent was 0.1 ppmv and effluent was 0.2 ppmv. Based on PID reading and assumption that benzene is 2% of effluent, benzene was well below air discharge standard. Lab sampling of GWET air influent/effluent showed influent had 67 ppbv total volatiles, including 34 ppbv of benzene, but effluent air was ND. System's GW effluent was in compliance with NYCDEP criteria. Due to problems with flow meter on one GWE pump, gals of GW recovered/treated this period is estimated to be ~75,045 gals; NYCDEP flow meter showed 79,656 gals during rpt period. Well gauging data table indicates well MW-15 had 0.001 ft of LNAPL (trace or sheen) on 2/14/19 and on 4/17/19; absorbent sock was 75% saturated on 4/17/19 and was replaced. GW sampling on 4/16-17/19 showed well GEW-1 had 335 ug/L tVOCs (up from 185 ug/L in Jan. 2019), well GEW-4 had 3,545 ug/L tVOCs (up from 3,232 ug/L in Jan. 2019), well MW-6R had 9 ug/L tVOCs (was ND in Jan. 2019), well MW-7R had 2,315 ug/L tVOCs (up from 1,168 ug/L in Jan. 2019), well MW-9 had 123 ug/L tVOCs (up from 4 ug/L in Jan. 2019), well MW-10 had 2,340 ug/L tVOCs (up from 1,149 ug/L in Jan. 2019), well MW-11 had 3,427 ug/L tVOCs (up from 70 ug/L in Jan. 2019). Rpt notes that water table was 1 ft lower in April than in Jan. 2019, suggesting that increases in tVOCs in GW were due to release of contaminants trapped in soil pore spaces. Based on data, URS will repair & recalibrate flow meters in GWE wells or replace units, and will continue: quarterly GW monitoring, manual product recovery from affected wells using absorbent socks, optimizing GWET system, performing scheduled quarterly & semiannual system maintenance, and evaluating need for surfactant injections or other actions to address product & saturated soil contamination. - JK

11/12/19: Received phone call from Kevin Shanahan of URS/AECOM, who reported that subcontractor at site discovered a hole in side of vapor-phase carbon unit that treats air stripper off-gas; system has been shut down. Kevin said options are to repair unit, replace unit, or discharge directly to atmosphere without vapor treatment. I said if they choose to go with no treatment, I would need to see a proposal with supporting data showing that system's untreated vapor influent meets air discharge standards. Kevin agreed with this. - J. Kolleeny 11/13/19: Received email from Kevin Shanahan of URS/AECOM: Jonathan, As we discussed yesterday, GWET remediation system at Midtown South Police Precinct was turned off on Nov. 11, 2019 during a routine O&M inspection. Our subcontractor EnviroTrac turned system off after observing a hole in side of vapor-phase granular activated carbon (VGAC) tank and carbon discharged to floor of treatment system enclosure. Attached photo illustrates hole in VGAC tank. URS and EnviroTrac are currently evaluating actions necessary to return remediation system to operation. These actions may include repairing VGAC unit, replacing VGAC unit, or removing unit from air stripper emission flow. URS is reviewing historical system data and if it seems that best option is to eliminate VGAC unit from air stripper emission flow, we will send you a letter with that recommendation and request your approval. Please contact me if you have any comments or questions. - J. Kolleeny 11/26/19: Reviewed Request to Discontinue Air Emissions Treatment (Revised) by URS, dated 11/25/19 (in DecDocs). Rpt states that on 11/12/19 VGAC unit that treats air stripper off-gas for on-site GWET system was found to be damaged (has a hole in side, black carbon has apparently been spewed from hole). URS evaluated options: repair VGAC unit, replace unit, or discharge untreated system off-gas directly to atmosphere. URS recommends last option, proposing to connect air stripper directly to system s discharge stack and discontinue air emissions treatment. In support of this proposal, URS provided lab analytical data for system vapor samples showing both benzene and total VOC concentrations in system influent (i.e., untreated air stripper off-gas) to be below benzene discharge standard (2,000 ppbv at 200 cfm air flow) since at least 2009. URS states that when remedial system is reactivated, air emissions will be monitored weekly with a PID and sampled quarterly for lab analysis to ensure compliance with regulatory limit. I sent letter (in DecDocs) to Jerry Aliberti of DDC, cc's to Carlos Maldonado of DDC, Kevin Shanahan & Harvey Roberts of URS, approving this proposal, but requiring that after system has been reactivated and running for several hours, a vapor discharge sample should be collected for lab analysis to confirm compliance with air discharge standard, and that even if discharge meets standard, if any nuisance odors are reported, system should be shut down and refitted with air emissions treatment. - J. Kolleeny 12/10/19: Reviewed System Performance Monitoring Rpt for Third Quarter 2019 by URS, dated 11/5/19 (in DecDocs). Rpt covers period from 4/24/19 to 7/31/19. PID screening of air stripper off-gas (effluent after vapor phase carbon adsorption treatment) gave readings of 0.0 ppm; air samples collected on 7/18/19 had benzene at 40.3 ppbv in influent and 0.97 ppbv in effluent, well below benzene discharge std., so GWET is in compliance. NYCDEP discharge flow totalizer showed 98,084 gals of GW pumped during 99-day period; flow meters for individual extraction wells totaled 70,530 gals during this period. One system shutdown occurred during rpt period: system was off when EnviroTrac (O&M contractor) arrived at site on 7/18/19, apparently due to power

outage caused by thunderstorm on previous day. Rpt states that no measurable product or sheen was observed in wells during 3rd quarter 2019; absorbent sock in well MW-7R was last replaced in Aug. 2018, sock in well MW-15 was last replaced in April 2019. GW sampling on 7/17/19 showed well GEW-1 had 147 ug/L total VOCs (down from 335 ug/L in April 2019), well GEW-4 had 2,049 ug/L tVOCs (down from 3,545 ug/L in April 2019), well MW-6R had 37 ug/L tVOCs (up from 9 ug/L in April 2019), well MW-7R had 1,962 ug/L tVOCs (down from 2,315 ug/L plus sheen in April 2019), well MW-9 had 79 ug/L tVOCs (down from 123 ug/L in April 2019), well MW-10 had 600 ug/L tVOCs (down from 2,340 ug/L in April 2019), well MW-11 had 7,913 ug/L tVOCs (up from 3,427 ug/L in April 2019), well MW-15 had 33,749 ug/L tVOCs (had 0.001 ft of product in April 2019 so was not sampled; same in Jan. 2019 and Oct. 2018). URS will continue quarterly GW monitoring, continue product recovery using socks or other appropriate methods, optimize GWET system to maintain/increase GW capture zone, perform scheduled quarterly & semiannual maintenance tasks, and continue to evaluate need for surfactant injections or other actions to address residual product and saturated zone soil contamination. - J. Kolleeny 02/03/20: Reviewed System Performance Monitoring Rpt for Fourth Quarter 2019 by URS, dated 1/13/20 (in DecDocs). Rpt covers Aug. 1st thru Oct. 31st, 2019. Rpt states that PID screening and lab sampling of GWET system's air effluent (from air stripper) showed it was in compliance with DEC air discharge stds (PID screening was 0.0 ppm; lab analysis on 10/25/19 showed air influent was ND for all VOCs, effluent had 0.483 ppbv of benzene and 3.562 ppbv of tVOCs). NYCDEP discharge flow totalizer showed 59,388 gals of GW were pumped during 92-day period; this is lower than previous quarter, which URS attributes to issues with high-level alarms in EQ tank and air stripper sump, which shut down pumping operations. Rpt states that system was off upon arrival on O&M visits numerous times this quarter due to high-level alarms. Sampling of GWET system water effluent showed it was in compliance with NYCDEP discharge criteria. Rpt states that well gauging on 10/16/19 showed 0.18 ft of LNAPL in well GEW-1; product was sampled for fingerprint analysis, which indicated it most closely resembled motor oil. There are no motor oil tanks at site and no known releases of motor oil at site. GW sampling on 10/16 and 10/17/19 showed well GEW-4 had 4,804 ug/L total VOCs (up from 2,049 ug/L in July 2019), well MW-6R had 67 ug/L tVOCs (up from 37 ug/L in July 2019), well MW-7R had 1,214 ug/L tVOCs (down from 1,962 ug/L in July 2019), well MW-8R had 483 ug/L tVOCs (not sampled in Jan., April or July 2019), well MW-9 had 108 ug/L tVOCs (up from 79 ug/L in July 2019), well MW-10 had 759 ug/L tVOCs (up from 600 ug/L in July 2019), well MW-11 had 6,936 ug/L tVOCs (down from 7,913 ug/L in July 2019), well MW-15 had 45,067 ug/L tVOCs (up from 33,749 ug/L in July 2019). Rpt concludes that soil & GW contamination remain sufficiently high to warrant continued remediation; minor quantities of free product are still present in a limited area. Extent of dissolved plume is ~50 x 35 ft. URS will continue quarterly GW monitoring, activate spill buster in GEW-1 or install absorbent sock to address LNAPL, continue product recovery from affected wells using socks or other appropriate methods, optimize GWET system to maintain/increase GW capture zone, perform scheduled quarterly & semiannual maintenance tasks, and continue to evaluate need for surfactant injections or other actions to address residual product and saturated zone soil contamination. Rpt states that shutdown of GWET system in Nov. 2019 due to hole found in vapor-phase carbon

treatment unit, and DEC approval of system operation w/o vapor treatment, will be discussed in next quarterly rpt. - J. Kolleeny 04/14/20: Reviewed System Performance Monitoring Rpt for First Quarter 2020 by URS, dated 3/31/20. Rpt covers period from Nov. 2020 thru Jan. 2020. Rpt notes that in Nov. 2019, on-site system's GAC unit (treating air stripper off-gas) was found to be damaged. System was shut down, and URS proposed to modify system to discharge to atmosphere without treatment, providing supporting data showing vapor stream meets DEC standards. DEC approved this proposal in Nov. 2019. EnviroTrac completed system modifications and system was re-started on 2/25/20. Info regarding system modifications and re-start will be in next quarterly rpt. A system vapor discharge sample was collected after re-start on 2/26/20, as required by DEC, and benzene was in compliance with discharge standard. Rpt notes that no monthly GW samples were collected from GWET wells and no system water discharge sample was collected this quarter because system was shut down. Rpt states that free product was detected in well GWET-1 in Nov. 2019 (0.34 ft) and Dec. 2019 (0.12 ft); product was ID'ed as resembling motor oil; active tanks at site store gasoline & fuel oil, there are no known releases of motor oil at site. On 3/4/20, EnviroTrac initiated product recovery from GWET-1 using a Spill Buster pump. URS speculates that presence of product in GWET-1 may be related to change in water table elevations due to system shutdown (altho product was first detected in GWET-1 in Oct. 2019, prior to shutdown). GW sampling on Jan. 20 & 21, 2020 showed well MW-6R had 3 ug/L total VOCs (down from 67 ug/L in Oct. 2019), well MW-7R had 643 ug/L tVOCs (down from 1,214 ug/L in Oct. 2019), well MW-8R had 5 ug/L tVOCs (down from 483 ug/L in Oct. 2019), well MW-9 had 2 ug/L tVOCs (down from 108 ug/L in Oct. 2019), well MW-10 had 29 ug/L tVOCs (down from 759 ug/L in Oct. 2019), well MW-11 had 55 ug/L tVOCs (down from 6,936 ug/L in Oct. 2019), well MW-15 could not be sampled (blocked by vehicle), well GWET-3 had 5 ug/L tVOCs (down from 6 ug/L in Oct. 2019), well GWET-4 had 151 ug/L tVOCs (down from 4,804 ug/L in Oct. 2019). Rpt states that decreases in contam levels in 1st quarter 2020 are likely related to shutdown of GWET system (?). URS will continue quarterly GW monitoring, continue product recovery from well GWET-1 using Spill Buster (or absorbent socks, depending on thickness), and continue system O&M & optimization. - J. Kolleeny 08/05/20: Reviewed System Performance Monitoring Rpt for Second Quarter 2020 by URS dated 7/20/20. Rpt covers period from 2/1/20 thru 4/29/20. Rpt states that EnviroTrac completed modifications to GWET system to allow air stripper off-gas to bypass damaged carbon unit & discharge to atmosphere, and restarted system on 2/25/20. An air sample taken 2/26 showed benzene in system exhaust is well below discharge limit. (Sample had 21.8 ppbv benzene, 349.9 ppbv total VOCs.) A quarterly air discharge sample collected in April was not analyzed when lab determined that sample container leaked so results would be invalid. Monitoring of system air emissions will continue weekly w/PID and quarterly with sampling for lab analysis. According to NYCDEP totalizer, GWET system treated & discharged 25,726 gals of GW from 2/25/20 to 4/29/20. Free product was detected only in recovery well GWET-1 this quarter, ranging from 0.11 to 0.23 ft. URS did not perform any product recovery this quarter, but on 3/4/20 EnviroTrac recovered product using Spill Buster pump (amt unknown). Product was ID'ed in Oct. 2019 as resembling motor oil. GW sampling on 4/20-21/20 showed well MW-7R had 1,079 ug/L total VOCs (up from 643 ug/L in Jan. 2020), well MW-10 had 145 ug/L tVOCs (up from 29 ug/L in Jan. 2020),

**S105054624**

well MW-11 had 39 ug/L tVOCs (down from 55 ug/L in Jan. 2020), well MW-15 had 33,469 ug/L tVOCs (not sampled in Jan. 2020 because blocked by vehicle), well GWET-4 had 2,681 ug/L tVOCs (up from 151 ug/L in Jan. 2020); well GWET-1 was not sampled due to LNAPL, well MW-9 because dry, MW-13 because blocked by equipment; other wells sampled were either ND or have very low tVOCs consistent with previous quarter. URS will continue quarterly GW monitoring, continue product recovery from GWET-1 (and any other wells with product) using Spill Buster or absorbent socks, and continue system O&M & optimization. - J. Kolleeny 12/14/20: Reviewed System Performance Monitoring Rpt for Third Quarter 2020 by URS dated 11/3/20. Rpt covers period from May thru July 2020. Off-gas from on-site remedial system's air stripper was sampled in June & July 2020 and benzene was in compliance with discharge limit (2.25 ppbv in June, ND in July). According to NYCDEP Discharge Flow Totalizer, system pumped 29,756 gals of GW during rpt period. Sampling of system GW influent showed total VOCs ranged up to 3,112 ug/L in GEW-1, up to 2,767 ug/L in GEW-3, and up to 4,136 ug/L in GEW-4. Sampling of system's water discharge showed it was in compliance with NYCDEP criteria. Semiannual redevelopment of extraction wells was performed on 6/26/20. Free product was detected in well GEW-1 this quarter (0.06 to 0.12 ft); this well has had measurable product detected every month since Oct. 2019. A Spill Buster pump was installed in this well in March 2020; during this quarter ~3 inches of product accumulated in storage drum, indicating product is being recovered by system. A product sample collected/analyzed in Oct. 2019 indicated product most closely resembled motor oil. Rpt speculates that appearance of product may be related to water level changes due to recent system shutdown. GW sampling on 7/20/20 showed well GEW-4 had 3,237 ug/L total VOCs (up from 2,681 ug/L in April 2020), well MW-7R had 3,425 ug/L tVOCs (up from 1,079 ug/L in April 2020), well MW-10 had 1,199 ug/L tVOCs (up from 145 ug/L in April 2020), well MW-11 had 152 ug/L tVOCs (up from 39 ug/L in April 2020), well MW-15 had 31,134 ug/L tVOCs (down from 33,469 ug/L in April 2020); other wells sampled were either ND or had very low tVOCs. Well MW-9 was dry and MW-13 was blocked by equipment, so those wells could not be sampled. Rpt states that URS will continue quarterly GW monitoring, collection of LNAPL from GEW-1 via Spill Buster, manual product recovery with absorbent socks or other methods as needed, system OM&M and optimization, and evaluation of need for supplemental remedial actions. - J. Kolleeny 03/16/21: Reviewed System Performance Monitoring Rpt for Fourth Quarter 2020 by URS dated 2/9/21. Rpt covers period from August thru Oct. 2020. Sampling of on-site remedial system's off-gas on 10/29/20 showed it had 0.0147 ppmv of benzene, in compliance with std of 2.0 ppmv. Extraction wells GEW-1 and GEW-4 operated during this quarter; NYCDEP Discharge Flow Totalizer indicated system pumped 18,039 gals of GW during 91-day rpt period. Monthly sampling of system GW influent showed total VOCs in GEW-1 ranged from 505 ug/L to 1,049 ug/L in GEW-1, from 748 ug/L to 800 ug/L in GEW-3, and from 1,425 ug/L to 1,654 ug/L in GEW-4. System GW effluent was in compliance with NYCDEP discharge stds. Free product was detected in GEW-1 this quarter, ranging from 0.06 to 0.12 ft. Based on measurements of product storage drum, Spill Buster recovered ~3.6 gals of product this quarter. Qtrly GW sampling showed well MW-7R had 3,352 ug/L total VOCs (down from 3,425 ug/L in July 2020), well MW-8R had 18 ug/L tVOCs (down from 37 ug/L in July 2020), well MW-10 had 96 ug/L tVOCs (down from 1,199 ug/L in July 2020), well MW-11 had 59 ug/L tVOCs

(down from 152 ug/L in July 2020), well MW-15 had 33,787 ug/L tVOCs (up from 31,134 ug/L in July 2020), extraction well GEW-4 had 2,005 ug/L tVOCs (down from 3,237 ug/L in July 2020); extraction well GEW-1 had 0.06 ft of LNAPL and was not sampled. Rpt concludes that GWET system continues to be effective in reducing GW contamination at site. URS will continue quarterly GW monitoring, collection of LNAPL from GEW-1 via Spill Buster, system OM&M and optimization, and evaluation of need for supplemental remedial actions possibly including surfactant injections. - J. Kolleeny 06/07/21: Reviewed System Performance Monitoring Rpt for 10/30/21 thru 1/27/21 by URS dated 5/13/21. Sampling of on-site remedial system's off-gas on 1/27/21 showed in had 0.00107 ppmv of benzene, in compliance with std of 2.0 ppmv. Extraction wells GEW-1 & GEW-4 operated during this rpt period. System's flow-thru meter, which reflects total volume of GW pumped, indicated that 10,764 gals of GW were pumped from 10/30/20 to 1/27/21 (~120 gpd or 0.08 gpm); however, rpt states that data from this meter have been questionable since April 2018. NYCDEP discharge flow totalizer recorded total of 70,811 gals of GW pumped thru 12/30/20 (62 days, ~1,142 gpd or 0.79 gpm), after which it stopped working. Influent to GWET system was sampled on 11/23/20, 12/22/20 and 1/27/21; results showed total VOCs in GEW-1 ranged from 105 to 123 ug/L, tVOCs in GEW-3 ranged from 174 ug/L to 2,206 ug/L, and tVOCs in GEW-4 ranged from 178 ug/L to 2,823 ug/L. System GW effluent was in compliance with NYCDEP discharge stds. Free product was detected in GEW-1 this rpt period, ranging from 0.09 to 0.16 ft. Based on measurements of product storage drum, Spill Buster in GEW-1 recovered only ~1.6 gals of product this period. Product has been ID'ed as resembling motor oil, but there have been no known releases of motor oil at site. GW sampling on 1/6/21 showed well MW-10 had 878 ug/L total VOCs (up from 96 ug/L in Oct. 2020), well MW-11 had 4,242 ug/L tVOCs (up from 59 ug/L in Oct. 2020), well GEW-4 had 1,665 ug/L tVOCs (down from 2,005 ug/L in Oct. 2020). Well GEW-1 was not sampled due to presence of LNAPL, wells MW-7R, MW-8R & MW-15 could not be sampled because they were blocked by vehicles, MW-9 was dry, and MW-13 was blocked by equipment. Rpt concludes that GWET system continues to be effective in reducing GW contam at site. URS will continue quarterly GW monitoring, collection of LNAPL from GEW-1 by Spill Buster, system OM&M and optimization, and evaluation of need for suppl'l remedial actions possibly including surfactant injections. - JK 08/26/21: Reviewed System Performance Monitoring Rpt for 1/28/21 through 4/29/21 by URS dated 8/5/21. PID screening of remedial system off-gas showed no detections thru rpt period; sampling of off-gas had 11.1 ppbv of benzene, well below discharge limit of 2.0 ppmv. Extraction wells GEW-1 & GEW-4 operated during this rpt period. Flow meters in GEW-1 & GEW-4 indicated that 47,362 gals of GW were recovered by system from 1/28 to 4/29/21; NYCDEP Discharge Flow Totalizer stopped working after 12/30/20, so didn't record flow during rpt period; URS replaced flow meter on 7/12/21. Influent to GWET system was sampled on 2/25, 3/25 & 4/29/21; results showed total VOCs in GEW-1 ranged from 64 tp 119 ug/L, tVOCs in GEW-3 ranged from 107 to 239 ug/L, tVOCs in GEW-4 ranged from 262 to 550 ug/L. System water effluent was in compliane with DEP discharge stds throughout rpt period. Free product was detected only in GEW-1 this period, ranging from 0.02 to 0.11 ft. Spill buster in GEW-1 did not recover any appreciable product this period; URS has instructed EnviroTrac to remove Spill Buster pump from GEW-1 to allow URS to install an absorbent sock to recover traces of product. Quarterly GW

sampling on 4/8/21 showed well MW-7R had 1,270 ug/L tVOCs (not sampled in Jan. 2021; had 3,352 ug/L tVOCs in Oct. 2020), well MW-10 had 1,425 ug/L tVOCs (up from 878 ug/L in Jan. 2021), well MW-11 had 610 ug/L tVOCs (down from 4,242 ug/L in Jan. 2021), well MW-15 had 12,708 ug/L tVOCs (not sampled in Jan. 2021; had 33,787 ug/L tVOCs in Oct. 2020), well GEW-4 had 8,782 ug/L tVOCs (up from 1,665 ug/L in Jan. 2021). Well MW-8R and MW-14 were blocked by vehicles and MW-9 was dry, so these wells were not sampled. Rpt concludes that GWET system continues to be effective in reducing GW contam at site. URS will continue quarterly GW monitoring, work with EnviroTrac to optimize recovery of LNAPL from GEW-1, continue system OM&M and optimization, and evaluate need for suppl'l remedial actions possibly including surfactant injections. - JK 12/20/21: Reviewed System Performance Monitoring Rpt for 4/30 thru 7/28/21 by AECOM dated 11/11/21. PID readings taken during screening of remedial system off-gas were all zero during rpt period; lab sample of off-gas taken 7/28/21 showed 0.33 ppbv of benzene, well below discharge limit of 2.7 ppmv. Extraction wells GEW-1 and GEW-4 operated during this rpt period. System flow meters did not function properly during this period, and NYCDEP discharge flow meter stopped working in Dec. 2020. DEP meter was replaced on 7/12/21; discharge measured from 7/12 to 7/28/21 was 5,650 gals of total fluids. Monthly sampling of influent from extraction wells showed influent from GEW-1 ranged from 54 to 154 ug/L total VOCs, influent from GEW-3 ranged from 65 to 315 ug/L tVOCs, influent from GEW-4 ranged from 55 to 570 ug/L tVOCs. LNAPL was measured in GEW-1 this rpt period, ranging from 0.02 to 0.07 ft; an absorbent sock was installed in GEW-1 in Oct. 2021. GW sampling on 7/8-9/21 showed well GEW-4 had 1,746 ug/L tVOCs (down from 8,782 ug/L in April 2021), well MW-6R had 52 ug/L tVOCs (up from 3 ug/L in April 2021), well MW-7R had 865 ug/L tVOCs (down from 1,270 ug/L in April 2021), well MW-10 had 1,023 ug/L tVOCs (down from 1,425 ug/L in April 2021), well MW-11 had 1,614 ug/L tVOCs (up from 610 ug/L in April 2021), well MW-15 had 24,082 ug/L tVOCs (up from 12,708 ug/L in April 2021); wells MW-13 & MW-14 were ND; MW-9 was dry. Rpt states that on-site GWET system continues to be effective in reducing GW contam at site. AECOM will continue quarterly GW monitoring, work with EnviroTrac to optimize recovery of LNAPL from GEW-1, continue system OM&M and optimization, replace faulty system flow meters tracking flow from extraction wells and flow to & from air stripper with new magnetic flow meters, and evaluate need for suppl'l remedial actions possibly including surfactant injections. - J. Kolleeny 01/20/22: Received email from Kevin Shanahan of AECOM: Jonathan, This e-mail is intended to notify you of recent developments at Midtown South Pct. 1. System Outage On Jan. 14, 2022 our remediation system O&M contractor EnviroTrac reported that thermostat on system enclosure exhaust fan malfunctioned, resulting in fan remaining on continuously. This resulted in system freezing up, a broken pipe and cracked check valve from air stripper transfer pump P-301. Thermostat was removed and will be replaced prior to warm weather when exhaust fan is required to exhaust hot air from enclosure. Broken pipe was replaced on Jan. 17, 2022 by EnviroTrac staff. Envirotrac had to order check valve & replaced it on Jan. 19, 2022. After replacing pipe & check valve, EnviroTrac restarted system. At that time, Envirotrac determined that transfer pump P-301 was also damaged from system freezing, so system remains down until pump can be ordered and replaced. 2. Change in O&M Contractors AECOM s new remediation contract with NYCDDC started in Oct. 2021. New contract required us

to procure new subcontractors. Clean Globe Env't'l (CGE) was successful bidder for system O&M at this site. We held a meeting at site on Jan. 19, 2022 to coordinate hand-off of O&M responsibilities from Envirotrac to CGE. CGE's scope of work includes replacement of down-hole pumps/transducers, system flow meters & transfer pumps, including P-301. CGE will expedite ordering & replacing equipment, especially transfer pump P-301 so system can be brought back on-line. Let me know if you have any questions. - J. Kolleeny 02/04/22:  
Reviewed System Performance Monitoring Rpt for July 29 thru Oct. 28, 2021 by AECOM dated 1/11/22. PID screening of system vapor discharge from air stripper gave ND readings throughout rpt period; a vapor sample collected for lab analysis on 11/10/21 showed benzene in compliance with DEC air discharge std. Extraction wells GEW-1 and GEW-4 operated during this rpt period. NYCDEP flow meter indicated GWET system discharged 42,356 gals of GW during rpt period. Sampling of influent from extraction wells indicated total VOCs ranged from 103 to 146 ug/L in GEW-1, from 85 to 250 ug/L in GEW-3, and from 423 to 545 ug/L in GEW-4. GW samples taken on 10/14/21 from extraction wells themselves showed GEW-2 was ND, GEW-3 had 1.5 ug/L tVOCs, and GEW-4 had 3,562 ug/L tVOCs; GEW-1 had product (0.05 ft) so wasn't sampled (GEW-1 had 0.09 ft of LNAPL on 9/30/21). An absorbent sock was put in GEW-1 on 9/16/21; sock was replaced on 10/13 and 10/29/21. Quarterly GW sampling on 10/13 & 10/14/21 showed well MW-6R had 10 ug/L tVOCs (down from 52 ug/L in July 2021), well MW-7R had 475 ug/L tVOCs (down from 865 ug/L in July 2021), well MW-10 had 142 ug/L tVOCs (down from 1,023 ug/L in July 2021), well MW-11 had 12 ug/L tVOCs (down from 1,614 ug/L in July 2021), well MW-15 had 19,315 ug/L tVOCs (down from 24,082 ug/L in July 2021), well GEW-4 had 3,562 ug/L tVOCs (up from 1,746 ug/L in July 2021). AECOM concludes that operation of the GWET system at site continues to be effective in reducing dissolved VOC levels, and LNAPL is only present in one small area of site (well GEW-1). Upcoming actions include continuing quarterly GW monitoring; working with subcontractor to optimize recovery of LNAPL from GEW-1 and optimize system operation for more continuous pumping to increase capture zone; performing scheduled quarterly & semi-annual O&M tasks; replacing extraction pumps, flow meters, transfer pumps, and GAC in liquid-phase treatment units under new system operating contract; removing inactive SVE part of system and restoring site; and evaluating need for surfactant injections or other remedial actions to residual product and saturated zone impacts, with submission of a work plan to DEC for approval prior to implementing any supplemental remedial actions. - J. DEC Memo: "05/23/07-Vought-Duty desk officer. Vought spoke to Bob Laga(Fax 718-359-7865) and SVE and three groundwater wells onsite with SpillBusters installed and Franklin geologist performing weekly inspections of well and system. Franklin was contacted by NYPD that sump of UST was full of product and alarm for Veeder Root was going off. Franklin performed site visit and approximately 20-50 gallons of gasoline present in sump. Vacuum truck estimated time of arrival in two hours to recover gasoline. As per Franklin field geologist level of product in sump has remained constant (may indicate no loss to subsurface). No product in groundwater monitoring well immediately adjacent to tank with product in sump. Vought discussed site with DEC Krimgold and tightness test letter prepared by Vought and submitted to DEC Falvey for signature. Letter sent with one month due date to owner on PBS and cc to Franklin: NYCPD Building Maintenance Section 59-06 Brooklyn Queens Expressway Queens, NY 11377 05/29/07-Vought-See also new closed spill #0702402 for spill caused by delivery to broken fill despite instructions by Franklin to not deliver until fill was repaired. Vought called Franklin and spoke to Bill. Franklin reiterated requirement for no more deliveries. Klein still seeking bids for work. 07/08/08: This spill case transferred from J. Vought to J. Kolleeny. Problems with fill port and fuel deliveries have been rectified, any product released to environment will be addressed by remedial system on-site, as there is ongoing remediation under DDC consent order spill 9512583. This spill is closed, see also remarks for spill 0705553. - J. Kolleeny "

DEC Memo: "This site is already an active longterm remediation site - Spill #9512583 As part of this remediation effort, there are existing monitoring wells on the site that are tested periodically. Today, the geologist found 4 ft of gasoline product floating on the water table in a well that previously had nothing. The manway was checked and found to be full of gasoline as well. This was clearly an overfill from a recent delivery. Franklin and/or URS is working the long term cleanup of the site and has arranged for a vac truck to clear out whatever is possible right now. On a long term basis, the existing remediation system will be used to skim the free product from the water table and remove it from the site. This problem will now be addressed by the contractor through the existing long term spill

staff that spills are continuing to occur related to damaged fill line to gasoline UST at Midtown South. Initial spill (0613411) occurred in March '07 when gasoline was found in tank sump and nearby monitoring well. According to URS's system performance reports, Franklin Co. determined that tank's fill line was damaged, and they installed direct fill to tank to bypass damaged line. Do you know if Franklin plugged up old fill port when they installed direct fill? It appears that fuel deliveries continue to be made to old fill line, and product keeps showing up in tank sump and monitoring wells. On May 23rd, spill 0702185 was reported by NYPD because sump was filled with gasoline and Veeder Root alarm was going off. Today, another spill was called in (0705553) because of product in sump. Please take necessary steps to have old fill port blocked so it cannot be used anymore (or repaired so it won't leak) as soon as possible, and please also check out entire tank system to make certain it is damaged fill line that's problem, and that there are no other leaks in system. Please get back to me on this and let me know what actions have been taken to address this situation. Afterwards, spoke again with Ryan Piper, who suggested tank be taken out of service and emptied until problem is solved. Sent email to Afsar Samani of DDC, cc's to Jane Staten & Harvey Roberts of URS: In light of ongoing problems with gasoline UST at Midtown South Precinct, I strongly suggest that tank be taken out of service and emptied until problem(s) with tank and piping has/have been addressed. If this is not practical because police have no alternative location to fuel their vehicles, then please take whatever steps are necessary to immediately rectify problem(s) with tank system. NYCDDC is conducting remediation at this site using SVE and groundwater extraction & treatment systems, and these ongoing spills of fresh gasoline to subsurface will set back remedial efforts for months, or more likely, years, so it is in DDC's interest to resolve this situation promptly. In addition, these releases are a violation of Environmental Conservation Law, as you are aware, and if they continue to occur, our spill responders may be inclined to call Environmental Conservation Officers to site to issue summons. On 8/16/07, received email from Afsar Samani of DDC: Harvey informed me that vac-truck is scheduled to remove product from sump today. Also, NYPD subcontractor is going to be scheduled to repair fill line. URS is looking into this and will make all necessary action to make sure tank and fill port is tight. Then, received email from Jane Staten of URS: I just spoke with Lt. Pete Polanco for an update on problems with gasoline tank at Midtown South Precinct. According to Lt. Polanco, NYPD tank contractor inspected fuel fill line this morning and found no problems with integrity of line. Therefore, Lt. Polanco believes that product in tank sump was caused by fuel delivery vendor. NYPD are expecting fuel delivery vendor at site this afternoon to discuss problem and also to remove gasoline currently in sump. I will keep you posted. I then sent email to Afsar Samani, with cc's to Jane Staten & Harvey Roberts of URS, Jerry Aliberti of DDC and Lt. Peter Polanco of NYPD: Thank you for your response. Please be advised that no fuel deliveries should be made to gasoline tank at Midtown South until tank system has been tested to insure integrity of all elements of system. Documentation of tightness test results, and of any repairs made to fill line since problem was discovered in March 2007, must be submitted to NYSDEC before fuel deliveries can resume. This situation is high priority and NYPD should arrange for tightness testing immediately. Then, received phone call from Lt. Polanco of

NYPD, who said repairs to damaged fill line were done in June and fill line was tightness tested and passed, and he believes current problem is due to fuel delivery vendor not hooking up vapor recovery line (truck is parked in street long distance from fill port, so there's long length of delivery hose). He said product will be removed from sump and fill line will be tested again. I asked him to submit documentation of repair work and tightness testing, and sent him email with my address. Then, I was cc'd on email from Afsar Samani of DDC to Lt. Polanco of NYPD: We were informed by following correspondence from NYSDEC that gasoline tank over at Midtown South Police Precinct should not receive any more deliveries until a tightness test has been scheduled. Please let DDC know when you can arrange for your subcontractor to perform a tightness test on this tank. This is very crucial to remedial effort that URS is performing to clean up site on behalf of DDC. - J. Kolleeny 08/21/07: Received fax on 8/20/07 from Lt. Polanco of NYPD fuel control unit, with letter from Energy Tank & Environmental Services dated 7/16/07 describing repairs to and pressure testing of fill line to gasoline UST (in eDocs). Sent same-day email response to Lt. Polanco, cc's to Afsar Samani & Jerry Aliberti (DDC), Jane Staten & Harvey Roberts (URS): Thank you for faxed description of repair work to fill line of gasoline UST at Midtown South and diagram of site, tank and fill port, provided by Energy Tank & Environmental Services, Inc. However, these items do not completely satisfy my request for documentation of tank repairs and testing of fill line, and they raise additional questions. Page that describes repairs and subsequent pressure testing of line is dated 7/16/07. Is that date when repairs were done? I would like to see dated invoice for repair work in addition to this description. Description states that problem was with primary fill line, and that secondary line was intact, which allowed product to go into containment sump and not into ground. However, in March when this problem was first discovered, URS field personnel reported 5 feet of fresh gasoline in groundwater extraction well that had never had gasoline in it before, so somehow product did get into ground. If repairs were done on 7/16/07, why was gasoline again reported in containment sump on top of tank on August 15th (spill number 0705553)? You mentioned that this was caused by delivery person not hooking up vapor recovery line, yet our Petroleum Bulk Storage staff say this would not result in product appearing in sump. I would greatly appreciate it if you could provide additional documentation of repair work, and if NYPD would schedule a tightness test of all lines going into and out of tank, as well as a hydrostatic test of tank's containment sump. I would like to be informed in advance when these tests have been scheduled, so that I can attend. - J. Kolleeny 09/14/07: Visited site 9/10/07 to observe hydrostatic test of tank sump and tightness test of fill line. Mike Suppe of Fenley & Nichol on hand, said sump held water, more or less (slight drip along electric conduit extending from this sump to next sump at end of tank), for over 2 hours. He said no way to test fill line (it's about 2-3 feet long from remote fill port) without physically removing it, but he will test entire tank system. In discussions of how product could turn up in sump, I mentioned that Lt. Polanco said it had to do with delivery person not hooking up vapor recovery line. Mike wasn't clear on how that would cause product to appear in sump. I called Lt. Polanco, who said by not hooking up vapor recovery during delivery, excessive back pressure was created, so when delivery hose was disconnected, product would

back up and spill into overflow bucket, then drain to sump. Mike Suppe said this isn't possible, since any fuel spilled into spill bucket would drain back into fill line, then into tank (not sump). Mike suggested that temporary fill, which was used while remote fill line was awaiting repair, had not been properly capped once NYPD switched back to using remote fill, and poor threading on top of direct fill extension cylinder and improperly screwed-on cap for this extension, may have resulted in product spilling out capped off temporary fill, again related to back pressure from not hooking up vapor recovery (see photos in eDocs image folder). NYPD now has on-site a long hose to be used for vapor recovery, and reportedly there have not been any more problems with product appearing in sump after deliveries. Spoke with Mike Suppe on 9/11/07, who said tank system passed test. I discussed whole situation with Jane Staten of URS, who forwarded to me email from Harvey Roberts of URS (in eDocs) indicating temporary direct fill was installed by NYPD, not Franklin Co. as stated in URS's system performance reports for site. While this may explain why product was appearing in sump, none of this adequately explains how product escaped into ground and turned up in groundwater extraction wells and monitoring wells (for site cleanup under spill no. 9512583). Mike Suppe indicated if damaged fill line was unknown for a long time, sump could've filled up with gas during deliveries and overtopped inner rim of sump, and from there it could seep into ground. URS will continue to gauge nearby wells for product levels, and see if they continue to decrease. Harvey Roberts email also calls into question when exactly NYPD had repairs done to fill line. I contact Lt. Polanco again and asked for more detailed documentation of repair work, indicating date(s) and nature of work done. He said he would work on getting me that info. - J. Kolleeny 09/17/07: Received fax from Lt. Polanco, a revised version of earlier fax with statement by Energy Tank & Environmental Services regarding repair work on fuel fill line. Statement is still dated 7/16/07; it now states that they uncovered line on 7/5/07, reconnected and tested line on 7/6/07, reporting that line held pressure during backfilling, they then witnessed a fuel delivery on 7/9/07 with no leaks observed, so they re-surfaced area. - J. Kolleeny 01/04/08: On 12/19/07, sent email to Jane Staten of URS: I recently asked you to ask your field personnel to check if gasoline is still showing up in tank-top sump after fuel deliveries at this site. Do you know if they've checked on this? On 12/26/07, received email reply from Jane: Our field technician checked tank sumps at Midtown South on 11/29/07. One sump was dry and other contained a little water. There was no evidence of gasoline. Based on no new reports of gasoline appearing in tank top sump, it appears problem(s) that caused this and related spills has (have) been addressed; OK to close spill. - J. Kolleeny "PRODUCT IN SUMP"

DEC Memo: "02/19/08: This spill case transferred from V. Zhune of Spill Response staff to J. Kolleeny. On Feb. 13, URS (Franklin?) personnel at site noted 10 ft. of fresh free product in a groundwater extraction well (GEW-1), and several ft. of product in nearby monitoring wells. Product was bailed down to less than a foot. On Feb. 15th, URS returned to site and measured 5 ft. of product in GEW-1, and noted that spill buster in well was not operating. Nearby well MW-6 had 3 ft. of product. I instructed Jane Staten of URS to call in a new spill. Contacted Lt. Pete Polanco of NYPD who said they had arranged for Fenley & Nicol to perform a tank system tightness test on saturday, Feb. 16th. I asked that the results be faxed to me when available. On tuesday Feb. 19th, received test results by fax from Lt. Polanco, tank system tested tight (results in eDocs). Contacted Jane Staten of URS, who said their field staff visited site on monday Feb. 18th, found no product in GEW-1, 3 ft. of product in MW-6, and 0.02 ft. in MW-7. She suggested I ask NYPD to look into their inventory records, especially delivery versus tank volume records, for deliveries between Feb. 6 and Feb. 13. I sent email to Lt. Polanco asking him to look into these records and let me know. - J. Kolleeny 02/21/08: Received email reply from Lt. Polanco of NYPD:

We did an analysis with the last few deliveries. We determined that during the period of Feb 6 through Feb 13, 3167 gallons was used and we were able to account for 3146 gallons. Therefore we have an unaccounted loss of less than 1%. We passed the tank tightness test. So the question still remains where is this product coming from? Obviously it is not from my fuel site. As of today MTS Precinct is empty and will not be having a delivery for 1 week. Can URS check their wells tomorrow and see if any product appears in the next 7 days? Let me know what you want us to do. I also received email from Jane Staten of URS with detailed timeline of events, in response to my request: Following is a timeline of events concerning the new spill at Midtown South: Feb 13 (Wednesday) Franklin visits site to perform weekly O&M and verbally reports that there is 10 feet of product in well GEW-01; there was a reported kink in the GEW-01 Spill Buster discharge line and when it was fixed, the pump evacuated the product in the well URS visits site to perform monthly product recovery using a vacuum truck and records free product in MW-06 (3 ft), MW-07 (2 ft), and IW-15 (couple of inches); all product evacuated from wells Feb 15 (Friday) URS visits site to gauge wells and finds product in GEW-01 (4.2 ft), MW-06 (2.6 ft), and MW-07 (0.3 ft) URS calls in spill to NYSDEC Spill Hotline; assigned #0712091 Received email from Franklin that product storage tank in GW treatment shed is full and that they scheduled a vacuum truck to remove product Feb 16 (Saturday) NYPD performs tightness test on tank system Feb 18 (Monday) URS visits site with vacuum truck and measures product in MW-06 (3 ft) and MW-07 (0.02 ft); no product detected in GEW wells; all product evacuated from wells; 35 gal product removed from product storage drum in GW treatment shed I do not understand what happened to the 4 feet of product in GEW-01 between Friday and Monday. I asked Franklin if they sent a vacuum truck to the site during that time to remove product from the product storage drum and the answer was 'no.' So that means that the Spill Buster pump in GEW-01 would have remained idle over the weekend. While that is a mystery, the bigger mystery is the source of the gasoline since the tank system tested tight and NYPD records indicate less than a 1% discrepancy in fuel inventory records. - J. Kolleeny 03/20/08: On 2/26/08, sent email to Jane Staten of URS, asking if their field personnel have been back to site and gauged wells for product levels? Jane wrote back: We were at site on Monday with vacuum truck and there was 2.4 feet of product in MW-06, 0.3 feet in MW-07, 0.03 feet in MW-08, and 3.18 feet in GEW-01. Spill buster pump in GEW-01 did not appear to be working so we contacted Franklin. Franklin's regular O&M day for Midtown South is Wednesday, so I'll probably receive their report tomorrow or Thursday. URS will continue to bring vacuum truck to site to remove product until it appears that situation is under control. I'll keep you posted. On 3/20/08, I sent email to Jane Staten asking for updated info on product in wells and status of spill buster pump in GEW-01. - J. Kolleeny 03/28/08: Received email from Jane Staten of URS on 3/27/08, with attached table showing well gauging data from 1/17/08 to 3/14/08 (in eDocs). Data show product in GEW-01 has decreased, from 3.18 ft. on 2/25/08 to 0.0 ft. on 3/3/08, to 0/15 ft. on 3/14/08; however, product in MW-6 seems not to be going away, with 3.75 ft. on 3/14/08; MW-7 went from 0.30 ft. on 2/25/08 to 0.07 ft. on 3/3/08 to 0.44 ft. on 3/14/08. Jane also reported that spill buster pump in GEW-01 is operating and URS has instructed contractor to restart GW extraction pumps. - J. Kolleeny 06/11/08: At direction of my supervisor, Vadim Brevdo, I closed this

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead\_DEC Field was VOUGHT 8/2001-Tank closure report prepared by Franklin Company Contractors. 6/29/2001-Franklin implemented bioremediation by mixing 240lbs of ORC with surrounding soils and filling in excavation. 500 gallons of Waste stream technologies W-4 bio-blend mixture also injected.. Site was bakcfilled with 3 to 6 feet of clean fill, 6 inches of crushed stone and an 8-mil polyethylene vapor barrier. Area was then covered with 6 inch reinforced concrete slab. Soil VOC pass TAGM, soil SVOC exceed TAGM but are due to fill composition. Site visit by Jacob Krimgold showed no visual evidence of contamination. Groundwater VOC and SVOC also pass TAGM. 12/13/2001 Spill closed as per Mark Tibbe, Jacob Krimgold and myself (all NYSDEC personnel). "  
Remarks: "SOIL SAMPLE RESULTS FROM REMOVAL OF 3 TANKS AT LOCATION. NO VISABLE SIGNS OF CONTAMINATION."

Highlights: Former Use: The High Line is an elevated 1.5-mile long freight rail line on the West side of Manhattan that has not been used since 1980. It was constructed between 1929 and 1934 as part of the West Side Improvement Project. During the period from 1934 to 1982, the High Line was an active railroad servicing the warehouses and terminals adjacent to the active waterfront industries in this section of Manhattan. Since 1980, when the last train utilized the structure, it has been unused. In June 2005, the Federal Surface Transportation Board granted a Certificate of Interim Trail Use (CITU) to allow the High Line to be used as public open space in the Rails-to-Trails Program. The City of New York took title to the High Line from CSX Transportation, Inc. in November 2005.

Property Description:

The High Line is an elevated 1.5-mile long freight rail line on the West side of Manhattan that has not been used since 1980. It was constructed between 1929 and 1934 as part of the West Side Improvement Project. During the period from 1934 to 1982, the High Line was an active railroad servicing the warehouses and terminals adjacent to the active waterfront industries in this section of Manhattan. Since 1980, when the last train utilized the structure, it has been unused. In June 2005, the Federal Surface Transportation Board granted a Certificate of Interim Trail Use (CITU) to allow the High Line to be used as public open space in the Rails-to-Trails Program. The City of New York took title to the High Line from CSX Transportation, Inc. in November 2005.

| Highlights:                   | Former Use: The High Line is an elevated 1.5-mile long freight rail line on the West side of Manhattan that has not been used since 1980. It was constructed between 1929 and 1934 as part of the West Side Improvement Project. During the period from 1934 to 1982, the High Line was an active railroad servicing the warehouses and terminals adjacent to the active waterfront industries in this section of Manhattan. Since 1980, when the last train utilized the structure, it has been unused. In June 2005, the Federal Surface Transportation Board granted a Certificate of Interim Trail Use (CITU) to allow the High Line to be used as public open space in the Rails-to-Trails Program. The City of New York took title to the High Line from CSX Transportation, Inc. in November 2005. |

Property Description:

The High Line is an elevated 1.5-mile long freight rail line on the West side of Manhattan that has not been used since 1980. It was constructed between 1929 and 1934 as part of the West Side Improvement Project. During the period from 1934 to 1982, the High Line was an active railroad servicing the warehouses and terminals adjacent to the active waterfront industries in this section of Manhattan. Since 1980, when the last train utilized the structure, it has been unused. In June 2005, the Federal Surface Transportation Board granted a Certificate of Interim Trail Use (CITU) to allow the High Line to be used as public open space in the Rails-to-Trails Program. The City of New York took title to the High Line from CSX Transportation, Inc. in November 2005.

DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead\_DEC Field was SANGESLAND Sangesland responded to the site of a reported contaminated soil location. Owner of the site is excavating what was a parking lot in order to install footings for a new building. Upon excavation, the southwest corner of the property at 160 west 22nd St was found to have petroleum contaminated soil. After contacting DEC rep Mark Tibbe, it was determined that the property directly to the south (161 west 21st st) was a taxi company with an ongoing state PIN cleanup project. Mr. Tibbe stated that the parking lot at 160 west 22nd st did have 3 monitoring wells associated with the ongoing clean up. AKRF rep Mimi Sotiriou (212-340-9790) stated that all contaminated soil would be dug out, sorted, and shipped out with manifest for proper disposal. Since the contamination was only in the extreme southwest corner of 160 west 22nd st, directly adjacent to the property line of the taxi company and within 15 feet of the remediation equipment, it was clear where the source of the contamination was from. 11/1/2000 AKRF sent a letter to DEC stating that 228.75 tons of contaminated soil was removed from the site. AKRF stated that Petroleum contaminated soil was removed from along the southwest border of the property until no petroleum-like odors were observed.... ..Soil was transported to Mt. Hope Recycling of Wharton, New Jersey Since all contaminated soil was removed from this site, this spill number was closed out. IT SHOULD BE NOTED THAT EXISTING CONTAMINATION FROM THE PROPERTY AT 161 WEST 21ST STREET MAY HAVE AN IMPACT ON THE NEW BASEMENT WALL INSTALLED ON THE SOUTHWEST CORNER OF 160 WEST 22ND STREET. Spill closed 1/2/2001 "

Remarks: "CALLER REPORTING A SPILL OF MATERIAL FROM A POSSIBLE TANK FAILURE ODORS OF GAS ARE BEING REPORTED SPILL WAS DETECTED ON THE SOIL NO CALLBACK AND CLEAN UP CREW IS ON SCENE."

DEC Memo: "10/10/95: This is additional information about material spilled from the translation of the old spill file: GASOLINE ODOR. see also 8701176, 8701597 (SP97155), 9400302, 9403442, 0006798. (also addresses 160 W 22nd St, 166 W 22nd St) 3/18/04 Received phonecall from Kevin Kleaka, Impact Environmental. Excavation is planned for next Tuesday, 3/23. RAP was previously approved by M. Tibbe. DEC had requested 5day notification. Requested project manager return phonecall (631-269-8800 or cell 516-805-8892) when reassigned.(KMF) 3/22/04 Transferred from Tibbe to Foley. Rommel 3/23/04 Spoke to K. Kleaka, Impact Env. Excavation to begin tomorrow. Tanks have been out since approx 1992-1994. 3/31/05 Spoke to Scott Underhill, URS (518-378-8766). He was hired by Bank of NY to conduct a third party peer review. The bank is putting up funding for the development of the property. 4/5/05 Received update from K. Kleaka, Impact Env. In 3/04, they excavated 340tons of gasoline impacted soil. On 2/14/05, endpoint sampling from 8 locations was conducted and analyzed by 8021. On 3/15/05, additional endpoints were collected from 3 locations and analyzed by 8021. Additional excavation to mitigate residual soil contamination on the northwestern portion of the site will be conducted in 4/05. Construction of building is now to include a second sub-level which will require removing 3-5 feet of bedrock (bedrock is at 17'bgs). GW is at 11-14'bgs. 4/13/05 Spoke to K. Kleaka, Impact Env. They have excavated down to bedrock across most

of the site. Not much water is accumulating and have not had to dewater. Will schedule site visit and discuss possible modifications to the RAP. 5/17/05 Site visit conducted with owner, Impact, URS and Bank of America. Currently chipping away at bedrock which is about 17'bgs. All soil removed. Almost no groundwater infiltration which is surprising since perched GW was detected at 11-14'bgs. Requested a water sample from the puddle in the NW corner of property. They are contemplating an ORC application. I recommended that if the GW was clean from the bedrock surface, that they not go ahead with ORC. If it is contaminated, they will do ORC pour and will need to monitor effectiveness. Well locations possible along W 21st. Inspected backyard of 166 W 22nd St which is about 8'bgs. Access for equipment, especially for bedrock drilling, would be very difficult but may be able to obtain perched gw samples. 6/6/05 Received results for three grab samples taken from the standing water on site, collected on 5/18/05. BTEX ranged from ND to 2005ppb and MTBE from 128ppb to 1080ppb. Owner requested that the ORC application be eliminated from the RAP. 6/8/05 Email to K. Kleaka and K. Lalezarian. Required that the ORC application be completed along with effectiveness monitoring. Impact to submit revised RAP. 9/9/05 Received revised RAP via email. During the period from 3/24/05 to 5/20/05, 3983 tons of petroleum impacted soil was excavated. It is expected that removal of all source materials will reduce the concentrations found on the perched watertable. However, to address the residual impacts, Impact Env. proposed ORC for bio-enhancement. It will be spread as a dry mixture and the natural formation will provide the water to activate the release. A 6mil vapor barrier and passive vent system will be installed. A MW will be installed along W 21st St. GW samples will be collected before and after the application, analyzed for VOCs and taking field measurements for DTW, pH and DO. Due to physical constraints, no wells are to be installed at 166 W 22nd St. 9/9/05 Approved revised RAP. As discussed with K. Kleaka, the ORC will be applied in a slurry in dry areas and directly mixed with accumulated water in the wet areas. 5/18/06 K. Kleaka, Impact Env, indicates a closure report will be submitted next week. 5/25/06 Reviewed site closure report. The remediation activities completed on the site included the removal and disposal of 3,982.92 tons of petroleum impacted soil and construction fill, confirmatory endpoint soil sampling, certified laboratory analysis, bio-remediation of perched groundwater, and the installation of a vapor barrier in conjunction with a passive subslab ventilation system. After detecting contaminants in soil, all soils were removed to the bedrock surface. 450lbs of ORC was introduced following the detection of VOCs on the perched groundwater. Concentrations of total VOCs in perched water ranged from 165ppb to 3556ppb. MW-1 was installed in order to monitor the effectiveness of the bio-remediation. However, the well did not produce any water and therefore could not be sampled. It appears that the actions taken are protective of human health and the environment." Not reported

Site Description: "Location: The LIRR West Side Yard Site (site) is located at the southeast corner of 12th Ave and W 33rd St in midtown Manhattan. This is the northwest corner of the Long Island Railroad's West Side Yard (WSY), where commuter trains which have discharged at Penn Station are stored for their next outbound trip. The West Side Highway lies immediately to the west. The northern end of the High Line Park traverses part of the site. Site Features: The site is largely flat, and is almost completely filled with railroad tracks. Small maintenance buildings are present along the western ends of the storage tracks. Current Zoning and Land Use: The WSY is currently used for the storage of passenger trains. Periodic and routine cleaning and washing of the interior of the passenger train cars is performed. The site is zoned for commercial use. Past Use of the Site: The WSY has been utilized for railroad operations for over 100 years. Location: The LIRR West Side Yard Site (site) is located at the southeast corner of 12th Ave and W 33rd St in midtown Manhattan. This is the northwest corner of the Long Island Railroad's West Side Yard (WSY), where commuter trains which have discharged at Penn Station are stored for their next outbound trip. The West Side Highway lies immediately to the west. The northern end of the High Line Park traverses part of the site. Site Features: The site is largely flat and is almost completely filled with railroad tracks. Small maintenance buildings are present along the western ends of the storage tracks. Current Zoning and Land Use: The WSY is currently used for the storage of passenger trains. Periodic and routine cleaning and washing of the interior of the passenger train cars is performed. The site is zoned for commercial use. Past Use of the Site: The WSY has been utilized for railroad operations for over 100 years. Currently and historically, the LIRR has not stored any petroleum products in tanks or bulk containers in the western portion of the WSY, nor has maintenance activities involved the use of petroleum products. This site was previously reported to and investigated under the Spills program as spill no. 0407411, beginning late 2004. Contamination was discovered in a soil boring on the site during a Phase II Environmental Site Investigation of the WSY for the NY Jets organization, which was then reported to the DEC. Site Geology and Hydrogeology: The northwest corner of the WSY is immediately underlain by a layer of historic fill, approximately 20 to 30 feet thick. Site contamination appears to have been co-deposited with this fill, which was used to extend the Hudson River shoreline westward circa 1900. Below the historic fill exists a native low permeable silty clay to clay unit. Groundwater is present beneath the WSY within the urban fill at a depth of approximately 5 to 7 ft bgs (below ground surface), flowing in a northwesterly direction. "

Env Problem: "Nature and Extent of Contamination: Prior to Completion of Remediation Based upon investigations conducted to date, the primary contaminant of concern is coal tar. Soil- The most significant visual evidence of contamination, including staining, hydrocarbon and naphthalene-like odors and elevated PID readings, was observed within the fill deposits in soil borings SB-05 through SB-08, between 15 and 40 feet below grade, and starting at least 10 to 20 feet below the water table. Seventeen of the 20 subsurface soil samples exhibited

detectable concentrations of PAHs, with total PAH concentrations ranging from 0.3 ppm in SB-03 (20.5 - 22.5 feet) to a maximum of 1,818 ppm in SB-05 (25 - 27 feet), adjacent to the West Side Yard along the east side of 12th Avenue in the vicinity of the historic observed area of contamination. This sample had visual evidence of contamination, which also exhibited the highest BTEX concentration, but were below the Industrial Use SCOs. Soil samples from SB-06 (21 - 23 feet) and SB-08 (30 - 33 feet) were sent for forensic fingerprint analysis. The analysis suggests that the sample contained pyrogenic material derived from coal and not petroleum, and the PAH distribution was very similar to tars formed from MGPs utilizing carbureted water gas processes. Groundwater- NAPL was not identified in any of the groundwater monitoring wells. However, six of the 17 groundwater samples identified BTEX and PAH compounds at concentrations above Class GA standards. These samples were collected at or in the vicinity of soil borings which exhibited soil contamination and were screened at a depth intercepting the zone of soil contamination observed at 15 to 40 feet below grade. Off-site wells demonstrate that this contamination is not migrated farther off-site. Soil Vapor and Indoor Air- Soil vapor and indoor air have not been evaluated."

Health Problem: "Since the site is fenced and covered by asphalt or concrete, people will not come into contact with site related soil and groundwater contamination unless they dig below the surface. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Currently there are no occupied buildings on the site. The potential for soil vapor intrusion on- and offsite areas should be evaluated if a change of use is proposed. "

S100167794

discuss current status and plans of site. Fax to DEC from Gaseteria-2/22/90-Pedneault Associates (516-467-8477)-Groundwater analyticals from six monitoring wells and two soil disposal piles (no site plan in file). Groundwater analyticals show 275ppb benzene(W1), 341ppb benzene(W2), 327ppb benzene(W3), 448ppb benzene(W4), 158ppb benzene(W5) and 128ppb benzene(w6). Disposal samples show 1433ppb benzene(east pile) and 188ppb benzene(west pile). Groundwater analyticals-5/21/90-Pedneault Associates-Groundwater analyticals from six monitoring wells (no site plan in file). Groundwater analyticals show 2308ppb benzene(W1), 1091ppb benzene(W2), 680ppb benzene(W3), 385ppb benzene(W4), 736ppb benzene(W5) and 810ppb benzene(w6). Subsurface Investigation-7/90-Environmental Management Services. In Jan 1990 a subsurface water line broke beneath 10th avenue near the northwest side of the site. Water entered the basement of the adjoining building along with some gasoline. DEC required installation of six monitoring wells on Gaseteria property. Gasoline vapors detected in sewers in building across 10th Avenue. This subsurface investigation consisted of eight soil borings and installation of two additional monitoring wells. Three pump islands serviced by 12 (550-gallon) gasoline USTs and one (2000-gallon) diesel UST. Local topography slopes to the north. Groundwater at depth of 7-9' below grade. Bedrock is 7-11' below grade and slopes downward toward the northwest and southwest corners of site. Groundwater suspected to flow northward . All wells onsite were set firmly on bedrock and there is not sufficient information available to determine specific groundwater flow . No free product detected in wells. Groundwater appears to flow from 10th Ave towards the USTs. Report recommends groundwater monitoring with possible additional delineation. No soil samples submitted for analysis nor were screened via PID. Letter from DEC to Gaseteria-7/12/90. Letter from DEC (Sigona) to Gaseteria (Oscar Porcelli) requesting subsurface investigation work plan to be apporoved by the DEC to investigate the presence of gasoline vapors. Plan must be received by the DEC by 7/17/90. Odor complaints in January 1990 and again in July 1990. Sigona performed site visit on 7/13/90. Fax to DEC-7/17/90. Letter from Environmental Management Services to DEC (Sigona) proposing: 1)investigation of subsurface utilities as potential pathways 2)determination of groundwater flow direction 3)groundwater monitoring 4)installation of six soil borings along western margin of station and installation of two additional monitoring wells. Letter from DEC to Gaseteria-1/5/95. Letter from DEC (Sigona) to Gaseteria (Angel Chang) requiring cleanup and removal of discharge . Letter also required immediate steps to abate seepage into basement of 403 W 40th Street. Response from Gaseteria required to DEC by 1/15/95. Letter from Gaseteria to DEC-1/20/95. Letter from Gaseteria (Chang) to DEC (Sigona) stating that Gaseteria will: 1) divert the flow of surface water away from the south wall of the building 2)install a SVE system in the basement alongside of the south wall between the concrete floor and the building foundation. Gaseteria does not believe there is a need to install new groundwater monitoring wells or to further develop existing wells.....since the problem appears to be surface related . Sample analyticals from basement of 480 10th Ave-8/96. Soil analyticals show 20664ppb ethylbenzene(sample 48334), 59164ppb xylene(sample 48334), 11000ppb napthalene(sample 48334). Letter from DEC to Gaseteria-9/10/96. Letter from DEC(Rommel) to Gaseteria(George Esayan). DEC in possession of analyticals from Clinton Housing(403 W. 40th Street) . Gasteria required to sample two

of the onsite monitoring wells for 8021/8270/lead. Letter from Clinton Housing Development Company-9/11/96. Letter from Clinton(Joseph Tuana) to DEC(Rommel) with copies of analyticals discussed above. Letter from Carl Sulfaro (attorney for Gaseteria) to DEC (Rommel)-9/20/96. Letter stating that Sulfaro authorized EMS Environmental Services to take two samples of the onsite monitoring wells . Samples will be taken 9/27/96. Groundwater analyticals-10/10/96. Analyticals from MW5 by EMS showing 42.56ppb methylene chloride, 5549ppb benzene, 107.33ppb toluene, 1024.75ppb ethylbenzene, 393.15ppb xylene and 0ppb MTBE. Letter from Clinton(Kathy Prioleau) to DEC(Rommel)-11/11/96. On 10/27/96 strong fumes entered basement of 480 10th Ave . NYFD onsite. Letter requests that DEC relay information on testing done at Gaseteria and UST inspection of Gaseteria . Letter from DEC(Rommel) to Gaseteria(Sulfaro)-11/25/96. Letter stating that requirements of fax dated 9/10/96 were not met because only one well was sampled and 8270/Lead analyses were not performed. Letter requires:1)submittal of an investigation plan to delineate soil and groundwater contamination 2)source determination 3)installation of three additional monitoring wells 4)installation of an air sampling port on the exhaust line of the venting system and monthly sampling for benzene and THC. Letter states that action must be taken within 45 days . Letter from DEC(Rommel) to Prioleau(Clinton)-11/26/96. Letter stated that DEC was never notified of odor complaints as 11/11/96 letter stated. Also attached to letter was copy of 11/25/96 letter from DEC to Gaseteria. Letter from Gaseteria(Sulfaro) to DEC(Rommel)-1/15/97. Letter stating that Gaseteria would prefer to perform site investigation, soil removal and/or remediation as needed concurrent with excavation anticipated as part of Federal EPA UST upgrade mandate and the work is expected to take place in Spring 1997 . Letter from DEC(Rommel) to Gaseteria(Roberto Porcelli)-7/29/98. Letter serving as final notification of obligations regarding petroleum contamination and vapor incidents . On 6/28/03 petroleum contaminated groundwater infiltrated basement of 480 10th Ave due to heavy rains. This is the seventh vapor complaint associated with Gaseteria since Jan 1990 . Letter states that the Department is allotting 30 days for Gaseteria to satisfy all requirements in DEC letter dated 11/25/96 . Deadline of 8/31/98 given by DEC. Letter from Gaseteria(Seth Friedland) to DEC(Rommel)-8/13/98. Letter stating that the June 1998 episode was caused by heavy rains and appears to be an isolated event and that Gaseteria does not agree with Departments conclusions . Letter stated that the station will be taken out of service on 9/15/98,permanently close the USTs and reinstall upgraded USTs on the northern boundary of the site. Letter from DEC(Rommel) to Gaseteria(Roberto Porcelli)-8/28/98. Letter serving as a reminder of 8/31/98 deadline . Letter from Gaseteria(Oscar Porcelli) to DEC(Rommel)-8/28/98. Letter stating that new USTs were ordered and that work will start the second week of September. Gaseteria intends to install four monitoring wells to replace those destroyed by station upgrade and will retain Environmental Management services to develop remedial plan. Letter from DEC(Rommel) to Gaseteria(Oscar Porcelli)-8/31/98. Letter confirming phone conversation where an agreement was reached that Gaseteria will comply with following requirements and complete the tank upgrade prior to 9/30/98. Letter also required that a workplan be submitted prior to 9/4/03 which included 1)complete delineation 2)soil and groundwater sampling plan for use during excavation activities 3)sampling of SVE emissions 4)installation of

three monitoring wells into bedrock and 5) cleaning and proper disposal of oil in the building floor drains and all associated discharge points. Letter from Camin Cargo Control (Gaseteria's Enviro consultant) to Gaseteria-10/5/98. Letter from Camin (Patricia Badding) stating that a site investigation and report shall be prepared. Investigation with Geoprobe and subsequent installation of monitoring wells scheduled for 10/16/98. Soil samples will also be collected during excavation for new USTs. Venting system emissions will also be sampled. Cleaning and proper disposal of any oil in the building floor drains and all associated discharge points is the responsibility of Gaseteria. Letter from DEC (Rommel) to Gaseteria (Oscar Porcelli)-10/8/03. Letter acknowledging receipt of Camin 10/5/98 proposal and requiring the following by 10/13/98:

- 1) Site plan with proposed boring locations
- 2) discussion of locations
- 3) discussion of endpoint sampling locations from UST excavation
- 4) discussion of delineation procedure
- 5) include MTBE with analyticals
- 6) collect groundwater samples from Geoprobe locations.

Letter from Camin (Badding) to DEC (Rommel)-10/13/03. Submission of 1) site plan with ten boring locations 2) Collection of six endpoint soil samples from UST excavation 3) excavation and disposal of contaminated soil encountered during tank installation 4) Inclusion of MTBE analyticals 5) collection of groundwater samples (if encountered). Investigation Results from Camin (Badding) to DEC (Rommel)-11/6/98. Results of eight soil borings performed. Soil analyticals show 2149ppb MTBE (SB1), 526ppb benzene (SB2), 188ppb benzene (SB4), 212ppb benzene (SB5), 4576ppb MTBE (SB6), 1458ppb benzene (SB7), 29114ppb naphthalene (SB7), 187ppb benzene (SB8). Groundwater analyticals show 1239ppb benzene (SB4), 1975ppb benzene (SB5), 5360ppb benzene (SB6). Subsurface Investigation Report Camin Badding 908-523-0616 10/16/98). Investigation report including results above of eight soil borings performed. There is approximately 2-4 inches of contaminated soil at the soil/bedrock interface in soil boring locations SB2, SB4, SB5, SB7 and SB8. Bedrock at depths of 6-11.5' below grade. A sheen was detected on all samples (groundwater). Venting system was sampled on 12/11/98 via a vacuum canister attachment to vent. Removed dispenser island is the proposed location of new USTs. See analyticals above. Venting analyticals show 264ppm TPH and no other volatiles. Baseline Acquisition Assessment Report-10/10/02 Delta Environmental (Brad Fisher). Purpose was to establish baseline conditions prior to proposed lease and raze and rebuild of site by BP. One soil borings performed in 4/02 to depth of 11.5'. Two borings drilled to 24.5 via air rotary and converted to temporary monitoring wells (MW1 and MW2). Delta recommends 1) gaseteria install permanent monitoring wells to delineate contamination. It is Delta's understanding that Gaseteria will retain the environmental liability of the subject site until spill closure has been obtained. At time of assessment three USTs on site (two 6000-gallon gasoline USTs and one 6000-gallon diesel UST) and four pump islands with six dispensers. Surrounding area is multiple story apartment buildings. Groundwater is located within bedrock fractures at depths between approximately 12.5 and 13.5 ft bgs. Former USTs onsite which were CLOSED IN PLACE include two (6000-gallon) gasoline USTs in 1998, one 6000-gallon diesel in 1999, ten 550-gallon gasoline USTs in 1998, one 550-gallon waste oil in 1998 and one 550-gallon fuel oil in 1996. Soil analyticals show 4570ppb xylenes (SB1) and 3970ppb isopropylbenzene (SB1) from depths of 10-11.5'. Groundwater analyticals show 148ppb benzene (MW1), 24800ppb MTBE (MW1) and 30.7ppb benzene (MW2). 10/21/2003-Vought-Reviewed site

with DEC(Rommel). Sent Stipulation Agreement with the following requirements: 1)Groundwater delineation via installation of bedrock monitoring wells at former boring locations SB1, SB4, SB5, SB6, SB7 2)Monitoring of vapors and groundwater intrusion 480 10th Ave 3)current status of SVE system and submittal of historic and current SVE effluent samples for benzene analysis or collection of indoor air samples from 480 10th Ave. 10/24/2003-Vought-Called LuJuana Smith (212-967-1644) and left message and explained requirements of 10/21/03 letter. 10/27/2003-Vought-Received message from Steve Muller will be taking indoor air samples from 480 10th Avenue. Vought returned call to Muller (516-395-5957). 10/28/2003-Vought-returned call to Steve Muller to discuss indoor air samples. Left message to return call to DEC. Left message for LuJuana Smith to call DEC. Vought spoke with Muller and okayed PID and stated that SUMA sample as per NYSDOH guidance was not necessary until 1)closure of SVE system or 2)PID indications of petroleum vapors followed by subsequent remediation. Vought also instructed Muller to check sumps. Vought spoke to LuJuana Smith who will be sending in FOIL Request for continuous updates on site. Vought also called Muller and gave him LuJuana's phone (212-967-1644) for access arrangements. 11/6/2003-Vought-Spoke with Steve Muller who was onsite. No PID readings and no olfactory evidence of petroleum and no groundwater infiltration into basement and no product in sump. Muller will produce summary letter and send to DEC. 11/7/2003-Vought-Received Summary Letter from Applied Geosolutions(Muller). Site visit performed on 11/6/03 and inspection of basement at 480 10th Ave. AGS observed no olfactory detection of odors or vapors consistent with hydrocarbons related to gasoline . PID readings of 4.8ppm were attributed to moisture in basement. Small amount of standing water present near leaking hose. No signs of product in sump. Vapor abatement system unoperational during site visit. Photos of basement submitted with report show no free product or petroleum impact. 11/24/2003-Vought-Received signed STIP from Adam Good(Gaseteria) with revised Corrective Action Plan. 11/26/2003-Vought-Spill transferred from Rommel to Vought. Vought received call from LuJuana Smith and she requested update. Vought faxed her copy of 11/7/03 report and letter sent to Gaseteria on 10/21/03. Vought submitted STIP for implementation to DEC Kunkel. 12/2/03-Vought-STIP implemented by Kunkel. Copy sent and faxed to Good and Muller. 12/17/2003-Vought-See closed spill 0301220 at same location. 9/14/04-Vought-New file review by Vought: Letter from Applied Geosolutions (Steven Muller 516-395-5957). On November 6, 2003 Applied Geosolutions inspected the basement of 480 10th Avenue to perform vapor monitoring and to identify the presence of groundwater . During the inspection AGS observed no olfactory detection of odors or vapors consistent with hydrocarbons related to gasoline. The air space was monitored with a portable PID indicating a measurement of 4.8 ppm... This detection is likely the result of low atmospheric pressure followed from periods of rain causing the basement to be damp. The basement floor did not indicate the presence of groundwater... . Line and Dispenser Upgrade Report (Delta Environmental Brad Fisher 914-765-8180). This Line and Dispenser Report summarizes the results of pump island and product piping upgrade assessment activities conducted by Delta Environmental and Gasoline Installations on behalf of BP Products North America . Work performed included the removing and installing new spill containment boxes beneath each dispenser, removal and replacement of propduct piping and installation of electronic line leak detection

systems. Soil analyticals only show minor TAGM 4046 SVOC exceedences attributable to fill. Subsurface Investigation Workplan (Applied Geosolutions)-July 2004. Bedrock at depth of 10' below grade and groundwater at depth of 12.5-13.5' below grade. Report proposes installation of four wells via air rotary followed by groundwater sampling. Groundwater flow direction not determined as of yet. 9/14/04-Vought-Sent letter to Gaseteria approving of Subsurface Investigation Workplan. Vought received message from Lujuanna Smith (212-967-1644) and returned call. Vought spoke to Smith and no indication of vapors was noted. Ms. Smith requested info on the applicability of the BCP program for 480 10th Avenue and Vought replied that was only available if HPD was willing to take responsibility of the spill and that she should call Albany for further information. Vought also suggested that she return the call to DEC on 11/14/04 which is when the workplan results are due to DEC. 9/17/04-Vought-Received fax from Applied Geosolutions (Muller). 466 10th Avenue-AGS is currently getting drilling quotes and will complete the Workplan within the 60 day time frame . 1/6/05-Vought-Reviewed Subsurface Investigation Summary Report (Applied Geosolutions) dated December 2004 and received on 1/3/05. Location north of USTs not possible due to concrete with rebar. Installation of three monitoring wells. Groundwater from 7-11' bgs and flow to the west. Groundwater analyticals show 48ppb xylene(MW1), 13ppb 1,2,4-trimethylbenzene(MW1), 17ppb 1,3,5-trimethylbenzene(MW1), 26ppb naphthalene(MW1), 1400ppb MTBE(MW1), 23ppb MTBE(MW2), and 20ppb MTBE(MW3). The existing groundwater monitoring wells should be monitored on a monthly schedule and sampled on a quarterly schedule to document changes in groundwater elevation and contaminate concentration trends in order to develop and appropriate remedial strategy . DEC requires: 1)installation of monitoring wells on West 37th Street north northeast of site and downgradient from abandoned tankfield along 10th Avenue. 1/19/05-Vought-Meeting at DEC with ASR Tomasello. Will examine possibility of borings across 10th Avenue (may not be possible due to utilities) and also onsite adjacent to 480 10th Avenue. If onsite boring adjacent to 480 10th Avenue is not possible then boring will be installed on 37th Street. 2/17/05-Vought-Spoke to Muller and site visit scheduled for 2/24 at 10am to discuss possible well installation locations. 2/24/05-Vought-Site meeting with ASR Tomasello and no borings possible across 10th Avenue. Well will be installed onsite under canopy downgradient of abandoned tankfield. Well will also be installed on West 37th Street north northeast of site. Obligado- SITE TRANSFERRED FROM VOUGHT TO OBLIGADO 10/12/05 - Spoke with Tomasello ASR, requests to talk about closure for sp0206783. 10/17/05- Obligado - File Review: Final Subsurface Investigation Report, dated June 2005. 4 monitoring wells installed at the site. Wells were installed into Bedrock down to 25 ft bgs. 3 wells installed in December 2004, one additional well installed in March 2005. Groundwater encountered at approximately 7 to 11 feet. No product encountered. Initial gw samples in Dec. 2004 show ND for Benzene in all wells, 1400 ppb MTBE (MW-1), 23 ppb MTBE (MW@), 20 ppb MTBE (MW-3), 48 ppb Xylene (MW-1). March 2005 gw results show 140 ppb benzene (MW1), 2100 ppb MTBE (MW-1), 26 ppb benzene (MW-3), 16 ppb MTBE (MW-3). June 2005 results show 45 ppb benzene (MW-1), 11 ppb Ethylbenene (MW-1), 750 ppb MTBE (MW-1), 52 ppb benzene (MW4), 10 ppb toluene (MW-4), 170 ppb Napthalene (MW4), 55 ppb MTBE (MW4), 193 ppb xylenes (MW-4). 4Q05 Monitoring Report, dated 10/15/05. Ground water analyticals at show

20 ppb benzene (MW-1), 580 ppb MTBE (MW1), 23 ppb MTBE (MW-2), 21 ppb benzene (MW-3), 15 ppb MTBE (MW-3), 16 ppb benzene (MW-4), 52 ppb ethylbenzene (MW-4), 140 ppb MTBE (MW-4). 11/14/05 - Oblgado - Site visit with ASR Tomasello. Request to see at least 2 more quarters of monitoring at a minimum. 12/8/05 - Oblgado - Will do a sensitive receptor survey. Continue monitoring. Only 2 quarters of data at MW4. 3/1/06 - Oblgado - PHone call with Chris/STeve, ask that site be monitored quarterly not monthly. 4/12/06 - Oblgado - review 1Q06 monitoring report. BTEX ND to 33 ppb, MTBE ND to 800 ppb. 11/21/06 - Oblgado - Reviewed Closure Petition/Sensitive Receptor Survey. Sent email to ASR denying NFA stating the following: Due to historical vapor issues in the adjacent apartment, and the presence of benzene above guidance levels in ground water, the Department requires laboratory analyzed vapor samples from either the slub slab system (if operational) or indoor air samples to confirm no vapor intrusion. The Department also requires an additional round of ground water monitoring to confirm benzene and MTBE levels are still decreasing. NYSDOH Vapor Intrusion Guidance should be followed when collecting air samples available at

[http://www.health.state.ny.us/environmental/investigations/soil\\_gas/svi\\_guidance/index.html](http://www.health.state.ny.us/environmental/investigations/soil_gas/svi_guidance/index.html). Please submit the results of the additional investigation by January 21, 2007. 12/1/06 - Oblgado - Steve Muller will be onsite today to collect additional data. 5/19/09 - Oblgado - Meeting with DEC, ASR, GASeteria. They conducted a groundwater monitoring event and a vapor intrusion investigation in the adjacent residential building. According to report no Vapor intrusion was occurring. Ground water results found low levels of BTEX in GW, max 23 ppb and MTBE is continuing to decrease from 1400 ppb in 2004 to 250 ppb in 1Q09. They will submit a workplan for a confirmatory soil boring investigation by 7/31/09. 11/20/09 - Oblgado - Reviewed a revised Investigation Work Plan. The plan proposes to install 3 monitoring wells at the site. 2 wells are proposed in the area of the former abandoned 550 USTs and one is downgradient of the dispenser island. I sent a letter to Gaseteria approving the plan. 3/22/10 - Oblgado - Review the 4th quarter 2009 monitoring report. Max BTEX is 8 ug/L. Max MTBE is 140 ug/L. No LNAPI present. 6/14/10 - Oblgado - I reviewed the Remedial Investigation Report. 2 Additional soil boring/monitoring wells were installed. 1 soil boring/well location was not completed due utilities in that area. Soil samples were collected from one of the 2 locations, but the other location had shallow bed rock so no soil sample was collected. No soil impacts were detected at the one location where soil was collected. Ground water results showed 13 ppb total BTEX at newly installed MW5. MW6 had no exceedences of TOGs The existing monitoring wells were sampled as well. MW4 had max MTBE at 150 ppb, and BTEX at 14 ppb, and total VOCs were 174 ppb. MW2 had 15.3 ppb BTEX and 11 ppb MTBE. This site has minimal ground water impacts the 6 wells on the site, and lack of evidence of contaminated source soils. Also a VI investigation was previously performed at the adjacent apartment building and no vapor intrusion was determined to be occurring. After discussion with DEC Tibbe, this spill has been closed. "

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead\_DEC Field was TIBBE 11/18/94: REASSIGNED FROM SIGONA TO ZHITOMIRSKY ON 11/18/94. transferred from Hale to Tibbe. see also 94-05274 & 98-05205. Piping repaired, spill investigation, investigation/remediation ongoing.  
11/12/10 - spill re-assigned from Tibbe to Joe O'Connell 5/19/2011  
The spill was reassigned from Joe O'Connell to Linda Ross 3/2/12 - Raphael Ketani. During February 2012, the spill case was reassigned to me. I reviewed the Work Plan for Monitored Natural Attenuation Program. The USTs in question failed their tightness tests during 1993. Subsequent to this, 430 gal. of diesel were collected from the water table. The subsurface is tidally influenced with a smear zone from 4 feet to 15 feet below grade. During 2002, bioremediation was conducted. The soil results from 3/18/03 showed very high concentrations for specific VOC analytes in the tens of thousands of parts per billions for the samples from SB-01 from 9 to 11 feet bgs, and from SB-02 from 5 to 9 feet bgs. The groundwater results were from non-detect to just slightly above standards. TCLP results were from non-detect to very low hits. No product has been seen on the water table since 2004. Groundwater sampling had been taking place quarterly at W-5, W-20, W-21, W-23 and W-24. From the review of the data, it appears that a new round of soil sampling should take place in order to confirm subsurface conditions. Later, John Lysiak of URS (the consultant for the MTA bus depot program) sent me tables of soil and groundwater analytical data from samples that were taken after 2003. I reviewed the data. The first sets of tables listed the total VOCs in parts per billion for each interval sampled for each boring (i.e. SSP-6: 5'-7'; 9,565 ppb total VOCs; 7'-9'; 35,318 ppb total VOCs; etc.) and then the total SVOCs (see the e-doc title DEC Hand Tabulation of Totals ). These tables were followed by others listing the individual VOC analytes and the individual SVOC analytes for each interval sampled for each boring. I looked at only the latest sets of data for each boring. These were usually sets of data for samples collected during 2010 or 2011. While there sometimes were exceedences of particular VOC analytes that were double the standard or more, there were usually only one or two exceedences per sample. Sometimes the exceedence(s) was accompanied by analyte hits that were well below standards. So, even though the VOC totals looked very high, the total value was mostly one analyte (i.e. 61,000 ppb of n-propylbenzene with a total of 61,636 ppb). Also, the exceeding analyte(s) was usually a degradation product of benzene. In short, the VOC contamination was low. However, the 10' to 11' sample from

**NYCT HUDSON DEPOT (Continued)**

**S100177042**

SSP-2 taken on 7/17/08 had 12,000 ppb of n-propylbenzene. The 5' to 7' sample from SSP-4 taken on 1/12/09 had 61,000 ppb of p-isopropyltoluene. The 9' to 11' sample from SSP-5 taken on 8/26/09 had 48,000 ppb of p-isopropyltoluene. The 7' to 9' sample taken from SSP-6 on 6/2/10 had 10,000 ppb of n-propylbenzene. The 11' to 13' sample from SSP-7 taken on 11/13/09 had 12,000 ppb of n-propylbenzene. The individual SVOC exceedences were almost exclusively those of the benzo series and the associated combustion products (chrysene, dibenzo(a)anthracene, indeno(1,2,3-cd)pyrene). While the exceedences may have been ten times the standard or more, they were not above several thousand parts per billion. Anthracene, acenaphthene, acenaphthalene, naphthalene, phenanthrene and pyrene were typically low throughout all of the soil samples. In total, the analytical results were very similar to those of historical fill, and not an oil spill. Recent groundwater samples were also taken from 2009 to 2011. The results were almost entirely non-detect for all of the samples. In some samples there were estimated values, but these were typically only slightly above the standards or below the standards. The groundwater didn't seem to be affected by the spill. This was probably due to the years of tidal flushing. I was informed that letters to the NYCT should go to: GREGORY MATHELIER CONSTRUCTION ADMINISTRATOR UST & ENVIRONMENTAL REMEDIATION PROGRAM ON-CALL PROJECTS/ CAPITAL PROGRAM MANAGEMENT MTA NEW YORK CITY TRANSIT 2 BROADWAY, D2.91, NY 10004 PHONE: 646-252-3470 FAX: 646-252-3140 E-MAIL: GREGORY.MATHELIER@NYCT.COM 3/12/12 - Raphael Ketani. A search of the PBS database did not reveal a registration for the two side by side tanks, nor the other two tanks to the north. I sent an e-mail to Toni Watts of the Safety Division of the NYCT (646) 252-5939/Toni.Watts@NYCT.com requesting that the tanks be investigated and that a PBS registration be established. I added that the lack of a registration was a violation of 6NYCRR Part 612. Ms. Watts found the PBS registration. It is #2-190284. However, it lists 6 above ground tanks. Not the two USTs that were of concern. The document doesn't list what type of fuels were in the tanks. 3/13/12 - Raphael Ketani. Gregory Mathelier of NYCT (646) 252-3470 called. He said that he is the point of contact for all correspondences regarding NYCT sites which are under the Consent Order. We discussed the tank registration for the site. I commented that there used to be a 550 gal. UST north of the twin large tanks and also a 5,000 gal. heating oil UST. These tanks were removed some time ago. I also stated that the twin 7,100 gal. tanks are not indicated as being either USTs or ASTs. Mr. Mathelier said that the 7,100 gal. tanks are USTs. I responded by saying that all four tanks had to be added to the PBS registration for the site as they were not on there. I added that this was a violation and that the spill would not be closed without a proper PBS registration. Mr. Mathelier said that he will take care of this. Later, Mr. Mathelier sent me an e-mail containing a map showing the 4 USTs in question and a PBS registration form indicating that the twin 7,100 gal. USTs are registered. As Mr. Mathelier explained and as the map shows, the 550 gal. UST and the 5,000 gal. UST are on NYC DOS property, not the NYCT property. 3/15/12 - Raphael Ketani. A case review meeting took place today. In attendance were Hassan Hussein, EE 3 and head of the Hazardous Materials Unit, myself and the other members of the unit. The soil and groundwater analytical data were presented. Staff at the meeting stated that more information was needed in order to understand the case. Kevin Connare of URS (716) 856-5636 (the NYCT consultant) was

**NYCT HUDSON DEPOT (Continued)**

**S100177042**

contacted by phone and a teleconference ensued. Mr. Connare explained that the tanks were closed by cleaning them and then pumping in concrete slurry. The oil was first addressed by pumping and treating. About 430 gallons of product were collected from 1994 to 1997. A sheen hasn't been seen since at least a year ago. During April 4 to 7, 2002, RegenOx was pumped into 5 existing wells. Each well received 100 gal. of a mixture. There were 7 injection events. This work was done by Fenley & Nicol. RegenOx was pumped quarterly into the wells during 2007. Monitored natural attenuation was allowed to reduce the soil analyte concentrations since 2007. This involved taking confirmatory samples quarterly since 2007 and up until last fall. Since 1999, groundwater samples have been taken bi-annually. I asked Mr. Connare about the boring locations that were marked on one of the site maps which extend well north of the site. He stated that these were done in 1994 and 1995 by ADT and he knew nothing about them. 3/29/12 - Raphael Ketani. A case review meeting took place today. In attendance were Hassan Hussein, EE 3 and head of the Hazardous Materials Unit, myself and the other members of the unit. The soil and groundwater analytical data were presented. Kevin Connare of URS (716) 856-5636 lead the meeting. Mr. Connare stated that a comprehensive report will be submitted to the DEC regarding the site in the near future. 4/26/12 - Raphael Ketani. During this monthly meeting, the consultant, URS, stated that there was no remediation or monitoring activity at the site. Previous soil sampling via monitored natural attenuation was being allowed to reduce the analyte concentrations. Staff at the Department expressed concerns that no soil samples had been taken on the east side of the twin tanks and that the last set of soil results showed up to 60,000 ppb and 70,000 ppb of particular analytes in the soil on the west sides of the tanks. Staff from the NYCT stated that a petition for closure will be submitted. 1/31/2013 - Raphael Ketani. I received the URS Petition for Spill Closure Report dated January 2013 and began my review. 2/5/13 - Raphael Ketani. I finished my review of the Petition for Spill Closure Report. In summation from the report: Groundwater is present below the site from 4 to 8 feet below grade with a 4 foot tidal fluctuation. The ground below the site contains a thick layer of artificial/anthropogenic fill - from the soil analytical chemistry and the boring logs, the fill appears to be ash and cinder with wood, concrete, brick and other manmade materail. The twin 7100 gal. UST systems were integrity tested during September and October 1991 and each system failed its respective test. According to the closure report, the failed portion of the systems was the piping. A subsurface investigation took place during 1993 and 1994 and a plume of oil was discovered on the water table. Wells W-1 to W-3 were installed during July and August 1993 and up to 4.26 feet of oil was found on the water table. The plume turned out to be diesel fuel from the twin 7100 gal. UST systems and fuel oil from a UST under the adjacent NYC DOT site to the north. An estimated 550 to 1100 gals. of product was lost from the NYCT UST systems. From April to June 1994, wells W-5 to W-7 were installed. A sheen was present in W-5. In 1994, wells W-8, W-11, W-13 to W-17 were installed. A product recovery system was installed and operated from June 1994 to December 1997 when recoverable product was no longer present. About 430 gals. of product was recovered. During December 1998, the USTs were cleaned out and abandoned in place with sand. During January 1999, borings GP-1 to GP-4: GP-1 to GP-3 were installed around the tanks and GP-4 was installed in the vicinity of the pump house. All of the borings

**NYCT HUDSON DEPOT (Continued)**

**S100177042**

had odors and product. During February 2000, wells W-19 to W-23 were installed west, north and south of the USTs. No wells were installed east of the USTs due to the bike path. During September 2000, borings GP-5 to GP-10 were installed to the south, north, east and west of the USTs. During 2002, the bioremediation program was started. Monitored natural attenuation was started during May 2007. From May 2007 to June 2011, quarterly soil and groundwater sampling took place. Residual VOCs and SVOCs were found in the soil and the absence or minor presence of VOCs in the groundwater. Wells W-25 and W-26 were installed northeast and southeast of the USTs during July 2007 and had a few soil VOCs above CP-51 standards, but few SVOCs. Confirmatory soil borings SSP-1 to SSP-3 were installed on the west side of the USTs in order to minimize disruptions to the bike path. Soil borings up to SSP-10 were sampled from 5 to 15 feet below grade between June 2007 and July 2011 at consecutive 2 foot intervals. On June 2, 2010, the NYCT did in-situ chemical oxidation by injecting RegenOx into some wells. No product has been seen on the groundwater since 2010. The last soil sampling event took place during June 2011 and showed VOCs in only one of the three borings and SVOCs in two of the three borings. Only one groundwater sample had VOCs above standards. Quarterly sampling stopped as agreed upon by the NYCT, DEC and URS as it was agreed that the site was a candidate for closure. As part of the decommissioning of the wells, ORC solution will be mixed into the backfill for the wells before plugging and abandoning them. However, historical soil hot spots had been identified at locations SB-01 and SB-02, GP-06 and GP-07, SSP-01, SSP-02, SSP-04 to SSP-07 and SSP-09. Many of these moderate to very high VOC exceedences were from soil samples taken during 2009 to 2011. So, it is not clear whether the analytes would have been reduced by natural weathering during the past several years to the present. Confirmatory soil sampling needs to be performed. Though, no product has been seen during 2012 and the groundwater results do not show more than low exceedences of the TOGS 1.1.1 standards. Additionally, no borings or wells were ever installed on the east side of the east UST. Despite the bike path, there is a need to find out what is below the surface under this area. The soil results for GP-06 and GP-07 suggest that elevated concentrations of the analytes may be present. Because of the VOC exceedences in the soil samples from the recent past and the lack of information regarding subsurface conditions east of the twin USTs I could not close the spill case. I drafted a letter to the NYCT requesting a work plan for conducting confirmatory soil borings to the west of the USTs and new soil borings and new wells east of the USTs. The letter was submitted to Hassan Hussein, supervisor of Unit C Region 2 DER, for his approval. Mr. Hussein approved the letter and it was sent out with a due date of March 22, 2013 for submission of the work plan for doing the requested borings and wells. 3/22/13 - Raphael Ketani. Mr. Mathelier sent me a request by e-mail asking that the DEC obtain permission from the Hudson River Park Trust for the NYCT so that they may install more borings next to the two USTs. The area above the USTs is presently crossed by bike paths and walkways. The draft letter was forwarded to Hassan Hussein for his approval. 3/29/13 - Raphael Ketani. Mr. Hussein approved the letter to Ms. Silberfeld, General Counsel of the Hudson River Park Trust, in which her cooperation was requested for the soil investigation at the USTs. The letter was sent out. 5/31/13 - Raphael Ketani. I reviewed the May 2013 Site Specific Investigation Work Plan. Historical hot spots were identified as SB-01, 2, 6 and 7, SSP-01, 2, 4 to 7 and 9. The soil

MNA and groundwater sampling program had continued until June 2011. Product had not been seen in the wells until 8/20/10 when 0.01' of product appeared in W-21. Five borings will be installed. These will be HDSB-1 to 3, HDMW-01 and HDMW-02. Two of the borings will be converted into wells. The wells will be installed to 15 feet below grade with 12 feet of screen. The borings will be installed east of the east tank, west of the west tank, north of both tanks and in the vicinities of the historical hot spots. I looked at Figure 3-1 which showed the proposed boring locations and determined that there were not enough borings or wells to delineate the extent of any undiscovered contamination. I revised the figure to show where the DEC wanted more borings and wells. I indicated that borings should be installed midway on the east side of the east tank, between SSP-01 and SSP-07, between SB-01 and SSP-09, between SSP-02 and SSP-06, and between SSP-05 and SSP-04. Wells should be installed at the southern and northern ends of each tank and closer to GP-06 and GP-07. In total, I asked for 2 additional borings and 4 additional wells. An e-mail was sent with the revised Figure 3-1. A deadline was set for June 28 for submission of the revised SSIWP. 6/26/13 - Raphael Ketani. I reviewed the Hudson Depot Site Specific Investigation Work Plan dated May 2013 and revised June 2013. The work plan contained a revised Figure 3-1 with the boring and well locations as requested by the DEC in its 5/31/13 e-mail. I approved the revised work plan. I sent Mr. Hussein a draft letter approving the revised SSIWP. 6/27/13 - Raphael Ketani. Mr. Hussein approved the letter and it was sent out. 8/1/13 - Raphael Ketani. I reviewed a set of task orders that Ms. Cadecia Josephs had sent to Ms. Silberfeld of the Hudson River Park Trust. These task order were: CPM-23 dated 5/23/13 and regarding the writing and submission of the SSIWP (which was previously approved in its revised version); CPM-24 dated 7/17/13 and regarding the addition of 2 soil borings and 4 wells to the SSIWP (the document as approved); and CPM-25 dated 7/31/13 and regarding the abandonment of well W-05. 4/3/14 - Raphael Ketani. I sent an e-mail to Noreen Doyle, General Counsel, Hudson River Park Trust (212) 627-2020/ndoyle@hrpt.ny.gov. In the e-mail, I requested her help in getting the NYCT's plan approved for doing the site investigation. I added that this step was necessary before the NYCT could apply for a permit to the NYC DOT for doing the work. 12/31/15 - Raphael Ketani. I reviewed the NYCT December 2015 Soil and Groundwater Investigation/Petition for Spill Closure Report. A historical review of the site was contained in the beginning of the report. The consultants estimated from the product thicknesses in the wells that 550 to 1100 gallons of product was released. A recovery pump was installed and operated from June 1994 to December 1997. The pump was shut down after this as no product was seen. Two 7100 gallon USTs were located below grade and had been closed in place during December 1998. Several investigations took place and some remedial actions from 1999 to 2011. Bioremediation of the soil took place during 2002. The sheens and product thicknesses were reduced after this action. The DEC allowed monitored natural attenuation (MNA) to drive the remediation. The first soil and groundwater sampling took place during 2007. Chemical oxidation took place during 2010 to enhance the MNA. Groundwater monitoring has continued to the present time. The soil and groundwater investigation work east of the USTs was completed from December 4 to 30, 2014. Sixteen (16) borings and 6 wells were installed. The borings were HDSB-1 to HDSB-10. The wells were HDMW-01 to HDMW-06. Groundwater was found to be at from 4' to 9'

**S100177042**

bgs and tidally influenced. Thirty (30) soil samples and 6 groundwater samples were collected. The soil results were compared to the CP-51 standards and the groundwater results were compared to the TOGS 1.1.1 standards. The soil samples were taken on 12/5, 8, 11, 12/2014. The upper portion of each boring had brown to dark brown fine to medium sub-angular sand with varying amounts of gravel and silt and fill. The PID readings varied. Oil stains and odors were present in several borings and generally only within the 5' to 15' interval. The most significant stains, PID readings (to 175 ppm) and odors were at borings to the northwest of the USTs (HDSB-01 and HDSB-04). Sheen and oil blebs appeared in some borings west of the USTs at 6' to 12' bgs. SB-1 (7'-9') was taken on 12/5/14 and had 4 analytes from 14,800 ppb to 36,400 ppb (benzene species analytes), but no benzene. The rest of the results were non-detect. The results for SB-1 (16'-18'), SB-2 to 7 and SB-10 were either all non-detect or mostly non-detect with 1 high exceedence. SB-6 (10'-12') was taken on 12/8/14 and had 6 exceedences from 180 ppb to 1400 ppb. The soil sample results for HDMW-01 (15'-16'), HDMW-03 (10'-11'), HDMW-04 (17'-19'), HDMW-05 (16'-18') and HDMW-06 (15'-16') were all non-detect or had 3 to 4 low hits with the rest non-detect. HDMW-01 (10'-12'), HDMW-02 (5.5'-7.5'), HDMW-04 (5'-7'), HDMW-05 (10'-12') and HDMW-06 (10'-12') each had 2 to 4 high hits and/or exceedences from 1500 ppb to 12,300 ppb with the rest of the results non-detect. Groundwater samples were taken from HDMW-01 to HDMW-06 on 12/30/14. The samples had from 4 to 11 very low to moderate (highest 21.5 ppb) hits and exceedences. The rest of the results were non-detect. The consultants recommended closure based upon the fact that the VOC results for the soil were either mostly non-detect or below standards. They also stated that the groundwater VOCs were either non-detect or mostly below standards with no free phase product. The NYCT believes that monitoring should be discontinued based upon the results. Also, the area is a paved bike path, which is part of the Hudson River Linear Park. So contact with any residual contamination is not possible. I approved the report and agreed with the recommendations of NYCT and their consultants that the spill case should be closed. This was also based upon the generally very low soil analytical results and the very low groundwater results. It was also based upon the fact that the USTs had been closed in place, bioremediation had been attempted and chemical oxidation had also been attempted in order to remediate the contamination. As the site could not be dug up due to the disruption this would cause to activities in the area, there was not anything else that could be done to reduce the contaminant concentrations. Also, the subsurface is subject to tidal action twice a day and so the soil and materials below grade will continue to be washed - thereby removing more contamination or oxidizing it. However, as the tidal waters can enter below grade, so can spills that originate on the river from boat and shipping activity. So, the subsurface will never be pristine and will maintain itself in equilibrium with the Hudson River water chemistry. 1/4/2016 - Raphael Ketani. I closed the spill case effective today and issued a Spill Closure Letter to NYCT for the site. 4/7/16 - Raphael Ketani. A progress update meeting took place on 3/31/16 for all of the NYCT depot sites. During the meeting, Mr. Mathelier asked that I contact the administrative staff at the Hudson River Linear Park in order to find out what construction activities are taking place so that the NYCT can plan for closing the wells. I contacted Ms. Doyle by email (General Counsel, Hudson River Park Trust (212)

627-2020/ndoyle@hrpt.ny.gov) and asked her for a construction update and whether well abandonment can proceed. Ms. Doyle sent the following response email: The short answer is that no Trust-sponsored construction has occurred on the site as of yet. However, our Board of Directors approved a lease last week that will allow construction at and in the vicinity of Pier 57. I was just speaking with Rachel Seebacher of DEC this morning about this. She was going to contact the DEC staff involved with the NYCT spill to get a better understanding of the status of this spill and clean-up and any continuing obligations that may exist. I think it makes sense for that conversation to occur. I've looped her in above. She will be back in touch with HRPT after getting an update so that we can figure out next steps. Later, I sent Ms. Doyle an air photo of the site, along with maps and a pdf of the extracted pages concerning the site from the December 2015 Monthly Progress Report. 4/26/16 - Raphael Ketani. Mr. Mathelier (Gregory.Mathelier@nyct.com) copied me in an email to David Boyle regarding future development of the site. Mr. Mathelier stated that the NYCT CPM would provide some assistance to RXR (the developer) concerning the removal of oil contaminated soil, should this be encountered. The possibility of encountering contaminated soil would arise from the installation of new utilities which are associated with the reconstruction of the Pier 57 facility. 6/22/16 - Raphael Ketani. Late today, I received an email from Yasin Rahman, Assistant Environmental Engineer in the NYCT CPM/UST and Environmental Remediation Program (718) 613-0294/yasin.rahman@nyct.com. The email was addressed to representatives of the owner of Pier 57, RXR Realty, and HRCG and EIC Associates. Excavation drawings dated and revised on 10/19/15 were attached to the email. The email stated that NYCT would assist RXR in the hauling and disposal of the contaminated soil. The excavating would be for the installation of various utilities and would extend down to as much as 13 feet below grade. About 94.8 cu. yds. of soil and fill are expected to be removed. I archived the documentation and had no comments. The contact information for RXR Realty is 1330 Avenue of the Americas, Ste. 500, NY, NY, 10019, (212) 797-1330. Another address for RXR Realty is: 230 Park Avenue, Ste. 1500, NY, NY, 10169, (516) 874-2966, Attn: Michael Rem, PE, Senior Project Manager, Development. 7/27/16 - Raphael Ketani. Mr. Rem copied me in an email that was sent to Mr. Yasin. The first paragraph of the email stated that the wells had been decommissioned and removed. Shortly after this email, Mr. Yasin sent an email to Mr. Rem regarding the contaminated soil excavation plan. 3/29/18 - Raphael Ketani. Yesterday, I received the Dvirka & Bartilucci Monitoring Well Decommissioning/Abandonment Report dated 3/28/18. The work was performed in accordance with CP-43 Groundwater Monitoring Well Decommissioning Policy. The work was performed on 6/6/16, 6/7/16 and 12/19/16. For each well, the concrete well head box was broken up and the casing with its screen was pulled out. Then the wells were filled with grout and an asphalt patch placed on top of the depression where the well used to be. Boring locations were also covered with an asphalt patch. "

Site Description:

"Location: The site is located in the Hell's Kitchen neighborhood of Manhattan and is bounded on the west by 11th Avenue, on the south by West 36th Street and on the north by West 37th Street. The eastern boundary of the site is defined by an Amtrak railroad easement. Site Features: The 0.876-acre site consists of two tax lots with considerably different surface elevations. Lot 1 is an L-shaped parcel that lies approximately 18 feet below street grade with areas of exposed bedrock. The second lot (Lot 62) contains a vacant one-story building at street grade. A 100 square-foot portion of Lot 62 along West 37th Street and the Amtrak easement on Lot 1 are excluded from the BCP site. Current Zoning and Land Use: The site is zoned C6-4 (commercial and mixed uses) and is currently unoccupied. Past Use of the Site: Circa 1930s, Lot 1 was excavated to its current depth for construction of a railyard and a railroad spur that went westward beneath 11th Avenue. Lot 1 also contained a loading platform and a motor freight station. By 1996 the rail tracks and railyard structures were removed, and the property has since been used as a staging area for railroad construction and repair materials and equipment. Since its construction in 1919, the building currently occupying Lot 62 had been utilized as an automotive repair garage, sanitation company garage, and warehouse. The building has been vacant since 2013. Site Geology and Hydrogeology: Site soils were observed as historic fill material to a depth of approximately 5 feet below the surface, underlain with brown fine sand with silt which may or may not be native material. Where not exposed, bedrock is present directly below the fine sand/silt approximately 6 to 9 feet below the surface. The bedrock is a high-grade metamorphic rock consisting of a sequence of Cambrian and Ordovician age gneiss, schistose-gneiss, and marble. The bedrock is characterized by numerous faults and fractures, many of which contain groundwater. The groundwater table is in bedrock across much of the site. Groundwater at the site is approximately two feet below grade in the lowest area of Lot 1 and flows west toward the Hudson River, located approximately a quarter mile away."

Env Problem:

"Nature and Extent of Contamination: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), pesticides, and per- and polyfluoroalkyl substances (PFAS). Soil vapor was analyzed for VOCs. The primary contaminants of concern are VOCs, SVOCs and metals in soil and groundwater and chlorinated VOCs

in soil vapor. Soil Lot 1: The soil contamination on Lot 1 is indicative of historic fill. Several SVOCs were detected to a depth of 8 feet below ground surface (bgs) at levels above unrestricted use soil cleanup objectives (UUSCOs) and/or restricted residential soil cleanup objectives (RRSCOs) including: benzo(a)anthracene up to 64.1 parts per million (ppm) (UUSCO and RRSCO of 1 ppm), benzo(a)pyrene up to 12.1 ppm (UUSCO and RRSCO of 1 ppm), benzo(b)fluoranthene up to 12.6 ppm (UUSCO and RRSCO of 1 ppm), benzo(k)fluoranthene up to 10.3 ppm (UUSCO of 0.8 ppm, RRSCO of 3.9 ppm), chrysene up to 54.4 ppm (UUSCO of 1 ppm, RRSCO of 3.9 ppm), dibenzo(a,h)anthracene up to 4.73 ppm (UUSCO and RRSCO of 0.33 ppm), indeno(1,2,3-cd)pyrene up to 8.05 ppm (UUSCO and RRSCO of 0.5), phenanthrene up to 119 ppm (UUSCO and RRSCO of 100 ppm), and pyrene up to 108 ppm (UUSCO and RRSCO of 100 ppm). The following metals were detected to a depth of 8 feet bgs at levels exceeding UUSCOs and/or RRSCOs: cadmium up to 3.55 ppm (UUSCO of 2.5 ppm), copper up to 225 ppm (UUSCO of 50 ppm), lead up to 1,030 ppm (UUSCO of 63 ppm, RRSCO of 400 ppm), mercury up to 8.76 ppm (UUSCO of 0.18 ppm, RRSCO of 0.81 ppm), selenium up to 7.11 ppm (UUSCO of 3.9 ppm), silver up to 138 ppm (UUSCO of 2 ppm), zinc up to 615 ppm (UUSCO of 109 ppm). The following pesticides were detected to depth of 2 feet bgs at levels exceeding UUSCOs: 4,4'-DDT up to 0.0057 ppm and 4,4'-DDT up to 0.0087 ppm, both with UUSCOs of 0.0033. Total PCBs were detected above the UUSCO in two locations (maximum 0.641 ppm compared to UUSCO of 0.1 ppm). No VOCs were detected above their respective UUSCOs. All pesticides, PCBs and VOC detections were below their respective RRSCOs. Lot 62: The following petroleum-related VOCs were detected to a depth of 8 feet bgs at levels exceeding UUSCOs and/or RRSCOs: 1,2,4-trimethylbenzene up to 54 ppm (UUSCO of 3.6 ppm, RRSCO of 52 ppm), 1,3,5-trimethylbenzene up to 23 ppm (UUSCO of 8.4 ppm), chlorobenzene up to 1.6 ppm (UUSCO of 1.1 ppm), ethylbenzene up to 5.4 ppm (UUSCO is 1 ppm), n-propylbenzene up to 9.1 ppm (UUSCO of 3.9 ppm) and total xylenes up to 20 ppm (UUSCO of 0.26 ppm). All of the VOC exceedances were limited to one boring location in the center of the lot. SVOCs were detected at levels exceeding UUSCOs and/or RRSCOs at one location, to a depth of 2 feet bgs, in the southwestern portion of the lot as follows: benzo(a)anthracene at 1.75 ppm (UUSCO and RRSCO of 1 ppm), benzo(a)pyrene at 1.31 ppm (UUSCO and RRSCO of 1 ppm), benzo(b)fluoranthene at 2.15 ppm (UUSCO and RRSCO of 1 ppm), benzo(k)fluoranthene at 1.66 ppm (UUSCO of 0.08 ppm). The following metals were detected to a depth of 8 feet bgs at levels exceeding UUSCOs and/or RRSCOs: arsenic up to 15.6 ppm (UUSCO of 13 ppm), barium up to 607 ppm (UUSCO of 350 ppm, RRSCO of 400 ppm), cadmium up to 2.74 ppm (UUSCO of 2.5 ppm), copper up to 151 ppm (UUSCO of 50 ppm), lead up to 611 (UUSCO of 63 ppm, RRSCO of 400 ppm), mercury up to 2.94 ppm (UUSCO of 0.18 ppm, RRSCO of 0.81 ppm), and zinc up to 362 (UUSCO of 109 ppm). Pesticides and PCBs were not detected above their respective UUSCOs. The data do not indicate any off-site impacts in soil related to this site. Groundwater Lot 1: Two VOCs, benzene at 1.2 parts per billion (ppb) and cis-1,2-dichloroethene at 53 ppb, were detected above their Class GA Ambient Water Quality Standard (AWQS) of 1 ppb and 5 ppb, respectively. The dissolved metals manganese and sodium were detected in groundwater above AWQS but are considered naturally occurring. No PCBs, pesticides or SVOCs were detected above standards. Lot 62: Several VOCs were detected at levels exceeding AWQS as follows: 1,2,4-trimethylbenzene up to 59 ppb (5 ppb standard), 1,2-dichlorobenzene up to 3.9 ppb (3 ppb standard),

1,3,5-trimethylbenzene up to 35 ppb (5 ppb standard), 1,4-dichlorobenzene up to 3.3 ppb (3 ppb standard), benzene up to 250 ppb (1 ppb standard), chlorobenzene up to 56 ppb (5 ppb standard), ethylbenzene up to 94 ppb (5 ppb standard), isopropylbenzene up to 58 ppb (5 ppb standard), n-butylbenzene up to 30 ppb (5 ppb standard), n-propylbenzene up to 120 ppb (5 ppb standard), p-isopropyltoluene up to 13 ppb (5 ppb standard), sec-butylbenzene up to 19 ppb (5 ppb standard), toluene up to 18 ppb (5 ppb standard), mixed xylenes up to 65 ppb (5 ppb standard), and total xylenes up to 69 ppb (5 ppb standard). The SVOC naphthalene was detected up to 51.8 ppb (10 ppb standard). Selenium was detected as a dissolved metal above AWQS in one well (14 ppb compared to 10 ppb standard). The dissolved metals magnesium, manganese and sodium were also detected in one well above AWQS but are considered naturally occurring. No PCBs or pesticides were detected above standards. Sitewide: For PFAS, perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS) were reported at concentrations up to 99 parts per trillion (ppt) and 110 ppt, respectively, exceeding the Maximum Contaminant Level (MCL) (drinking water standard) of 10 ppt each in groundwater. There are no public water supply wells within a half a mile and there is a municipal prohibition for use of groundwater at the site. The data do not indicate any off-site impacts in groundwater related to this site. Soil Vapor Lot 1: Ten soil vapor samples were collected and analyzed on Lot 1. Chlorinated VOC detections include: tetrachloroethene (PCE) up to 60 micrograms per cubic meter (g/m3), cis-1,2-dichloroethene in one location at 26 g/m3, and vinyl chloride in one location at 550 g/m3. The cis-1,2-dichloroethene and vinyl chloride detections were at the same location near the northern boundary of the site. Methylene chloride was detected in one location at 18 g/m3 and trichlorofluoromethane (Freon 11) was detected in six locations up to 400 g/m3. Lot 62: Five soil vapor samples were collected and analyzed on Lot 62. PCE was detected at four locations up to 120 g/m3 and methylene chloride was detected at 72 g/m3 at one location. Several petroleum-related VOCs were detected throughout the site on both lots. The data do not indicate any off-site impacts in soil vapor related to this site."

Health Problem:

"The site is enclosed by fencing, concrete walls, and adjoining structures, which restricts public access. Persons who enter the site could contact contaminants in the soil by walking on the site, digging or otherwise disturbing the soil. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil) may move into buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Currently, there are no occupied buildings on-site. The potential exists for indoor air impacts via the soil vapor intrusion pathway on-site should the site building be re-occupied and/or if new construction and occupancy occurs. Environmental sampling indicates soil vapor intrusion is not a concern for off-site structures."

DEC Memo: "sharif sent a ttf ltr On 2/24/05. 06/21/05-SR: Spoke with Stuart Smoller of Andrews Building Corp. who is the managing agent now for the building. They are going to convert the oil heating system to gas burn heating system. So, tank will be abandoned and documentation will be sent to DEC. 10.06.05 //Sharif- rec'd tank test failure report from Eastmond and Sons Boiler. The fillline and the return line failed. Apparently, oil leaked through the pipeline and contaminated the surrounding environment. Needs subsurface investigation around the tank. Tried to contact Mr. John Wellmann of Andrews Corp.212-529-5688\* 276. He is on vacation. 12/21/05 Sharif//I spoke with Rene Lewis of EastMond. He said they pumped out the tank, cleaned it and later on they found oil water mix coming into the tank. So they installed a monitoring well to identify if any oil has escaped from the tank to the surrounding environment. They checked the well again and found only water coming into the well, a sample was taken from the well. Contaminated soil around the return line was removed and manifest will be sent to DEC along with closure report. 03/15/06 Sharif Rahman- Rec'd waste disposal manifest, analytical result for the water sample from the well.VOC/SVOC non detect. Spill is closed."

number is not working number. Spoke with Mr. Gomez, super at  
building. as per him building owner is Mr. Joel Berman. Right now  
owner is in California for two weeks. Super will give my number to  
owner as he denied giving owner's number. Phone number on report for  
Mr. Berman is out of service. 03/03/06-Hiralkumar Patel. Got Mr.  
Berman's number (212-583-0005) from super. Left message for Mr.  
Berman. Received call from Mr. Berman. as per him, they don't have  
any records on oil spill. and he doesn't know anything. he told me  
that the building is on solid concrete. as he is from law firm he was  
talking legal language. he is blaming DEC for harassment.  
03/08/06-Hiralkumar Patel. spoke with super and property has 3000 gal  
of tank. they have permit from fire department. got pbs registration  
certificate from super. PBS# 2-603898. as per PBS certificate, this  
tank was installed on Nov. 1st 1998 and spill happened on Oct. 7  
1998. from PBS registration, mailing address for owner is: General  
Partner of 115 W 27th Street Co 1140 Ave of the Americas 17th Floor  
New York, NY 10036 From Reverse Phone Directory, the address for phone  
number 212-583-0005 is as follow which was confirmed by Mr. Berman  
also. send letter at this address: 780 Third Ave New York, NY  
10017-2024 Berman's FAX no.: 212-583-0072 03/09/06-Hiralkumar Patel.  
CSL sent out to Berman by mail and by fax. (forgot to send pbs  
registration form and instruction) 03/14/06-Hiralkumar Patel.  
Received fax from Mr. Berman. ...The company has no record of the  
petroleum release which we believe was no more than a minor ordinary  
oil delivery spill which occurred when our supplier/delivery company  
inadvertently overfilled the tank. the fill port is outside the  
building and whatever minor amount spilled would have been on the  
sidewalk. we have no notice of any violation. if you could please  
supply me with a copy of the violation, including the name of the  
delivery/supplier company, it may be helpful in resolving this matter  
expeditiously Discuss with Jeff. he is suggesting to take site visit.  
Left message for Mr. Berman. visited site. spoke with Mr. Gomez,  
super at site. there is no odor in boiler room as well as in tank  
vault. tank is partially buried in concrete and tank is enclosed in  
concrete vault. but concrete vault is opened at one side. water was  
flowing out from tank vault. few oil stains on concrete floor in  
boiler room, but very little. poor concrete floor in boiler room.  
water was standing all over floor. little shine on top of water in  
sump. no leaking from boiler. suggested following to Mr. Berman  
afterwards: - repairing of floor in boiler room. - keeping area clean  
and dry - replacing old corroded pipings to/from tank. - closing tank  
vault as it is being used as secondary containment. they can keep  
small window at elevated level to get access to tank. and as this  
tank in concrete vault, tank test every five years. - updating PBS  
records with current address, phone number and product information,  
as PBS records shows #2 oil in use. but as per super they are using  
#4 oil all the time. - submitting tank test results and copy of  
invoices for every work done. as i discussed with Mr. Berman, he is  
agree to all above suggestions. the company who did tank test will  
replace those pipings. he will submit tank test results and copy of  
invoices for any work done. i asked him to call me with contractor's

name and number who will work to close tank access and repairing of floor. Got copy of work proposal from Petroleum to Owner. Spoke with Joe Ostrowski (718-624-4842) and he told me that the whole system failed in tank test. now they are waiting to get permission from owner for isolation test. Mr. Joe doesn't know how bad the leak was as the person, who did tank test, was not there. Left message for Mr. Berman. Spoke with Mr. Berman. i told him about tank test failure as i spoke with Joe at Petroleum. Mr. Berman was upset as contractor gave test results directly to me without concerning hiring person. i have asked Mr. Berman to work out on further testing of individual parts to find out leaking portion of system. asked him to call back with date on which they plan for isolation test. 03/21/06-Hiralkumar Patel. Left message for Mr. Berman. Received call from Mr. Berman. he was blaming me for harrasing him. he told me that Petroleum has done individual test and found problem at vent pipe. i have asked him to send me copy of report. he will call back tomorrow. 03/24/06-Hiralkumar Patel. REceived certified mail receipt. 04/06/06-Hiralkumar Patel. Received letter from Mr. Berman. received contract copies which was signed by Joe Ostrowski from Petroleum and by Mr. Berman. as per contract copies, petroleum has proposed following work: - will open manhole cover on one 3000 gal fuel oil storage tank - pump out all existing fuel, water and sludge from bottom and sides of tank. - pressure test all lines-suction, return, vent and fill to make sure they are not leaking. - men will enter tank and squeegee clan all remaining sludge and residue - examine tank shell for signs of deterioration and make a full report to person in charge. - if a line fails test, we will then plug up bad lines and perform tank only tank test to make sure tank is good. - all sludge will be disposed of to a legal facility - seal tank making a watertight closure. - excavate concrete, remove old fill line and vent line - install 40 ft of new 3 fill line from tank top to outside the building wall. - install 50 ft of new 2 vent line with vent alarm - re-cement area. 04/07/06-Hiralkumar Patel. Received letter from Mr. Berman. this includes copy of tank test results. result shows tank only passed in test. 04/18/06-Hiralkumar Patel. Spoke with Mr. Berman. he has got bill from Petroleum. once he pay it, he will get final report and will forward it to Department. Mr. Berman will be out of office for this whole week now. 05/02/06-Hiralkumar Patel. REceived tank test results which shows whole system passed the test. based on site visit and tank test result, case closed."

Remarks:

"unknown reason for spill at this time"

DER Facility ID: 272857  
DEC Memo: "See duplicate spill #0412147. 2/14/2005 - Sangesland spoke to Quilvio who manages the Chelsea Car Wash/Gas Station. Station is only about 5 years old - all new equipment & alarms - Also the site is right next to the West Side Hwy and the water table is quite high. A water sump pump under the station runs constantly at a very high rate. Any groundwater which may have been under the station around the time of the spill is long gone at this point. Quilvio said he got a gasoline delivery about 3 or 4 weeks ago from Island Transportation. Island overfilled the tanks and the alarms went off. The Island delivery man left without doing any remediation. Quilvio says there was gasoline in 3 manholes around on the site. He called American Resource Technology (Chelsea's regular test & repair company). They came and cleaned the overfill buckets and checked the system. ExxonMobil is somehow involved as a distributor??? Exxon environmental people came to the site to test the air in 2 nearby basements. There continues to be a problem with gasoline smell in the basement next door. Quilvio is now going to hire a contractor to run a couple of test borings in the area to determine if any of the gasoline went into the ground, or if it was all contained in the overfill buckets. 2/14/05 Spoke to Frank Messina, ExxonMobil Global Remediation (908-730-2055). ExxonMobil only supplies the station with fuel. He stated that ExxonMobil may have initially sent someone to test the air if they did not realize the station was independent. Filed spill report #1016151 with DEP. (KMF) 2/15/05 Changed address from 62-76 10th Ave to 450 W 15th St. Spoke to Quilvio Monoz, operator of Tenth Avenue Car Wash (PBS 2-604379). Quilvio called ExxonMobil territory manager, Mike Romano. ExxonMobil sent Geologic Services Corp., Michael Meyerhofer, with PID. He tested basements which returned negative. Q. Monoz hired American Resource Technology (Bob Arcaro, 718-234-0024) to test the lines. They will also be doing borings around the tanks. Q. Monoz stated he will be taking

responsibility for now but feels Island Transportation is responsible for the overflow. (KMF) 2/15/05 Spoke to Bob Arcaro, American Resource Technology. Will be testing fill lines since Q. Monoz stated there was product in the sumps during delivery. The drain plugs in the spill containment boxes would not open. They will probably change these first and then test fill lines. He stated he wasn't sure that there was product lost to the subsurface or that borings were necessary. I requested he do the line tests and speak further with the operator to determine how much product was lost. If borings are necessary, Bill Klein from Franklin will probably do the work. (KMF) 07/28/05 A limited subsurface investigation report by Fenley & Nicol dated 4-13-05 (See File) was reviewed. Report recommends an extended subsurface investigation to determine the extent of hydrocarbon impact. Attempted to contact Fenley & Nicol- unsuccessful. 2:00pm Called Bob Arcaro (718-234-0024). No answer. LNK. 08/19/05 Bob Arcaro never returned call. Next step- recontact either Fenley & Nicol or Bob Arcaro to determine if a subsurface investigation was completed and if there is a report available. LNK. 04/12/06 - Hough - Received additional documents from Fenley & Nicol concerning limited subsurface investigation. Report concludes that there was no significant impact from the overflow event. Spill should be closed. However there is another open spill on the site 01-03052. Next Step: Regional follow-up on older open spill and verification of finding of report from the most recent spill. Activities may include site visit and obtaining documentation of other remedial activities related to residual impacts from older spill. 02/22/10-Hiralkumar Patel. while investigating spill #: 0911962, came across this spill number. this spill was reported as 500 gal gasoline spilled during delivery at the gas station which is located at 70 10th Avenue. Mr. Shternlicht owned two properties during spill event: 450 W 15th Street (address in spill report) and 70 10th Avenue (where gas tanks located and actual spill occurred). then Mr. Shternlicht sold property at 450 W 15th Street and new owner Mr. Randberg bought it in late 2006. Mulnick LLC. \*\*owner of car wash/gas station property\*\* c/o Milk Studios 450 W 15th Street, 8th Floor New York, NY 10011 Attn.: Erez Shternlicht PH. (212) 645-2797 email: erez@milkstudios.com base on available information, spill was happened on 70 10th Avenue (aka 461-469 W 14th Street and 58-76 10th Ave). refer to spill #: 0911962 for further details."

Remarks:

"The delivery guy pumped 72 inches of material into the tank. The alarms went off and the delivery man just drove off. 200 gallons have been recovered and lost 200-300 gallons into the ground. (OFF THE WESTSIDE HIGHWAY)"

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead\_DEC Field was ROMMEL This spill case was reassigned from DEC (Sigona) to Rommel on 01/07/2004. On December 22, 2000, DEC (Sigona) observed the excavation and removal of 4 x 550 gallon USTs. The contents of 3 x 550 gallon USTs was found to contain a mixture of gasoline and water. 1 x 550 gallon UST contained water only. The excavation was being performed by Fenely & Nicol for Public Parking, Inc. The project was also supervised by DEC contractor EAR under PIN project for New York Auto Service which was impacting the Jacob Javits Center. Does not appear to be related to New York Auto Service spill or have an impact on the Javits Center. 2/24/05-Vought-Spoke with Phillip Rizzuto (973-470-25510) who is agent for property owners. Rizzuto asked for status of Tank Closure Report review and Vought required that a copy be sent to DEC for review. Spill transferred from Rommel to Vought. 3/16/05-Vought-Reviewed Tank Closure Report(Fenley & Nicol - Angel Ramirez) dated 1/18/01 and received on 3/2/05. Project was prepared for: Mr. Phil Rizzuto Classic Sanitation Corporation 99 Route 3 Clifton, NJ 07014 Removal and closure of one (275-gallon) fuel oil

AST and four (550-gallon) gasoline USTs. Subject site is used as a public parking garage. Three (550-gallon) gasoline USTs were removed from the north-east front of the interior of the building(Tank Area 1) and one (550-gallon) gasoline UST was removed from southwest of Tank Area 1. Depth to groundwater at site estimated to be 20 feet below grade and flow to the west. Inspector Anthony Sigona of the NYSDEC was present at the time of the excavation to inspect the tanks and excavated area . The bottom and sidewalls of the excavation consisted of Manhattan Schist and bedrock . ...it was discovered that soil above the tanks exhibited evidence of gasoline contamination . All product lines were removed and disposed. Soil were analyzed for 8260/8270 TCLP as per Sigona. Soil analyticals only showed on minor exceedence of naphthalene at 11ug/L (Guidance value is 10ug/L). No PID readings were detected. Report recommends No Further Action. Spill closed by Vought due to one minor TAGM 4046 Soil Cleanup Objective exceedence."

Remarks:

"DURING TANK REMOVAL SOIL CONTAMINATION HAS BEEN DISCOVERED. CONTAMINATION IS ON TOP OF TANKS. AREA TO BE EXCAVATED AND FURTHER SAMPLING/TESTING TO BE DONE. NO CALL BACK REQUESTED. CALLER HAS BEEN IN CONTACT WITH REGION 2 OFFICE."

**FORMER GUARDIAN CLEANERS (Continued)**

**S113916768**

Features: The site is a rectangular shaped parcel of land measuring approximately 9,000 square feet and is improved with an one 11-story building with a basement. Current Zoning and Land Use: The building on site is used for office space and a restaurant/bar on the first floor and part of the basement. The site is zoned M1-6, which allows industrial and manufacturing. The current use of the site complies with the zoning code. Past Use of the Site: A dry cleaning facility formerly occupied the restaurant/bar space until approximately 1990. The former dry cleaning operations are believed to have contributed to the known contamination found in groundwater and soil vapor on the site. Site Geology and Hydrogeology: The subsurface lithology was homogenous throughout the site. The subsurface soil was noted to consist of urban fill material and brown coarse grain sand. Based upon boring logs from various site investigations, groundwater is encountered 8-10 feet beneath the basement slab except along the western property boundary where the water table is shallower, resulting in the need to actively pump out water entering the service elevator pit. "

Env Problem: "Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were chlorinated volatile organic compounds (VOCs) such as tetrachloroethene (PCE), trichloroethene (TCE), and cis-1,2-dichloroethene (DCE) which were detected in soil, groundwater and soil vapor. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil and groundwater is being managed under a Site Management Plan."

Health Problem: "Direct contact with contaminants in the soil or groundwater is unlikely because the site is entirely covered with a building. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. A sub-slab depressurization system was installed beneath the on-site building to prevent vapors beneath the slab from entering the building. Sampling at an adjacent structure indicates soil vapor intrusion is not a concern. Access to the other adjacent building was denied and soil vapor intrusion may be a potential exposure pathway at that structure. "

Site Description:

"Location: The site is located at 27-35 West 24th Street in the Borough of New York, New York. It is located on the northern side of West 24th Street. The site is designated as Block 826, Lot 19. Site Features: The site is a rectangular shaped parcel of land measuring approximately 9,000 square feet and is improved with an one 11-story building with a basement. Current Zoning and Land Use: The building on site is used for office space and a restaurant/bar on the first floor and part of the basement. The site is zoned M1-6, which allows industrial and manufacturing. The current use of the site complies with the zoning code. Past Use of the Site: A dry cleaning facility formerly occupied the restaurant/bar space until approximately 1990. The former dry cleaning operations are believed to have contributed to the known contamination found in groundwater and soil vapor on the site. Site Geology and Hydrogeology: The subsurface lithology was homogenous throughout the site. The subsurface soil was noted to consist of urban fill material and brown coarse grain sand. Based upon boring logs from various site investigations, groundwater is encountered 8-10 feet beneath the basement slab except along the western property boundary where the water table is shallower, resulting in the need to actively pump out water entering the service elevator pit. "

Env Problem: "Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were chlorinated volatile organic compounds (VOCs) such as tetrachloroethene (PCE), trichloroethene (TCE), and cis-1,2-dichloroethene (DCE) which were detected in soil, groundwater and soil vapor. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil and groundwater is being managed under a Site Management Plan."

Health Problem: "Direct contact with contaminants in the soil or groundwater is

unlikely because the site is entirely covered with a building. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. A sub-slab depressurization system was installed beneath the on-site building to prevent vapors beneath the slab from entering the building. Sampling at an adjacent structure indicates soil vapor intrusion is not a concern. Access to the other adjacent building was denied and soil vapor intrusion may be a potential exposure pathway at that structure. "

contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. A sub-slab depressurization system was installed beneath the on-site building to prevent vapors beneath the slab from entering the building. Sampling at an adjacent structure indicates soil vapor intrusion is not a concern. Access to the other adjacent building was denied and soil vapor intrusion may be a potential exposure pathway at that structure. "

Site Description: "Location: The site is located at 27-35 West 24th Street in the Borough of New York, New York. It is located on the northern side of West 24th Street. The site is designated as Block 826, Lot 19. Site Features: The site is a rectangular shaped parcel of land measuring approximately 9,000 square feet and is improved with an one 11-story building with a basement. Current Zoning and Land Use: The building on site is used for office space and a restaurant/bar on the first floor and part of the basement. The site is zoned M1-6, which allows industrial and manufacturing. The current use of the site complies with the zoning code. Past Use of the Site: A dry cleaning facility formerly occupied the restaurant/bar space until approximately 1990. The former dry cleaning operations are believed to have contributed to the known contamination found in groundwater and soil vapor on the site. Site Geology and Hydrogeology: The subsurface lithology was homogenous throughout the site. The subsurface soil was noted to consist of urban fill material and brown coarse grain sand. Based upon boring logs from various site investigations, groundwater is encountered 8-10 feet beneath the basement slab except along the western property boundary where the water table is shallower, resulting in the need to actively pump out water entering the service elevator pit. "

Env Problem: "Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were chlorinated volatile organic compounds (VOCs) such as tetrachloroethene (PCE), trichloroethene (TCE), and cis-1,2-dichloroethene (DCE) which were detected in soil, groundwater and soil vapor. Site Description:

"Location: The site is located in a mixed commercial and residential area. The property address is 674 Ninth Avenue, New York, NY 10036. The property is one tax parcel identified by the New York City Department of Finance as Block 1037, Lot 63. The site is located along the east side of Ninth Avenue, north of West 46th Street, south of West 47th Street, and west of Eighth Avenue. The approximate site area is 2,325 square feet (0.05 acres). Site Features: The site is improved with a two (2) story building that is currently vacant. The building is comprised of two (2) units totaling 3,988 square feet. The building was constructed prior to 1890 and originally consisted of a four-story building with a one-story addition off the rear. In 1936, the building consisted of a two-story building with a basement and a one-story addition. Current Zoning and Land Use: The site is zoned R-8 residential with a C1-5 commercial overlay. The site is additionally part of the Clinton Special zoning district. R-8 residence districts can range from mid-rise, eight- to ten-story buildings to much taller buildings set back from the street on large zoning lots. The C1-5 commercial overlays within residence districts are mapped on streets that serve the retail needs of local residents. In mixed buildings such as the site, commercial uses are limited to one or two floors and must always be located below residential use. The surrounding area consists of mixed commercial and residential buildings. Past Use of the Site: The site was developed prior to 1890 and was historically occupied by the following businesses: Herman Kellerman Painters and Supplies from 1920 through 1934, Harold Alpert Linoleum and Carpets from 1938 through 1983, Empire Tailors & Cleaners from at least 1988 through 2018, Teknokool in 1998, Marlen Gallery in 2000, New York Tae Kwon Do Academy in 2006, and JMC Custom Framing, Inc. from 2010 through at least 2014. The former dry-cleaning operations have impacted the site. Site Geology and

Hydrogeology: Subsurface soils at the site consist of silty sands underlain by clay soils. Drilling refusal below the clay was due to bedrock. A review of the Bedrock and Engineering Geologic Maps of New York County revealed bedrock is located at approximately 15 feet bgs in the vicinity of the site. During the investigation, bedrock was encountered at a shallower depth of 10 feet or less bgs. Groundwater is expected to flow to the west towards the Hudson River or to the south based on bedrock geology. Groundwater was not encountered in any of the borings advanced as part of the limited site investigation. "

Env Problem: "Soil was analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), and pesticides. Soil Vapor and Indoor air were sampled for VOCs. Based upon investigations conducted to date, the primary contaminants of concern for OU 1 include trichloroethene (TCE) and Terachloroethene (PCE). Soil - PCE was found near the southeast portion of the property at a depth of about 5 feet below the soil surface, at a concentration slightly exceeding the soil cleanup objective (SCO) for restricted residential (19 ppm). Additionally, a soil pile found in the property s basement was analyzed and various SVOCs, as well as TCE were found at concentrations exceeding their respective restricted residential SCOs. Soil Vapor and Indoor Air TCE and PCE were detected in soil vapor at elevated concentrations up to 3 and 1,200 micrograms per cubic meter, respectively. TCE and PCE were also detected in the indoor air at elevated concentrations up to 2.6 and 180 micrograms per cubic meter, respectively. "

Health Problem: "The site is covered with buildings and pavement; however, people may come into contact with contaminated soil if they dig below the surface. The area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in the soil vapor (air between soil particles) may move into buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Environmental sampling indicates that the potential exists for the inhalation of site contaminants due to soil vapor intrusion for the on-site building and off-site structures."

Record Added Date: 10/19/2018  
Record Updated Date: 02/07/2019  
Update By: JHOCONNE  
Site Description:

"Location: The site is located in a mixed commercial and residential area. The property address is 674 Ninth Avenue, New York, NY 10036. The property is one tax parcel identified by the New York City Department of Finance as Block 1037, Lot 63. The site is located along the east side of Ninth Avenue, north of West 46th Street, south of West 47th Street, and west of Eighth Avenue. The approximate site area is 2,325 square feet (0.05 acres). Site Features: The site is improved with a two (2) story building that is currently vacant. The building is comprised of two (2) units totaling 3,988 square feet. The building was constructed prior to 1890 and originally consisted of a four-story building with a one-story addition off the rear. In 1936, the building consisted of a two-story building with a basement and a one-story addition. Current Zoning and Land Use: The site is zoned R-8 residential with a C1-5 commercial overlay. The site is additionally part of the Clinton Special zoning district. R-8 residence districts can range from mid-rise, eight- to ten-story buildings to much taller buildings set back from the street on large zoning lots. The C1-5 commercial overlays within residence districts are mapped on streets that serve the retail needs of local residents. In mixed buildings such as the site, commercial uses are limited to one or two floors and must always be located below residential use. The surrounding area consists of mixed commercial and residential buildings. Past Use of the Site: The site was developed prior to 1890 and was historically occupied by the following businesses: Herman Kellerman Painters and Supplies from 1920 through 1934, Harold Alpert Linoleum and Carpets from 1938 through 1983, Empire Tailors & Cleaners from at least 1988 through 2018, Teknokool in 1998, Marlen Gallery in 2000, New York Tae Kwon Do Academy in 2006, and JMC Custom Framing, Inc. from 2010 through at least 2014. The former dry-cleaning operations have impacted the site. Site Geology and Hydrogeology: Subsurface soils at the site consist of silty sands underlain by clay soils. Drilling refusal below the clay was due to

bedrock. A review of the Bedrock and Engineering Geologic Maps of New York County revealed bedrock is located at approximately 15 feet bgs in the vicinity of the site. During the investigation, bedrock was encountered at a shallower depth of 10 feet or less bgs. Groundwater is expected to flow to the west towards the Hudson River or to the south based on bedrock geology. Groundwater was not encountered in any of the borings advanced as part of the limited site investigation. "

Env Problem: "Soil was analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), and pesticides. Soil Vapor and Indoor air were sampled for VOCs. Based upon investigations conducted to date, the primary contaminants of concern for OU 1 include trichloroethene (TCE) and Terachloroethene (PCE). Soil - PCE was found near the southeast portion of the property at a depth of about 5 feet below the soil surface, at a concentration slightly exceeding the soil cleanup objective (SCO) for restricted residential (19 ppm). Additionally, a soil pile found in the property s basement was analyzed and various SVOCs, as well as TCE were found at concentrations exceeding their respective restricted residential SCOs. Soil Vapor and Indoor Air TCE and PCE were detected in soil vapor at elevated concentrations up to 3 and 1,200 micrograms per cubic meter, respectively. TCE and PCE were also detected in the indoor air at elevated concentrations up to 2.6 and 180 micrograms per cubic meter, respectively. "

Health Problem: "The site is covered with buildings and pavement; however, people may come into contact with contaminated soil or groundwater if they dig below the surface. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in the soil vapor (air between soil particles), may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The potential exists for people to inhale site contaminants in indoor air due to soil vapor intrusion in the event the site is re-occupied. Additional investigation is needed to determine whether actions are needed to address exposures associated with soil vapor intrusion off-site."

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Lists of Federal NPL (Superfund) sites***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

|                                         |                                        |

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

### ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/25/2022

### ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

|                                         |                                        |

### ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

|                                         |                                         |

### ***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

|                                         |                                         |

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

|                                         |                                         |
|-----------------------------------------|-----------------------------------------|

### RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

|                                         |                                         |

NJ SHWS: Known Contaminated Sites in New Jersey

The Known Contaminated Sites in New Jersey includes sites under the purview of the Site Remediation Program which have contamination present at levels greater than the applicable cleanup criteria for soil and/or groundwater standards. The sites appearing in Known Contaminated Sites in New Jersey are classified as either active, where the site is assigned to a specific remedial program area, or pending, where the site is awaiting assignment to a specific remedial program area. Sites where no further action (NFA) designation has been given are not included in this report unless there are other areas of identified contamination which have not been remediated. This report includes sites being remediated under all of the various regulatory programs administered by the Site Remediation Program such as: Federal Superfund Program, Federal Resource Conservation and Recovery Act (RCRA), New Jersey's Industrial Site Recovery Act (ISRA), New Jersey's Underground Storage of Hazardous Substances Act, New Jersey's Spill Compensation and Control Act, New Jersey's Solid Waste Management Act, New Jersey's Water Pollution Control Act.

### NY RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

### NY VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

Date of Government Version: 01/06/2022

### NY ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

#### ***Local Brownfield lists***

##### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

### NY PFAS: PFAS Contamination Site Location Listing

DEC surveyed select businesses, fire departments, fire training centers, bulk storage facilities, airports, and Department of Defense (DoD) facilities. The responses to the survey have helped to determine if these entities used or stored materials containing PFOA/PFOS including AFFF and dispersants used in Teflon coating operations. The results of this survey will be updated periodically as additional responses are received..

### **NJ LIENS: Environmental LIENS**

A listing of properties with environmental liens. The listing includes sites from the Site Remediation & Waste Management Program Sites where the Department has placed either a 1st Priority or Regular Spill Fund Lien against. 1st Priority Type Lien - a lien placed against the property where the discharge occurred providing that the owners of the property have some responsibility towards the discharge. First Priority Lien is superior to other types of liens. Non-Priority (Regular) Type Lien - a lien placed against the Responsible Party & their revenues and all real and personal property, other than the real property comprising the location of the discharge.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### NY HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Date of Government Version: 01/01/2002

### **Other Ascertainable Records**

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

### SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Data Release Frequency: Quarterly

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

Data Release Frequency: Quarterly

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Data Release Frequency: Annually

### SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Data Release Frequency: Annually

### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

### UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

### US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

Date of Government Version: 10/12/2016  
Date Data Arrived at EDR: 10/26/2016

### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

### NY E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

Data Release Frequency: Varies

### NY HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### NY SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

### NYC LEAD 2: Recent Lead Paint Violations

Pursuant to New York City's Housing Maintenance Code, the Department of Housing Preservation and Development (HPD) issues violations against conditions in rental dwelling units that have been verified to violate the New York City Housing Maintenance Code (HMC) or the New York State Multiple Dwelling Law (MDL). Violations are issued when an inspection verifies that a violation of the HMC or MDL exists. It is closed when the violation is corrected, as observed/verified by HPD or as certified by the landlord.

Date of Government Version: 11/02/2021  
Date Data Arrived at EDR: 11/03/2021

## EDR HIGH RISK HISTORICAL RECORDS

### ***EDR Exclusive Records***

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A

Data Release Frequency: No Update Planned

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

#### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/11/2021  
Date Data Arrived at EDR: 11/12/2021  
Date Made Active in Reports: 02/01/2022

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Day Care Providers

Source: Department of Health

Telephone: 212-676-2444

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

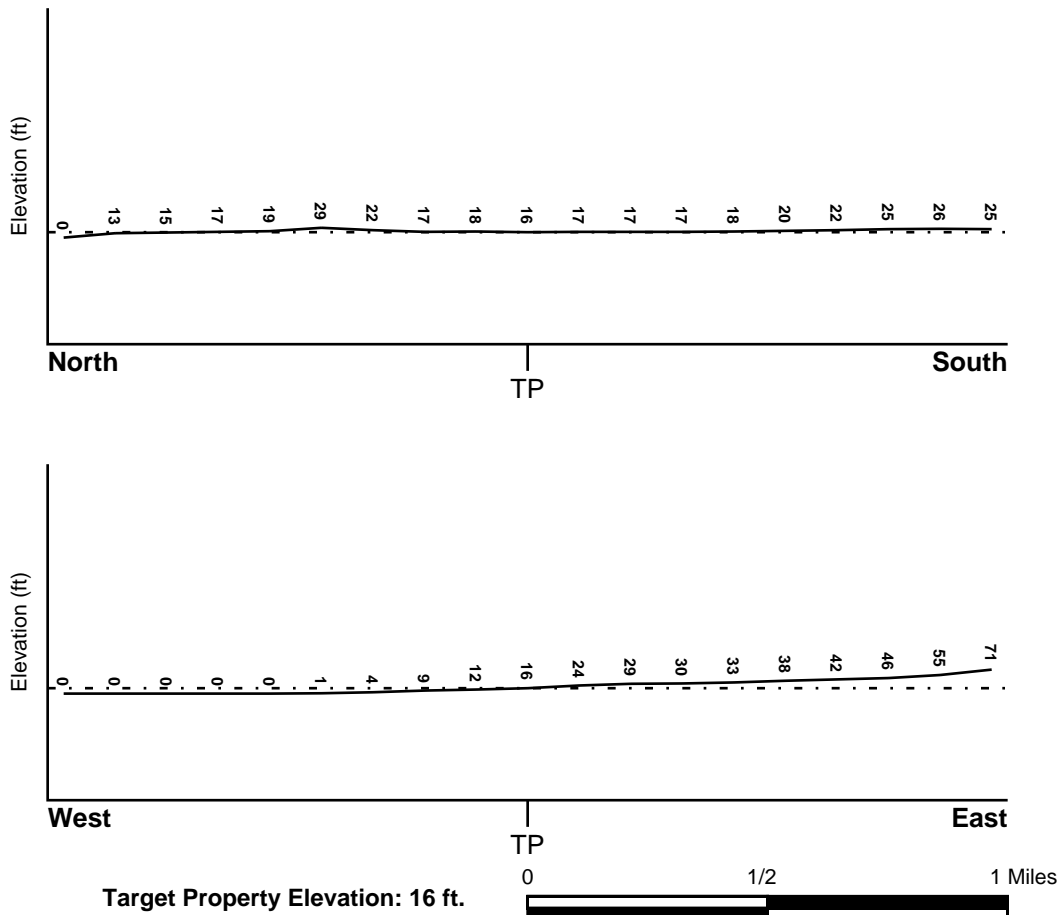

### TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### ***Site-Specific Hydrogeological Data\*:***

|                             |                                                                                                                                                                                                                                                       |

| Site Name:                  | MANHATTAN GENERAL MAIL FACILITY                                                                                                                                                                                                                       |
| Site EPA ID Number:         | NY6180000352                                                                                                                                                                                                                                          |
| Groundwater Flow Direction: | NOT AVAILABLE.                                                                                                                                                                                                                                        |
| Inferred Depth to Water:    | not available. Saturated layers impacted by salt water intrusion are present in the overburden. It is generally inferred that the depth to the uppermost 'aquifer' is greater than 70 feet at the surface of the bedrock/sediment interface.          |
| Hydraulic Connection:       | Detailed hydraulic connection information is not available. Glacial till and outwash deposit sediments overlie the Manhattan Schist, the uppermost bedrock unit at the site. The surface elevation of bedrock decreases to the southwest of the site. |
| Sole Source Aquifer:        | No information about a sole source aquifer is available                                                                                                                                                                                               |
| Data Quality:               | Information is inferred in the CERCLIS investigation report(s)                                                                                                                                                                                        |

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| <u>MAP ID</u> | <u>LOCATION</u><br><u>FROM TP</u> | <u>GENERAL DIRECTION</u><br><u>GROUNDWATER FLOW</u> |
|---------------|-----------------------------------|-----------------------------------------------------|
| Not Reported  |                                   |                                                     |

## **GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY**

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

Era: Paleozoic  
System: Ordovician  
Series: Lower Ordovician and Cambrian carbonate rocks  
Code: OC *(decoded above as Era, System & Series)*

#### **GEOLOGIC AGE IDENTIFICATION**

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### **DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY**

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam  
loamy sand  
sandy loam  
fine sandy loam

Surficial Soil Types: silt loam  
loamy sand  
sandy loam  
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock  
very gravelly - loamy sand  
stratified  
sandy loam

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### New York Public Water Wells

Source: New York Department of Health

Telephone: 518-458-6731

## OTHER STATE DATABASE INFORMATION

#### Oil and Gas Well Database

Source: Department of Environmental Conservation

Telephone: 518-402-8072

These files contain records, in the database, of wells that have been drilled.

### RADON

#### State Database: NY Radon

Source: Department of Health

Telephone: 518-402-7556

Radon Test Results

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

#### Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

#### Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

**From:** New York DEC Support <newyorkdec@mycusthelp.net>  
**Sent:** Monday, March 28, 2022 6:22 PM  
**To:** Joanne Bedkowski  
**Subject:** FOIL Request :: W098707-032822

Dear Joanne:

Thank you for your Freedom of Information Law (FOIL) request. Your request has been received and is being processed. Your request was received in this office on 3/28/2022 and given the reference number FOIL #W098707-032822 for tracking purposes. You may expect the Department's response to your request no later than **4/26/2022**.

Record Requested: **Records regarding above and underground storage tanks, permits and/or violations, spills, hazardous material and any other information of environmental concern as we are conducting a Phase I Environmental Site Assessment. (My ref#: Z3-4898), Time frame: 01/01/1940 - 03/28/2022 - Elliott-Chelsea - Various addresses (see attached address listing), Manhattan, NY 10001**

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the FOIL Center.

## Request a Record

Please make your request specific so you receive the fastest service. After you submit a FOIL request you will receive a confirmation number so you can track the status of the response. The agency will notify you about how much time is required to respond to your request.

### Category (optional)

Selecting a category helps clarify which agency will receive the request by listing agencies grouped by categories.

Environment

### Agency (required)

Select the agency that will handle your request.

Department of Environmental Protection (DEP)

### Request Title (required)

FOIL Request

77 characters remaining

**Note: The agency, category, and title of your request will be visible to the public. Do not enter personal information here.**

**Ex: Queens Blvd Roadwork Permit.**

### Request Description (required)

Records regarding above and underground storage tanks, permits and/or violations, spills, hazardous material and any other information of environmental concern as we are conducting a Phase I Environmental Site Assessment. (My ref#: Z3-4898), Time frame: 01/01/1940 - 03/28/2022 - Elliott-Chelsea - Various addresses (see attached address listing), Manhattan, NY 10001

4629 characters remaining

**Note: The request details you write here will not be visible to the public. However, the agency may post a description of the records provided.**

**Ex: Roadwork permits for work done in on Queens Blvd. between 40th and 45th streets, Borough of Queens, in September and October 2017.**

Upload File (optional, must be less than 20 Mb)

Clear File

Elliott-Chelsea.pdf

## Personal Information

First and last name fields are required. The Email field is optional but recommended. If you do not provide an email you must enter either a phone number, fax number, or address in the Alternate Contact Information section.

This information will not be publicly viewable on this site. You must provide contact information so that the agency can respond to your request for records.

#### Request Type:

#### Description:

Freedom of Information Law  
Request

A FOIL request is a request for any "record" under NY's Freedom of Information Law (Article 6 of the Public Officers Law). Section 86 defines a "record" as: "any information kept, held, filed, produced or reproduced by, with or for an agency or the state legislature, in any physical form whatsoever including, but not limited to, reports, statements, examinations, memoranda, opinions, folders, files, books, manuals, pamphlets, forms, papers, designs, drawings, maps, photos, letters, microfilms, computer tapes or discs, rules, regulations or codes. NYSDEC maintains records in a variety of forms, or media, such as in hard copy (on paper), as recordings, as photographs, in electronic form, etc.

**Type of Record(s) Requested:**

Other

**Description of Record(s) Requested:**

Records regarding above and underground storage tanks, permits and/or violations, spills, hazardous material and any other information of environmental concern as we are conducting a Phase I Environmental Site Assessment. (My ref#: Z3-4898), Time frame: 01/01/1940 - 03/28/2022 - Elliott-Chelsea - Various addresses (see attached address listing), Manhattan, NY 10001

**NYSDEC Office processing the Request:**

Region 2 (New York City) Covers the counties of Brooklyn Bronx Manhattan Queens and Staten Island

**If your request pertains to just one Region, select that Region. If your request pertains to more than one Region, select Central Office. If you're unsure which Region your request pertains to, select Central Office. The Department will route your request to the appropriate Region(s)**

**Preferred Method to Receive Records:**

Electronic copies

**NYSDEC will use its best efforts to provide records via the method you select. However, in some cases a particular delivery method is not feasible In such cases NYSDEC will deliver the records via an alternative method**

Please note not all public documents are available in electronic format. If the document(s) requested are not available electronically, we will make them available for inspection or by paper copy in accordance with the Public Records Law.

Thank you for your Freedom of Information Law (FOIL) request. Your request has been received and is being processed. Your request was received in this office on 3/28/2022 and given the reference number FOIL #W098707-032822 for tracking purposes. You may expect the Department's response to your request no later than **4/26/2022**.

Record Requested: **Records regarding above and underground storage tanks, permits and/or violations, spills, hazardous material and any other information of environmental concern as we are conducting a Phase I Environmental Site Assessment. (My ref#: Z3-4898), Time frame: 01/01/1940 - 03/28/2022 - Elliott-Chelsea - Various addresses (see attached address listing), Manhattan, NY 10001**

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the FOIL Center.

**NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL  
BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT**

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story, shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Borough Superintendent.

**NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL  
BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT**

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646I of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Sec. 6.1.2.3 sub-4 Building Code, C.26-273.0 Adm. Code

"Prior to the occupancy of a structure erected or altered after January 1, 1933, the authorized occupant of each floor of said structure as stated in the certificate of occupancy shall be permanently posted under glass and maintained in the main entrance hall of such structures."

Borough Superintendent

**NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL  
BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT**

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Borough Superintendent.

**NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL  
BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT**

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646I of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 R. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Borough Superintendent

**NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT**

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate, except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code; or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

**Sec. 612.3, sub-4 Building Code, C.26-273.0 Adm. Code**

"Prior to the occupancy of a structure erected or altered after January 1, 1962, the authorized Secretary of each floor of said structure as stated in the certificate of occupancy shall be permanently posted under glass and maintained in the main entrance hall of such structures."

THIS CERTIFICATE SHALL ALSO BE CONSIDERED A CERTIFICATE OF COMPLIANCE OR OCCUPANCY UNDER SECTION 302 OF THE BUILDING CODE

# DEPARTMENT OF BUILDINGS

## BOROUGH OF MANHATTAN, THE CITY OF NEW YORK

No. 00082  
Date August 24, 1964

*Thomas V. Ruck*  
Borough Superintendent

**NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL  
BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT**

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Sec. 4123 sub 4 Building Code, C26-2730 Adm. Code  
Prior to the occupancy of this building, the Borough Superintendent, January  
1, 1938, the authorized person or persons of such building or structure as  
stated in the certificate of occupancy shall be permanently posted under  
glass and maintained in the main entrance hall of such structure.

Borough Superintendent

CERTIFICATE WILL BE NULL AND VOID IF ALTERED IN ANY MANNER OR ADDITIONS ARE MADE THERETO.

(Page 1)

**NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL  
BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT**

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Sec. 61.23 sub 4 Building Code, C.26-273.0 Adm. Code  
Prior to the expiration of this certificate, no change shall be made in the use or occupancy of the building or structure as stated in the certificate, and no alteration or conversion shall be made in the building or structure, or in the use or occupancy thereof, except as provided under the provisions of the Building Code, and no change shall be made in the use or occupancy of the building or structure as stated in the certificate.

Sec. 612.03 of the 1938 Adm. Code  
 "Prior to the occupancy of any building constructed after January  
 1, 1938, the estimated live load shall be determined and posted under  
 stated in the certificate of occupancy and shall be maintained in the main  
 glass and maintained in the main hall of each structure."

Borough Superintendent

HOUSING AND  
DEPARTMENT OF BUILDINGS  
BOROUGH OF MANHATTAN, CITY OF NEW YORK

HVC **CERTIFICATE OF OCCUPANCY No. 23255 193**

Supersedes Certificate of Occupancy No.

To the owner or owners of the building:

New York January 3, 1938.

THIS CERTIFIES that the building located on Block 723, Lot 51  
known as 420 West 23th Street  
25th front

under a permit, Application No. 2482 Alt of 1937, conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is nonfireproof construction within the meaning of the building code and may be used and occupied as a residence building as hereinafter qualified, in a residence district under the building zone resolution, subject to all the privileges, requirements, limitations and conditions prescribed by law or as hereinafter specified.

This certificate is issued to David S. Lang, architect  
200 Broadway, City.

, for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 19, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the commissioner of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined.

Housing and  
Commissioner of Buildings, ~~New York City Department of~~

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

Borough Superintendent

**NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT**

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate, except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code; or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

For violation of this certificate, the owner or occupant of the building or premises shall be liable to a fine of not more than \$100.

For violation of this certificate, the owner or occupant of the building or premises shall be liable to a fine of not more than \$100.

For violation of this certificate, the owner or occupant of the building or premises shall be liable to a fine of not more than \$100.

For violation of this certificate, the owner or occupant of the building or premises shall be liable to a fine of not more than \$100.

For violation of this certificate, the owner or occupant of the building or premises shall be liable to a fine of not more than \$100.

For violation of this certificate, the owner or occupant of the building or premises shall be liable to a fine of not more than \$100.

For violation of this certificate, the owner or occupant of the building or premises shall be liable to a fine of not more than \$100.

For violation of this certificate, the owner or occupant of the building or premises shall be liable to a fine of not more than \$100.

For violation of this certificate, the owner or occupant of the building or premises shall be liable to a fine of not more than \$100.

For violation of this certificate, the owner or occupant of the building or premises shall be liable to a fine of not more than \$100.

For violation of this certificate, the owner or occupant of the building or premises shall be liable to a fine of not more than \$100.

For violation of this certificate, the owner or occupant of the building or premises shall be liable to a fine of not more than \$100.

For violation of this certificate, the owner or occupant of the building or premises shall be liable to a fine of not more than \$100.

For violation of this certificate, the owner or occupant of the building or premises shall be liable to a fine of not more than \$100.

For violation of this certificate, the owner or occupant of the building or premises shall be liable to a fine of not more than \$100.

For violation of this certificate, the owner or occupant of the building or premises shall be liable to a fine of not more than \$100.

Sec. 6.1.2.3 sub-4 Building Code, C.26-273.0 Adm. Code

"Prior to the occupancy of a structure erected or altered after January 1, 1962, the authorized signatory of each floor of said structure as stated in the certificate of occupancy shall be permanently posted under glass and maintained in the main entrance hall of such structures."

THIS CERTIFICATE SHALL ALSO BE CONSIDERED A CERTIFICATE OF COMPLIANCE ON OCCUPANCY UNDER SECTION 302 OF THE

**DEPARTMENT OF BUILDINGS**  
**BOROUGH OF MANHATTAN, THE CITY OF NEW YORK**

*Thomas V. Ruck*  
 Borough Superintendent

**NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT**

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Sec. 6123 sub 4 Building Code, C26-2730 Adm. Code  
Prior to the occupancy of this building, on or after January 1, 1938, the authorities of the City of New York shall be permitted to post under stated in the certificate of occupancy shall be permanently posted under place and maintained in the main entrance hall of such structures."

## DEPARTMENT OF BUILDINGS

BOROUGH OF MANHATTAN, THE CITY OF NEW YORK

No. 60569

Date December 4, 1964

## CERTIFICATE OF OCCUPANCY

Borough Superintendent

**NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL  
BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT**

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Sec. 6123 sub. 4 Building Code, C26-273.0 Adm. Code  
Prior to the expiration of a certificate issued after January  
1, 1938, the building, structure or enclosure as  
stated in the certificate shall be kept in good  
shape and maintained in the same condition as of such date.

Sec. 21.23 sub-4 Building Code, C26-273.8 Adm. Code  
Prior to the occupancy of a structure erected or altered after January  
1, 1963, the authorized occupancy of each floor of said structure as  
stated in the certificate of occupancy shall be permanently posted under  
glass and maintained in the main entrance hall of such structure.

Sec. 4.123 sub-4 Building Code, C.26-273.0 Adm. Code  
Prior to the occupancy of a structure erected or altered after January  
1, 1963, the authorized occupancy of each floor of said structure as  
stated in the certificate of occupancy, shall be permanently posted under  
glass and maintained in the main entrance hall of such structure.

Borough Superintendent

CERTIFICATE WILL BE NULL AND VOID IF ALTERED IN ANY MANNER OR ADDITIONS ARE MADE THERETO.

(Page 1)

**NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT.**

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Sec. 2222 sub 4 Building Code, C25-273.0 Adm. Code

After the expiration of the period for which the certificate is issued, the structure is to be permanently posted under glass and maintained in the main entrance hall of such structures.

48

Sec. 21.22 sub-4 Building Code, C-26-273.0 Adm. Code

1. This is the occupancy of the building or structure as shown on the plans and specifications submitted in connection with the application for this certificate, and shall be permanently posted under glass and maintained in the main entrance hall of such structures.

Borough Superintendent

**NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL  
BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT**

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate, except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

## DEPARTMENT OF BUILDINGS

BOROUGH OF MANHATTAN, THE CITY OF NEW YORK

No. 50372 TEMPORARY

Date October 23, 1964

## CERTIFICATE OF OCCUPANCY

(Standard form adopted by the Board of Standards and Appeals and issued pursuant to Section 646 of the New York Charter, and Sections C.26-181.0 to C.26-187.0 inclusive Administrative Code 2.1.3.1. to 2.1.3.7. Building Code.)

**NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL  
BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT**

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

## DEPARTMENT OF BUILDINGS

BOROUGH OF MANHATTAN, THE CITY OF NEW YORK

No. 60599 TEMPORARY

Borough Superintendent

CERTIFICATE WILL BE NULL AND VOID IF ALTERED IN ANY MANNER OR ADDITIONS ARE MADE THERETO.

(Page 1)

**NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL  
BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT**

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

January 13, 1949.</p> <p>This is a TEMPORARY Certificate of Occupancy issued for a period of two (2) years commencing November 9, 1948.</p> |

**NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL  
BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT**

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story, shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Sec. 6.1.2.3 sub-4 Building Code, C.26-273.0 Adm. Code

"Prior to the occupancy of a structure erected or altered after January 1, 1933, the authorized owner of each floor of said structure as stated in the certificate of occupancy shall be permanently posted under glass and maintained in the main entrance hall of such structures."

Borough Superintendent

**NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL  
BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT**

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

glass and maintained in the

Borough Superintendent

CERTIFICATE WILL BE NULL AND VOID IF ALTERED IN ANY MANNER OR ADDITIONS ARE MADE THERETO.

**NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL  
BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT**

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Borough Superintendent

**NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL  
BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT**

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1976, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

| <p>Sec. 2.132 sub-4 Building Code, C-26-273.0 Adm. Code</p> <p>"This is the occupancy of structures erected or altered after January 1, 1962, the number of persons permitted to occupy such structures as stated in this certificate and posted in the main entrance hall of such structures."</p> |                                |                                                                                                                                    |        |       |                                                                                                                  |                                    |  |  |

1. That the owner or owners of the building or premises shall cause the structures as shown in the certificate to be permanently posted under glass and maintained in the main entrance hall of such structures.

Borough Superintendent

**NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT**

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

**DEPARTMENT OF BUILDINGS**  
**BOROUGH OF MANHATTAN, THE CITY OF NEW YORK**

No. **50372 TEMPORARY**Date **October 23, 1964**

**CERTIFICATE OF OCCUPANCY**

(Standard form adopted by the Board of Standards and Appeals and issued pursuant to Section 646 of the New York Charter, and Sections C.26-181.0 to C.26-187.0 inclusive Administrative Code 2.1.3.1 to 2.1.3.7, Building Code.)

This certificate supersedes C. O. No. **59888**

To the owner or owners of the building or premises:

THIS CERTIFIES that the new ~~school~~ ~~residence~~ building—premises located at

glass and maintained in good condition and of such structure

Borough Superintendent

CERTIFICATE WILL BE NULL AND VOID IF ALTERED IN ANY MANNER OR ADDITIONS ARE MADE THERETO.

**NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL  
BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT**

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stress in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

# DEPARTMENT OF BUILDINGS BOROUGH OF MANHATTAN, THE CITY OF NEW YORK

Borough Superintendent

CERTIFICATE WILL BE NULL AND VOID IF ALTERED IN ANY MANNER OR ADDITIONS ARE MADE THERETO.

(Page 1)

**NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL  
BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT**

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

# BUREAU OF BUILDINGS

## BOROUGH OF MANHATTAN, CITY OF NEW YORK

**HVC** **CERTIFICATE OF OCCUPANCY No. 13745**

**1928**

Supersedes Certificate of Occupancy No.

To the owner or owners of the building:

New York **Feb. 27** 19**28**

THIS CERTIFIES that the building located on Block **723**, Lot **67-68**

known as **435-38 West 26th Street**  
**74' front**

under a permit, Application No. **1070** Alt of **1927**, conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of **fireproof** construction within the meaning of the building code and may be used and occupied as a **business** building as hereinafter qualified, in a **unrestricted** district under the building zone resolution, subject to all the privileges, requirements, limitations, and conditions prescribed by law or as hereinafter specified;

This certificate is issued to

**White Construction Co. Inc.,**  
**98 Madison Avenue, City.**

, for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored for medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1395 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited; except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the superintendent of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department, in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined, *CS*

*[Signature]*  
Superintendent of Buildings, Borough of Manhattan.

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

**DEPARTMENT OF BUILDINGS**  
**BOROUGH OF MANHATTAN, CITY OF NEW YORK**

**CERTIFICATE OF OCCUPANCY No.**

23772

193

Supersedes Certificate of Occupancy No.

To the owner or owners of the building:

THIS CERTIFIES that the building located on Block  
 known as 175 ft. front

New York June 30, 1939  
 724 7-3-9-10  
 Lot

under a permit, Application No. H. B. 69 38' 19', conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of metal construction within the meaning of the building code and may be used and occupied as a parking space building as hereinafter qualified, in an unrestricted district under the building zone resolution, subject to all the privileges, requirements, limitations and conditions prescribed by law or as hereinafter specified.

| STORY     | LIVE LOADS<br>Lbs. per Sq. Ft. | PERSONS ACCOMMODATED |        |       | USE                                                                                 |
|-----------|--------------------------------|----------------------|--------|-------|-------------------------------------------------------------------------------------|

| 1st story | on ground                      |                      |        |       | Storing and public parking space for more than 5 cars and gasoline service station. |

This certificate is issued to Ben C. Bloch, Arch.,  
 18 East 41st St.,  
 New York, N. Y.

, for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof; or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the commissioner of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined. A.H.M.

  
Emanuel J. Cicero  
Borough Superintendent

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

## DEPARTMENT OF BUILDINGS

BOROUGH OF MANHATTAN, CITY OF NEW YORK

## CERTIFICATE OF OCCUPANCY No.

23772

1938

Supersedes Certificate of Occupancy No.

To the owner or owners of the building:

THIS CERTIFICATE that the building, located on Block  
known as 175 ft. frontNew York June 30, 1938  
724, Lot 7-8-9-10

under a permit, Application No. H. E. 69 1938, conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of metal construction within the meaning of the building code and may be used and occupied as a parking space building as hereinafter qualified, in an unrestricted district under the building zone resolution, subject to all the privileges, requirements, limitations and conditions prescribed by law or as hereinafter specified.

| STORY     | LIVE LOADS<br>Lbs. per Sq. Ft. | PERSONS ACCOMMODATED |        |       | USE                                                                                 |
|-----------|--------------------------------|----------------------|--------|-------|-------------------------------------------------------------------------------------|
|           |                                | MALE                 | FEMALE | TOTAL |                                                                                     |
| 1st story | on ground                      |                      |        |       | Storing and public parking space for more than 6 cars and gasoline service station. |

This certificate is issued to Ben C. Bloch, Arch.,  
18 East 41st St.,  
New York, N. Y.

, for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the commissioner of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined. A.H.M.

  
Thomas J. Cicero  
Borough Superintendent

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

# Certificate of Occupancy

CO Number: 103627951T026

This certifies that the premises described herein conforms substantially to the approved plans and specifications and to the requirements of all applicable laws, rules and regulations for the uses and occupancies specified. No change of use or occupancy shall be made unless a new Certificate of Occupancy is issued. *This document or a copy shall be available for inspection at the building at all reasonable times.*

If you have any questions please review these [Frequently Asked Questions](#), the [Glossary](#), or call the 311 Citizen Service Center by dialing 311 or (212) NEW YORK outside of New York City.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot, in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the commissioner of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined. A.H.M.

  
Borough Superintendent

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

## BUREAU OF BUILDINGS

BOROUGH OF MANHATTAN, CITY OF NEW YORK

HVC CERTIFICATE OF OCCUPANCY No.

192 2

Supersedes Certificate of Occupancy No.

To the owner or owners of the building: New York Dec. 27 1922.

THIS CERTIFIES that the building located on Block 724 . Lot s 8 &amp; 9

known as 455-457 West 26th Street

under a permit, Application No. 50<sup>th</sup> Front 1878 Alt. of 1921 conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of non-fireproof construction within the meaning of the building code and may be used and occupied as a BUSINESS building as hereinafter qualified, in a n unrestricted district under the building zone resolution, subject to all the privileges, requirements, limitations, and conditions prescribed by law or as hereinafter specified.

| NOTE:             |                                |                      |        |       | This is a TEMPORARY Certificate of Occupancy, issued for the period of ninety (90) days, commencing October 14, 1963. |

THIS CERTIFICATE SHALL ALSO BE CONSIDERED A CERTIFICATE  
OF COMPLIANCE OR OCCUPANCY UNDER SECTION 301 OF THE  
MULTIPLE DWELLING LAW.

Borough Superintendent

CERTIFICATE WILL BE NULL AND VOID IF ALTERED IN ANY MANNER OR ADDITIONS ARE MADE THERETO.

Sec. 6123 sub-4 Building Code, C26-273.8 Adm. Code

or to the occupancy of a building, structure or enclosure, or altered after January 1, 1937, the authorized person shall cause a copy of said structure as stated in the certificate of occupancy to be permanently posted under glass and maintained in the main entrance hall of such structure."

**NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT**

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed; until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

**Borough Superintendents**

# BUREAU OF BUILDINGS

## BOROUGH OF MANHATTAN, CITY OF NEW YORK

**CERTIFICATE OF OCCUPANCY No. 16653**

**19 30**

Supersedes Certificate of Occupancy No.

To the owner or owners of the building:

New York **July 29 19 30**

THIS CERTIFIES that the building located on Block **724**, Lot **66-65-1/2**  
known as **458-460 West 27th Street - 292 Tenth Avenue S.E.C.**  
**24'8-1/4" front 1375 Alt. of 19 29**

under a permit, Application No. **19 29**, conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of **nonfireproof** construction within the meaning of the building code and may be used and occupied as a **business** building as hereinafter qualified, in a **n unrestricted** district under the building zone resolution, subject to all the privileges, requirements, limitations and conditions prescribed by law or as hereinafter specified.

This certificate is issued to

**Florence H. Commons,**  
**4010 Norman Avenue, Bronx, N.Y.**, for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated; nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the superintendent of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department, in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined.  
*[Signature]*

*[Signature]*  
Superintendent of Buildings, Borough of Manhattan.

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

## DEPARTMENT OF BUILDINGS

BOROUGH OF MANHATTAN, CITY OF NEW YORK

## CERTIFICATE OF OCCUPANCY No.

23772

1938

Supersedes Certificate of Occupancy No.

To the owner or owners of the building:

THIS CERTIFICATE that the building, located on Block  
known as 175 ft. frontNew York June 30, 1938  
724, Lot 7-3-9-10

under a permit, Application No.

U. E. 69

1938

conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of metal construction within the meaning of the building code and may be used and occupied as a parking space building as hereinafter qualified, in an unrestricted district under the building zone resolution, subject to all the privileges, requirements, limitations and conditions prescribed by law or as hereinafter specified.

| STORY     | LIVE LOADS<br>Lbs. per Sq. Ft. | PERSONS ACCOMMODATED |        |       | USE                                                                                 |
|-----------|--------------------------------|----------------------|--------|-------|-------------------------------------------------------------------------------------|
|           |                                | MALE                 | FEMALE | TOTAL |                                                                                     |
| 1st story | on ground                      |                      |        |       | Storing and public parking space for more than 5 cars and gasoline service station. |

This certificate is issued to Ben C. Bloch, Arch.,  
18 East 41st St.,  
New York, N. Y.

, for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the commissioner of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined. A.H.M.

  
Borough Superintendent

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

# BUREAU OF BUILDINGS

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United States regarding the activities of the Committee for the Liberation of the People of the East (CLPE) in the United States. This is a serious omission, as the CLPE is a well-known and active organization in the United States, and its activities are of great concern to the Commission.

|                   |                                |                      |        |       | STANDPIPE SYSTEM— approved by Fire Department October 10, 1963.                                                             |
|                   |                                |                      |        |       | NOTE: This is a TEMPORARY Certificate of Occupancy, issued for the period of ninety (90) days, commencing October 14, 1963. |

THIS CERTIFICATE SHALL ALSO BE CONSIDERED A CERTIFICATE  
OF COMPLIANCE OR OCCUPANCY UNDER SECTION 301 OF THE  
MULTIPLE DWELLING LAW.

Borough Superintendent

CERTIFICATE WILL BE NULL AND VOID IF ALTERED IN ANY MANNER OR ADDITIONS ARE MADE THERETO.

(Page 1)

6.1.2.3 sub-4 Building Code, C.26-273.8 Adm. Code

or to the occupancy of a building erected or altered after January 1, 1938, the authorized person shall cause a sign of said structure as stated in the certificate of occupancy, shall be permanently posted under glass and maintained in the main entrance hall of such structure."

**NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT**

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed; until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

**DEPARTMENT OF BUILDINGS**  
**BOROUGH OF MANHATTAN, CITY OF NEW YORK**

**CERTIFICATE OF OCCUPANCY No.** 22218 **1937**  
HVC

Supersedes Certificate of Occupancy No.

To the owner or owners of the building:

New York: March 9,

1937

THIS CERTIFIES that the building located on Block 723, Lot 62

known as 446 West 26th Street

under a permit, Application No. 2031 Alt of 1936, conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of nonfireproof construction within the meaning of the building code and may be used and occupied as a business building as hereinafter qualified, in an unrestricted district under the building zone resolution, subject to all the privileges, requirements, limitations and conditions prescribed by law or as hereinafter specified.

This certificate is issued to John L. Collins,  
446 West 26th Street, City, as owner.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot, in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the commissioner of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined. 

  
Commissioner of Buildings, Borough of Manhattan.

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene, nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket; but, if approved as a factory building for less than twenty-five persons, it shall not be used for any other purpose.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the superintendent of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined.

Superintendent of Buildings, Borough of Manhattan.

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

# BUREAU OF BUILDINGS

## BOROUGH OF MANHATTAN, CITY OF NEW YORK

HVC **CERTIFICATE OF OCCUPANCY No.**

**1924**

Supersedes Certificate of Occupancy No.

To the owner or owners of the building:

New York **May 20** 19**24**

THIS CERTIFIES that the building located on Block **723**, Lot **9 & 10**

known as **443-445 West 25th Street**

**50' front**

under a permit, Application No. **2575** Alt of **1922**, conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of **non-fireproof** construction within the meaning of the building code and may be used and occupied as a **business** building as hereinafter qualified, in an **unrestricted** district under the building zone resolution, subject to all the privileges, requirements, limitations, and conditions prescribed by law or as hereinafter specified.

| STORY     | LIVE LOADS<br>Lbs. per Sq. Ft. | PERSONS ACCOMMODATED |        |       | USE                             |
|-----------|--------------------------------|----------------------|--------|-------|---------------------------------|
|           |                                | MALE                 | FEMALE | TOTAL |                                 |

| 2nd "     |                                |                      |        | 5     | Storage                         |
| 3rd "     |                                |                      |        | 5     | Storage                         |
| 4th "     |                                |                      |        | 5     | Storage                         |

This certificate is issued to

**Clausen-Flanagan Storage Company**

**448-460 W. 26th Street, City**, for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket; but if approved as a factory building for less than twenty-five persons, it shall not be used for any other purpose.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the superintendent of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined. *CS*

Superintendent of Buildings, Borough of Manhattan.

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

# DEPARTMENT OF BUILDINGS

## BOROUGH OF MANHATTAN, CITY OF NEW YORK

HVC **CERTIFICATE OF OCCUPANCY No.** 21845 **1936**

Supersedes Certificate of Occupancy No.

To the owner or owners of the building:

THIS CERTIFIES that the building located on Block 724 New York, Lot 18, known as 429 West 26th Street, 27'11" front

under a permit, Application No. 1935 Alt of 36', conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of ~~nonfireproof~~ <sup>business and</sup> construction within the meaning of the building code and may be used and occupied as a ~~restricted~~ <sup>unrestricted</sup> building as hereinafter qualified, in a ~~restricted~~ <sup>unrestricted</sup> district under the building zone resolution, subject to all the privileges, requirements, limitations and conditions prescribed by law or as hereinafter specified.

| STORY               | LIVE LOADS<br>Lbs. per Sq. Ft. | PERSONS ACCOMMODATED |        |       | USE                                   |

| 1st story           | 100                            |                      |        | 5     | Boiler room and Storage<br>Store      |
| 2nd to 5th<br>Story | 40 on<br>each                  |                      |        |       | Three (3) Apartments<br>on each floor |

This certificate is issued to Samuel Pelton, architect  
50 West 47th Street, City.  
for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the commissioner of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined.

Commissioner of Buildings, Borough of Manhattan.

Additional copies of this certificate will be furnished, upon written request, to persons having a proprietary interest in the building.

**APPENDIX G**

**PROJECT PERSONNEL QUALIFICATIONS**

## **Chris Hirschmann, CHMM**

Director, Site Investigation & Remediation Services

### **EDUCATION:**

B.S. Environmental Science, Cornell University

M.S., Environmental Science, NJIT – Rutgers University

### **CERTIFICATION:**

OSHA 40-Hour HAZWOPER

OSHA HAZWOPER Supervisor

OSHA 10-Hour Construction

Certified Hazardous Materials Manager (CHMM) #14701

NJDEP Subsurface Evaluator #572258

Hazardous Waste Management Certification

Site Remediation Basics Certification

New York City Office of Environmental Remediation (NYCOER) Brownfield Certification (TurboTraining)

OSHA 30-Hour 1910 General Industry Training

### **YEARS OF EXPERIENCE:**

With Hillmann: 12

Total: 14

### **PROFESSIONAL EXPERIENCE:**

Mr. Hirschmann is currently the Director, Site Investigation & Remediation Services at Hillmann Consulting, LLC. As such, he is responsible for managing and implementing soil, groundwater, and soil vapor subsurface investigations and remediation; regulatory compliance; storage tank closure and install; and third party document review.

Mr. Hirschmann has extensive experience in evaluating and investigating sites for subsurface contamination and instituting remedial activities for commercial and industrial properties (including City & State regulatory & brownfield programs). He also performs SPCC plan preparation and hazardous materials management; and performs Phase I environmental site assessments to meet due diligence requirements under CERCLA, including the quality assurance of technical reports.

Representative experience includes:

#### **The Doe Fund, Bronx, NY:**

Identified as a spill case with confirmed soil, groundwater and soil/vapor contamination with the New York State Department of Environmental Conservation (NYSDEC) and brownfield and e-designation site with New York State Office of Environmental Remediation (NYCOER). Mr. Hirschmann functioned as the project director for Hillmann and prepared the remedial investigation work plan (RIWP), conducted remedial investigation activities and prepared a Remedial Investigation Report (RIR). Based on the RIR Hillmann prepared a Remedial Action Work Plan (RAWP) that was subsequently approved by the NYSDEC and NYCOER. Under the direction of Mr. Hirschmann, Hillmann provided oversight and direction of remedial activities, including implementation of a Community Air Monitoring Plan, during site redevelopment activities.

#### **Women in Need, Brooklyn, NY:**

Identified as an e-designation and brownfield case with soil and soil/vapor contamination with NYCOER. Mr. Hirschmann functioned as the project director for Hillmann and prepared the remedial investigation work plan (RIWP), conducted remedial investigation activities and prepared a Remedial Investigation Report (RIR). Based on the RIR Hillmann designed and prepared a Remedial Action Work Plan (RAWP) that was subsequently approved by the NYCOER. Under the direction of Mr. Hirschmann, Hillmann provided oversight and direction of remedial activities during site redevelopment activities.

#### **TLK Manor, Bronx, NY:**

Identified as a contaminated property under the purview of NYCDEP, Hillmann provided investigation and remediation services related to redevelopment activities. Mr. Hirschmann functioned as the project director and conducted the remedial investigation and prepared a Remedial Action Work Plan based on the results of the soil, groundwater and soil/vapor investigation. During redevelopment

activities, under the direction of Mr. Hirschmann, Hillmann provided oversight and direction of remedial activities including implementation of a Community Air Monitoring Plan.

**BP Real Estate Fund, Queens, NY**

Hillmann was retained to address the e-designation on the property for hazardous materials prior to redevelopment activities. Mr. Hirschmann functioned as the project director and prepared a Remedial Investigation Workplan, conducted the Remedial Investigation soil, groundwater and soil vapor sampling activities and issued the Remedial Investigation Report to the NYCOER. The NYCOER subsequently removed the e-designation from the property after review and approval of project documents.

**AIG, Bernardsville, NJ:**

The Property had a leaking underground storage tank (UST) identified as a spill case with the New Jersey Department of Environmental Protection (NJDEP) and contained widespread soil and groundwater contamination. Hillmann provided investigation and remedial activities at the site including: delineation of soil and groundwater contamination, preparation of remedial action plans for the NJDEP, enhanced fluid recovery for groundwater remediation, injection remediation of groundwater including chemical oxidation material and microbe material to break down and remediate the elevated contaminants found in the groundwater. Mr. Hirschmann was the project manager and NJDEP certified Subsurface Evaluator for the remedial activities.

**City of Newark, New Jersey:**

Hillmann provided investigation and remediation activities for five City owned brownfield properties. Mr. Hirschmann functioned as the project manager for oversight, design, implementation and management of soil and groundwater remedial investigations at the properties.

**Unique People Services, Bronx, New York**

Identified as a contaminated property under the purview of NYCDEP, Hillmann provided investigation and remediation services related to redevelopment activities. Mr. Hirschmann functioned as the project director and conducted the remedial investigation and prepared a Remedial Action Work Plan based on the results of the soil, groundwater and soil/vapor investigation. During redevelopment activities, under the direction of Mr. Hirschmann, Hillmann provided oversight and direction of remedial activities including implementation of a Community Air Monitoring Plan.

**Notias Construction, NY, NY:**

Hillmann provided environmental investigation activities for 5 separate sites in Manhattan, NY. Mr. Hirschmann functioned as the project manager and prepared Phase II Investigation workplans for soil and soil-vapor sampling, directed site investigation activities and prepared Remedial Investigation Reports for each site. Where

contamination was identified, Mr. Hirschmann prepared Remedial Action Work Plans for slated redevelopment activities.

**AIG: Northeastern States:** Hillmann provides ongoing environmental consulting for this client including decommissioning of fuel oil storage tanks, investigation and remediation of fuel oil contaminated soil and groundwater. Mr. Hirschmann provides third-party oversight on behalf of this client to ensure the contractors/consultants onsite are performing project activities in accordance with industry and regulatory protocol. When applicable on certain projects, Mr. Hirschmann will also direct full remedial investigation and remedial activities as the project manager.

## Etan Hindin

Senior Project Manager

### EDUCATION:

B.S. Biology, Bar Ilan University, Ramat Gan, Israel

### CERTIFICATIONS:

US EPA AHERA Asbestos Inspector  
New York State Asbestos Project Monitor  
New York State Air Sampling Technician  
NJDEP GIS Training  
Environmental Audit and Site Assessments (Rutgers NJAES)  
40-hr OSHA Hazardous Waste Operations and Emergency Response (HAZWOPER) Training  
8-hr OSHA HAZWOPER Refresher Training

### YEARS OF EXPERIENCE:

With Hillmann: 1 year  
Total: 11 years

### PROFESSIONAL EXPERIENCE:

As a Senior Project and Account Manager, Mr. Etan Hindin advises private and public sector clients on a broad range of environmental projects including due diligence (Phase I and II), regulatory compliance, HSE audits, soil and groundwater remediation, and mold investigations and asbestos surveys. Mr. Hindin is responsible for proposing project services, bidding, managing projects, and meeting with clients.

Mr. Hindin has conducted Phase I's of commercial and industrial sites throughout the country and has provided EH&S consulting to Fortune 500 companies. He is particularly well versed in environmental, health and safety regulations and he strives to provide creative, effective, and efficient solutions to complex environmental problems.

Representative experience includes:

**Enviro-Sciences (of Delaware), Inc.:** From 2011 to 2018, Mr. Hindin served as a Project Manager at Enviro-Sciences (of Delaware), Inc. where he designed sampling programs, oversaw abatement projects, and performed clearance sampling for mold and asbestos. He also managed environmental due diligence projects of commercial and industrial sites, throughout the US. Mr. Hindin often trained entry-level consultants in database review, report writing, and assessment protocols while working to improve report templates to comply with changing regulations and ASTM standards.

**NJDEP Watershed Ambassadors Program:** From 2010 to 2011, Mr. Hindin worked as a New Jersey Watershed Ambassador for the NJDEP where he monitored water quality utilizing NJDEP protocols and online reporting software, utilized GIS, NJGeoWeb, and DataMiner to research assigned water bodies and surrounding areas. Mr. Hindin also presented on watershed management, resource conservation, sustainability, and environmental regulations.
