# LIST OF ACRONYMS

| Acronym | Definition |
|---|---|
| AOC | Area of Concern |
| CAMP | Community Air Monitoring Plan |
| COC | Contaminant of Concern |
| CPP | Citizen Participation Plan |
| CSM | Conceptual Site Model |
| DER-10 | New York State Department of Environmental Conservation Technical Guide 10 |
| FID | Flame Ionization Detector |
| GPS | Global Positioning System |
| HASP | Health and Safety Plan |
| HAZWOPER | Hazardous Waste Operations and Emergency Response |
| IRM | Interim Remedial Measure |
| NAPL | Non-aqueous Phase Liquid |
| NYC VCP | New York City Voluntary Cleanup Program |
| NYC DOHMH | New York City Department of Health and Mental Hygiene |
| NYC DEP | New York City Department of Environmental Protection |
| NYS DOH ELAP | New York State Department of Health Environmental Laboratory Accreditation Program |
| OSHA | Occupational Safety and Health Administration |
| PID | Photoionization Detector |
| QEP | Qualified Environmental Professional |
| SI | Site Investigation |
| SIR | Site Investigation Report |
| SCO | Soil Cleanup Objective |
| SPEED | Searchable Property Environmental Electronic Database |

# CERTIFICATION

I, Ryan K. Powell, am a Qualified Environmental Professional, as defined in RCNY § 43-1402(ar). I have primary direct responsibility for implementation of the Site Investigation for the Fulton 11 & Chelsea Elliott, Manhattan, New York, CEQR number 23CHA001M. I am responsible for the content of this Site Investigation Report (SIR), have reviewed its contents and certify that this SIR is accurate to the best of my knowledge and contains all available environmental information and data regarding the property.

# EXECUTIVE SUMMARY

This Site Investigation Report (SIR) provides sufficient information for establishment of remedial action objectives, evaluation of remedial action alternatives, and selection of a remedy. The site investigation (SI) described in this document is consistent with applicable guidance.

**Site Location and Current Usage**

The project site consists of two proposed buildings that will be constructed during the first stage of redevelopment:

Fulton 11, a 7-story, 47,656-gross-square-foot (gsf) apartment building (36 dwelling units) with approximately 10-foot deep basement, located at 401-419 W. 19th Street (Block 717, Lot 19), adjacent to the northwest corner of the W. 19th Street and 9th Avenue intersection.

Chelsea Elliot Addition, a 14-story, 65,136-gsf apartment building (96 dwelling units), 436 W. 27th Drive and the adjoining 2-story John Lovejoy Elliott Center (an approximately 42,225-gsf neighborhood center operated by Hudson Guild), with approximately 10-foot deep basements, located at 441 W. 26th Street (Block 724, Lot 10), on W. 27th Drive east of 10th Avenue. The Elliott Center is set back from W. 26th Street and entered via a footpath from W. 26th Street though its northern wall faces W. 27th Drive.

**Summary of Proposed Redevelopment Plan**

The development project demolition of these buildings and new construction that includes the following components:

In place of Fulton 11 and adjacent areas, a new 11-story (approximately 108.5-foot tall to roof) mixed use apartment building would be developed. It would include approximately 186 dwelling units, 6,591 gsf of retail space, and 15,000 gsf of community facility space, with a total building area of approximately 196,191 gsf. It would have an approximately 10-foot deep basement. Proposed landscaping at the Site will consist of 2 feet of excavation to remove existing soil and replace with two feet of approved clean soil. Refer to the site plan which shows the location of the proposed building footprint relative to the footprint of Fulton 11.

In place of Chelsea Elliott Addition, the adjoining Elliott Center and adjacent areas, a new 38-story (approximately 396.5-foot tall) mixed use apartment building would be developed. It would include approximately 449 dwelling units and 28,229 gsf of community facility space, with a total

building area of approximately 469,578 gsf. It would have an approximately 10-foot deep basement. Proposed landscaping at the Site will consist of 2 feet of excavation to remove existing soil and replace with two feet of approved clean soil. A proposed landscaped areas will be excavated two feet below grade. Refer to the site plan which shows the location of the proposed building footprint relative to the footprint of Chelsea Addition/Elliott Center.

**Summary of Past Uses of Site and Areas of Concern**

**Past Uses and Ownership**

**Fulton 11**

Hillmann Consulting, LLC completed a Phase I Environmental Site Assessment (ESA) dated April 21, 2022 for the Fulton locations. The recognized environmental conditions (RECs) from the ESA are listed in bullet form. The Phase I ESA is included in Attachment A.

Multiple historic uses of potential environmental concern occurred at the Property prior to the 1963-1965 construction of the present Property buildings, per review of Sanborn Fire Insurance Maps, as follows:

- Vinegar Factory at 424-426 West 17th Street (off the east side of the present Property Building 4) in 1895;
- "Chinese Laundry" at 101 and 119 9th Avenue (near present Property Buildings 2 and 7) in 1904;
- 165-car garage with auto-repair operations in the basement and a 1,500-gallon gasoline buried tank (in the vicinity of the present asphalt surface parking south of Building 2) and a 15-car private garage with a buried gasoline tank (capacity indecipherable) at 409 West 17th Avenue (off the west side of the present Property Building 7), and iron works 434-436 West 17th Avenue and 414 19th Avenue in 1921;
- Filling station (gas station), taxi garage and auto repair with multiple gasoline tanks depicted along ninth avenue between West 16th and West 17th Avenue and along West 16th and West 17th Avenue and an additional auto filling/service station with multiple gasoline tanks depicted at the northwest corner of 9th Avenue and West 17th Street (near the southern edge of the present Building 7) and auto painting (431-433 West 17th) and repair (443-445 West 17th), a motor freight terminal (410-412 West 19th) in 1950.

The aforementioned historic uses including a factory, laundry, iron works, motor freight station, auto filling/service stations with multiple gasoline tanks found at Fulton 11 was considered a REC.

**Chelsea Elliott**

Hillmann Consulting, LLC completed a Phase I Environmental Site Assessment (ESA) dated May 6, 2022 for the Chelsea-Elliot locations. The recognized environmental conditions (RECs) from the ESA are listed in bullet form.

Multiple historic uses of potential environmental concern, based on a review of Sanborn Fire Insurance Maps, occurred at the Property prior to the construction of the present Property buildings in the 1940's-1960's, as follows:

- N.Y. Edison Co. Sub Station/transformer station (452 West 27th Street – 1911-1930);
- Machine Shop (429 West 26th Street 1911);
- Manufacturing (not specified) use (418-420 West 27th Street, 447-455 West 26th Street, 425-427 West 25th Street; 1911-1930);

Both Phase 1 report are presented in Appendix A.

**Summary of the Work Performed under the Site Investigation**

Fulton Elliott LLC performed the following scope of work at Chelsea Elliott and Fulton 11:

**Fulton 11**

1. Conducted a Site inspection and geophysical survey at the Fulton 11 site to identify AOC, physical obstructions (i.e. structures, buildings, etc.);
2. Installed nine (9) soil borings across the Fulton 11 Site and collected fifteen (15) soil samples for chemical analysis from the soil borings to evaluate soil quality;
3. Installed four (4) groundwater monitoring wells throughout the Site to establish groundwater flow and collected four (4) groundwater samples for chemical analysis to evaluate groundwater quality;
4. Installed six (6) soil vapor probes around Site perimeter and collected six samples for chemical analysis.

**Chelsea Elliott**

1. Conducted a Site inspection and geophysical survey at the Chelsea Elliott site to identify AOC, physical obstructions (i.e. structures, buildings, etc.);
2. Installed eleven (11) soil borings across the Chelsea Elliott Site and collected eighteen (18) soil samples for chemical analysis from the soil borings to evaluate soil quality;
3. Installed five (5) groundwater monitoring wells throughout the Site to establish groundwater flow and collected five (5) groundwater samples for chemical analysis to evaluate groundwater quality;
4. Installed seven (7) soil vapor probes around Site perimeter and collected seven samples for chemical analysis.

**Summary of Environmental Findings**

Refer to section 5.0 of this site investigation report that shows analytical data for both Fulton 11 and the Chelsea Elliott Sites.

# SITE INVESTIGATION REPORT

## 1.0 SITE BACKGROUND

This Phase II/Site Investigation Report (SIR) has been prepared by HK Engineering & Geology, D.P.C., on behalf of Elliott Fulton LLC for these subject Sites; Fulton 11 and Chelsea Elliott. This SIR documents the investigation activities and summarizes the nature and extent of contamination and provides sufficient information for establishment of remedial action objectives, evaluation of remedial action alternatives, and selection of a remedy that is protective of human health and the environment consistent with the use of the property.

### 1.1 Site Location and Current Usage

The project site consists of two proposed buildings that will be constructed during the first stage of redevelopment:

Fulton 11, a 7-story, 47,656-gross-square-foot (gsf) apartment building (36 dwelling units) with approximately 10-foot deep basement, located at 401-419 W. 19th Street (Block 717, Lot 19), adjacent to the northwest corner of the W. 19th Street and 9th Avenue intersection.

Chelsea Elliot Addition, a 14-story, 65,136-gsf apartment building (96 dwelling units), 436 W. 27th Drive and the adjoining 2-story John Lovejoy Elliott Center (an approximately 42,225-gsf neighborhood center operated by Hudson Guild), with approximately 10-foot deep basements, located at 441 W. 26th Street (Block 724, Lot 10), on W. 27th Drive east of 10th Avenue. The Elliott Center is set back from W. 26th Street and entered via a footpath from W. 26th Street though its northern wall faces W. 27th Drive.

### 1.2 Proposed Redevelopment Plan

The development project demolition of these buildings and new construction that includes the following components:

In place of Fulton 11 and adjacent areas, a new 11-story (approximately 108.5-foot tall to roof) mixed use apartment building would be developed. It would include approximately 186 dwelling units, 6,591 gsf of retail space, and 15,000 gsf of community facility space, with a total building area of approximately 196,191 gsf. It would have an approximately 10-foot deep basement. Proposed landscaping at the Site will consist of 2 feet of excavation to remove existing soil and

replace with two feet of approved clean soil. Refer to the site plan which shows the location of the proposed building footprint relative to the footprint of Fulton 11.

In place of Chelsea Elliott Addition, the adjoining Elliott Center and adjacent areas, a new 38-story (approximately 396.5-foot tall) mixed use apartment building would be developed. It would include approximately 449 dwelling units and 28,229 gsf of community facility space, with a total building area of approximately 469,578 gsf. It would have an approximately 10-foot deep basement. Proposed landscaping at the Site will consist of 2 feet of excavation to remove existing soil and replace with two feet of approved clean soil. A proposed landscaped areas will be excavated two feet below grade. Refer to the site plan which shows the location of the proposed building footprint relative to the footprint of Chelsea Addition/Elliott Center.

### 1.3 Description of Surrounding Property

The areas are urban and both within the Chelsea section of Manhattan, New York. Surrounding adjoining properties include a mix of residential and commercial properties to the North, East, West, and South.

# 2.0 SITE HISTORY

## 2.1 Past Uses and Ownership

**Fulton 11**

Hillmann Consulting, LLC completed a Phase I Environmental Site Assessment (ESA) dated April 21, 2022 for the Fulton locations. The recognized environmental conditions (RECs) from the ESA are listed in bullet form. The Phase I ESA is included in Attachment A.

Multiple historic uses of potential environmental concern occurred at the Property prior to the 1963-1965 construction of the present Property buildings, per review of Sanborn Fire Insurance Maps, as follows:

- Vinegar Factory at 424-426 West 17th Street (off the east side of the present Property Building 4) in 1895;
- "Chinese Laundry" at 101 and 119 9th Avenue (near present Property Buildings 2 and 7) in 1904;
- 165-car garage with auto-repair operations in the basement and a 1,500-gallon gasoline buried tank (in the vicinity of the present asphalt surface parking south of Building 2) and a 15-car private garage with a buried gasoline tank (capacity indecipherable) at 409 West 17th Avenue (off the west side of the present Property Building 7), and iron works 434-436 West 17th Avenue and 414 19th Avenue in 1921;
- Filling station (gas station), taxi garage and auto repair with multiple gasoline tanks depicted along ninth avenue between West 16th and West 17th Avenue and along West 16th and West 17th Avenue and an additional auto filling/service station with multiple gasoline tanks depicted at the northwest corner of 9th Avenue and West 17th Street (near the southern edge of the present Building 7) and auto painting (431-433 West 17th) and repair (443-445 West 17th), a motor freight terminal (410-412 West 19th) in 1950.

The aforementioned historic uses including a factory, laundry, iron works, motor freight station, auto filling/service stations with multiple gasoline tanks found at Fulton 11 was considered a REC.

**Chelsea Elliott**

Hillmann Consulting, LLC completed a Phase I Environmental Site Assessment (ESA) dated May 6, 2022 for the Chelsea-Elliot locations. The recognized environmental conditions (RECs) from the ESA are listed in bullet form.

Multiple historic uses of potential environmental concern, based on a review of Sanborn Fire Insurance Maps, occurred at the Property prior to the construction of the present Property buildings in the 1940's-1960's, as follows:

- N.Y. Edison Co. Sub Station/transformer station (452 West 27th Street – 1911-1930);
- Machine Shop (429 West 26th Street 1911);
- Manufacturing (not specified) use (418-420 West 27th Street, 447-455 West 26th Street, 425-427 West 25th Street; 1911-1930);

Both Phase 1 report are presented in Appendix A.

# 3.0 PROJECT MANAGEMENT

## 3.1 Project Organization

The Qualified Environmental Professions (QEP) responsible for preparation of this SIR are Ryan K. Powell, P.G. and Chris Hirschmann, CHMM.

## 3.2 Health and Safety

All work described in this SIR was performed in full compliance with applicable laws and regulations, including Site and OSHA worker safety requirements and HAZWOPER requirements.

## 3.3 Materials Management

All material encountered during the SI was managed in accordance with applicable laws and regulations.

# 4.0 SITE INVESTIGATION ACTIVITIES

Prior to the start of onsite work activities, a Phase II Workplan, dated October 2023 was submitted to the New York City Department of Environmental Protection (NYCDEP) detailing the planned sampling activities. The Workplan was subsequently approved by NYCDEP in an October 25, 2023 email. In accordance with the approved Phase II Workplan, on behalf of Fulton Elliott LLC, HK Engineering & Geology, D.P.C. performed the following scope of work within the boundary of the Site in November 2023:

Fulton Elliott LLC performed the following scope of work at Chelsea Elliott and Fulton 11:

**Fulton 11**

5. Conducted a Site inspection and geophysical survey at the Fulton 11 site to identify AOC, physical obstructions (i.e. structures, buildings, etc.);
6. Installed nine (9) soil borings across the Fulton 11 Site and collected fifteen (15) soil samples for chemical analysis from the soil borings to evaluate soil quality;
7. Installed four (4) groundwater monitoring wells throughout the Site to establish groundwater flow and collected four (4) groundwater samples for chemical analysis to evaluate groundwater quality;
8. Installed six (6) soil vapor probes around Site perimeter and collected six samples for chemical analysis.

**Chelsea Elliott**

5. Conducted a Site inspection and geophysical survey at the Chelsea Elliott site to identify AOC, physical obstructions (i.e. structures, buildings, etc.);
6. Installed eleven (11) soil borings across the Chelsea Elliott Site and collected eighteen (18) soil samples for chemical analysis from the soil borings to evaluate soil quality;
7. Installed five (5) groundwater monitoring wells throughout the Site to establish groundwater flow and collected five (5) groundwater samples for chemical analysis to evaluate groundwater quality;
8. Installed seven (7) soil vapor probes around Site perimeter and collected seven samples for chemical analysis.

## 4.1 Geophysical Investigation

A geophysical survey was completed at each Site on November 14, 2023 prior to any invasive drilling below ground surface. The geophysical survey included the use of ground penetrating radar (GPR), magnetometer and line tracing equipment to identify buried utilities, metallic objects or other anomalies below grade for safe drilling. The geophysical report for each Site is included in Appendix B.

## 4.2 Borings and Monitoring Wells

### Drilling and Soil Logging

A direct push drill was used during the investigation with HK oversight on November 15 through 17 and 20, 2023 at both the Fulton 11 and Chelsea Elliott Sites.

**Fulton 11**

Boring depths were determined based on proposed excavation depths of the of 10 feet below ground surface for the building footprint areas and 0-2 feet in the proposed landscaped areas.

Using a Geoprobe®, soil samples on the exterior portions of the existing building were captured in 2-inch diameter dedicated macro-PVC liners for every 5 feet installed below ground surface (bgs). Soil borings were continuously logged and screened from the surface to terminal boring depth by visual and olfactory means and using a calibrated PID. The results of soil screening are recorded in boring logs in Appendix C. Zero PID readings were recording in all soil boring intervals.

Two soil grab samples were collected from each boring in areas of the proposed building footprint. The first sample was collected from the surface 0-2 feet bgs interval. Deeper interval samples were collected two feet beyond the proposed building footprint at the 10-12 foot bgs interval. For proposed landscaped areas one grab soil sample was collected from the surface 0-2 foot bgs interval.

The existing conjoined buildings each contain a confined entry partial dirt floor crawlspace at 401 and 419 W. 19$^{th}$ Street. The height of each crawl space was measured at 6 feet below grade inside each building. One soil sample was collected from the 6.0-6.5 foot bgs interval above each crawl space entry using an extended steel hand auger. Due to the identified crawlspace, one soil sample

was omitted from sample collection inside the building. Soil sample locations are shown in Figure 2A. Soil sample result data is reported in Table 1A.

Groundwater was encountered in four boring locations across the Site. Four (4) temporary monitoring wells were installed with the Geoprobe® via direct push to the depth of groundwater. The construction of the temporary monitoring well points included a 1-inch diameter 0.010-inch schedule 40 PVC slotted screen installed and PVC riser pipe installed from ground surface to 40 feet bgs. Depth of groundwater was measured using an oil/water interface probe and ranged from 13.50 through 15 feet bgs. Following sample collection, temporary well points were removed. Groundwater sample locations are shown in Figure 2A. Groundwater sample result data is reported in Table 2A.

Six (6) soil vapor probes were installed and six samples were collected for chemical analysis. Soil vapor samples were collected two feet beyond the ten foot bgs proposed excavation depth at 12 feet bgs on exterior areas of the existing building. One additional sub-slab soil vapor sample was collected inside the existing trash compactor room at 401 West. 19$^{th}$ Street. To remove dead air in the tubing and verify water would not intrude air samples, each sample point was purged three times the volume based on the length of the sample tube.

Soil vapor was not captured inside the crawl space due to the floor being observed as a dirt floor in addition to being a confined space for entry. Soil vapor sample locations are shown in Figure 2A. Soil vapor sample result data is reported in Table 3A and shown on Figure 2A. Methodologies used for soil vapor assessment conform to the *NYS DOH Final Guidance on Soil Vapor Intrusion, October 2006.*

**Chelsea Elliott**

Boring depths were determined based on proposed excavation depths of the of 10 feet below ground surface for the building footprint areas and 0-2 feet in the proposed landscaped areas.

Using a Geoprobe®, soil samples on the exterior portions of the existing building were captured in 2-inch diameter dedicated macro-PVC liners for every 5 feet installed below ground surface (bgs). Soil borings were continuously logged and screened from the surface to terminal boring depth by visual and olfactory means and using a calibrated PID. The results of soil screening are recorded in boring logs in Appendix C. Zero PID readings were recording in all soil boring intervals.

Two soil grab samples were collected from each boring in areas of the building footprint. The first sample was collected from the surface 0-2 feet bgs interval. Deeper interval samples were collected two feet beyond the proposed building footprint from the 10-12 foot bgs interval. For proposed landscaped areas one grab soil sample was collected from the surface 0-2 foot bgs interval. Soil samples were also collected beneath the concrete slab inside the basements of the Hudson Guild Center and inside the 436 W. 27th Drive residential building. Soil sample locations are shown in Figure 2B. Soil sample result data is reported in Table 1B.

Five (5) temporary monitoring wells were installed with the Geoprobe® via direct push to the depth of groundwater at boring locations. The construction of the temporary monitoring well points included a 1-inch diameter 0.010-inch schedule 40 PVC slotted screen installed and PVC riser pipe installed from ground surface to 40 feet bgs. Depth of groundwater was measured using an oil/water interface probe and ranged from 11.50 through 14 feet bgs. Following sample collection, temporary well points were removed. Groundwater sample locations are shown in Figure 2B. Groundwater sample result data is reported in Table 2B.

Seven (7) soil vapor probes were installed and seven (7) samples were collected for chemical analysis. Soil vapor samples were collected at twelve feet, two feet beyond the ten foot bgs proposed excavation depth on exterior areas of the existing building. Interior soil vapor samples were collected beneath the sub-slab within the existing building. To remove dead air in the tubing and verify water would not intrude air samples, each sample point was purged three times the volume based on the length of the sample tube.

One proposed sample location that included playground areas across the site were omitted due to inaccessibility with the equipment. Soil vapor sample locations are shown in Figure 2B. Soil vapor sample result data is reported in Table 3B and shown on Figure 2B. Methodologies used for soil vapor assessment conform to the *NYS DOH Final Guidance on Soil Vapor Intrusion, October 2006.*

## 4.3 Chemical Analysis

### Chemical Analysis

Chemical analytical work presented in this SIR has been performed in the following manner:

| Factor | Description |
|---|---|
| Quality Assurance Officer | The chemical analytical quality assurance is directed by Kim James at Integrated Analytical Laboratory and Kelly Ramos at SGS Dayton. |
| Chemical Analytical Laboratory | Chemical analytical laboratory(s) used in the RI is NYS ELAP certified and were Integrated Analytical Laboratory of Randolph, New Jersey and SGS of Dayton, New Jersey. |
| Chemical Analytical Methods | Soil analytical methods:<br>• TAL Metals by EPA Method 6010C (rev. 2007);<br>• VOCs by EPA Method 8260C (rev. 2006);<br>• SVOCs by EPA Method 8270D (rev. 2007);<br>• Pesticides by EPA Method 8081B (rev. 2000);<br>• PCBs by EPA Method 8082A (rev. 2000);<br>Groundwater analytical methods:<br>• TAL and dissolved Metals by EPA Method 6010C (rev. 2007);<br>• VOCs by EPA Method 8260C (rev. 2006);<br>• SVOCs by EPA Method 8270D (rev. 2007);<br>• Pesticides by EPA Method 8081B (rev. 2000);<br>• PCBs by EPA Method 8082A (rev. 2000);<br>Soil vapor analytical methods:<br>• VOCs by TO-15 VOC parameters. |

# 5.0 ENVIRONMENTAL EVALUATION

## 5.1 Results of Chemical Analysis

### 5.2 Soil Chemistry

Soil/fill samples collected during the SI were compared to the New York State Department of Environmental Conservation (NYSDEC) 6NYCRR Part 375 Section 6.8 Unrestricted Use (UU) and Restricted Residential Use (RRU) Soil Cleanup Objectives (SCOs). Appendix D contains the analytical laboratory data deliverables for each Site.

**Fulton 11 – Soil Chemistry**

- No VOCs compounds were detected above the Unrestricted Use SCOs and Restricted Residential Use SCOs.
- Three metals were detected above the Restricted Residential Use SCOs including barium (max of 517 mg/kg), lead (max. of 1,070 mg/kg), and mercury (max of 1.2 mg/kg). One additional metal, zinc (max. of 616 mg/kg) was the only metal above the Unrestricted Use SCO but below the Restricted Residential Use SCOs. Remaining metals were either not detected or detected below the applicable SCO.
- Four pesticides including 4'4-DDD (max. of 0.099 mg/kg), 4,4'-DDE (max. of 1.34 mg/kg), 4,4'-DDT (max. of 1.58 mg/kg), and Dieldrin (max. of 0.012) were detected mainly in shallow samples above Unrestricted Use SCOs. No pesticides were detected above Restricted Residential Use SCOs.
- SVOCs known as Polycyclic aromatic hydrocarbons (PAHs) were detected above both the Unrestricted Use SCOs and Restricted Residential Use SCOs. PAHs that were identified above both SCOs include Benzo[a]anthracene (max 10.6 mg/kg), Benzo[a]pyrene (max 9.82 mg/kg), Benzo[b]fluoranthene (max 9.82 mg/kg), Benzo[k]fluoranthene (max 9.27 mg/kg), Chrysene (max 9.92 mg/kg), Dibenz[a,h]anthracene (max 2.34 mg/kg) and Indeno[1,2,3-cd]pyrene (max 4.97 mg/kg) were detected in exceedance in both shallow and deep intervals. Remaining SVOC compounds analyzed were either not detected or detected below the applicable SCO.
- One PCB Aroclor 1254 (max. of 1.95 mg/kg) was detected in exceedance of the Restricted Residential Use SCOs found in the crawl space sample (SB6-419 CS) located at 419 W. 19$^{th}$ Street. Remaining PCB compounds were not detected in any other soil sample.

**Chelsea Elliott – Soil Chemistry**

- No VOC or PCB compounds were detected above the Unrestricted Use SCOs and Restricted Residential Use SCOs.
- Six metals were detected above its Restricted Residential Use SCOs including barium (max of 2,180 mg/kg), cadmium (max of 12.80 mg/kg) copper (max. of 503 mg/kg), lead (max. of 2,680 mg/kg), manganese (max of 2,890 mg/kg) and mercury (max of 1.10 mg/kg). One additional metal, zinc (max. of 2,550 mg/kg) was the only metal above the Unrestricted Use SCO but below the Restricted Residential Use SCOs. Remaining metals were either not detected or detected below the applicable SCO.
- Three pesticides including 4'4-DDD (max. of 0.011 mg/kg), 4,4'-DDE (max. of 0.095 mg/kg), 4,4'-DDT (max. of 0.096 mg/kg) were detected above the Unrestricted Use SCOs. No pesticides were detected above Restricted Residential Use SCOs.
- Identical PAHs were detected above both Unrestricted Use SCOs and Restricted Residential SCOs. PAHs that were identified above both SCOs include Benzo[a]anthracene (max 15.3 mg/kg), Benzo[a]pyrene (max 13.3 mg/kg), Benzo[b]fluoranthene (max 13.6 mg/kg), Benzo[k]fluoranthene (max 10.4 mg/kg), Chrysene (max 14.0 mg/kg), Dibenz[a,h]anthracene (max 3.51 mg/kg) and Indeno[1,2,3-cd]pyrene (max 7.05 mg/kg) were detected in exceedance in both shallow and deep intervals. Remaining SVOC compounds analyzed were either not detected or detected below the applicable SCO.

A summary table of data for chemical analyses performed on soil samples at Fulton 11 is included in Table 1A and at Chelsea Elliott is included in Table 1B. Figure 3A for the Fulton 11 Site and Figure 3B for Chelsea Elliott Site shows the location and posts the values for soil/fill that exceed the 6NYCRR Part 375-6.8 Soil Cleanup Objectives.

## 5.3 Groundwater Chemistry

The groundwater samples collected during the SI were compared to the New York State 6NYCRR Part 703.5 Class GA Groundwater Ambient Quality Standards (AWQS).

**Fulton 11 – Groundwater Chemistry**

- No pesticides or PCB compounds were identified above their AWQS.

- One VOC, tetrachloroethene was detected above the AWQS in two groundwater samples with a maximum concentration identified at 4.82 µg/L. Remaining analyzed compounds were either not detected or detected below the AWQS.
- Four undissolved metals were identified in exceedance above its AWQS that include beryllium (max of 3.3 µg/L), chromium (max of 66.7 µg/L), copper (max of 105 µg/L), lead (max of 299 µg/L), and sodium (max of 138,000 µg/L).
- Following field filtering, two dissolved metals, sodium and lead were still detected in exceedance above its AWQS. Remaining metals were either not detected or detected below its applicable AWQS.
- Four PAHs were detected above its applicable AWQS which include Benzo[a]anthracene (max. 10.8 µg/L), Benzo[b]fluoranthene (max. 7.43 µg/L), Benzo[k]fluoranthene (max 3.28 µg/L), Chrysene (max. 9.27 µg/L), and Indeno[1,2,3-cd]pyrene (max 3.57 µg/L). Remaining SVOC compounds analyzed were either not detected or detected below its applicable AWQS.

**Chelsea Elliott – Groundwater Chemistry**

- No pesticides or PCB compounds were identified above their AWQS.
- One VOC, chloroform was detected above the AWQS (max of 14.0 µg/L. Remaining analyzed compounds were either not detected or detected below the AWQS.
- Three undissolved metals were identified in exceedance above its AWQS that include lead (max. of 122 µg/L), selenium (max. of 10.5 µg/L) , and sodium (max. of 274,000 µg/L).
- Following field filtering, two dissolved metals, sodium and selenium were still detected in exceedance above its AWQS. Remaining metals, including lead, were either not detected or detected below its applicable AWQS.
- Four PAHs were detected above its applicable AWQS which include Benzo[a]anthracene (max. 10.8 µg/L), Benzo[b]fluoranthene (max. 7.43 µg/L), Benzo[k]fluoranthene (max 3.28 µg/L), Chrysene (max. 9.27 µg/L), and Indeno[1,2,3-cd]pyrene (max 3.57 µg/L). Remaining SVOC compounds analyzed were either not detected or detected below its applicable AWQS.

A summary table of data for chemical analyses performed on groundwater samples is included in Table 2A for the Fulton 11 Site and Table 2B for the Chelsea Elliott Site. Figure 4A for the Fulton 11 Site and Figure 4B for Chelsea Elliott Site shows the location and posts the values for

groundwater that exceed the New York State 6NYCRR Part 703.5 Class GA groundwater standards.

## 5.4 Soil Vapor Chemistry

Soil vapor samples collected during both investigations were compared to the New York State Department of Health (NYSDOH) Final Guidance for Evaluating Soil Vapor Intrusion matrices dated October 2006 (with subsequent updates).

**Fulton 11 – Soil Vapor Chemistry**

- Chlorinated VOCs (CVOCs) detections included tetrachloroethene found at a maximum concentration of 100 µg/$m^3$ identified at the exterior portion of the Site. Other CVOCs including trichloroethene, methylene chloride, cis-1,2-dichloroethene, 1,1-dichloroethene, carbon tetrachloride, 1,1,1-trichloroethane, and vinyl chloride were either detected at low concentrations or not detected in the soil vapor sample.

**Chelsea Elliott – Soil Vapor Chemistry**

- Chlorinated VOCs (CVOCs) detections included tetrachloroethene found at a maximum concentration of 73 µg/$m^3$ found inside the basement of the Hudson Guild Center. Other CVOCs including trichloroethene, methylene chloride, cis-1,2-dichloroethene, 1,1-dichloroethene, carbon tetrachloride, 1,1,1-trichloroethane, and vinyl chloride were either detected at low concentrations or not detected in the soil vapor sample.

A summary table of data for chemical analyses performed on soil vapor samples for the Fulton 11 Site is included in Table 3A and the Chelsea Elliott Site is included in Table 3B. Figure 5A shows the location and posts the values for soil vapor samples with detected concentrations at the Fulton 11 Site. Figure 5B shows the location and posts the values for soil vapor samples with detected concentrations at the Chelsea Elliott Site.

- Groundwater Sample
- Property Boundary
- Project Site Boundary
- Existing Building
- Proposed Building to be Built in 1st Stage
- Proposed Landscaping
- NYC Tax Parcel

0 25 50 100 Feet

Notes:
All locations are approximate; field activities conducted on 11/15/2023, 11/16/2023, & 11/20/2023.
Only select compounds displayed - full analytical results can be found on Table 2B; all concentrations displayed in micrograms per liter (ug/L); FT BGS = feet below ground surface; ND = Not Detected; ( ) = Laboratory Reporting Limit (RL) listed with ND value with available; exceedance of New York State Department of Environmental Conservation (NYSDEC) Ambient Water Quality Standards (AWQS) highlighted blue.
City parcel coverage provided by NY State GIS Clearinghouse and New York City Department of Finance, last updated 11/13/2022; aerial imagery basemap obtained from Google Earth Pro, dated 6/19/2022.
Figure created by JLD Mapping Services LLC.

**Results in Yellow Highlight displays exceedance above the UUSCO regulatory standard**
**Results in Green Highlight displays exceedance above both UUSCO & RRUSCO regulatory standard**
**J = Concentration detected at a value below the RL and above the MDL for target compounds**
**N = Presumptive evidence of a compound from the use of GC/MS library search.**

**NS = No Standard Available**
**D = The compound was reported from the Diluted analysis**
**ND = Analyzed for but Not Detected at the MDL**

**Results in Yellow Highlight displays exceedance above the UUSCO regulatory standard**
**Results in Green Highlight displays exceedance above both UUSCO & RRUSCO regulatory standard**
**J = Concentration detected at a value below the RL and above the MDL for target compounds**
**N = Presumptive evidence of a compound from the use of GC/MS library search.**

**NS = No Standard Available**
**D = The compound was reported from the Diluted analysis**
**ND = Analyzed for but Not Detected at the MDL**

**Results in Yellow Highlight displays exceedance above the UUSCO regulatory standard**
**Results in Green Highlight displays exceedance above both UUSCO & RRUSCO regulatory standard**
**J = Concentration detected at a value below the RL and above the MDL for target compounds**
**N = Presumptive evidence of a compound from the use of GC/MS library search.**

**NS = No Standard Available**
**D = The compound was reported from the Diluted analysis**
**ND = Analyzed for but Not Detected at the MDL**
**~ = Sample not analyzed**

**Results in Yellow Highlight displays exceedance above the UUSCO regulatory standard**
**Results in Green Highlight displays exceedance above both UUSCO & RRUSCO regulatory standard**
**J = Concentration detected at a value below the RL and above the MDL for target compounds**
**N = Presumptive evidence of a compound from the use of GC/MS library search.**

**NS = No Standard Available**
**D = The compound was reported from the Diluted analysis**
**ND = Analyzed for but Not Detected at the MDL**

**Results in Yellow Highlight displays exceedance above the UUSCO regulatory standard**
**Results in Green Highlight displays exceedance above both UUSCO & RRUSCO regulatory standard**
**J = Concentration detected at a value below the RL and above the MDL for target compounds**
**N = Presumptive evidence of a compound from the use of GC/MS library search.**

**NS = No Standard Available**
**D = The compound was reported from the Diluted analysis**
**ND = Analyzed for but Not Detected at the MDL**

**Results in Yellow Highlight displays exceedance above the UUSCO regulatory standard**
**Results in Green Highlight displays exceedance above both UUSCO & RRUSCO regulatory standard**
**J = Concentration detected at a value below the RL and above the MDL for target compounds**
**N = Presumptive evidence of a compound from the use of GC/MS library search.**

**NS = No Standard Available**
**D = The compound was reported from the Diluted analysis**
**ND = Analyzed for but Not Detected at the MDL**
**~ = Sample not analyzed**

*** TAL Metals analyzed by SGS Dayton.**

**Results in Yellow Highlight displays exceedance above the UUSCO regulatory standard**
**Results in Green Highlight displays exceedance above both UUSCO & RRUSCO regulatory standard**
**J = Concentration detected at a value below the RL and above the MDL for target compounds**
**N = Presumptive evidence of a compound from the use of GC/MS library search.**

**NS = No Standard Available**
**D = The compound was reported from the Diluted analysis**
**ND = Analyzed for but Not Detected at the MDL**

**Results in Yellow Highlight displays exceedance above the UUSCO regulatory standard**
**Results in Green Highlight displays exceedance above both UUSCO & RRUSCO regulatory standard**
**J = Concentration detected at a value below the RL and above the MDL for target compounds**
**N = Presumptive evidence of a compound from the use of GC/MS library search.**

**NS = No Standard Available**
**D = The compound was reported from the Diluted analysis**
**ND = Analyzed for but Not Detected at the MDL**

**Results in Yellow Highlight displays exceedance above the UUSCO regulatory standard**
**Results in Green Highlight displays exceedance above both UUSCO & RRUSCO regulatory standard**
**J = Concentration detected at a value below the RL and above the MDL for target compounds**
**N = Presumptive evidence of a compound from the use of GC/MS library search.**

**NS = No Standard Available**
**D = The compound was reported from the Diluted analysis**
**ND OR < = Analyzed for but Not Detected at the MDL**
**~ = Sample not analyzed**

*** TAL Metals analyzed by SGS Dayton.**
**[a] = Elevated detection limit due to dilution required for high interfering element**

**Results in Yellow Highlight displays exceedance above the UUSCO regulatory standard**
**Results in Green Highlight displays exceedance above both UUSCO & RRUSCO regulatory standard**
**J = Concentration detected at a value below the RL and above the MDL for target compounds**
**N = Presumptive evidence of a compound from the use of GC/MS library search.**

**NS = No Standard Available**
**D = The compound was reported from the Diluted analysis**
**ND = Analyzed for but Not Detected at the MDL**

**Results in Yellow Highlight displays exceedance above the UUSCO regulatory standard**
**Results in Green Highlight displays exceedance above both UUSCO & RRUSCO regulatory standard**
**J = Concentration detected at a value below the RL and above the MDL for target compounds**
**N = Presumptive evidence of a compound from the use of GC/MS library search.**

**NS = No Standard Available**
**D = The compound was reported from the Diluted analysis**
**ND = Analyzed for but Not Detected at the MDL**

**Results in Yellow Highlight displays exceedance above the UUSCO regulatory standard**
**Results in Green Highlight displays exceedance above both UUSCO & RRUSCO regulatory standard**
**J = Concentration detected at a value below the RL and above the MDL for target compounds**
**N = Presumptive evidence of a compound from the use of GC/MS library search.**

**NS = No Standard Available**
**D = The compound was reported from the Diluted analysis**
**ND OR < = Analyzed for but Not Detected at the MDL**
**~ = Sample not analyzed**

*** TAL Metals analyzed by SGS Dayton.**
**[a] = Elevated detection limit due to dilution required for high interfering element**

**Results in Blue Highlight displays exceedance above the AWQS**

**~ = Sample not analyzed**

**B : Compound was found in the blank and sample.**
**I : Value is EMPC (estimated maximum possible concentration).**
**J = Concentration detected at a value below the RL and above the MDL for target compounds**
**N = Presumptive evidence of a compound from the use of GC/MS library search.**

# PHASE I ENVIRONMENTAL SITE ASSESSMENT

Fulton
401 West 19th Street, 401 West 18th Street, 427 and 430 West 17th Street
New York, New York 10011

Prepared For:

Elliott Fulton LLC c/o Essence Development
30 Hudson Yards
New York, NY 10001

Report Issuance Date: April 21, 2022
Site Reconnaissance Date: April 19, 2022

Hillmann Project Number Z34898

HILLMANN
CONSULTING

April 21, 2022

Mr. Jamar Adams
Elliott Fulton LLC c/o Essence Development
30 Hudson Yards
New York, NY 10001

**RE: Phase I Environmental Site Assessment**
Fulton
401 West 19th Street, 401 West 18th Street, 427 and 430 West 17th Street
New York, New York 10011
Hillmann Project No: Z34898

Dear Mr. Adams:

Hillmann Consulting LLC has completed a Phase I Environmental Site Assessment of the above referenced property. This assessment was performed in conformance with our contract agreement and the scope and limitations of ASTM Practice E 1527-21, which is the latest version of the E1527 standard published by the ASTM.

We appreciate the opportunity to provide environmental due diligence services. If you have any questions concerning this report, or if we can assist you in any other matter, please contact our office at 908-688-7800.

Sincerely,

Hillmann Consulting, LLC

Chris Hirschmann
Environmental Services Director

Etan Hindin
Senior Project Manager

# TABLE OF CONTENTS

## List of Abbreviations/Acronyms

Hillmann may use the following abbreviations and acronyms for common terminology described in our report. Not all abbreviations or acronyms may be applicable to this report:

| | |
|---|---|
| ACM | – Asbestos Containing Material |
| AOC | – Area of Concern |
| AST | – Aboveground Storage Tank |
| ASTM | – American Society for Testing Materials |
| BER | – Business Environmental Risk |
| CEA | – Classification Exception Area |
| CERCLA | – Comprehensive Environmental Response Compensation and Liability Act |
| CERCLIS | – Comprehensive Environmental Response Compensation and Liability Information System |
| CESQG | – Conditionally Exempt Small Quantity Generator |
| COC | – Chemicals of Concern |
| CORRACTS | – Corrective Action Sites |
| CREC | – Controlled Recognized Environmental Condition |
| DEC | – Department of Environmental Conservation |
| DEP | – Department of Environmental Protection |
| DHS | – Department of Health Services |
| DNPL | – Delisted National Priority List |
| DOB | – Department of Buildings |
| DOH | – Department of Health |
| DOT | – Department of Transportation |
| DTSC | – Department of Toxic Substances Control |
| ENG | – Engineering |
| EPA | – Environmental Protection Agency |
| ERNS | – Emergency Response Notification System |
| FD | – Fire Department |
| FOI/FOIA/FOIL | – Freedom of Information / Freedom of Information Act / Freedom of Information Letter |
| HVAC | – Heating Ventilation & Air Conditioning |
| HREC | – Historic Recognized Environmental Condition |
| IAQ | – Indoor Air Quality |
| ISRA | – Industrial Site Recovery Act |
| LBP | – Lead-Based Paint |
| LCP | – Lead-Containing Paint |
| LQG | – Large Quantity Generator |
| LTANK | – Leaking Storage Tank |
| LUST | – Leaking Underground Storage Tank |
| SDS/MSDS | – Safety Data Sheet / Material Safety Data Sheet |
| NA | – Not Applicable |
| NFA | – No Further Action |
| NFRAP | – No Further Remedial Actions Planned |
| NPDES | – National Pollutant Discharge Elimination System |
| NPL | – National Priority List |
| OER | – Office of Environmental Remediation |
| OPRA | – Open Public Records Act |
| PAH | – Polycyclic Aromatic Hydrocarbon |
| PCE | – Perchloroethylene |
| RAO | – Response Action Outcome |
| RCRA | – Resource Conservation and Recovery Act |
| RCRIS | – Resource Conservation and Recovery Information System |
| REC | – Recognized Environmental Condition |
| RWQCB | – Regional Water Quality Control Board |
| SCAQMD | – South Coast Air Quality Management District |
| SDG | – Significant Data Gap |
| SEMS | – Superfund Enterprise Management System |
| SRP | – Site Remediation Program |
| SQG | – Small Quantity Generator |
| SVOC | – Semi-Volatile Organic Compound |
| TCE | – Trichloroethylene |
| TSDF | – Treatment Storage and/or Disposal Facility |
| UST | – Underground Storage Tank |
| VEC | – Vapor Encroachment Condition |
| VOC | – Volatile Organic Compound |

# 1.0 FINDINGS, OPINIONS, AND CONCLUSIONS

Hillmann Consulting, LLC (Hillmann) performed a Phase I Environmental Site Assessment (ESA) of 401 West 19th Street, 401 West 18th Street, 427 and 430 West 17th Street, New York, New York (the Subject Property). The assessment has been conducted in accordance with our contracted scope of work and the ASTM Standard Practice E 1527-21 for Phase I Environmental Site Assessments and All Appropriate Inquiries (AAI) Final Rule 40 CFR Part 312. This section contains a summary of findings, opinions and conclusions made by this assessment. However, this section, alone, does not constitute the complete assessment. The report must be read in its entirety.

## 1.1 Summary of Project Details

| | | | | | |
|---|---|---|---|---|---|
| **Primary Street Address:** | | 401 West 19th Street, 401 West 18th Street, 427 and 430 West 17th Street | | | |
| **City:** | New York | **County:** | New York | **State:** | New York |
| **Tax ID/Parcel Number:** | | 401W19th: Block 717, Lot 19; 401W18th: Block 716, Lot 17; 427W17th: Block 715, Lot 10; 430W17th: Block 714, Lot 31 | | | |
| **Property Owner:** | | New York City Housing Authority (NYCHA) | | | |
| **Zoning Designation:** | | R8-C2-5 (Residential with Commercial Overlay) | | | |
| **Approx. Property Area:** | | 6.21-acres (combined) | | | |
| **Buildings:** | | Eleven residential apartment buildings: B2, B6, B9 are high-rise 25-story plus basement; B1, B3, B4, B5, B7, B8, B10, B11 each 6-story with no basement except B1 and B3 which have a basement; and B12 - freestanding garage (1-story / 2-bay)<br><br>NOTE: See Appendix A for building numbering/locations | | | |
| **Approx. Building Size:** | | 974-units (combined) | | | |
| **Approx. Year Built:** | | 1963-1965 | | | |
| **Commercial Occupants:** | | Primarily residential with senior center, development/management office and computer lab | | | |
| **Current Use:** | | Multifamily residential | | | |
| **Inspected By:** | | Mr. Etan Hindin and Mr. Dominick Aponte | | | |
| **Site Contact/Company:** | | Mr. Patrick Chan / Property Manager (NYCHA) | | | |
| **Site Escort/Company:** | | Rico / Site Caretaker (NYCHA) | | | |
| **Inspection Date:** | | April 19, 2022 | | | |
| **Weather Conditions:** | | Overcast 42 degrees Fahrenheit | | | |

## 1.2 Findings Summary Table

| Assessment Subject | No REC | REC | CREC | HREC | SDG | Rpt. Ref. |
|---|---|---|---|---|---|---|
| **Property Regulatory Records Review:** | | | | X | | 4.3 |
| **Property Historical Records Review:** | | X | | | | 4.2 |
| **Bulk Petroleum Storage:** | X | | | | | 6.3 |
| **On-Site Operations:** | X | | | | | 6.3 |
| **On-Site Haz-Mat Storage/Use/Spills:** | X | | | | | 6.3 |
| **Transformers/Hydraulic Systems:** | X | | | | | 6.3 |
| **Waste Discharges:** | X | | | | | 6.3 |
| **Interviews:** | X | | | | | 5.0 |
| **Adjoining & Nearby Properties:** | X | | | | | 4.3<br>6.2 |
| **Prior Env. Reports/User Provided Info:** | X | | | | | 3.0 |

## 1.3 Findings, Opinions and Conclusions

### Recognized Environmental Conditions & Significant Data Gaps

Hillmann has performed a Phase I Environmental Site Assessment in accordance with the scope and limitations of ASTM Practice E 1527-21 of the Subject Property as described in Section 2.2 of this report. Any additions to, exceptions to, or deletions from this practice are also described in Section 2 of this report. This assessment has revealed the following *recognized environmental conditions* (RECs), *controlled recognized environmental conditions* (CRECs) and/or *significant data gaps* (SDGs) in connection with the Subject Property:

**RECOGNIZED ENVIRONMENTAL CONDITIONS**

Multiple historic uses of potential environmental concern occurred at the Property prior to the 1963-1965 construction of the present Property buildings, per review of Sanborn Fire Insurance Maps, as follows:

- Vinegar Factory at 424-426 West 17th Street (off the east side of the present Property Building 4) in 1895;
- "Chinese Laundry" at 101 and 119 9th Avenue (near present Property Buildings 2 and 7) in 1904;
- 165-car garage with auto-repair operations in the basement and a 1,500-gallon gasoline buried tank (in the vicinity of the present asphalt surface parking south of Building 2) and a 15-car private garage with a buried gasoline tank (capacity indecipherable) at 409 West 17th Avenue (off the west side of the present Property Building 7), and iron works 434-436 West 17th Avenue and 414 19th Avenue in 1921;
- Filling station (gas station), taxi garage and auto repair with multiple gasoline tanks depicted along ninth avenue between West 16th and West 17th Avenue and along West 16th and West 17th Avenue (see Appendix A figure), and an additional auto filling/service station with multiple gasoline tanks depicted at the northwest corner of 9th Avenue and West 17th Street (near the southern edge of the present Building 7) and auto painting (431-433 West 17th) and repair (443-445 West 17th), a motor freight terminal (410-412 West 19th) in 1950.

| |
|---|
| The aforementioned historic uses including a factory, laundry, iron works, motor freight station, auto filling/service stations with multiple gasoline tanks is considered a REC.<br><br>Two (2) groundwater monitoring wells were observed within the Property north of B12 (two-bay Property garage) and northwest of B4 on the south side of West 18th and West 17th Streets respectively. The trigger for the installation of these wells and their use for sampling/monitoring if any was unknown by the site escort/contact.<br><br>Hillmann recommends obtaining records of a subsurface investigation (if already performed) or performing a subsurface investigation to determine the presence/absence of impact to underlying environmental media from aforementioned uses and the presence/absence of abandoned underground storage tanks (USTs) in areas not excavated in the 1960's for the construction of the present Property buildings. If the onsite groundwater monitoring wells observed during the site reconnaissance are no longer in use, said wells should be decommissioned in accordance with applicable regulations. |
| **CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS (CRECs)** |
| No CRECs were identified. |
| **SIGNIFICANT DATA GAPS (SDGs)** |
| No SDGs were identified. |

### Historical Recognized Environmental Conditions (HRECs)

This assessment has revealed the following *historical recognized environmental conditions* (HRECs) in connection with the Subject Property:

| **HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS** | |
|---|---|
| | An NY SPILLS database listing for the "Excavation Site - Front of 413 West 16th Street" details the discovery of a fuel odor during an unrelated excavation (infrastructure work on a sewer line and transformer vault) leading to the removal of approximately 40 cubic yards of soil on May 27, 2005. Given the impact identified and subsequent remediation (soil removal) and regulatory closure, listed as closed on December 27, 2005, the NY SPILLS listing is considered an HREC.<br><br>Hillmann notes that given the nature of the discovery of the impact (unrelated excavation likely along the sidewalk in front of 413 West 16th Street) and title of the listing "Front of…" the investigation/soil removal was likely not comprehensive enough to determine the presence/absence of impact from historical uses to the rest of the 430 West 17th Street Parcel (Block 714, Lot 31), a parcel noted above with historic uses including multiple gasoline tanks and an auto filling/service station. |

### De Minimis and Other Environmental Conditions

The following *de minimis* and other environmental conditions were identified:

| **OTHER ENVIRONMENTAL CONDITIONS / DE MINIMIS CONDITIONS** |
|---|
| 401-411 West 18th Street (Building 8) is listed on the UST database for a 1,500-gallon UST removed on June 5, 2017. The listing does not indicate any release was identified during the UST removal and is not considered a REC. |
| 400 West 17th Street (Building 7) is listed on the NY SPILLS database due to an incident involving wastewater in June 2020. The case obtained regulatory closure and due to the nature of the spill and regulatory status is not considered a REC. |
| Multiple Con-Edison listings (MANIFEST, RCRA-NonGen, FINDS, ECHO) associated with Property addresses were identified. The listings are associated with infrastructure work generating regulated waste. The listings are not indicative of a release and not considered a REC. |

| |
|---|
| 427-431 West 17th Street / NYCHA-Fulton Houses is listed on the RCRA-NonGen, FINDS and ECHO databases likely associated with the removal of regulated waste. The listings are regulatory in nature, not indicative of a release and not considered a REC. |
| West 17th Street and 10th Avenue is listed on the Brownfields database. The site is located to the adjacent west of Property building 4. In 2004 during a Phase I and II, contaminants of concern were identified associated with past uses of petroleum and historic fill. Soils and groundwater were identified to be contaminated with VOCs, petroleum related and chlorinated solvents and SVOCs. The listings details the subsequent remediation as follows:<br><br>"*A Track 4 cleanup was achieved for the site. Engineering and Institutional Controls have been instituted to manage the residual contamination. These controls have been memorialized in the Environmental Easement that has been recorded in the New York County Clerk's office. The Certificate of Completion was issued on October 6, 2008.*<br><br>*Public water is provided to the area, thereby preventing exposures to groundwater. The remedial action work plan for the site calls for the removal of contaminated soil from the site prior to construction of a residential building on-site. Soil gas is contaminated by chlorinated solvents that are likely due to an off-site source. The site owner will include measures in the building construction to prevent soil vapor migration into the building.*"<br><br>Given the above, a vapor encroachment condition to the Property cannot be ruled out. |

**Environmental Professional Statement**

I/We declare that, to the best of my professional knowledge and belief, I/we meet the definition of *Environmental professional* as defined in § 312.10 of 40 C.F.R. 312. I/we have the specific qualifications based on education, training and experience to assess a *property* of the nature, history and setting of the *subject property*. I/We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

## 1.4 Business Environmental Risks / Non-ASTM Scope

Hillmann has performed a limited review of the following potential Business Environmental Risks (BER), also known as "Non-ASTM Scope concerns", in accordance with the contracted scope of work scope for this assessment. BER is defined by ASTM E1527-21 as *"a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice."* The following is a summary of findings for the limited review of potential BERs, where applicable, as per the contracted scope of work and limitations outlined in Section 2. For a more detailed discussion of the findings and contracted scope of work, please see the referenced report section.

| BUSINESS ENVIRONMENTAL RISKS / NON-ASTM SCOPE | | | |
|---|---|---|---|
| **Subject** | **Findings** | **Not Appl.** | **Rpt. Ref.** |
| **Asbestos** | Given the 1963-1965 years of construction, asbestos containing materials are suspected unless ruled out by laboratory analysis.<br><br>Suspected ACM noted within the accessed building areas included floor tile, wall-board, spray-of insulation and roofing materials | | 7.1 |
| **Lead Paint** | Given the 1963-1965 years of construction, lead-paint is suspected unless ruled out by field survey or laboratory analysis.<br><br>Lead sampling was reportedly being performed due to the December 21, 2021 modification to the legal lead-based paint standard to 0.5 $mg/cm^2$ (Local Law 66 and rules adopted by the Department of Housing Preservation and Development [HPD]) The results of the survey have been requested by Hillmann. | | 7.2 |
| **Radon** | The Property is located in the USEPA radon designation Zone 3 or 'low risk' area for radon. | | 7.3 |
| **Mold / Microbial Damage** | The basement of Building 1 was observed to have standing water on the concrete surface with some discoloration. Intermittent pipe and roof leaks were reportedly common given the age of the building. Mold abatement, primarily removing water damaged wall-board is reportedly performed by NYCHA staff as needed. | | 7.4 |
| **NWI Wetlands** | No NWI Wetlands were depicted within the Property. | | 7.5 |
| **Lead in Drinking Water** | Potable water service at the Subject Property is provided by the City of New York. The water purveyor water supply is within acceptable standards. Property building specific lead-in-drinking water sampling was not performed. | | 7.6 |

# 2.0 INTRODUCTION

## 2.1 Purpose and Scope

This assessment was conducted utilizing generally accepted Phase I ESA industry standards in accordance with the ASTM Standard Practice E 1527-21. The ASTM describes these methodologies as representing good commercial and customary practice in the United States of America for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. § 9601) and petroleum products. As such, this practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner or bona fide prospective purchaser limitations on CERCLA liability (hereinafter, the "landowner liability protections," or "LLPs"): that is, the practice that constitutes all appropriate inquiries into the previous ownership and uses the property consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35) (B). The goal of the processes established by ASTM E1527-21 is to identify *recognized environmental conditions* in connection with the Subject Property.

The term *recognized environmental condition* (REC) is defined by ASTM E1527-21 as *"(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment."*

The term *controlled recognized environmental condition* is a type of recognized environmental condition and defined by ASTM E1527-21 as a *"recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)."*

The term *historical recognized environmental condition* is defined as a *"previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations)."* The ASTM E1527-21 standard has clarified that a *historical recognized environmental condition* (HREC) is not a *recognized environmental condition* (REC).

The term *de minimis condition* is defined by the ASTM, *"…a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies."* A condition determined to be a *de minimis condition* is not REC nor a CREC.

The chief components of this assessment are generally described as follows:

- A non-invasive visual reconnaissance of the Subject Property and adjoining properties in accordance with ASTM guidelines for evidence of RECs.

- Interviews of past and present owners and occupants and state and local government officials, seeking information related to the potential presence of RECs at the Subject Property.

- A review of standard physical record sources for available topographic, geologic and groundwater data.

- A review of standard historic record sources, such as fire insurance maps, city directories, aerial photographs, prior reports and interviews, etc., to determine prior uses of the Subject Property from the present, back to the Subject Property's first developed use, or back to 1940, whichever is earlier.

- A review of standard environmental record sources including federal and state environmental databases, and additional environmental record sources, to identify potential regulatory concerns with the Subject Property, adjoining properties and properties located within the surrounding area.

An evaluation of environmental or other regulatory compliance matters is excluded from the scope of this assessment.

These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions.

**Business Environmental Risks/Non-ASTM Scope Considerations**

In accordance with our contract agreement, Hillmann may have addressed the following potential environmental subject matters that are outside of the requirements of the ASTM E1527-21 standard:

- Asbestos-Containing Materials (ACM): A cursory non-intrusive visual screening for the presence of suspect ACM within the accessed areas of buildings built prior to 1990 on the Subject Property. If the Subject Property contains buildings built in 1990 or later, the contracted scope of work excludes a cursory non-intrusive visual screening or any other level of evaluation for suspect ACM; however, the exclusion for buildings built ≥1990 should not be interpreted to suggest that any such buildings are free of ACM or would not warrant evaluation of building materials for ACM prior to disturbance. It is emphasized that this cursory non-intrusive visual screening does not constitute an asbestos survey/inspection of the premises. An asbestos survey/inspection should be sought by the report User(s) if a greater certainty is desired regarding ACM and potential asbestos hazards at the Subject Property. Furthermore, a review of regulatory compliance matters pertaining to asbestos is excluded from the scope of work.

- Lead-Based Paint (LBP): A cursory non-intrusive visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1980 on the Subject Property. If the Property contains buildings built in 1980 or later, the contracted scope of work excludes any cursory non-intrusive visual screening or other level of evaluation for suspect

LPB; however, the scope of work exclusion for building built ≥1980 should not be interpreted to suggest that any such buildings are free of LPB or other lead hazards. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for LBP or potential lead hazards. A comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding LBP at the Subject Property. Furthermore, a review of regulatory compliance matters pertaining to lead-based paint is excluded from the scope of work.

- USEPA Designated Radon Potential: Review of general non-site specific data published by the USEPA regarding the Radon Zone classification for the area of the Subject Property.

- Mold/Microbial Damage: A cursory non-intrusive visual screening within the accessed areas of buildings on the Subject Property for evidence of systemic microbial problems, including visible mold growth, water damaged building materials or musty odors. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for moisture/mold/microbial damage. A more comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding the potential for moisture/mold/microbial damages at the Subject Property.

- NWI Wetlands: The Property has been reviewed for jurisdictional wetlands using the National Wetlands Inventory Wetland Mapper (http://wetlandsfws.er.usgs.gov/NWI/download.html) to determine whether mapped federal wetlands have been indicated on the Subject Property. Any further evaluation or legal delineation of regulated wetlands areas is excluded from the scope of work. It is also emphasized that a field delineation of regulated wetlands by a qualified professional would be warranted to more fully determine the presence or absence of regulated wetlands at the Subject Property.

- Lead in Drinking Water: Review of the potential for elevated levels of lead in the drinking water by determining the source of the drinking water supply and a review of available testing or compliance data reports.

## 2.2 Property Location/Legal Description

Property location and legal description details are described as follows:

| | | | | | |
|---|---|---|---|---|---|
| **Primary Street Address:** | 401 West 19th Street, 401 West 18th Street, 427 and 430 West 17th Street | | | | |
| **City:** | New York | **County:** | New York | **State:** | New York |
| **Tax ID/Parcel Number:** | 401W19th: Block 717, Lot 19; 401W18th: Block 716, Lot 17; 427W17th: Block 715, Lot 10; 430W17th: Block 714, Lot 31 | | | | |
| **Approx. Land Area:** | 6.21-acres (combined) | | | | |
| **Apprx. Latitude/Longitude:** | North 40.7436330 degrees/West 74.0043040 degrees | | | | |
| **Additional Details (if appl.):** | Secondary address range:<br>89-157 9th Avenue;<br>401-433 West 19th; | | | | |

| | |
|---|---|
| | 400-426 West 19th;<br>401-423 West 18th;<br>400-434 West 18th;<br>401-445 West 17th;<br>400-438 West 17th;<br>401-429 West 16th; |
| **Property Owner:** | New York City Housing Authority (NYCHA) |
| **Zoning Designation:** | R8-C2-5 (Residential with Commercial Overlay) |

## 2.3 Data Gaps

A *data gap* is defined by the ASTM as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. A data gap is only significant if other information and/or professional experience raises reasonable concerns involving the data gap and the ability to determine the presence or absence of recognized environmental conditions. The following table summarizes data gaps encountered during the assessment as well as a discussion of their significance.

| Data Gap: | Significant (Yes/No)? | Discussion |
|---|---|---|
| Historical records data failure | No | Records gaps exceeding five years were encountered; however, no significant site use changes are suspected during these intervals. |
| Response to agency records requests not received as of date of report. | No | Any additional information indicative of a REC will be forwarded upon receipt. |

## 2.4 ESA Report Component Dates/Viability

The ASTM E1527-21 standard states that an environmental site assessment (ESA) is presumed to be viable when it is conducted within 180 days prior to the date of acquisition of the Subject Property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction). Specifically, all of the following components must be conducted or updated within 180 days prior to the date of acquisition or prior to the date of the transaction. The following table summarizes the component completion dates:

| ESA Component | Completion Date |
|---|---|
| Interviews | April 19, 2022 |
| Env Lien Search | (excluded from scope) |
| Government Records Review | March 31 |
| Visual Inspections | April 19, 2022 |
| Env. Professional Declaration | April 21, 2022 |

## 2.5 User Reliance

This report is for the exclusive use of Elliott Fulton LLC c/o Essence Development and additional relying entities, if any, named on the front cover. No additional individuals or entities shall be

permitted to rely upon any data, interpretation, reports or other information or documentation contained in this report, without first obtaining the consent of Elliott Fulton LLC c/o Essence Development; and without obtaining written consent from Hillmann in the form of a reliance agreement/letter.

Hillmann may, in its sole discretion, withhold its consent to additional reliance and/or Hillmann may condition consent for reliance upon payment of a fee or other conditions.

## 2.6 Significant Assumptions

The following significant assumptions are made:

- The site operations at the time of the site visit are assumed to reflect typical site conditions relative to potential environmental conditions and that no concealment of environmental conditions or releases by site owners or occupants has occurred. Likewise, it is assumed that no areas of the Subject Property with potential environmental concerns or RECs were concealed or otherwise not reported, intentionally or unknowingly, by the Subject Property owners/occupants and/or site escort at the time of the site visit.

- For the purpose of estimating the approximate direction of groundwater flow in the absence of site specific groundwater data, unless indicated otherwise, an assumption has been made that the gradient of groundwater flow follows the surface topography of the Subject Property and immediate surrounding area.

## 2.7 General Limitations and Exceptions

### Limitations

The report turnaround time specified by the contract agreement for this assessment may present a limitation to the availability of pertinent regulatory agency records. Such limitations, if encountered, would be further specified in Section 4.1.

Significant limitations related to the condition or accessibility of the Subject Property at the time of the site reconnaissance, if encountered, are reported in Section 6.1.

### Other Exceptions or Deletions

No other exceptions or deletions from the ASTM Standard E 1527-21 are reported.

### Special Terms and Conditions

This Phase I Environmental Site Assessment has been prepared using reasonable efforts in each phase of its work to identify recognized environmental conditions associated with hazardous substances, wastes and petroleum products at the Subject Property. Findings within this report are based on information collected from observations made on the day of the site reconnaissance and from reasonably ascertainable information obtained from governing public agencies and private sources.

This report is not definitive and should not be assumed to be a complete or specific definition of the conditions above or below grade. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, site development, redevelopment, or other construction purposes. No representation or warranty is made that the past or current operations at the Subject Property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes.

Findings, conclusions and recommendations presented in this report are based on visual observations of the Subject Property, interviews conducted, the records reviewed, information provided by the Client, and/or a review of readily available and supplied drawings and documents. Information obtained during the assessment, whether written, graphic or verbal, provided by the Subject Property contact(s) or as shown on any documents reviewed or received from the Subject Property contact, owner or agent, or government agency source; is assumed to be accurate except as specifically stated otherwise in this report. Independent verification of the accuracy or completeness of all information reviewed or received during the course of this assessment is not made and excluded from the scope of work for this assessment. No warranty or guarantee is made of the accuracy or completeness of information that was obtained from ostensibly knowledgeable individuals, regulatory agency representatives or other secondary sources.

Regardless of the findings stated in this report, Hillmann is not responsible for consequences or conditions arising from facts that were concealed, withheld or not fully disclosed at the time the assessment was conducted.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated.

The regulatory database report provided is based on an evaluation of the data collected and compiled by a contracted data research company. Hillmann can neither warrant nor guarantee the accuracy or completeness of the information obtained from the regulatory database report provider during the course of this assessment.

Subsurface conditions may differ from the conditions implied by the surface observations and can only be reliably evaluated through intrusive techniques.

Reasonable efforts have been made during this assessment to identify aboveground and underground storage tanks and ancillary equipment. Reasonable efforts are limited to information gained from visual observation of largely unobstructed areas, recorded database information held in public record and available information gathered from interviews. Such methods may not identify surficial and subsurface features that may have been hidden from view due to parked automobiles and other vehicles, snow cover, vegetative growth, pavement, construction or debris pile storage or incorrect information from sources.

No guarantee, explicit or implied, is made that the records pertaining to historical ownership or occupancy which were reviewed represent a comprehensive or precise delineation of past Property ownership or tenancy for legal purposes.

The ASTM E1527-21 standard states that recommendations are not required to be included in a Phase I ESA report; however, further that recommendations are an additional service that may be useful in the User's analysis of landowner liability protections or business environmental risks; and that the User should consider whether recommendations for additional inquiries or other services are desired.

Recommended response actions offered in Section 1.3, if any, are provided as an option to the Client, and may have taken into account the Client's relation to the Subject Property and/or their intended purpose of this assessment. If included, it is not intended by Hillmann to represent the only course(s) of action, or inaction, to take. Furthermore, it is emphasized that additional response actions may become advisable depending on the outcome of the initial action(s) taken. Hillmann advises that Client and any additional authorized relying parties as specified on the report Cover and Section 2.5, or via letter of reliance extension, undertake consultation with legal counsel familiar with environmental and real estate law would be beneficial to the decision making process for the type and timing of a response action to identified RECs or Business Environmental Risks, if any.

Due to the limited nature of our review of potential Business Environmental Risks, the User(s) of the report should consider whether to take additional action(s) to further define, properly manage and/or mitigate potential BERs.

The User(s) assumes responsibility for business decisions that it makes utilizing information in the report provided by Hillmann. Hillmann shall not be responsible for any conclusions, interpretations and/or decisions of the User(s).

In the event of any conflict between the terms and conditions of this report and the terms and conditions of the consulting services agreement for this project, the consulting services agreement shall control.

# 3.0 USER PROVIDED INFORMATION

The term "User" is defined by ASTM as the party seeking to use Practice E1527 to complete an environmental site assessment of the Subject Property; specifically, the entity or entities named on the front cover to which the report has been addressed.

## 3.1 Environmental Lien and Activity and Use Limitation (AUL) Search

The User did not provide Hillmann with the results of an environmental lien and AUL search for the Subject Property.

## 3.2 Prior Environmental Reports/Documentation

No prior environmental reports/documentation were provided.

## 3.3 User Responsibilities

Section 6 of the ASTM E1527-21 standard describes certain tasks required to be performed by the report User in order to qualify for landowner liability protections to CERCLA liability. To assist the report User to meet these requirements, the ASTM E1527-21 standard recommends a questionnaire of inquiries (User Questionnaire) specified in 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31 be provided to the original report User. A User Questionnaire has been provided to the report User; however, a completed questionnaire was not returned to Hillmann.

| Question: | Yes/No: | Detail: |
|---|---|---|
| **Environmental liens that are filed or recorded against the property:** Did a search of recorded land title records identify any environmental liens filed or recorded against the property under federal, tribal, state or local law? | NR | |
| **Activity and use limitations that are in place on the property or that have been filed or recorded against the property:** Did a search of recorded land title records (or judicial records where appropriate, identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law? | NR | |
| **Specialized knowledge or experience of the person seeking to qualify for the LLP:** Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? | NR | |
| **Relationship of the purchase price to the fair market value of the property if it were not contaminated:** Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower | NR | |

| Question: | Yes/No: | Detail: |
|---|---|---|
| purchase price is because contamination is known or believed to be present at the property? | | |
| **Commonly Known or Reasonably Ascertainable Information:** Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, | | |
| -Do you know the past uses of the property? | NR | |
| -Do you know of specific chemicals that are present or were once present at the property? | NR | |
| -Do you know of spills or other chemical releases that have taken place at the property? | NR | |
| -Do you know of any environmental cleanups that have taken place at the property? | NR | |
| **The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation:** Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property? | NR | |
| **Litigation/Administrative Proceedings/Government Notices** As the User of this ESA, do you have knowledge of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products. | NR | |

*NR-no response*

## 3.4 User's Reason for Performing Phase I ESA

The User did not indicate the purpose of the assessment. In accordance with ASTM E1527-21, it is assumed that the Phase I ESA was being performed in order to qualify for landowner liability protection to CERCLA liability.

# 4.0 RECORDS REVIEW

## 4.1 Environmental Information

### Physical Setting

| Source | Discussion |
|---|---|
| USGS 7.5 minute Topographic Map Data: (EDR Geocheck-Physical Setting Source Addendum) | The Property lies at an elevation of approximately 14 feet above mean sea level. An interpretation of topographic contour lines as well as a review of the EDR Geocheck-General Topographic Gradient suggested terrain sloping downward towards the west-northwest. The closest down gradient water body is the Hudson River, located approximately 850-ft to the west-northwest. |
| USDA SCS Soil Data: (EDR Geocheck-Physical Setting Source Addendum) | The soil type at the Subject Property is classified as "Urban Land". The Urban Land designation indicates that a majority of the original soils on the site have been disturbed by development or covered with impervious surfaces, such as buildings or pavement. |
| Geologic Data: (EDR Geocheck-Physical Setting Source Addendum) | The Geologic Age Identification Category for the Property is Stratified Sequence, and the Rock Stratigraphic Unit is the Paleozoic Eta, Ordovicias System and Lower Orodovician and Cambrian carbonate rocks Series. |
| Prior Env. Reports: (Section 3.2) | None provided. |
| Additional Sources/ Data: | An eastern adjacent Property listed on the Brownfields database, 10th Avenue between West 16th and 17th Streets is listed as having groundwater at 10-14 feet below ground surface (bgs). |
| Groundwater Flow Discussion: | Based on a review of the above information as well as observation of the site, the direction of shallow groundwater flow at the site is inferred to be towards the west-northwest. |

### Federal, State and Tribal Environmental Record Sources

Standard government records were obtained and reviewed primarily via a third-party regulatory database report, titled EDR Radius Map™ Report, prepared by Environmental Data Resources of Shelton, CT. The report provided government records from the standard environmental resources and within minimum search distances specified by Section 8.2.2-Table 2 of the ASTM E1527-21; and were reviewed for the purpose of identifying potential RECs in connection with the Subject Property. Additional detail of the source and significance of the regulatory databases can be found in the regulatory database report in Appendix E. Hillmann has also included discussion of records pertaining to the Subject Property from other government record sources not specifically listed under Table 2, as applicable.

Reported distances for adjoining property listings, if applicable, are approximate and indicative of the presence of a public roadway or right-of-way between the adjoining site and Property.

The reported gradients have been estimated based on a number of factors including but not necessarily limited to field observation, review of topographic maps, database listing details and/or site specific geo-technical data.

Limited analysis of the details of on-site, adjoining and vicinity database sites was conducted to identify potential sources of sub-surface vapor encroachment. This review was based on elements of the ASTM "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions" (ASTM E 2600-15); and also on elements of "Methodology for Identifying the Area of Concern Around a Property Potentially Impacted by Vapor Migration from Nearby

Contaminated Sources" (Buonicore, 2011-S-103-AWMA). Vicinity database sites pertaining to non-petroleum product releases within 1,760 feet of the Subject Property in the up-gradient direction, 365 feet of the Subject Property in the cross gradient direction and 100 feet of the Subject Property in the down gradient direction; and vicinity database sites pertaining to petroleum product releases within 528 feet of the Subject Property in the up-gradient direction, 165 feet of the Subject Property in the cross gradient direction and 100 feet of the Subject Property in the down gradient direction were reviewed to identify active contamination sites with the potential to affect subsurface vapor conditions at the Subject Property. The potential for vapor encroachment was considered in assessing whether or not a REC exists in connection with the Subject Property when reviewing applicable sites within those distances.

Regulatory database sites with active petroleum or non-petroleum releases that are considered to constitute a vapor encroachment condition (VEC) to the Subject Property, if any, are identified and discussed in this section.

The EDR Radius Map report is attached in Appendix E.

**Property Listings**

The following listings of the Subject Property were identified:

- An NY SPILLS database listing for the "Excavation Site - Front of 413 West 16th Street" details the discovery of a fuel odor during an unrelated excavation (sewer line to transformer vault) leading to the removal of approximately 40 cubic yards of soil on May 27, 2005. Given the impact identified and subsequent remediation (soil removal) and regulatory closure – listed as closed on December 27, 2005, the NY SPILLS listing is considered an HREC.

  Hillmann notes that given the nature of the discovery of the impact (unrelated excavation likely along the sidewalk in front of 413 West 16th Street) and title of the listing "Front of…" the investigation/soil removal was likely not comprehensive enough to determine the presence/absence of impact to the rest of the 430 West 17th Street Parcel (Block 714, Lot 31), a parcel noted above with historic uses including multiple gasoline tanks and an auto filling/service station.

- 401-411 West 18th Street (Building 8) is listed on the UST database for a 1,500-gallon UST removed on June 5, 2017. The listing does not indicate any release was identified during the UST removal and is not considered a REC.

- 400 West 17th Street (Building 7) is listed on the NY SPILLS database due to an incident involving wastewater in June 2020. The case obtained regulatory closure and due to the nature of the spill and regulatory status is not considered a REC.

- Multiple Con-Edison listings (MANIFEST, RCRA-NonGen, FINDS, ECHO) associated with Property addresses were identified. The listings are associated with infrastructure work generating regulated waste. The listings are not indicative of a release and not considered a REC.

- 427-431 West 17th Street / NYCHA-Fulton Houses is listed on the RCRA-NonGen, FINDS and ECHO databases likely associated with the removal of regulated waste. The listings are regulatory in nature, not indicative of a release and not considered a REC.

**Adjoining Property Listings**

The following adjoining property listings were identified.

- Multiple adjacent Con-Edison listings (MANIFEST, RCRA-NonGen, FINDS, ECHO) were identified. The listings are associated with infrastructure work generating regulated waste. The listings are not indicative of a release and not considered a REC in connection with the Property.

- Multiple adjacent sites are listed on the NY SPILLS and LTANKS databases. Each of the adjacent listings obtained regulatory closure and are not considered a REC in connection with the Property.

- West 17th Street and 10th Avenue is listed on the Brownfields database. The site is located to the adjacent west of Property building 4. In 2004 during a Phase I and II, contaminants of concern were identified associated with past uses of petroleum and historic fill. Soils and groundwater were identified to be contaminated with VOCs petroleum related and chlorinated solvents and SVOCs. The listings details the subsequent remediation as follows:

  "*A Track 4 cleanup was achieved for the site. Engineering and Institutional Controls have been instituted to manage the residual contamination. These controls have been memorialized in the Environmental Easement that has been recorded in the New York County Clerk's office. The Certificate of Completion was issued on October 6, 2008.*

  *Public water is provided to the area, thereby preventing exposures to groundwater. The remedial action work plan for the site calls for the removal of contaminated soil from the site prior to construction of a residential building on-site. Soil gas is contaminated by chlorinated solvents that are likely due to an off-site source. The site owner will include measures in the building construction to prevent soil vapor migration into the building.*"

  Given the above, a vapor encroachment condition to the Property cannot be ruled out.

**Surrounding Area Findings**

The following is a discussion of non-adjoining sites identified as located within the ASTM specified search distance surrounding the Subject Property. In order to keep this discussion informative and concise, discussion(s) is/are provided of the listed site(s) for each database category that appears most likely to impact the Subject Property based on distance, area topography and/or regulatory status. Listings of sites within the applicable search distances not specifically discussed below were reviewed and concluded not to be RECs in connection with the Subject Property or VECs based on various factors including distance, area topography, known or inferred groundwater flow direction and/or regulatory status.

| **Federal NPL** | | | | **# of sites:** | 1 | **Search Distance:** | 1-mile |
|---|---|---|---|---|---|---|---|
| **Notable Listing:** | Hudson River PCBs | | | | | | |
| **Distance in feet:** | 850 | **Direction:** | WNW | **Gradient:** | Down | | |
| **Data Discussion:** | Given the location and nature of the NPL case – PCBs in the Hudson River sediment, the listing is not considered a REC to the Property. | | | | | | |
| **REC Discussion:** | Based on the details provided above, a REC is not suspected in connection with the Property. | | | | | | |
| **VEC Discussion:** | Based on the available data, a VEC is not suspected. | | | | | | |

| **Federal Delisted NPL** | | | | **# of sites:** | 0 | **Search Distance:** | 1-mile |
|---|---|---|---|---|---|---|---|
| **Notable Listing:** | None | | | | | | |
| **Distance in feet:** | | **Direction:** | | **Gradient:** | | | |
| **Data Discussion:** | | | | | | | |
| **REC Discussion:** | | | | | | | |
| **VEC Discussion:** | | | | | | | |

| **Federal SEMS** | | | | **# of sites:** | 1 | **Search Distance:** | ½-mile |
|---|---|---|---|---|---|---|---|
| **Notable Listing:** | Hudson River PCBs | | | | | | |
| **Distance in feet:** | 850 | **Direction:** | WNW | **Gradient:** | Down | | |
| **Data Discussion:** | Given the location and nature of the SEMS case (also listed on the NPL database) – PCBs in the Hudson River sediment, the listing is not considered a REC to the Property. | | | | | | |
| **REC Discussion:** | Based on the details provided above, a REC is not suspected in connection with the Property. | | | | | | |
| **VEC Discussion:** | Based on the available data, a VEC is not suspected. | | | | | | |

| **Federal SEMS-ARCHIVE** | | | | **# of sites:** | 2 | **Search Distance:** | ½-mile |
|---|---|---|---|---|---|---|---|
| **Notable Listing:** | Federal Building / 252 7th Avenue | | | | | | |
| **Distance in feet:** | 2,216 | **Direction:** | E | **Gradient:** | Up/Cross | | |
| **Data Discussion:** | Given the distance the SEMS-ARCHIVE sites are not considered a REC in connection with the Property. | | | | | | |
| **REC Discussion:** | Based on the details provided above, a REC is not suspected in connection with the Property. | | | | | | |
| **VEC Discussion:** | Based on the available data, a VEC is not suspected. | | | | | | |

| **Federal CORRACTS** | | | | **# of sites:** | 0 | **Search Distance:** | 1-mile |
|---|---|---|---|---|---|---|---|
| **Notable Listing:** | None | | | | | | |
| **Distance in feet:** | | **Direction:** | | **Gradient:** | | | |
| **Data Discussion:** | | | | | | | |
| **REC Discussion:** | | | | | | | |
| **VEC Discussion:** | | | | | | | |

| **Federal RCRA-TSD** | | | | **# of sites:** | 0 | **Search Distance:** | ½-mile |
|---|---|---|---|---|---|---|---|
| **Notable Listing:** | None | | | | | | |
| **Distance in feet:** | | **Direction:** | | **Gradient:** | | | |
| **Data Discussion:** | | | | | | | |
| **REC Discussion:** | | | | | | | |
| **VEC Discussion:** | | | | | | | |

| **State/Tribal SUPERFUND & HAZARDOUS WASTE** | **# of sites:** | 7 | **Search Distance:** | 1-mile |
|---|---|---|---|---|

| | | | | | |
|---|---|---|---|---|---|
| **Notable Listing:** | Bayview Correctional Facility / 550 West 20th Street | | | | |
| **Distance in feet:** | 987 | **Direction:** | NW | **Gradient:** | Down |
| **Data Discussion:** | Given the distance, gradient and/or regulatory status the SHWS listing are not considered a REC in connection with the Property. | | | | |
| **REC Discussion:** | Based on the details provided above, a REC is not suspected in connection with the Property. | | | | |
| **VEC Discussion:** | Based on the available data, a VEC is not suspected. | | | | |

| **State/Tribal LANDFILL/SOLID WASTE DISPOSAL** | | | | **# of sites:** | 1 | **Search Distance:** | ½-mile |
|---|---|---|---|---|---|---|---|
| **Notable Listing:** | NYCDOS Ganesvoort MTS (near 14th Street) | | | | | | |
| **Distance in feet:** | 1,718 | **Direction:** | SSW | **Gradient:** | Down | | |
| **Data Discussion:** | Given the distance and downgradient location, the NYCDOS transfer station is not considered a REC in connection with the Property. | | | | | | |
| **REC Discussion:** | Based on the details provided above, a REC is not suspected in connection with the Property. | | | | | | |
| **VEC Discussion:** | Based on the available data, a VEC is not suspected. | | | | | | |

| **State/Tribal LEAKING STORAGE TANKS** | | | | **# of sites:** | 132 | **Search Distance:** | ½-mile |
|---|---|---|---|---|---|---|---|
| **Notable Listing:** | Auto Care West / 464 West 18th Street | | | | | | |
| **Distance in feet:** | 145 | **Direction:** | W | **Gradient:** | Down | | |
| **Data Discussion:** | Given the distance, gradient and/or regulatory status, the LTANKS listings are not considered a REC in connection with the Property. | | | | | | |
| **REC Discussion:** | Based on the details provided above, a REC is not suspected in connection with the Property. | | | | | | |
| **VEC Discussion:** | Based on the available data, a VEC is not suspected. | | | | | | |

| **State/Tribal VOLUNTARY CLEANUP SITES** | | | | **# of sites:** | 20 | **Search Distance:** | ½-mile |
|---|---|---|---|---|---|---|---|
| **Notable Listing:** | 118 10th Avenue / Hudson Yards-Chelsea-Flatiron Union Square | | | | | | |
| **Distance in feet:** | 209 | **Direction:** | NW | **Gradient:** | Down | | |
| **Data Discussion:** | Given the nature of the listings and/or distance/gradient the VCP sites are not considered a REC in connection with the Property. | | | | | | |
| **REC Discussion:** | Based on the details provided above, a REC is not suspected in connection with the Property. | | | | | | |
| **VEC Discussion:** | Based on the available data, a VEC is not suspected. | | | | | | |

| **State/Tribal BROWNFIELD SITES** | | | | **# of sites:** | 11 | **Search Distance:** | ½-mile |
|---|---|---|---|---|---|---|---|
| **Notable Listing:** | 515 West 18th Street | | | | | | |
| **Distance in feet:** | 575 | **Direction:** | W | **Gradient:** | Down | | |
| **Data Discussion:** | Given the distance and gradient, the Brownfields listings are not considered a REC in connection with the Property. | | | | | | |
| **REC Discussion:** | Based on the details provided above, a REC is not suspected in connection with the Property. | | | | | | |
| **VEC Discussion:** | Based on the available data, a VEC is not suspected. | | | | | | |

| **UNMAPPED/ORPHAN LIST SITES** | |
|---|---|
| | Hillmann has also reviewed a list of unmapped sites (a.k.a. "Orphan List" sites) indicated by the database report. Unmapped sites that were identified as falling within an applicable specific search distance or warranting discussion have either been discussed in the preceding tables or are detailed below: |

| **Notable Listings:** | None |
|---|---|

### Additional Environmental Record Sources

Requests have been submitted to local, municipal and state agencies for pertinent records pertaining to the Subject Property, particularly with regard to potential environmental concerns such as petroleum storage tanks, storage and usage of hazardous substances and petroleum products, and/or known or suspected environmental contamination. Where applicable, internet research of government environmental regulatory databases was also conducted, as well as a general cursory internet search of the Subject Property address, for information indicative of a REC. The following table summarizes the findings of the research:

| Source | Type of Request | Outcome |
|---|---|---|
| NYCFD-Public Records Unit / Tank Section | FOI request | No response was received prior to report issuance. |
| NYS DEC | FOI request | A response was received stating that no records were found. |
| NYCDEP | FOI request | No response was received prior to report issuance. |
| NY DOB | Online search | Records corroborating historic filling station within the Property identified. |
| USEPA | Online search | No records indicative of a REC identified. |
| Internet | Online Search | No records indicative of a REC identified. |

Pertinent records referenced in the above table have been included in Appendix F.

## 4.2 Historical Research

Historical records have been compiled and analyzed for historical property information and developing a history of previous uses of the Subject Property, adjoining properties and surrounding area. These records were reviewed for the purpose of identifying the likelihood of past uses having led to RECs in connection with the Subject Property.

The historical record sources listed below have been sought with the objective to document past uses of the Subject Property from the present back to the Subject Property's first developed use, or back to 1940, whichever is earlier. The term "developed use" includes agricultural use, placement of fill dirt and other uses that do not involve structures. Hillmann has sought to review historical records in minimum intervals of five years.

### Fire Insurance Maps

A Certified Sanborn Map Report was obtained from EDR for a review of published historic fire insurance maps for the Subject Property and surrounding area. The following is a summary of site uses and notable details depicted by the available maps:

*430 West 17th Street (Block 714, Lot 31)*

| Year(s) | Prop/Adj | Depicted Use(s) | Notable Details |
|---|---|---|---|
| 1895, 1904, 1919, 1921, 1928 | **Property:** | Multiple multi-story dwellings and commercial occupants including of potential environmental concern. | Vinegar Factory (1895); Chinese Laundry (101 9th Avenue – 1904); 165-car garage with auto repair operation in basement and 1,500-gallon gasoline UST in basement (415-425 West 16th Street – 1921-1950); Iron works (1921). |
| | **Adjoining:** | National Biscuit Company factory/warehouse noted to the south. | |
| 1950 | **Property:** | Dwellings have been cleared and replaced with a filling station and a taxi garage. | Taxi garage and filling station each with multiple gasoline tanks along West 16th Street, 9th Avenue and West 17th Street (1950). |
| | **Adjoining:** | Warehouse to the south, residential and commercial in other directions. | Auto repair and freight terminal to the west. |
| 1969, 1975, 1979, 1980, 1983, 1985, 1987, 1988, 1991-1996, 2001-2005 | **Property:** | Four Property buildings corresponding to the present configuration are depicted. | |
| | **Adjoining:** | Manhattan Industrial Center to the south, residential and commercial in other directions. | |

*427 West 17th Street (Block 715, Lot 10)*

| Year(s) | Prop/Adj | Depicted Use(s) | Notable Details |
|---|---|---|---|
| 1895, 1904, 1919, 1921, 1928 | **Property:** | Multiple multi-story dwellings and commercial occupants including of potential environmental concern. | Chinese Laundry (119 9th Avenue in 1904) |
| | **Adjoining:** | Consolidated Gas Company Gas Holders to the west; residential and commercial in other directions. In | Gas holding silos depicted to the west (1895-1904); |
| 1950 | **Property:** | An auto service and filling station with three gasoline tanks with multiple gasoline tanks is noted at 109 9th Avenue. Auto painting and repair are noted along West 17th. A cheese dealer, lumber yard and waste paper are depicted in addition to multiple mixed-use store/dwelling buildings. | Auto painting, repair and filling with multiple gasoline tanks. |
| | **Adjoining:** | Garage with gasoline tanks noted to the adjacent west. | Gasoline tanks depicted to the adjacent west. |
| 1969, 1975, 1979, 1980, 1983, 1985, 1987, 1988, 1991-1996, 2001-2005 | **Property:** | Three Property buildings corresponding to the present configuration are depicted. The apartment complex is listed as "Fulton Houses Apartments" with 944 units and parking. | |
| | **Adjoining:** | Beginning in 2002 the western adjacent building is listed as a Verizon site. | |

*401 West 18th Street (Block 716, Lot 17)*

| Year(s) | Prop/Adj | Depicted Use(s) | Notable Details |
|---|---|---|---|
| 1895, 1904, 1919, 1921, 1928 | **Property:** | Multiple multi-story dwellings and commercial occupants including a pharmacy and bakery. | |
| | **Adjoining:** | Residential/commercial buildings. | |
| 1950 | **Property:** | Motor freight terminal noted at 410-412 West 19th Street. | Motor freight terminal |

| Year(s) | Prop/Adj | Depicted Use(s) | Notable Details |
|---|---|---|---|
| | **Adjoining:** | Auto body shop noted to the adjacent west. | |
| 1969, 1975, 1979, 1980, 1983, 1985, 1987, 1988, 1991-1996, 2001-2005 | **Property:** | Three Property buildings corresponding to the present configuration are depicted. | |
| | **Adjoining:** | No significant changes noted. | |

*401 West 19th Street (Block 717, Lot 19)*

| Year(s) | Prop/Adj | Depicted Use(s) | Notable Details |
|---|---|---|---|
| 1895, 1904, 1919, 1921, 1928 | **Property:** | Multiple multi-story dwellings and a convent. | |
| | **Adjoining:** | Residential/commercial buildings. | |
| 1950 | **Property:** | The dwellings are not listed as mixed-use (store/dwelling) buildings. | |
| | **Adjoining:** | Primarily mixed-use buildings. | |
| 1969, 1975, 1979, 1980, 1983, 1985, 1987, 1988, 1991-1996, 2001-2005 | **Property:** | One Property building corresponding to the present configuration is depicted. | |
| | **Adjoining:** | No significant changes noted. | |

A copy of the Certified Sanborn Map Report is attached in Appendix D.

### City Directories

An EDR City Directory Abstract report was reviewed for data of former occupants of the Subject Property's street address. The following is a generalized summary of the findings of city directory research for past occupants of the Subject Property.

| Property | |
|---|---|
| **Use(s) / Occupant(s):** | **Years** |
| Residential and mixed-use listings | 1920-2017 |
| 403 West 18th Street – Cleveland Automotive Prod Co, Unit Auto Parts Co | 1950 |
| 424 West 18th Street – Drayer scrap metal, Dry Lee Plastic Co Inc. | 1956-1958 |

The EDR City Directory Abstract report was also reviewed for listings of historic occupants of the adjoining properties. The following is a general summary of listings of historic adjoining property occupants:

| Adjoining Properties | |
|---|---|
| **Use and/or Occupant(s)** | **Years** |
| Mix of residential and commercial occupants. | 1920-2017 |

A copy of the EDR City Directory report is attached in Appendix D.

### Historical Topographic Maps

Due to the availability of alternate historic sources, as well as the likelihood that this source would not provide any significant data, historical aerial photographs were not researched for this assessment.

### Historical Aerial Photographs

Due to the availability of alternate historic sources, as well as the likelihood that this source would not provide any significant data, historical aerial photographs were not researched for this assessment.

### EDR High-Risk Historical Records

The EDR Radius Map™ report, which is discussed in greater detail in Section 4.1 and attached in Appendix E, provided a search of proprietary databases of potential historical high-risk uses at or in the vicinity of the Subject Property. These databases include EDR Historic Cleaners – a database of property addresses with records of historical occupancy by suspected cleaners businesses; EDR Historic Auto – a database of property addresses with records of historical occupancy by potential automotive gas/filling stations and repair facilities; and EDR MGP- a database of sites historically occupied by manufactured gas plants and related facilities.

| EDR Database | On-site Listings: | Adjoining/Off-Site Listings |
|---|---|---|
| **Historic Cleaners:** (on-site/adjoining only) | None | 322 Franklin Street, Indigo Cleaners and Dyers, listed for the years 1957 to 1972 |
| **Historic Auto:** (on-site/adjoining only) | None | None |
| **MGP:** (1-mile distance) | None | ConEdison-West 58th St. Station MGP 11th Ave Between W. 58th – W. 59th Sts, was incorrectly plotted by EDR, and is actually located over a mile to the west-northwest. |

### Petroleum/Natural Gas Well Review

The historical record sources were reviewed for records of historic petroleum and/or natural gas wells at the Subject Property. No record of any historical petroleum/natural gas wells at or adjoining the Property was identified.

### Additional Historical Data

Where applicable, the following additional pertinent historical data was obtained:

| | |
|---|---|
| **Interviews/Anecdotal:** | No additional pertinent historical data was obtained. |
| **Local Gov't Records:** | The following additional pertinent historical data was obtained:<br><br>NYC DOB records corroborate Sanborn depictions of gasoline tanks/fillings stations historically within the Property. |

| | |
|---|---|
| **Prior Env. Reports:** (Section 3.2) | Not applicable; no prior reports were provided. |
| **Site Observations:** | Indications of historic uses of the Property or adjoining properties were not observed during the site reconnaissance. |
| **Other Sources:** | No additional pertinent historical data was obtained. |

**Summary of Identified Historic Uses**

The following table presents a summary of the types and approximate date ranges of identified prior uses of the Subject Property:

| Property | |
|---|---|
| **Date Range** | **Use** |
| Late 1800's to 1963 | Residential and auto repair / fillings station among other commercial uses. |
| 1963-Present | Fulton apartment buildings |

The following table presents a summary of the types of identified prior uses of the adjoining properties:

| Adjoining Properties | |
|---|---|
| **Date Range** | **Use** |
| Unk to Present | Residential, commercial and auto repair, industrial warehouses (south), Chelsea Market (south) |

**Historical Records Data Failure**

The ASTM E1527-21 standard defines data failure as failure to achieve the historical research objective even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. The objective is to identify all obvious uses of the property from the present, back to the property's first developed use, or back to 1940, whichever is earlier. Furthermore, records of historic use/conditions were sought in intervals no less than approximately five years, unless the property conditions appear unchanged over a longer interval. In encountered, data failure and its significance as a data gap is discussed below:

| Objective | Met? | Detail | Significant? |
|---|---|---|---|
| First developed use/date determined? | Yes | The first developed use of the Property was for dwellings in the late 1800's. | No |
| Record sources at 5-year intervals back to 1940 or first developed use? | Yes | Historical record gaps exceeding five years were encountered. However, significant site-use changes or undiscovered site uses appear unlikely to have occurred during the record gaps. | No |
| All obvious prior uses identified? | Yes | See Summary of Identified Past Uses of this section. | No |

Please refer to Section 2.3 for additional discussion of data gaps and their significance to the findings of the assessment.

**Historic Uses REC Discussion**

The review of historical records indicated evidence of the following potential RECs in connection with the Property:

Multiple historic uses of potential environmental concern, based on a review of Sanborn Fire Insurance Maps, occurred at the Property prior to the construction of the present Property buildings in the 1960's as follows:

- Vinegar Factory at 424-426 West 17th Street (off the east side of the present Property Building 4) in 1895;
- "Chinese Laundry" at 101 and 119 9th Avenue (near present Property Buildings 2 and 7) in 1904;
- 165-car garage with auto-repair operations in the basement and a 1,500-gallon gasoline buried tank (in the vicinity of the present asphalt surface parking south of Building 2) and a 15-car private garage with a buried gasoline tank (capacity indecipherable) at 409 West 17th Avenue (off the west side of the present Property Building 7), and iron works 434-436 West 17th Avenue and 414 19th Avenue in 1921;
- Filling station (gas station), taxi garage and auto repair with multiple gasoline tanks depicted along ninth avenue between West 16th and West 17th Avenue and along West 16th and West 17th Avenue (see Appendix A figure), and an additional auto filling/service station with multiple gasoline tanks depicted at the northwest corner of 9th Avenue and West 17th Street (near the southern edge of the present Building 7) and auto painting (431-433 West 17th) and repair (443-445 West 17th), a motor freight terminal (410-412 West 19th) in 1950.

The aforementioned historic uses including a factory, laundry, iron works, motor freight station, auto filling/service stations with multiple gasoline tanks is considered a REC.

# 5.0 INTERVIEWS

## 5.1 Interviews with Owners, Operators and Occupants

### Current Owner / Key Site Operator

| **Property Owner** | **Contact Name** | **Affiliation** | **Interview Type** |
|---|---|---|---|
| New York City Housing Authority (NYCHA) representative | Patrick Chan | Property Manager with NYCHA | In person |
| **Interview Date:** | April 19, 2022 | | |
| **Interview Outcome/Findings:** | | | |
| An interview for information pertinent to the assessment was conducted in person at the time of the site visit. The following pertinent information was indicated:<br><br>The Property was reportedly always supplied with high pressure steam and no heating oil is or was present to Mr. Chan's knowledge. | | | |

### Prior Owners/Operators/Occupants

| **Name** | **Company/Title** | **Yrs @ Site** | **Interview Type** |
|---|---|---|---|
| | | | |
| **Interview Date:** | | | |
| **Interview Outcome/Findings:** | | | |
| No prior owners, operators or occupants were interviewed. | | | |

### Neighboring Property Owner/Occupants

| **Name** | **Company/Title** | **Yrs at site** | **Interview Type** |
|---|---|---|---|
| | | | |
| **Interview Date:** | | | |
| **Interview Outcome/Findings:** | | | |
| The Property was not an abandoned property with evidence of unauthorized uses or uncontrolled access; therefore, interviews with adjoining or nearby property owners or occupants were not conducted. | | | |

## 5.2 Interviews with State and/or Local Government Officials

State and/or local governmental officials have been interviewed to obtain information of potential RECs in connection with the Subject Property. Many government agencies and their officials require submittal of written request for records in order to respond. The details in Section 4.1 list the various state and local government agencies contacted as part of this assessment, and the outcome of each inquiry. In addition, the details of regulatory database research in Section 4.1 may

have included detail of interviews with officials pertinent to government records review and identification of RECs.

Additional interview of government officials not previously detailed in Sections 4.1 are discussed below, if applicable.

| **Name** | **Agency Name/Title** | **Interview Type** |
|---|---|---|
| | | |
| **Interview Outcome/Findings:** | | |
| No additional local/state government officials were interviewed. | | |

# 6.0 SITE RECONNAISSANCE

## 6.1 Methodology and Limiting Conditions

A site reconnaissance was conducted to collect information and make observations to help identify RECs in connection with the Subject Property. This included visual and/or physical observations of the Subject Property and its structures, adjoining properties as viewed from the Subject Property boundaries and the surrounding area based on visual observations from adjoining public thoroughfares and accessed Subject Property structures. Subject property building exteriors were observed at ground level, unless otherwise indicated. Where applicable, building interiors were accessed and observed to the extent they were made safely accessible with the cooperation of the site escort.

| | |
|---|---|
| **Site Inspection Personnel:** | Mr. Etan Hindin and Mr. Dominick Aponte |
| **Property Escort/Company:** | Rico / Property Caretaker |
| **Inspection Date:** | April 19, 2022 |
| **Weather Conditions:** | Overcast 45 degrees Fahrenheit |

### Significant Inaccessible Areas

Due to the pandemic occupied units were inaccessible. The inability to access these units is not considered a Significant Data Gap.

### Significant Limiting Site Conditions

No significant limiting site conditions were noted at the time of the site reconnaissance.

## 6.2 General Site Setting

### Site and Vicinity Characteristics

| | |
|---|---|
| **Abutting Roadways:** | 9th Avenue to the east; West 16th Street to the south; West 17th, 18th and 19th divide the Property parcels. |
| **Current Property Use:** | Multifamily residential |
| **Evidence of Past Property Uses:** | None observed. |
| **Evidence of Past Adjoining Property Uses:** | None observed. |
| **Surrounding Area Uses:** | Commercial, residential |

### Current Adjoining Property Uses

| Dir | Street Address | Description |
|---|---|---|
| **N** | Multiple West 20th addresses | Primarily residential |
| **W** | Multiple West 16th-20th addresses | Residential and commercial |
| **E** | Multiple 9th Avenue addresses | Commercial and residential |
| **S** | 75 9th Avenue | Commercial |

No visual observations indicative of a potential environmental concern were noted on the adjoining properties.

### Topographic Characteristics

| | |
|---|---|
| **Terrain:** | Flat to gently sloping |
| **Direction of Downward Slope:** | Towards the northwest |
| **On-site Water Bodies:** | None observed |
| **Other Significant Features:** | None observed |

### General Description of Structures and Improvements

| | |
|---|---|
| **Buildings:** | Twelve |
| **Approx. Building Size:** | 974-units (combined) |
| **Approx. Year Built:** | 1963-1965 |
| **Number of Stories:** | B12 – 1; B2, B6, B9 – 25-story plus basement; B1, B3 6-story plus basement; B4, B5, B7, B8, B10, B11 – 6-story |
| **Basement/Subgrade Levels:** | See above |
| **Exterior Ground Cover:** | Asphalt, cement and landscaped areas, |
| **Ancillary Structures:** | B12 as noted above |
| **Sources of Heating & Cooling:** | High pressure steam supplied by Con Edison for heat and tenant-owned optional electric window units for cooling. |
| **Potable Water/Sewage Disposal:** | Municipal utility connections |

## 6.3 Site Features and Conditions

### Storage/Usage of Hazardous Substances and Petroleum Products

The following approximate number of containers, and general description of their contents, capacity, container types and storage conditions, were observed to be stored and/or used at the Subject Property:

| Occupant | Substance | Qty/Container Type | Storage Conditions |
|---|---|---|---|
| NYCHA | Maintenance and cleaning materials (including paint) | 1-30-gallon | All stored indoors on intact concrete. No storage concerns noted.<br><br>Paint storage within western side of B4. |

**Bulk Petroleum/Hazardous Material Storage Tanks**

The following storage tanks for bulk petroleum or hazardous material storage were identified or reported to be present; or are suspected to be present based on visual observations:

| AST/UST | Product | Capacity | Construction | Year Installed | Status | Location/Notes |
|---|---|---|---|---|---|---|
| None observed | | | | | | |

One UST noted to have been removed from the Property, specifically, 401-411 West 18th Street (Building 8) is listed on the UST database for a 1,500-gallon UST removed on June 5, 2017.

While no visual evidence of a UST was noted, considering the history of development, the potential presence of abandoned USTs and/or associated buried piping at the Subject Property cannot be ruled out.

**Strong, Pungent or Noxious Odors and their Sources**

No strong, pungent or noxious odors were noted at the Subject Property.

**Standing Surface Water/Pools & Sumps**

No standing water, pools or sumps containing liquids likely to be hazardous substances or petroleum products were noted.

**Drums, Totes and Intermediate Bulk Containers**

No hazardous substance or petroleum product drums were noted.

**Unidentified Substance Containers**

No unidentified substance containers suspected of containing hazardous substance or petroleum product were noted.

**PCBs in Oil Filled Electrical/Hydraulic Equipment**

No oil-filled electrical or hydraulic equipment was identified at the Subject Property.

It is noted that identification of PCB containing fluorescent light ballasts, caulk, paint, or other materials located inside and are part of the building or structure is outside of the scope of the ASTM

E1527-21 standard and this assessment.

**Stains or Corrosion on Floors, Walls or Ceilings**

No stains or corrosion of floors, walls or ceilings, excluding any staining from water, were noted.

**Drains and Sumps**

Floor drains and a basement sump designed for the purpose of managing sanitary sewage were noted. No conditions indicative of a REC were observed.

**Pits/Ponds/Lagoons**

No pits, ponds or lagoons were identified in connection with waste treatment or disposal.

**Stained Soil, Pavement/Stressed Vegetation**

No stained soil, pavement or stressed vegetation was observed.

**On-Site Solid Waste Disposal/Fill Material**

No evidence of on-site disposal of trash, construction debris, demolition debris or other solid waste was observed.

Based on the history of previous site development, historical fill material may be present in the subsurface at areas of previous site grading or building structures.

**Waste Water**

Sanitary sewage generated at the Subject Property is discharged via a connection to the local public sewer system.

Storm water runoff at the Subject Property is discharged via roof drains into the municipal sewer system.

**Septic Systems/Cesspools**

No septic systems/cesspools identified.

**Wells**

The following wells were identified at the Subject Property:

Two (2) groundwater monitoring wells were observed within the Property north of B12 (two-bay Property garage) and northwest of B4 on the south side of West 18$^{th}$ and West 17$^{th}$ Streets respectively. The trigger for the installation of these wells and their use for sampling/monitoring, if any, was unknown by the site escort/contact.

**Railroad Spurs**

No railroad spurs were identified on the Subject Property.

# 7.0 BUSINESS ENVIRONMENTAL RISKS

In accordance with the contract agreement for this assessment, Hillmann has performed cursory reviews of several potential Business Environmental Risks (also known as "Non-Scope Considerations"). The ASTM E1527-21 standard defines the term business environmental risk (BER) as, *"a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice."*

## 7.1 Asbestos-Containing Material (ACM)

The contracted scope of work included a cursory visual screening of the accessed portions of buildings at the Subject Property built prior to 1990 for suspect asbestos containing materials (ACM). The information provided in this section, where applicable, is limited to identification of potential suspect materials in the readily accessible and observed areas of the building, and their general condition. This is not intended to be a comprehensive survey for the presence of ACM, and no testing has been conducted.

Given the 1963-1965 years of construction, asbestos containing materials are suspected unless ruled out by laboratory analysis.

Suspected ACM noted within the accessed building areas included floor tile, wall-board, spray-of insulation and roofing materials.

## 7.2 Lead-Based Paint

The contracted scope of work included a cursory visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1980. This is not intended to constitute a comprehensive survey for LBP or potential lead hazards, and no testing has been conducted.

Given the 1963-1965 years of construction, lead-paint is suspected unless ruled out by field survey or laboratory analysis.

Lead sampling was reportedly being performed due to the December 21, 2021 modification to the legal lead-based paint standard to 0.5 $mg/cm^2$ (Local Law 66 and rules adopted by the Department of Housing Preservation and Development [HPD]) The results of the survey have been requested by Hillmann.

## 7.3 Radon

Data compiled by the USEPA, as summarized by the regulatory database report, indicated that the Subject Property is located in an area classified as Zone 3 or 'low risk' area for radon. Radon testing was not included in the scope of this assessment.

## 7.4 Mold/Microbial Damage

The contracted scope of work included a cursory visual screening of the accessed areas of the building for evidence of significant damage to building materials and finishes as result of moisture intrusion and/or mold/microbial growth.

The following evidence of significant moisture intrusion or mold/microbial growth was noted:

The basement of Building 1 was observed to have standing water on the concrete surface with some discoloration. Intermittent pipe and roof leaks were reportedly common given the age of the building. Mold abatement, primarily removing water damaged wall-board is reportedly performed by NYCHA staff as needed.

## 7.5 NWI Mapped Wetlands

The National Wetlands Inventory online Wetland Mapper (https://www.fws.gov/wetlands/data/mapper.html) was reviewed for indications of jurisdictional wetlands at or immediately adjoining the Subject Property. The scope of work for this assessment excluded a visual determination of regulated wetlands at the Subject Property. It is emphasized that, regardless of the data reviewed via the NWI Wetlands Mapper, a field delineation of regulated wetlands by a qualified professional would be warranted to determine the presence or absence of regulated wetlands at the Subject Property.

The review did not indicate regulated wetland areas on the Property.

## 7.6 Lead in Drinking Water

The scope of work for this assessment included a review of the potential for elevated levels of lead in drinking water by determining the source of the drinking water supply and a review of available compliance or testing data.

Potable water service at the Property is provided by a utility connection with the City of New York. A recently published water quality report from the utility indicated compliance with USEPA water quality standards for lead in drinking water. A copy of the report has been attached in Appendix F. Note – no site-specific lead-in-water sampling was performed within the context of the Phase I.

**RE: Phase I Environmental Site Assessment**
Chelsea-Elliott
264 & 278 10th Avenue, 427 & 441 West 26th Street, 407 West 25th Street
New York, New York 10001
Hillmann Project No: Z34898

Dear Mr. Adams:

Hillmann Consulting LLC has completed a Phase I Environmental Site Assessment of the above referenced property. This assessment was performed in conformance with our contract agreement and the scope and limitations of ASTM Practice E 1527-21, which is the latest version of the E1527 standard published by the ASTM.

We appreciate the opportunity to provide environmental due diligence services. If you have any questions concerning this report, or if we can assist you in any other matter, please contact our office at 908-688-7800.

Sincerely,

Hillmann Consulting, LLC

Chris Hirschmann
Environmental Services Director

Etan Hindin
Senior Project Manager

# TABLE OF CONTENTS

## List of Abbreviations/Acronyms

Hillmann may use the following abbreviations and acronyms for common terminology described in our report. Not all abbreviations or acronyms may be applicable to this report:

| | |
|---|---|
| ACM | – Asbestos Containing Material |
| AOC | – Area of Concern |
| AST | – Aboveground Storage Tank |
| ASTM | – American Society for Testing Materials |
| BER | – Business Environmental Risk |
| CEA | – Classification Exception Area |
| CERCLA | – Comprehensive Environmental Response Compensation and Liability Act |
| CERCLIS | – Comprehensive Environmental Response Compensation and Liability Information System |
| CESQG | – Conditionally Exempt Small Quantity Generator |
| COC | – Chemicals of Concern |
| CORRACTS | – Corrective Action Sites |
| CREC | – Controlled Recognized Environmental Condition |
| DEC | – Department of Environmental Conservation |
| DEP | – Department of Environmental Protection |
| DHS | – Department of Health Services |
| DNPL | – Delisted National Priority List |
| DOB | – Department of Buildings |
| DOH | – Department of Health |
| DOT | – Department of Transportation |
| DTSC | – Department of Toxic Substances Control |
| ENG | – Engineering |
| EPA | – Environmental Protection Agency |
| ERNS | – Emergency Response Notification System |
| FD | – Fire Department |
| FOI/FOIA/FOIL | – Freedom of Information / Freedom of Information Act / Freedom of Information Letter |
| HVAC | – Heating Ventilation & Air Conditioning |
| HREC | – Historic Recognized Environmental Condition |
| IAQ | – Indoor Air Quality |
| ISRA | – Industrial Site Recovery Act |
| LBP | – Lead-Based Paint |
| LCP | – Lead-Containing Paint |
| LQG | – Large Quantity Generator |
| LTANK | – Leaking Storage Tank |
| LUST | – Leaking Underground Storage Tank |
| SDS/MSDS | – Safety Data Sheet / Material Safety Data Sheet |
| NA | – Not Applicable |
| NFA | – No Further Action |
| NFRAP | – No Further Remedial Actions Planned |
| NPDES | – National Pollutant Discharge Elimination System |
| NPL | – National Priority List |
| OER | – Office of Environmental Remediation |
| OPRA | – Open Public Records Act |
| PAH | – Polycyclic Aromatic Hydrocarbon |
| PCE | – Perchloroethylene |
| RAO | – Response Action Outcome |
| RCRA | – Resource Conservation and Recovery Act |
| RCRIS | – Resource Conservation and Recovery Information System |
| REC | – Recognized Environmental Condition |
| RWQCB | – Regional Water Quality Control Board |
| SCAQMD | – South Coast Air Quality Management District |
| SDG | – Significant Data Gap |
| SEMS | – Superfund Enterprise Management System |
| SRP | – Site Remediation Program |
| SQG | – Small Quantity Generator |
| SVOC | – Semi-Volatile Organic Compound |
| TCE | – Trichloroethylene |
| TSDF | – Treatment Storage and/or Disposal Facility |
| UST | – Underground Storage Tank |
| VEC | – Vapor Encroachment Condition |
| VOC | – Volatile Organic Compound |

# 1.0 FINDINGS, OPINIONS, AND CONCLUSIONS

Hillmann Consulting, LLC (Hillmann) performed a Phase I Environmental Site Assessment (ESA) of 264 & 278 10th Avenue, 427 & 441 West 26th Street, 407 West 25th Street, New York, New York (the Subject Property). The assessment has been conducted in accordance with our contracted scope of work and the ASTM Standard Practice E 1527-21 for Phase I Environmental Site Assessments and All Appropriate Inquiries (AAI) Final Rule 40 CFR Part 312. This section contains a summary of findings, opinions and conclusions made by this assessment. However, this section, alone, does not constitute the complete assessment. The report must be read in its entirety.

## 1.1 Summary of Project Details

## 1.3 Findings, Opinions and Conclusions

### Recognized Environmental Conditions & Significant Data Gaps

Hillmann has performed a Phase I Environmental Site Assessment in accordance with the scope and limitations of ASTM Practice E 1527-21 of the Subject Property as described in Section 2.2 of this report. Any additions to, exceptions to, or deletions from this practice are also described in Section 2 of this report. This assessment has revealed the following *recognized environmental conditions* (RECs), *controlled recognized environmental conditions* (CRECs) and/or *significant data gaps* (SDGs) in connection with the Subject Property:

**RECOGNIZED ENVIRONMENTAL CONDITIONS**

Multiple historic uses of potential environmental concern, based on a review of Sanborn Fire Insurance Maps, occurred at the Property prior to the construction of the present Property buildings in the 1940's-1960's, as follows:

- N.Y. Edison Co. Sub Station/transformer station (452 West 27th Street – 1911-1930);
- Machine Shop (429 West 26th Street 1911);
- Manufacturing (not specified) use (418-420 West 27th Street, 447-455 West 26th Street, 425-427 West 25th Street; 1911-1930);
- Garage with a 10,000-gallon buried tank (417-423 West 25th Street – 1930-1950);
- Printer-Lithographer operation with multiple tanks noted to the immediate east of the Property at the southwest corner of 9th Avenue and West 26th Street – 263 9th Avenue (1930-2005).

The aforementioned historic uses, including a transformer sub-station, machine shop, manufacturing, and garage with a UST, and a printer/lithographer immediately east of the Property, are considered a REC.

Hillmann recommends obtaining records of a subsurface investigation (if already performed) or performing a subsurface investigation to determine the presence/absence of impact to underlying environmental media from

aforementioned uses and the presence/absence of an abandoned underground storage tanks (USTs) in the area of the former garage (417-423 West 25th Street).

Hillmann notes that prior reports reviewed by Hillmann (See Section 3.1) detail investigations limited to the leaking USTs and not site-wide subsurface investigations.

**CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS (CRECs)**

Elliott-Houses-NYCHA, 426 West 27th Street is listed on the LTANKS database for Spill Number: 9602200 due to a tank test failure on May 15, 1996. The spill listed as consolidated with Spill Number: 8908401 is listed as having obtained regulatory closure on February 2, 2006. The remarks detail a discharge of #6-fuel oil, extensive remediation and monitoring and the installation of an oil recovery system detailed in Section 3.1 above. The database listing remarks state:

*"20K TANK - EVERYTIME FILLED ACTIVE FLOW TAKES PLACE INTO BASEMENT THRU WALLS - ABSORBED WITH SPEEDY DRY AND TEMPORARILY TAKING TANK OUT OF SERVICE"*

The database listing detail regarding the backdrop to the regulatory closure is as follows:

*The PRS [Petroleum Recovery System] was operated between 1998 and 2014. Free product has not been observed in the accessible monitoring wells since 2007. Since halting the PRS in 2014, free product has not been observed in the accessible monitoring wells and little free product (less than 0.25in) has been observed in the recovery wells. No petroleum related VOCs or SVOCs (listed in Table 3 of CP-51) were detected in groundwater samples collected in April 2015 from the accessible monitoring wells. As per Randy in a discussion of January 20, 2017 if less than 0.25 inches of No. 6 oil has been in on-site wells for 2+ years and contamination has been delineated all around the impacted area and there is nothing off-site and no dissolved phase in wells, spills can be closed. The Closure Letter should contain the contaminated soil clause. Spill closure email will be prepared with contaminated soil clause and sent to NYCHA.*

Given the closure with a "*soil clause"* the above is considered a CREC. Hillmann recommends obtaining the closure records from NYCHA to understand the nature of any closure conditions e.g., monitoring or administrative requirements or institutional/engineering controls.

If the onsite groundwater monitoring wells, petroleum recovery system and associated 275-gallon waste oil UST observed during the site reconnaissance are no longer in use these wells and equipment should be decommissioned in accordance with applicable regulations.

**SIGNIFICANT DATA GAPS (SDGs)**

No SDGs were identified.

### Historical Recognized Environmental Conditions (HRECs)

This assessment has revealed the following *historical recognized environmental conditions* (HRECs) in connection with the Subject Property:

**HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS**

Chelsea Houses-NYCHA, 431 West 25th Street is listed on the LTANKS, NY SPILLS and UST databases. The LTANKS listings is for Spill Number: 9806339 due to a tank test failure on August 21, 1998. The spill is listed as having obtained regulatory closure on August 27, 2013. The listing details the removal of a 30,000-gallon #2 fuel oil UST with six post excavation samples leading to the removal of 900-tons of soil. Exceedances included Benzo(a)anthracene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(g,h,i)perylene, Chrysene, Dibenzo(a,h)anthracene.

The listing details the backdrop to regulatory closure as follows:

"*30,000 gallon UST removed in 8/2000. -890 tons of contaminated soils removed in 2000 -investigation done in 2006 along fill lines and by fill port (DEC request) -some PAHs detected in grab groundwater sample in 2006 -5 permanent wells installed in 2010 -All gw under TOGS with the exception of MW-5 (3 minor VOC compound exceedences) -Slight sheen subsequently detected in MW-5. Absorbent sock placed in well. -Minor impacts on sock in 2012. -No oil detect on absorbent sock in 2013. -Confirmed no product sheen in well during site visit of 7/31/13. NFA. Email sent to NYCHA on 8/27/13 requesting wells be decommissioned*."

Hillmann recommends obtaining the closure letter. If it is determined that any conditions are linked to the No Further Action (other than decommissioning the wells), the case would be re-classified as a CREC, however available database listing detail does not list and conditions.

Additionally, Hillmann observed multiple monitoring wells in the vicinity of the former 30,000-gallon UST. Hillmann recommends decommissioning the wells if no ongoing monitoring requirements apply.

### De Minimis and Other Environmental Conditions

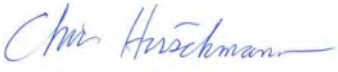
The following *de minimis* and other environmental conditions were identified:

| OTHER ENVIRONMENTAL CONDITIONS / DE MINIMIS CONDITIONS |
|---|
| The Property is equipped with two (2) 25,000-gallon #2 fuel oil USTs. Hillmann recommends continued maintenance and permitting and obtaining most recent maintenance record logs from NYCHA. |
| Multiple NY SPILLS listings were identified associated with Property addresses. Given their regulatory closure and the nature/quantity of the spills (contained with not impact to soil/groundwater), they are not considered a REC. |
| Multiple Property and adjacent Con-Edison listings (MANIFEST, RCRA-NonGen, FINDS, ECHO) were identified. The listings are associated with infrastructure work generating regulated waste. The listings are not indicative of a release and not considered a REC in connection with the Property. |
| Multiple adjacent sites are listed on the NY SPILLS and LTANKS databases. Each of the adjacent listings obtained regulatory closure and are not considered a REC in connection with the Property. |
| 500 West 25th Street, listed on the VCP database for OER Site Number: 17CVCP047M associated with redevelopment and investigations/remediation associated with historic use obtained a notice of completion dated November 9, 2020. Given the status and findings of the investigations, the southwestern adjacent VCP site is not considered a REC in connection with the Property. Records were reviewed via the NYC EPIC Online Document Repository. |

### Environmental Professional Statement

I/We declare that, to the best of my professional knowledge and belief, I/we meet the definition of *Environmental professional* as defined in § 312.10 of 40 C.F.R. 312. I/we have the specific qualifications based on education, training and experience to assess a *property* of the nature, history and setting of the *subject property*. I/We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

Etan Hindin
Environmental Professional



Chris Hirschmann
Environmental Professional

## 1.4 Business Environmental Risks / Non-ASTM Scope

Hillmann has performed a limited review of the following potential Business Environmental Risks (BER), also known as "Non-ASTM Scope concerns", in accordance with the contracted scope of work scope for this assessment. BER is defined by ASTM E1527-21 as *"a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice."* The following is a summary of findings for the limited review of potential BERs, where applicable, as per the contracted scope of work and limitations outlined in Section 2. For a more detailed discussion of the findings and contracted scope of work, please see the referenced report section.

| BUSINESS ENVIRONMENTAL RISKS / NON-ASTM SCOPE | | | |
|---|---|---|---|
| **Subject** | **Findings** | **Not Appl.** | **Rpt. Ref.** |
| **Asbestos** | Given the 1940-1968 years of construction, asbestos containing materials are suspected unless ruled out by laboratory analysis.<br><br>Suspected ACM noted within the accessed building areas included floor tile, wall-board, spray-on insulation and roofing materials. | | 7.1 |
| **Lead Paint** | Given the 1940-1968 years of construction, lead-paint is suspected unless ruled out by field survey or laboratory analysis.<br><br>Lead sampling was reportedly being performed due to the December 21, 2021 modification to the legal lead-based paint standard to 0.5 mg/cm$^2$ (Local Law 66 and rules adopted by the Department of Housing Preservation and Development [HPD]) The results of the survey have been requested by Hillmann. | | 7.2 |
| **Radon** | The Property is located in the USEPA radon designation Zone 3 or 'low risk' area for radon. | | 7.3 |
| **Mold / Microbial Damage** | The basement of Building Elliot-1 was observed to have standing water on the concrete surface. Intermittent pipe and roof leaks were reportedly common given the age of the building. Mold abatement, primarily removing water damaged wall-board is reportedly performed by NYCHA staff as needed. | | 7.4 |
| **NWI Wetlands** | No NWI Wetlands were depicted within the Property. | | 7.5 |
| **Lead in Drinking Water** | Potable water service at the Subject Property is provided by the City of New York. The water purveyor water supply is within acceptable standards. Property building specific lead-in-drinking water sampling was not performed. | | 7.6 |

# 2.0 INTRODUCTION

## 2.1 Purpose and Scope

This assessment was conducted utilizing generally accepted Phase I ESA industry standards in accordance with the ASTM Standard Practice E 1527-21. The ASTM describes these methodologies as representing good commercial and customary practice in the United States of America for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. § 9601) and petroleum products. As such, this practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner or bona fide prospective purchaser limitations on CERCLA liability (hereinafter, the "landowner liability protections," or "LLPs"): that is, the practice that constitutes all appropriate inquiries into the previous ownership and uses the property consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35) (B). The goal of the processes established by ASTM E1527-21 is to identify *recognized environmental conditions* in connection with the Subject Property.

The term *recognized environmental condition* (REC) is defined by ASTM E1527-21 as *"(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment."*

The term *controlled recognized environmental condition* is a type of recognized environmental condition and defined by ASTM E1527-21 as a *"recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)."*

The term *historical recognized environmental condition* is defined as a *"previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations)."* The ASTM E1527-21 standard has clarified that a *historical recognized environmental condition* (HREC) is not a *recognized environmental condition* (REC).

The term *de minimis condition* is defined by the ASTM, *"…a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies."* A condition determined to be a *de minimis condition* is not REC nor a CREC.

The chief components of this assessment are generally described as follows:

- A non-invasive visual reconnaissance of the Subject Property and adjoining properties in accordance with ASTM guidelines for evidence of RECs.

- Interviews of past and present owners and occupants and state and local government officials, seeking information related to the potential presence of RECs at the Subject Property.

- A review of standard physical record sources for available topographic, geologic and groundwater data.

- A review of standard historic record sources, such as fire insurance maps, city directories, aerial photographs, prior reports and interviews, etc., to determine prior uses of the Subject Property from the present, back to the Subject Property's first developed use, or back to 1940, whichever is earlier.

- A review of standard environmental record sources including federal and state environmental databases, and additional environmental record sources, to identify potential regulatory concerns with the Subject Property, adjoining properties and properties located within the surrounding area.

An evaluation of environmental or other regulatory compliance matters is excluded from the scope of this assessment.

These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions.

**Business Environmental Risks/Non-ASTM Scope Considerations**

In accordance with our contract agreement, Hillmann may have addressed the following potential environmental subject matters that are outside of the requirements of the ASTM E1527-21 standard:

- Asbestos-Containing Materials (ACM): A cursory non-intrusive visual screening for the presence of suspect ACM within the accessed areas of buildings built prior to 1990 on the Subject Property. If the Subject Property contains buildings built in 1990 or later, the contracted scope of work excludes a cursory non-intrusive visual screening or any other level of evaluation for suspect ACM; however, the exclusion for buildings built ≥1990 should not be interpreted to suggest that any such buildings are free of ACM or would not warrant evaluation of building materials for ACM prior to disturbance. It is emphasized that this cursory non-intrusive visual screening does not constitute an asbestos survey/inspection of the premises. An asbestos survey/inspection should be sought by the report User(s) if a greater certainty is desired regarding ACM and potential asbestos hazards at the Subject Property. Furthermore, a review of regulatory compliance matters pertaining to asbestos is excluded from the scope of work.

- Lead-Based Paint (LBP): A cursory non-intrusive visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1980 on the Subject Property. If the Property contains buildings built in 1980 or later, the contracted scope of work excludes any cursory non-intrusive visual screening or other level of evaluation for suspect

LPB; however, the scope of work exclusion for building built ≥1980 should not be interpreted to suggest that any such buildings are free of LPB or other lead hazards. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for LBP or potential lead hazards. A comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding LBP at the Subject Property. Furthermore, a review of regulatory compliance matters pertaining to lead-based paint is excluded from the scope of work.

- USEPA Designated Radon Potential: Review of general non-site specific data published by the USEPA regarding the Radon Zone classification for the area of the Subject Property.

- Mold/Microbial Damage: A cursory non-intrusive visual screening within the accessed areas of buildings on the Subject Property for evidence of systemic microbial problems, including visible mold growth, water damaged building materials or musty odors. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for moisture/mold/microbial damage. A more comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding the potential for moisture/mold/microbial damages at the Subject Property.

- NWI Wetlands: The Property has been reviewed for jurisdictional wetlands using the National Wetlands Inventory Wetland Mapper (http://wetlandsfws.er.usgs.gov/NWI/download.html) to determine whether mapped federal wetlands have been indicated on the Subject Property. Any further evaluation or legal delineation of regulated wetlands areas is excluded from the scope of work. It is also emphasized that a field delineation of regulated wetlands by a qualified professional would be warranted to more fully determine the presence or absence of regulated wetlands at the Subject Property.

- Lead in Drinking Water: Review of the potential for elevated levels of lead in the drinking water by determining the source of the drinking water supply and a review of available testing or compliance data reports.

## 2.2 Property Location/Legal Description

Property location and legal description details are described as follows:

| | | | | | |
|---|---|---|---|---|---|
| **Primary Street Address:** | 264 & 278 10th Avenue, 427 & 441 West 26th Street, 407 West 25th Street | | | | |
| **City:** | New York | **County:** | New York | **State:** | New York |
| **Tax ID/Parcel Number:** | 278 10th Avenue: Block 724, Lot 1; 441W26th: Block 724, Lot 10; 427W26th: Block 724, Lot 15; 264 10th Avenue: Block 723, Lot 1; 407W25th: Block 723, Lot 15 | | | | |
| **Approx. Land Area:** | 6.53-acres (combined) | | | | |
| **Apprx. Latitude/Longitude:** | North 40.7496440 degrees/West 74.0014680 degrees | | | | |
| **Additional Details (if appl.):** | Secondary address range:<br>407-461 West 25th Street; | | | | |

| | |
|---|---|
| | 408-466 and 421-465 West 26th Street;<br>416-460 West 27th Street. |
| **Property Owner:** | New York City Housing Authority (NYCHA) |
| **Zoning Designation:** | R8 (Residential) |

## 2.3 Data Gaps

A *data gap* is defined by the ASTM as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. A data gap is only significant if other information and/or professional experience raises reasonable concerns involving the data gap and the ability to determine the presence or absence of recognized environmental conditions. The following table summarizes data gaps encountered during the assessment as well as a discussion of their significance.

| Data Gap: | Significant (Yes/No)? | Discussion |
|---|---|---|
| Historical records data failure | No | Records gaps exceeding five years were encountered; however, no significant site use changes are suspected during these intervals. |
| Response to agency records requests not received as of date of report. | No | Any additional information indicative of a REC will be forwarded upon receipt. |

## 2.4 ESA Report Component Dates/Viability

The ASTM E1527-21 standard states that an environmental site assessment (ESA) is presumed to be viable when it is conducted within 180 days prior to the date of acquisition of the Subject Property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction). Specifically, all of the following components must be conducted or updated within 180 days prior to the date of acquisition or prior to the date of the transaction. The following table summarizes the component completion dates:

| ESA Component | Completion Date |
|---|---|
| Interviews | April 19, 2022 |
| Env Lien Search | (excluded from scope) |
| Government Records Review | March 28, 2022 |
| Visual Inspections | April 19, 2022 |
| Env. Professional Declaration | May 6, 2022 |

## 2.5 User Reliance

This report is for the exclusive use of Elliott Fulton LLC c/o Essence Development and additional relying entities, if any, named on the front cover. No additional individuals or entities shall be permitted to rely upon any data, interpretation, reports or other information or documentation contained in this report, without first obtaining the consent of Elliott Fulton LLC c/o Essence Development; and without obtaining written consent from Hillmann in the form of a reliance agreement/letter.

Hillmann may, in its sole discretion, withhold its consent to additional reliance and/or Hillmann may condition consent for reliance upon payment of a fee or other conditions.

## 2.6 Significant Assumptions

The following significant assumptions are made:

- The site operations at the time of the site visit are assumed to reflect typical site conditions relative to potential environmental conditions and that no concealment of environmental conditions or releases by site owners or occupants has occurred. Likewise, it is assumed that no areas of the Subject Property with potential environmental concerns or RECs were concealed or otherwise not reported, intentionally or unknowingly, by the Subject Property owners/occupants and/or site escort at the time of the site visit.

- For the purpose of estimating the approximate direction of groundwater flow in the absence of site specific groundwater data, unless indicated otherwise, an assumption has been made that the gradient of groundwater flow follows the surface topography of the Subject Property and immediate surrounding area.

## 2.7 General Limitations and Exceptions

### Limitations

The report turnaround time specified by the contract agreement for this assessment may present a limitation to the availability of pertinent regulatory agency records. Such limitations, if encountered, would be further specified in Section 4.1.

Significant limitations related to the condition or accessibility of the Subject Property at the time of the site reconnaissance, if encountered, are reported in Section 6.1.

### Other Exceptions or Deletions

No other exceptions or deletions from the ASTM Standard E 1527-21 are reported.

### Special Terms and Conditions

This Phase I Environmental Site Assessment has been prepared using reasonable efforts in each phase of its work to identify recognized environmental conditions associated with hazardous substances, wastes and petroleum products at the Subject Property. Findings within this report are based on information collected from observations made on the day of the site reconnaissance and from reasonably ascertainable information obtained from governing public agencies and private sources.

This report is not definitive and should not be assumed to be a complete or specific definition of the conditions above or below grade. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, site development,

redevelopment, or other construction purposes. No representation or warranty is made that the past or current operations at the Subject Property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes.

Findings, conclusions and recommendations presented in this report are based on visual observations of the Subject Property, interviews conducted, the records reviewed, information provided by the Client, and/or a review of readily available and supplied drawings and documents. Information obtained during the assessment, whether written, graphic or verbal, provided by the Subject Property contact(s) or as shown on any documents reviewed or received from the Subject Property contact, owner or agent, or government agency source; is assumed to be accurate except as specifically stated otherwise in this report. Independent verification of the accuracy or completeness of all information reviewed or received during the course of this assessment is not made and excluded from the scope of work for this assessment. No warranty or guarantee is made of the accuracy or completeness of information that was obtained from ostensibly knowledgeable individuals, regulatory agency representatives or other secondary sources.

Regardless of the findings stated in this report, Hillmann is not responsible for consequences or conditions arising from facts that were concealed, withheld or not fully disclosed at the time the assessment was conducted.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated.

The regulatory database report provided is based on an evaluation of the data collected and compiled by a contracted data research company. Hillmann can neither warrant nor guarantee the accuracy or completeness of the information obtained from the regulatory database report provider during the course of this assessment.

Subsurface conditions may differ from the conditions implied by the surface observations and can only be reliably evaluated through intrusive techniques.

Reasonable efforts have been made during this assessment to identify aboveground and underground storage tanks and ancillary equipment. Reasonable efforts are limited to information gained from visual observation of largely unobstructed areas, recorded database information held in public record and available information gathered from interviews. Such methods may not identify surficial and subsurface features that may have been hidden from view due to parked automobiles and other vehicles, snow cover, vegetative growth, pavement, construction or debris pile storage or incorrect information from sources.

No guarantee, explicit or implied, is made that the records pertaining to historical ownership or occupancy which were reviewed represent a comprehensive or precise delineation of past Property ownership or tenancy for legal purposes.

The ASTM E1527-21 standard states that recommendations are not required to be included in a Phase I ESA report; however, further that recommendations are an additional service that may be useful in the User's analysis of landowner liability protections or business environmental risks; and

that the User should consider whether recommendations for additional inquiries or other services are desired.

Recommended response actions offered in Section 1.3, if any, are provided as an option to the Client, and may have taken into account the Client's relation to the Subject Property and/or their intended purpose of this assessment. If included, it is not intended by Hillmann to represent the only course(s) of action, or inaction, to take. Furthermore, it is emphasized that additional response actions may become advisable depending on the outcome of the initial action(s) taken. Hillmann advises that Client and any additional authorized relying parties as specified on the report Cover and Section 2.5, or via letter of reliance extension, undertake consultation with legal counsel familiar with environmental and real estate law would be beneficial to the decision making process for the type and timing of a response action to identified RECs or Business Environmental Risks, if any.

Due to the limited nature of our review of potential Business Environmental Risks, the User(s) of the report should consider whether to take additional action(s) to further define, properly manage and/or mitigate potential BERs.

The User(s) assumes responsibility for business decisions that it makes utilizing information in the report provided by Hillmann. Hillmann shall not be responsible for any conclusions, interpretations and/or decisions of the User(s).

In the event of any conflict between the terms and conditions of this report and the terms and conditions of the consulting services agreement for this project, the consulting services agreement shall control.

# 3.0 USER PROVIDED INFORMATION

The term "User" is defined by ASTM as the party seeking to use Practice E1527 to complete an environmental site assessment of the Subject Property; specifically, the entity or entities named on the front cover to which the report has been addressed.

## 3.1 Environmental Lien and Activity and Use Limitation (AUL) Search

The User did not provide Hillmann with the results of an environmental lien and AUL search for the Subject Property.

## 3.2 Prior Environmental Reports/Documentation

The following prior environmental reports/documentation was provided:

*Excel Spreadsheet – R9.5 Sites*

An excel spreadsheet was provided listing PBS (Petroleum Bulk Storage) 475483 for Chelsea as having an active tank (Tank #1) ad Elliot PBS 601955 with an active tank (Tank #2). Both are listed as having closed spills, no tank testing and Elliott is listed as having had a visual inspection.

Below is the excel table provided:

| Consolidation Name | Development Name | PBS | Active | Tank #s | Tank Testing | Visual inspections | Open Spills | Closed Spills |
|---|---|---|---|---|---|---|---|---|
| Chelsea | CHELSEA | 475483 | Y | 1 | N | N | N | Y |
| Chelsea | CHELSEA ADDITION | | N | | N | N | N | N |
| Chelsea | ELLIOTT | 601955 | Y | 2 | N | Y | N | Y |
| Fulton | FULTON | | N | | N | N | N | N |

Site Specific Field Investigation Work Plan Elliott Houses, 426 West 27th Street, New York, New York NYSDEC Spill Number 89-08401 PBS Number 601955; prepared by Gannett Fleming Engineers and Architects, P.C. (GF) dated July 2007 (DRAFT)

The draft report prepared by GF for NYCHA details a subsurface investigation in the vicinity of two (2) 20,000-gallon single-walled underground storage tanks (USTs) [PBS No. 601955] removed and replaced with one (1) 25,000-gallon double-walled UST in 1997. "*The purpose of this assessment is to evaluate the effectiveness of the existing on-site oil recovery system and to assess the horizontal extent of the product plume".*

The draft report notes that the groundwater table is approximately 10 to 17 feet below ground surface (bgs) and groundwater flow is towards the west. The USTs that were removed (per the GF report according to NYCHA) were installed in 1947 and contained No. 4 and No. 6 fuel oil. A 275-gallon AST is noted to be located onsite associated with an oil recovery system installed in 1998. The GF report notes that a Phase II was conducted by TRC in November 1989 due to fuel oil observed to leak into the boiler room through the northern wall of the boiler room. The tank was repaired, and seepage into the boiler room ceased, however TRC noted there could still be product within the subsurface soil. Soil and groundwater sampling confirmed free product in the subsurface

(~4-ft thick). In 1998 after the two aforementioned tanks were removed an oil recovery system including two recovery wells, an oil/water separator, and a 275-gallon holding tank was installed. "*According to the NYCHA, free product was observed in monitoring well MW-2 in March 2007".*

The Draft GF report, in Section 3.0 lays out a proposed scope of work which would include monitoring well measurements and sampling, fingerprint analysis, and recovery system evaluation.

Hillmann has included a figure from the GF report showing the locations of the former USTs relative to the present UST as well as the locations of monitoring wells. See Appendix A Figure 3.

Phase II Field Investigation Elliott Houses, 426 West 27th Street, New York, NY 10001, NYSDEC Spill #89-08401; prepared by American Environmental Assessment & Solutions, Inc. (AEASinc) dated March 15, 2011

The Phase II was performed "*to evaluate the effectiveness of the existing on-site recovery system and to assess the horizontal extent of the product plume. The assessment was performed in the vicinity of two former 20,000-gallon single walled underground storage tanks (USTs) which were removed and replaced with one 25,000 gallon double walled UST in 1997".*

The Phase II included soil and groundwater sampling with the following results:

Soil Contamination

VOCs were identified in soil sample SB-4 at 13 to 15 feet. The compound Isoproplybenzene and n-Propylbenzene were detected at levels exceeding their respective RSCO. SB-4 was installed west of RW-1.

SVOCs were identified in soil sample SB-6 and SB-7 exceeding their respective RSCO. The compound Chrysene was detected in SB-6 at 400 µg/kg exceeding its respective RSCO of 400 µg /kg.

Five SVOCs were detected in SB-7 exceeding their respective RSCO. The compounds Benzo(a)Anthracene; Benzo(a)Pyrene; Benzo(b)Fluoranthene; Benzo(k)Fluoranthene; and Chrysene were identified at levels exceeding their respective Recommended Soil Cleanup Objective (RSCO). SB-7 was installed between RW-2 and MW-2

Groundwater Contamination

VOCs were detected in groundwater sample GW-3 at levels exceeding the NYSDEC Groundwater Quality Standards. Five VOCs were detected in groundwater sample GW-3 above their respective groundwater standard. The compounds 1,2,4-Trimethylbenzene; Benzene; Isopropylbenzene; Isopropylbenzene; n-Butylbenzene; and n-Propylbenzene were detected in GW-3 exceeding their respective NYSDEC Ambient Groundwater Quality Standards.

Other VOCs were detected at very low levels below their respective groundwater standard in GW-3 and GW-4.

> No VOCs were detected [in] groundwater sample GW-1 or GW-2.
> No SVOCs were identified in any of the groundwater samples obtained from GW-01 through GW-04.

The AEASinc report concludes and recommends:

> *It is evident that the remediation system has been effective in removing the free floating product from the groundwater as was revealed from the monitoring data and previous environmental report indicating that product thickness has greatly reduced from 4.5 feet in 1992 to 3 inches currently and should be kept in use until no free floating product is present in the groundwater. However although the remediation system usage should be continued, the dissolved constituents in the groundwater should also be addressed.*
>
> *The remediation system should be kept in use to further reduce product thickness until no free floating product is detected in any of the wells or in the groundwater.*
>
> *Since the observed fuel oil impacts have shown to represent an isolated area, no further subsurface investigation is warranted. AEASinc recommends conducting Vacuum Enhanced Fluid Recovery (EFR) and product thickness measurements on a monthly basis for a period of 12 months. The purpose is to remove contamination from the subsurface of the AOC in the liquid, vapor and dissolved phases. After such period the effectiveness of the product recovery strategy should be evaluated by NYCHA and possibly increase recovery efforts of the impacted groundwater twice a month until petitioned for spill closure.*

## 3.3 User Responsibilities

Section 6 of the ASTM E1527-21 standard describes certain tasks required to be performed by the report User in order to qualify for landowner liability protections to CERCLA liability. To assist the report User to meet these requirements, the ASTM E1527-21 standard recommends a questionnaire of inquiries (User Questionnaire) specified in 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31 be provided to the original report User. A User Questionnaire has been provided to the report User; however, a completed questionnaire was not returned to Hillmann.

| Question: | Yes/No: | Detail: |
|---|---|---|
| **Environmental liens that are filed or recorded against the property:** Did a search of recorded land title records identify any environmental liens filed or recorded against the property under federal, tribal, state or local law? | NR | |
| **Activity and use limitations that are in place on the property or that have been filed or recorded against the property:** Did a search of recorded land title records (or judicial records where appropriate, identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law? | NR | |
| **Specialized knowledge or experience of the person seeking to qualify for the LLP:** | NR | |

| Question: | Yes/No: | Detail: |
|---|---|---|
| Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? | | |
| **Relationship of the purchase price to the fair market value of the property if it were not contaminated:** Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? | NR | |
| **Commonly Known or Reasonably Ascertainable Information:** Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, | | |
| -Do you know the past uses of the property? | NR | |
| -Do you know of specific chemicals that are present or were once present at the property? | NR | |
| -Do you know of spills or other chemical releases that have taken place at the property? | NR | |
| -Do you know of any environmental cleanups that have taken place at the property? | NR | |
| **The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation:** Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property? | NR | |
| **Litigation/Administrative Proceedings/Government Notices** As the User of this ESA, do you have knowledge of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products. | NR | |

*NR-no response*

## 3.4 User's Reason for Performing Phase I ESA

The User did not indicate the purpose of the assessment. In accordance with ASTM E1527-21, it is assumed that the Phase I ESA was being performed in order to qualify for landowner liability protection to CERCLA liability.

# 4.0 RECORDS REVIEW

## 4.1 Environmental Information

### Physical Setting

| Source | Discussion |
|---|---|
| USGS 7.5 minute Topographic Map Data: (EDR Geocheck-Physical Setting Source Addendum) | The Property lies at an elevation of approximately 16 feet above mean sea level. An interpretation of topographic contour lines as well as a review of the EDR Geocheck-General Topographic Gradient suggested terrain sloping downward towards the west. The closest down gradient water body is the Hudson River, located approximately 1,750-ft to the west-northwest. |
| USDA SCS Soil Data: (EDR Geocheck-Physical Setting Source Addendum) | The soil type at the Subject Property is classified as "Urban Land". The Urban Land designation indicates that a majority of the original soils on the site have been disturbed by development or covered with impervious surfaces, such as buildings or pavement. |
| Geologic Data: (EDR Geocheck-Physical Setting Source Addendum) | The Geologic Age Identification Category for the Property is Stratified Sequence, and the Rock Stratigraphic Unit is the Paleozoic Eta, Ordovicias System and Lower Orodovician and Cambrian carbonate rocks Series. |
| Prior Env. Reports: (Section 3.2) | Prior reports discussed in Section 3.2 detail investigations performed at the site which indicated groundwater to be 10-17-ft bgs and flowing westward. |
| Additional Sources/ Data: | None |
| Groundwater Flow Discussion: | Based on a review of the above information as well as observation of the site, the direction of shallow groundwater flow at the site is inferred to be towards the west. |

### Federal, State and Tribal Environmental Record Sources

Standard government records were obtained and reviewed primarily via a third-party regulatory database report, titled EDR Radius Map™ Report, prepared by Environmental Data Resources of Shelton, CT. The report provided government records from the standard environmental resources and within minimum search distances specified by Section 8.2.2-Table 2 of the ASTM E1527-21; and were reviewed for the purpose of identifying potential RECs in connection with the Subject Property. Additional detail of the source and significance of the regulatory databases can be found in the regulatory database report in Appendix E. Hillmann has also included discussion of records pertaining to the Subject Property from other government record sources not specifically listed under Table 2, as applicable.

Reported distances for adjoining property listings, if applicable, are approximate and indicative of the presence of a public roadway or right-of-way between the adjoining site and Property.

The reported gradients have been estimated based on a number of factors including but not necessarily limited to field observation, review of topographic maps, database listing details and/or site specific geo-technical data.

Limited analysis of the details of on-site, adjoining and vicinity database sites was conducted to identify potential sources of sub-surface vapor encroachment. This review was based on elements of the ASTM "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions" (ASTM E 2600-15); and also on elements of "Methodology for Identifying the Area of Concern Around a Property Potentially Impacted by Vapor Migration from Nearby

Contaminated Sources" (Buonicore, 2011-S-103-AWMA). Vicinity database sites pertaining to non-petroleum product releases within 1,760 feet of the Subject Property in the up-gradient direction, 365 feet of the Subject Property in the cross gradient direction and 100 feet of the Subject Property in the down gradient direction; and vicinity database sites pertaining to petroleum product releases within 528 feet of the Subject Property in the up-gradient direction, 165 feet of the Subject Property in the cross gradient direction and 100 feet of the Subject Property in the down gradient direction were reviewed to identify active contamination sites with the potential to affect subsurface vapor conditions at the Subject Property. The potential for vapor encroachment was considered in assessing whether or not a REC exists in connection with the Subject Property when reviewing applicable sites within those distances.

Regulatory database sites with active petroleum or non-petroleum releases that are considered to constitute a vapor encroachment condition (VEC) to the Subject Property, if any, are identified and discussed in this section.

The EDR Radius Map report is attached in Appendix E.

**Property Listings**

The following listings of the Subject Property were identified:

- An NY SPILLS database listing, Spill number 0511572, for "Elliott Houses-NYCHA" associated with 426 West 27th Drive obtained regulatory closure on January 9, 2006. The spill occurred on January 6, 2006 when NYC DEP received a call pertaining to the release of 30-gallons of #2 fuel oil. The remarks state that the spill was due to a mechanical failure, and the spill contained in the basement and cleaned. Given no indication that remediation was needed and regulatory closure, the listing is not considered a REC or HREC.

- Elliott- Houses (Chelsea Houses), 426 West 27th Street is listed on the AST database for a permitted Petroleum Bulk Storage aboveground storage tank with ID: 2-601955. The AST capacity is listed as 275-gallon, for waste oil, and installed in 1995.

- Elliott-Houses-NYCHA, 426 West 27th Street is listed on the LTANKS database for Spill Number: 9602200 due to a tank test failure on May 15, 1996. The spill listed as consolidated with Spill Number: 8908401 is listed as having obtained regulatory closure on February 2, 2006. The remarks detail a discharge of #6-fuel oil, extensive remediation and monitoring and the installation of an oil recovery system detailed in Section 3.1 above. The database listing remarks state:

  *"20K TANK - EVERYTIME FILLED ACTIVE FLOW TAKES PLACE INTO BASEMENT THRU WALLS - ABSORBED WITH SPEEDY DRY AND TEMPORARILY TAKING TANK OUT OF SERVICE"*

  The database listing detail regarding the backdrop to the regulatory closure is as follows:

  *The PRS [Petroleum Recovery System] was operated between 1998 and 2014. Free product has not been observed in the accessible monitoring wells since 2007. Since halting the PRS in 2014, free product has not been observed in the accessible monitoring wells and little free product (less than*

*0.25in) has been observed in the recovery wells. No petroleum related VOCs or SVOCs (listed in Table 3 of CP-51) were detected in groundwater samples collected in April 2015 from the accessible monitoring wells. As per Randy in a discussion of January 20, 2017 if less than 0.25 inches of No. 6 oil has been in on-site wells for 2+ years and contamination has been delineated all around the impacted area and there is nothing off-site and no dissolved phase in wells, spills can be closed. The Closure Letter should contain the contaminated soil clause. Spill closure email will be prepared with contaminated soil clause and sent to NYCHA.*

Given the closure with a "*soil clause"* the above is considered a CREC. Hillmann recommends obtaining the closure records from NYCHA to understand the nature of any closure conditions e.g., monitoring or administrative requirements or institutional/engineering controls.

- Multiple Con-Edison listings (MANIFEST, RCRA-NonGen, FINDS, ECHO) associated with Property addresses were identified. The listings are associated with infrastructure work generating regulated waste. The listings are not indicative of a release and not considered a REC.

- Chelsea-Elliott Municipal Housing Project, 427 West 26th Street is listed on the NY SPILLS database for Spills 1104033 – closed July 13, 2011 and 1711615 – closed March 23, 2018. 425 West 25th Street is listed for Spill 9802923 – closed July 21, 1998. The spills were contained and closed with no impact to soil/groundwater. Given the nature of the cases, they are not considered a REC or HREC.

- The Property is listed on the RCRA-NonGen, FINDS and ECHO databases likely associated with the removal of regulated waste. The listings are regulatory in nature, not indicative of a release and not considered a REC.

- Chelsea Houses-NYCHA, 431 West 25th Street is listed on the LTANKS, NY SPILLS and UST databases. The LTANKS listings is for Spill Number: 9806339 due to a tank test failure on August 21, 1998. The is listed as having obtained regulatory closure on August 27, 2013. The listing details the removal of a 30,000-gallon #2 fuel oil UST with six post excavation samples leading to the removal of 900-tons of soil. Exceedances included Benzo(a)anthracene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(g,h,i)perylene, Chrysene, Dibenzo(a,h)anthracene.

  The listing details the backdrop to regulatory closure as follows:

  "*30,000 gallon UST removed in 8/2000. -890 tons of contaminated soils removed in 2000 - investigation done in 2006 along fill lines and by fill port (DEC request) -some PAHs detected in grab groundwater sample in 2006 -5 permanent wells installed in 2010 -All gw under TOGS with the exception of MW-5 (3 minor VOC compound exceedences) -Slight sheen subsequently detected in MW-5. Absorbent sock placed in well. -Minor impacts on sock in 2012. -No oil detect on absorbent sock in 2013. -Confirmed no product sheen in well during site visit of 7/31/13. NFA. Email sent to NYCHA on 8/27/13 requesting wells be decommissioned*."

  Hillmann recommends obtaining the closure letter to determine what, if any, conditions are linked to the No Further Action. Additionally, Hillmann observed multiple monitoring wells

in the vicinity of the former 30,000-gallon UST. Hillmann recommends decommissioning the wells if no ongoing monitoring requirements apply.

Chelsea-Houses, 431 West 25th Street is listed as being equipped with one (1) 25,000-gallon #2 fuel oil UST installed on September 1, 2000. The UST is listed as having secondary containment and leak detection. A 30,000-gallon UST is listed as having been installed in 1964 and removed in 2000.

Given the above and historic uses a VEC cannot be ruled out for the Property.

**Adjoining Property Listings**

The following adjoining property listings were identified.

- Multiple adjacent Con-Edison listings (MANIFEST, RCRA-NonGen, FINDS, ECHO) were identified. The listings are associated with infrastructure work generating regulated waste. The listings are not indicative of a release and not considered a REC in connection with the Property.

- Multiple adjacent sites are listed on the NY SPILLS and LTANKS databases. Each of the adjacent listings obtained regulatory closure and are not considered a REC in connection with the Property.

- 500 West 25th Street, listed on the VCP database for OER Site Number: 17CVCP047M associated with redevelopment and investigations/remediation associated with historic use obtained a notice of completion dated November 9, 2020. Given the status and findings of the investigations, the southwestern adjacent VCP site is not considered a REC in connection with the Property. Records were reviewed via the NYC EPIC Online Document Repository.

**Surrounding Area Findings**

The following is a discussion of non-adjoining sites identified as located within the ASTM specified search distance surrounding the Subject Property. In order to keep this discussion informative and concise, discussion(s) is/are provided of the listed site(s) for each database category that appears most likely to impact the Subject Property based on distance, area topography and/or regulatory status. Listings of sites within the applicable search distances not specifically discussed below were reviewed and concluded not to be RECs in connection with the Subject Property or VECs based on various factors including distance, area topography, known or inferred groundwater flow direction and/or regulatory status.

| **Federal NPL** | | | | **# of sites:** | 1 | **Search Distance:** | 1-mile |
|---|---|---|---|---|---|---|---|
| **Notable Listing:** | Hudson River PCBs | | | | | | |
| **Distance in feet:** | 1,600 | **Direction:** | WNW | **Gradient:** | Down | | |
| **Data Discussion:** | Given the location and nature of the NPL case – PCBs in the Hudson River sediment, the listing is not considered a REC to the Property. | | | | | | |

| | |
|---|---|
| **REC Discussion:** | Based on the details provided above, a REC is not suspected in connection with the Property. |
| **VEC Discussion:** | Based on the available data, a VEC is not suspected. |

| **Federal Delisted NPL** | | | | **# of sites:** | 0 | **Search Distance:** | 1-mile |
|---|---|---|---|---|---|---|---|

| **Data Discussion:** | Given the distance, gradient and/or regulatory statut, the Brownfields listings are not considered a REC in connection with the Property. | | | | | | |
| **REC Discussion:** | Based on the details provided above, a REC is not suspected in connection with the Property. | | | | | | |
| **VEC Discussion:** | Based on the available data, a VEC is not suspected. | | | | | | |

| **UNMAPPED/ORPHAN LIST SITES** | |
|---|---|
| | Hillmann has also reviewed a list of unmapped sites (a.k.a. "Orphan List" sites) indicated by the database report. Unmapped sites that were identified as falling within an applicable specific search distance or warranting discussion have either been discussed in the preceding tables or are detailed below: |
| **Notable Listings:** | None |

**Additional Environmental Record Sources**

Requests have been submitted to local, municipal and state agencies for pertinent records pertaining to the Subject Property, particularly with regard to potential environmental concerns such as petroleum storage tanks, storage and usage of hazardous substances and petroleum products, and/or known or suspected environmental contamination. Where applicable, internet research of government environmental regulatory databases was also conducted, as well as a general cursory internet search of the Subject Property address, for information indicative of a REC. The following table summarizes the findings of the research:

| Source | Type of Request | Outcome |
|---|---|---|
| NYCFD-Public Records Unit / Tank Section | FOI request | No response was received prior to report issuance. |
| NYS DEC | FOI request | No response was received prior to report issuance. |
| NYCDEP | FOI request | No response was received prior to report issuance. |
| NY DOB | Online search | Records included in Appendix F including certificates to operate dual natural gas/heating oil number 2 boilers. |
| USEPA | Online search | No records indicative of a REC identified. |
| Internet | Online Search | No records indicative of a REC identified. |

Pertinent records referenced in the above table have been included in Appendix F.

## 4.2 Historical Research

Historical records have been compiled and analyzed for historical property information and developing a history of previous uses of the Subject Property, adjoining properties and surrounding area. These records were reviewed for the purpose of identifying the likelihood of past uses having led to RECs in connection with the Subject Property.

The historical record sources listed below have been sought with the objective to document past uses of the Subject Property from the present back to the Subject Property's first developed use, or back to 1940, whichever is earlier. The term "developed use" includes agricultural use, placement of fill dirt and other uses that do not involve structures. Hillmann has sought to review historical records in minimum intervals of five years.

### Fire Insurance Maps

A Certified Sanborn Map Report was obtained from EDR for a review of published historic fire insurance maps for the Subject Property and surrounding area. The following is a summary of site uses and notable details depicted by the available maps:

| Year(s) | Prop/Adj | Depicted Use(s) | Notable Details |
|---|---|---|---|
| 1890, 1899, 1911, 1930 | **Property:** | The southwest portion of the Property (Block 723, Lot 1) is depicted as the Columbia Ale Brewery. The southeastern portion of the Property is depicted as a coal yard, stable and elevator factory among multiple multi-story mixed use buildings.<br><br>The Property north of West 26th Street is improved with multiple multi-story mixed use buildings and a Copper Works company in the present Chelsea Addition portion of the Property.<br><br>Multiple Property addresses were used for manufacturing listed to the right and depicted spatially relative to the present Property configuration in Appendix A, Figure 4. | N.Y. Edison Co. Sub Station/transformer station (452 West 27th Street – 1911-1930); Machine Shop (429 West 26th Street 1911); Manufacturing use (418-420 West 27th Street, 447-455 West 26th Street, 425-427 West 25th Street; 1911-1930); Garage with a 10,000-gallon buried tank (417-423 West 25th Street – 1930-1950). |
| | **Adjoining:** | Multiple mixed-use buildings and a manufacturing establishments building to the northeast, | Printer-Lithographer operation with multiple tanks noted to the immediate east of the Property at the southwest corner of 9th Avenue and West 26th Street – 263 9th Avenue (1930-2005).<br><br>Motor freight station / auto repair shop equipped with multiple gasoline tanks noted to the adjacent west across 10th Avenue at 293 10th Avenue (1930-2001). Given the location downgradient and across a multi-lane road not considered a REC in connection with the Property. |
| 1950, 1976, 1979, 1980, 1982, 1985, 1987, 1988, 1991-1996, 2001-2005 | **Property:** | The present Elliott Buildings 2 and 3 south of West 26th Street are depicted and listed as John Lovejoy, 11-story plus basement apartment buildings.<br><br>The present Elliott Buildings 1 and 4 between West 26th and 27th Streets are depicted and listed as "Elliott Houses – New York City Housing Authority", 12-story plus basement apartment buildings.<br><br>The area of the present Chelsea Addition building between Elliott Buildings 1 and 4 has been cleared except for the Hudson Guild Neighborhood House (5-story plus basement building constructed in 1908-09). In the subsequent 1976 Sanborn Fire Insurance Map it is depicted as a 96 unit 14-story plus basement Chelsea Houses Addition with an auditorium/community house corresponding to its present configuration. | |
| | **Adjoining:** | Public school to the immediate east of the Property. | |

A copy of the Certified Sanborn Map Report is attached in Appendix D.

### City Directories

An EDR City Directory Abstract report was reviewed for data of former occupants of the Subject Property's street address. The following is a generalized summary of the findings of city directory research for past occupants of the Subject Property.

| Property | |
|---|---|
| **Use(s) / Occupant(s):** | **Years** |
| Residential and mixed-use listings | 1920-2017 |
| Hand Laundry (Glassman Standard Hand Laundry) at 436 West 26th Street | 1923 |

The EDR City Directory Abstract report was also reviewed for listings of historic occupants of the adjoining properties. The following is a general summary of listings of historic adjoining property occupants:

| Adjoining Properties | |
|---|---|
| **Use and/or Occupant(s)** | **Years** |
| Mix of residential and commercial occupants. | 1920-2017 |

A copy of the EDR City Directory report is attached in Appendix D.

### Historical Topographic Maps

Due to the availability of alternate historic sources, as well as the likelihood that this source would not provide any significant data, historical aerial photographs were not researched for this assessment.

### Historical Aerial Photographs

Due to the availability of alternate historic sources, as well as the likelihood that this source would not provide any significant data, historical aerial photographs were not researched for this assessment.

### EDR High-Risk Historical Records

The EDR Radius Map™ report, which is discussed in greater detail in Section 4.1 and attached in Appendix E, provided a search of proprietary databases of potential historical high-risk uses at or in the vicinity of the Subject Property. These databases include EDR Historic Cleaners – a database of property addresses with records of historical occupancy by suspected cleaners businesses; EDR Historic Auto – a database of property addresses with records of historical occupancy by potential automotive gas/filling stations and repair facilities; and EDR MGP- a database of sites historically occupied by manufactured gas plants and related facilities.

| EDR Database | On-site Listings: | Adjoining/Off-Site Listings |
|---|---|---|
| **Historic Cleaners:** (on-site/adjoining only) | None | Tonis Dry Cleaners, 2001-2006 at 243 9th Avenue to the adjacent southeast across West 25th Street; |

| | | |
|---|---|---|
| **Historic Auto:** (on-site/adjoining only) | None | Carlo and Peter Truck Repair 289 10th Avenue, 1975-2002 and Marial Service Station, 279 10th Avenue, 1971-2014 to the adjacent west across 10th Avenue. |
| **MGP:** (1-mile distance) | None | Six listings within 1-mile. Each greater than 1,600-ft from the Property and downgradient. |

### Petroleum/Natural Gas Well Review

The historical record sources were reviewed for records of historic petroleum and/or natural gas wells at the Subject Property. No record of any historical petroleum/natural gas wells at or adjoining the Property was identified.

### Additional Historical Data

Where applicable, the following additional pertinent historical data was obtained:

| | |
|---|---|
| **Interviews/Anecdotal:** | No additional pertinent historical data was obtained. |
| **Local Gov't Records:** | No additional pertinent historical data was obtained. |
| **Prior Env. Reports:** (Section 3.2) | Not applicable; no prior reports were provided. |
| **Site Observations:** | Indications of historic uses of the Property or adjoining properties were not observed during the site reconnaissance. |
| **Other Sources:** | No additional pertinent historical data was obtained. |

### Summary of Identified Historic Uses

The following table presents a summary of the types and approximate date ranges of identified prior uses of the Subject Property:

| Property | |
|---|---|
| **Date Range** | **Use** |
| Late 1800's to 1940's | Mixed-use and manufacturing including a machine shop, brewery |
| 1940's-Present | Apartment buildings |

The following table presents a summary of the types of identified prior uses of the adjoining properties:

| Adjoining Properties | |
|---|---|
| **Date Range** | **Use** |
| Unk to Present | Residential, commercial and printing/lithography |

### Historical Records Data Failure

The ASTM E1527-21 standard defines data failure as failure to achieve the historical research objective even after reviewing the standard historical sources that are reasonably ascertainable and

likely to be useful. The objective is to identify all obvious uses of the property from the present, back to the property's first developed use, or back to 1940, whichever is earlier. Furthermore, records of historic use/conditions were sought in intervals no less than approximately five years, unless the property conditions appear unchanged over a longer interval. In encountered, data failure and its significance as a data gap is discussed below:

| Objective | Met? | Detail | Significant? |
|---|---|---|---|
| First developed use/date determined? | Yes | The first developed use of the Property was for dwellings in the late 1800's. | No |
| Record sources at 5-year intervals back to 1940 or first developed use? | Yes | Historical record gaps exceeding five years were encountered. However, significant site-use changes or undiscovered site uses appear unlikely to have occurred during the record gaps. | No |
| All obvious prior uses identified? | Yes | See Summary of Identified Past Uses of this section. | No |

Please refer to Section 2.3 for additional discussion of data gaps and their significance to the findings of the assessment.

**Historic Uses REC Discussion**

The review of historical records indicated evidence of the following potential RECs in connection with the Property:

Multiple historic uses of potential environmental concern, based on a review of Sanborn Fire Insurance Maps, occurred at the Property prior to the construction of the present Property buildings in the 1940's-1960's as follows:

- N.Y. Edison Co. Sub Station/transformer station (452 West 27th Street – 1911-1930);
- Machine Shop (429 West 26th Street 1911);
- Manufacturing (not specified) use (418-420 West 27th Street, 447-455 West 26th Street, 425-427 West 25th Street; 1911-1930);
- Garage with a 10,000-gallon buried tank (417-423 West 25th Street – 1930-1950);
- Printer-Lithographer operation with multiple tanks noted to the immediate east of the Property at the southwest corner of 9th Avenue and West 26th Street – 263 9th Avenue (1930-2005).

The aforementioned historic uses including a transformer sub-station, machine shop, manufacturing, and garage with a UST, and a printer/lithographer immediately east of the Property are considered a REC.

# 5.0 INTERVIEWS

## 5.1 Interviews with Owners, Operators and Occupants

### Current Owner / Key Site Operator

| Property Owner | Contact Name | Affiliation | Interview Type |
|---|---|---|---|
| New York City Housing Authority (NYCHA) representative | Sidiya Harris | Property Caretaker with NYCHA | In person |
| **Interview Date:** | April 19, 2022 | | |
| **Interview Outcome/Findings:** | | | |
| An interview for information pertinent to the assessment was conducted in person at the time of the site visit. The following pertinent information was indicated:<br><br>Sidiya was unaware of any known environmental concerns at the Property. | | | |

### Prior Owners/Operators/Occupants

| Name | Company/Title | Yrs @ Site | Interview Type |
|---|---|---|---|
| | | | |
| **Interview Date:** | | | |
| **Interview Outcome/Findings:** | | | |
| No prior owners, operators or occupants were interviewed. | | | |

### Neighboring Property Owner/Occupants

| Name | Company/Title | Yrs at site | Interview Type |
|---|---|---|---|
| | | | |
| **Interview Date:** | | | |
| **Interview Outcome/Findings:** | | | |
| The Property was not an abandoned property with evidence of unauthorized uses or uncontrolled access; therefore, interviews with adjoining or nearby property owners or occupants were not conducted. | | | |

## 5.2 Interviews with State and/or Local Government Officials

State and/or local governmental officials have been interviewed to obtain information of potential RECs in connection with the Subject Property. Many government agencies and their officials require submittal of written request for records in order to respond. The details in Section 4.1 list the various state and local government agencies contacted as part of this assessment, and the outcome of each inquiry. In addition, the details of regulatory database research in Section 4.1 may

have included detail of interviews with officials pertinent to government records review and identification of RECs.

Additional interview of government officials not previously detailed in Sections 4.1 are discussed below, if applicable.

| **Name** | **Agency Name/Title** | **Interview Type** |
|---|---|---|
| | | |
| **Interview Outcome/Findings:** | | |
| No additional local/state government officials were interviewed. | | |

# 6.0 SITE RECONNAISSANCE

## 6.1 Methodology and Limiting Conditions

A site reconnaissance was conducted to collect information and make observations to help identify RECs in connection with the Subject Property. This included visual and/or physical observations of the Subject Property and its structures, adjoining properties as viewed from the Subject Property boundaries and the surrounding area based on visual observations from adjoining public thoroughfares and accessed Subject Property structures. Subject property building exteriors were observed at ground level, unless otherwise indicated. Where applicable, building interiors were accessed and observed to the extent they were made safely accessible with the cooperation of the site escort.

| | |
|---|---|
| **Site Inspection Personnel:** | Mr. Etan Hindin and Mr. Dominick Aponte |
| **Property Escort/Company:** | Sidiya Harris / Property Caretaker |
| **Inspection Date:** | April 19, 2022 |
| **Weather Conditions:** | Overcast 45 degrees Fahrenheit |

### Significant Inaccessible Areas

Due to the pandemic occupied units were inaccessible. The inability to access these units is not considered a Significant Data Gap.

### Significant Limiting Site Conditions

No significant limiting site conditions were noted at the time of the site reconnaissance.

## 6.2 General Site Setting

### Site and Vicinity Characteristics

| | |
|---|---|
| **Abutting Roadways:** | West 25th Street to the south; West 27th Street – Drive to the north; 10th Avenue to the west; West 26th Street divides the Property parcels. |
| **Current Property Use:** | Multifamily residential and daycare |
| **Evidence of Past Property Uses:** | None observed. |
| **Evidence of Past Adjoining Property Uses:** | None observed. |
| **Surrounding Area Uses:** | Commercial, residential |

### Current Adjoining Property Uses

| Dir | Street Address | Description |
|---|---|---|
| **N** | 294 10th Avenue | Park |
| **W** | 259-293 10th Avenue | Residential and commercial |
| **E** | 281 9th Ave<br>401 West 25th Street<br>263 9th Avenue | Public School<br>Residential and commercial<br>Residential and commercial |
| **S** | 406-462 West 25th Street | Residential and commercial |

No visual observations indicative of a potential environmental concern were noted on the adjoining properties.

### Topographic Characteristics

| | |
|---|---|
| **Terrain:** | Flat to gently sloping |
| **Direction of Downward Slope:** | Towards the northwest |
| **On-site Water Bodies:** | None observed |
| **Other Significant Features:** | None observed |

### General Description of Structures and Improvements

| | |
|---|---|
| **Buildings:** | Eight |
| **Approx. Building Size:** | 1,002-units (combined) |
| **Approx. Year Built:** | 1963-1965 |
| **Number of Stories:** | **Chelsea**: 407 West 25th Street parcel (Block 723, Lot 15) is comprised of two (2) 21-story plus basement apartment buildings. The eastern building is equipped with a two-bay maintenance garage on the east side and a waste management areas east of the building.<br><br>**Chelsea Addition**: 441 West 26th Street parcel (Block 724, Lot 10) – one (1) 14-story plus basement apartment building (ground level day center).<br><br>**Elliott**: three (3) parcels (Block 724, Lots 1 and 15 and Block 723, Lot 1), four (4) 11-story and 12-story plus basement apartment buildings and one freestanding daycare at the northeast corner of West 26th Street and 10th Avenue.<br><br>NOTE: See Appendix A for building numbering/locations |
| **Basement/Subgrade Levels:** | See above |
| **Exterior Ground Cover:** | Asphalt, cement and landscaped areas, |

| | |
|---|---|
| **Ancillary Structures:** | Bulk trash/compactor covered-masonry enclosure with two overhead doors. Northeast of Chelsea Building 2 |
| **Sources of Heating & Cooling:** | Dual natural gas/heating oil boilers for onsite generated steam heat and tenant-owned optional electric window units for cooling. |
| **Potable Water/Sewage Disposal:** | Municipal utility connections |

## 6.3 Site Features and Conditions

### Storage/Usage of Hazardous Substances and Petroleum Products

The following approximate number of containers, and general description of their contents, capacity, container types and storage conditions, were observed to be stored and/or used at the Subject Property:

| Occupant | Substance | Qty/Container Type | Storage Conditions |
|---|---|---|---|
| NYCHA | Maintenance and cleaning materials (including paint) | 1-30-gallon | All stored indoors on intact concrete. No storage concerns noted. |

### Bulk Petroleum/Hazardous Material Storage Tanks

The following storage tanks for bulk petroleum or hazardous material storage were identified or reported to be present; or are suspected to be present based on visual observations:

| AST/UST | Product | Capacity | Construction | Year Installed | Status | Location/Notes |
|---|---|---|---|---|---|---|
| UST | Heating oil Number 2 | 25,000-gal | Double walled | 1998 | Active (natural gas generally used) | In area of former UST with monitoring wells noted.<br><br>West of Chelsea Building 1 just north of West 25th Street. |
| UST | Heating oil Number 2 | 25,000-gal | Double walled | 1998 | Active (natural gas generally used) | West of Elliott Building 4 south of West 27th Street – Drive |
| AST | Waste oil | 275 | Steel | 1990's | Status unknown | Elliott Building 4 Boiler Room – Remediation Oil Recovery System waste oil tank (see discussion Section 3.1) |
| AST | Holding tank | 275 | Steel | 1990's | Status unknown | Elliott Building 4 Boiler Room - Remediation Oil Recovery System holding tank (see discussion Section 3.1) |

### Strong, Pungent or Noxious Odors and their Sources

No strong, pungent or noxious odors were noted at the Subject Property.

**Standing Surface Water/Pools & Sumps**

No standing water, pools or sumps containing liquids likely to be hazardous substances or petroleum products were noted.

**Drums, Totes and Intermediate Bulk Containers**

No hazardous substance or petroleum product drums were noted.

**Unidentified Substance Containers**

No unidentified substance containers suspected of containing hazardous substance or petroleum product were noted.

**PCBs in Oil Filled Electrical/Hydraulic Equipment**

The Property is equipped with a trach compactor northeast of Chelsea Building 2 just south of West 26th Street. The compactor area is masonry enclosed with a roof and two overhead garage bay doors. No concerns were noted.

It is noted that identification of PCB containing fluorescent light ballasts, caulk, paint, or other materials located inside and are part of the building or structure is outside of the scope of the ASTM E1527-21 standard and this assessment.

**Stains or Corrosion on Floors, Walls or Ceilings**

No stains or corrosion of floors, walls or ceilings, excluding any staining from water, were noted.

**Drains and Sumps**

Floor drains and a basement sump designed for the purpose of managing sanitary sewage were noted. No conditions indicative of a REC were observed.

**Pits/Ponds/Lagoons**

No pits, ponds or lagoons were identified in connection with waste treatment or disposal.

**Stained Soil, Pavement/Stressed Vegetation**

No stained soil, pavement or stressed vegetation was observed.

**On-Site Solid Waste Disposal/Fill Material**

No evidence of on-site disposal of trash, construction debris, demolition debris or other solid waste was observed.

Based on the history of previous site development, historical fill material may be present in the subsurface at areas of previous site grading or building structures.

**Waste Water**

Sanitary sewage generated at the Subject Property is discharged via a connection to the local public sewer system.

Storm water runoff at the Subject Property is discharged via roof drains into the municipal sewer system.

**Septic Systems/Cesspools**

No septic systems/cesspools identified.

**Wells**

The following wells were identified at the Subject Property:

Multiple monitoring wells were observed in the vicinity of the two (2) Property heating oil USTs, west of Chelsea Building 1 just north of West 25th Street, and west of Elliott Building 4 south of West 27th Street – Drive. The wells are associated with documented releases from USTs removed from the Property discussed in Section 3 and 4 above.

**Railroad Spurs**

No railroad spurs were identified on the Subject Property.

# 7.0 BUSINESS ENVIRONMENTAL RISKS

In accordance with the contract agreement for this assessment, Hillmann has performed cursory reviews of several potential Business Environmental Risks (also known as "Non-Scope Considerations"). The ASTM E1527-21 standard defines the term business environmental risk (BER) as, *"a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice."*

## 7.1 Asbestos-Containing Material (ACM)

The contracted scope of work included a cursory visual screening of the accessed portions of buildings at the Subject Property built prior to 1990 for suspect asbestos containing materials (ACM). The information provided in this section, where applicable, is limited to identification of potential suspect materials in the readily accessible and observed areas of the building, and their general condition. This is not intended to be a comprehensive survey for the presence of ACM, and no testing has been conducted.

Given the 1940-1968 years of construction, asbestos containing materials are suspected unless ruled out by laboratory analysis.

Suspected ACM noted within the accessed building areas included floor tile, wall-board, spray-of insulation and roofing materials.

## 7.2 Lead-Based Paint

The contracted scope of work included a cursory visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1980. This is not intended to constitute a comprehensive survey for LBP or potential lead hazards, and no testing has been conducted.

Given the 1940-1968 years of construction, lead-paint is suspected unless ruled out by field survey or laboratory analysis.

Lead sampling was reportedly being performed due to the December 21, 2021 modification to the legal lead-based paint standard to 0.5 $mg/cm^2$ (Local Law 66 and rules adopted by the Department of Housing Preservation and Development [HPD]) The results of the survey have been requested by Hillmann.

## 7.3 Radon

Data compiled by the USEPA, as summarized by the regulatory database report, indicated that the Subject Property is located in an area classified as Zone 3 or 'low risk' area for radon. Radon testing was not included in the scope of this assessment.

## 7.4 Mold/Microbial Damage

The contracted scope of work included a cursory visual screening of the accessed areas of the building for evidence of significant damage to building materials and finishes as result of moisture intrusion and/or mold/microbial growth.

The following evidence of significant moisture intrusion or mold/microbial growth was noted:

The basement of Building Elliott - 1 was observed to have standing water on the concrete surface with some discoloration. Intermittent pipe and roof leaks were reportedly common given the age of the building. Mold abatement, primarily removing water damaged wall-board is reportedly performed by NYCHA staff as needed.

## 7.5 NWI Mapped Wetlands

The National Wetlands Inventory online Wetland Mapper (https://www.fws.gov/wetlands/data/mapper.html) was reviewed for indications of jurisdictional wetlands at or immediately adjoining the Subject Property. The scope of work for this assessment excluded a visual determination of regulated wetlands at the Subject Property. It is emphasized that, regardless of the data reviewed via the NWI Wetlands Mapper, a field delineation of regulated wetlands by a qualified professional would be warranted to determine the presence or absence of regulated wetlands at the Subject Property.

The review did not indicate regulated wetland areas on the Property.

## 7.6 Lead in Drinking Water

The scope of work for this assessment included a review of the potential for elevated levels of lead in drinking water by determining the source of the drinking water supply and a review of available compliance or testing data.

Potable water service at the Property is provided by a utility connection with the City of New York. A recently published water quality report from the utility indicated compliance with USEPA water quality standards for lead in drinking water. A copy of the report has been attached in Appendix F. Note – no site-specific lead-in-water sampling was performed within the context of the Phase I.

## GEOPHYSICAL SURVEY REPORTS

Coastal Environmental Solutions, Inc.

# GEOPHYSICAL INVESTIGATION REPORT

**11.22.2023**

**NYCHA Fulton 11, Manhattan, NY**
**Date of Investigation: 11/14/2023**

**Prepared for:**

H.K. Engineering
1600 Rt. 22 East
Union, New Jersey 07083

**Prepared By:**

Dennis Berthold
Director of Geophysical Operations
Coastal Environmental Solutions, Inc.
PO Box 342
Medford, New York 11763

# 1.0 INTRODUCTION

On 11/14/2023, Coastal Environmental Solutions, Inc (Coastal) personnel performed a limited geophysical investigation at NYCHA Fulton 11, Manhattan, NY. The areas of interest included the exterior of the building for the clearing of approximately 7 proposed soil borings as directed by the client. Surface conditions consisted of soil/grass, asphalt and concrete.

# 2.0 SCOPE OF WORK

1. Locate and mark detectable evidence of subsurface features such as utilities and former or existing Underground Storage Tanks (USTs) and related piping.

# 3.0 EQUIPMENT

**ImpulseRadar PinPointR Ultra-Wide Band (UWB) Penetrating Radar System**

Ground Penetrating RADAR (GPR) is a non-destructive geophysical method that produces a continuous cross-sectional profile of subsurface features in real time. GPR operates by transmitting both high and low frequency electromagnetic wave pulses down into the ground through a transmitter in the antenna. The transmitted electromagnetic waves reflect off materials with contrasting dielectric properties from surrounding medium such as underground storage tanks, utilities, distinct contacts between different earth materials, and other various subsurface objects. The antenna receiver collects the reflected electromagnetic waves which are then interpreted by the operator.

The ImpulseRadar PinPointR UWB GPR utilizes a dual band 400/800 MHz HS antenna mounted to a stroller frame which rolls over the surface. The total depth of penetration achieved with the antenna can be up to 10 feet but widely varies based on site-specific subsurface conditions. Conductive materials in the soil attenuate the GPR signal causing a decrease in effective depth of penetration and clarity.

**Vivax-Metrotech vLoc3-Pro Receiver/Transmitter**

The vLoc3-Pro Receiver is a hand-operated antenna capable of detecting electromagnetic (EM) fields emitted from a source. The EM antenna can detect pipes and cables in the ground at depths of up to 20 feet using active or passive tracing techniques. Passive tracing is the act of locating an underground utility through the detection of electrical or radio signals travelling along conductive utilities. Active tracing is used in conjunction with the Transmitter that is directly connected to the target utility or to a conductive rodder within a non-conductive line. A signal is sent through the utility at a specific frequency that can be detected by the Receiver. The detectability of a target utility depends on many factors including access to the target utility, grounding, depth of utility, conductivity, and other site-specific factors.

**TW-6 Pipe and Cable Locator**

The TW-6 Pipe and Cable locator is a handheld magnetometer which utilizes a transmitter-receiver pair attached to opposite ends of a handle and carried approximately 1-2ft from the surface. The magnetometer induces an electromagnetic (EM) field into the ground that is generated by the

transmitter. Once the induced EM field passes through a buried metallic object, it generates a secondary EM field which is detected by the receiver, generating an audible tone. Based on the calibration of the magnetometer, the audible tone reflects the strongest response as the highest pitched sound, trailing off on all sides of the peak. This piece of technology can be used to detect subsurface features such as metallic USTs, large diameter conductive pipes, and buried manholes, especially in areas in which traditional GPR methods cannot be utilized, such as overgrown or uneven surfaces.

# 4.0 METHODOLOGY

1. A subsurface investigation was performed in close proximity to the client proposed area. Active and passive detection methods were utilized with the VLoc3-Pro receiver/transmitter. Coastal personnel directly connected to all accessible and traceable pipes, conduits, valve covers, and any other surface feature throughout the site. A passive scan was performed throughout the site to detect any potential underground utilities that could not be located with active scan.
2. (If applicable) The TW-6 was utilized to sweep any accessible areas for suspected UST locations in 3-to-5-foot spacings for readings that may represent a buried metallic anomaly. Upon detection of a reading, the approximate size and shape of the anomalous area was marked on the surface to be investigated further with GPR.
3. GPR was utilized to further characterize the approximate dimensions, depth, and shape of the anomalies located with the TW-6 and other detections. The remainder of the areas around suspected UST locations were scanned with GPR in 3-to-5-foot spacing to locate any anomalous features not previously detected such as non-conductive piping and former excavations.
4. All findings were marked on the surface utilizing the American Public Works Association (APWA) recommended color code, seen below:

| | |
|---|---|
| WHITE | Proposed Excavation |
| PINK | Temporary Survey Markings (Approximate UST Locations, Soil Boring Locations) |
| RED | Electric Power Lines, Cables, Conduit and Lighting Cables |
| YELLOW | Gas, Oil, Steam, Petroleum or Gaseous Materials |
| ORANGE | Communication, Alarm or Signal Lines, Cables or Conduit |
| BLUE | Water (Domestic and Fire Lines) |
| PURPLE | Irrigation (Not commonly used) |
| GREEN | Sewers and Drain Lines |

# 5.0 SUMMARY OF FINDINGS

**Geophysical Investigation**

Coastal personnel conducted a geophysical investigation within all accessible areas of concern as indicated by the client. The investigation began with a visual inspection of the areas surrounding the building prior to a thorough search with the above referenced equipment. Within the asphalt

parking lot area, an electrical line and storm drain line was detected and marked out. Within the rear of the building, one storm drain was also found and marked. The area indicated as the playground area was also investigated and found to be absent of utilities with the exception of one storm drain which immediately exited the site at the southern interface. No evidence of current or recently excavated USTs was detected.

**Limitations**

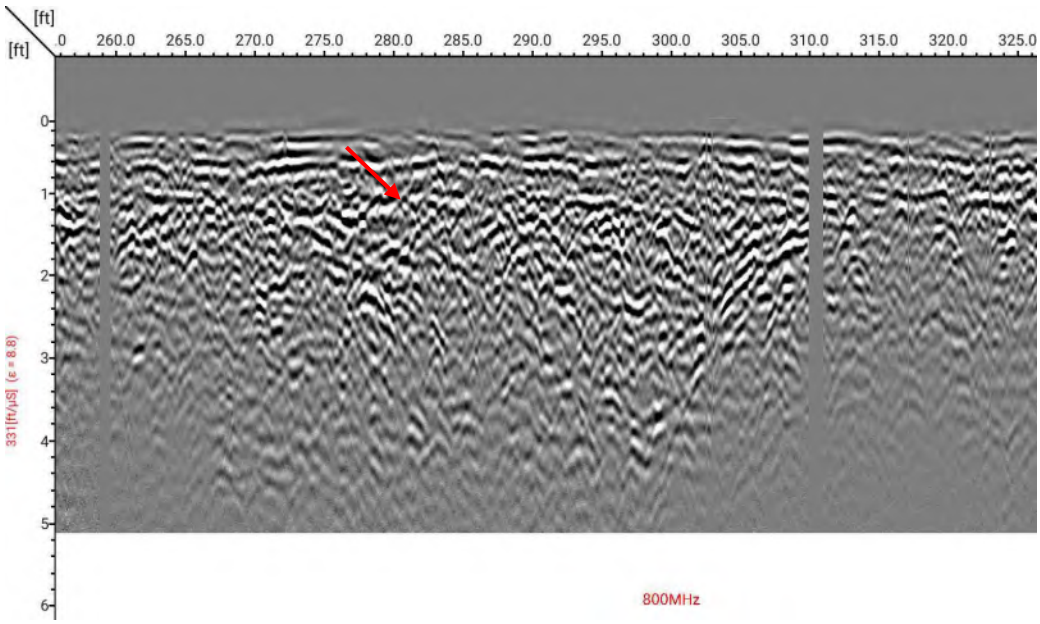
The effective depth of GPR penetration was limited to approximately 2.5 feet below the concrete/asphalt grade and 4 feet below soil grade. The limiting factor was likely due to soil conductivity attenuating the GPR signal, shallow bedrock containing moisture, or non-conductive materials utilized for the utilities. The GPR and TW-6 are unable to be utilized within close proximity to parked vehicles and exterior walls or on reinforced concrete, such as sidewalks.

**Disclaimer**

The subsurface investigation was performed by Coastal after considering the limits of the scope of work and the time constraint for the investigation. The investigation that is described in this report was undertaken in accordance with current accepted standards and practices of the geophysical survey industry. The results and interpretations that are presented are based on professional judgment and are as accurate as can reasonably be achieved. However, no geophysical equipment can accurately depict all subsurface features due to the geology and environmental conditions of the subsurface. Any intrusive work in proximity to identified anomalies should be carefully considered and cross-referenced with all available site-specific documentation. Coastal is not liable for the use, interpretation, or application of the data and information in this report.

# PHOTOS & GPR SCREENSHOTS

**Photo 1 – Photo of the asphalt parking lot area containing the electrical line leading to the pole visible in the background.**



**GPR Screenshot 1 – GPR screenshot showing the electrical line detected beneath the asphalt within the above parking lot.**

**Photo 2 – Area located behind the building on site. The white circle shows a proposed soil boring location, while the green arrow shows the location of a partially covered storm drain. The storm drain line extended away from the area of concern towards the parking lot in the background.**

**Photo 3 – Photo of a proposed soil boring located on the east side of the building, adjacent to the playground area.**

**Photos 4 & 5 – Photos of the proposed soil borings located in the asphalt playground area. Both locations were cleared of all utilities.**

# 1.0 INTRODUCTION

On 11/14/2023, Coastal Environmental Solutions, Inc (Coastal) personnel performed a limited geophysical investigation at NYCHA Chelsea-Elliot Addition, Manhattan, NY. The areas of interest included locations within the building and along the exterior of the building for the clearing of approximately 13 proposed soil borings as directed by the client. Surface conditions consisted of soil/grass, asphalt and concrete.

# 2.0 SCOPE OF WORK

1. Locate and mark detectable evidence of subsurface features such as utilities and former or existing Underground Storage Tanks (USTs) and related piping.

# 3.0 EQUIPMENT

**ImpulseRadar PinPointR Ultra-Wide Band (UWB) Penetrating Radar System**

Ground Penetrating RADAR (GPR) is a non-destructive geophysical method that produces a continuous cross-sectional profile of subsurface features in real time. # 5.0 SUMMARY OF FINDINGS

**Geophysical Investigation**

Coastal personnel conducted a geophysical investigation within all accessible areas of concern as indicated by the client. The investigation began with a visual inspection of the areas surrounding

the building prior to a thorough search with the above referenced equipment. The exterior investigations showed evidence of multiple utilities including electric, water, and possible steam lines connecting to multiple buildings. No evidence of current or recently excavated USTs was detected throughout the investigation areas, though a known UST is present within the concrete walkway east of the investigation area near Elliot 4.

Within the Elliot Center building, multiple areas were investigated for the purposes of clearing safe locations for further investigation. No utilities were detected within the subsurface at the investigated locations.

**Limitations**

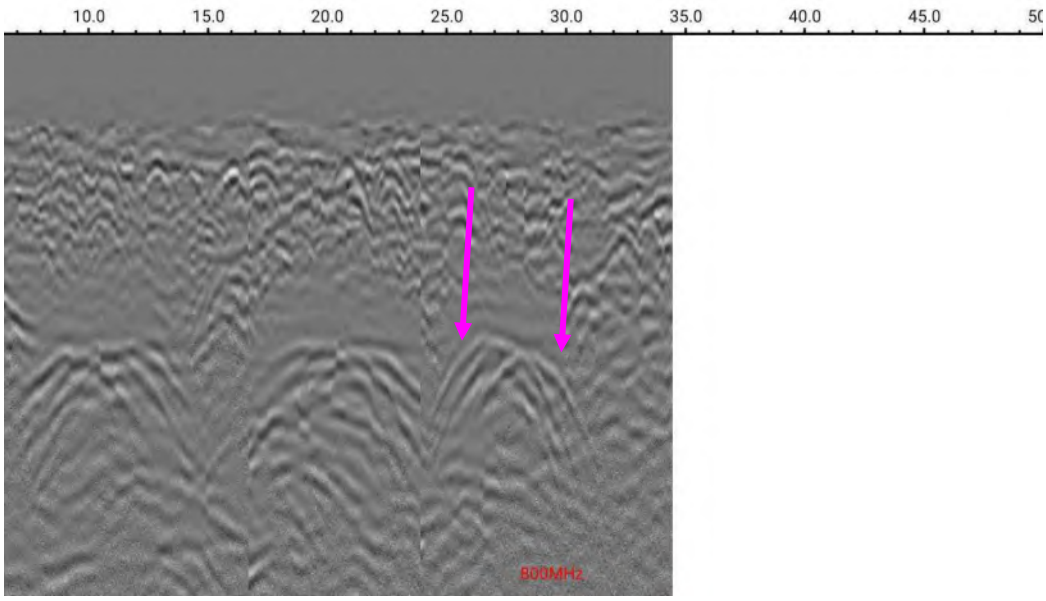
The effective depth of GPR penetration was limited to approximately 2.5 feet below the concrete/asphalt grade and 4 feet below soil grade. The limiting factor was likely due to soil conductivity attenuating the GPR signal, shallow bedrock containing moisture, or non-conductive materials utilized for the utilities. The GPR and TW-6 are unable to be utilized within close proximity to parked vehicles and exterior walls or on reinforced concrete, such as sidewalks.

**Disclaimer**

The subsurface investigation was performed by Coastal after considering the limits of the scope of work and the time constraint for the investigation. The investigation that is described in this report was undertaken in accordance with current accepted standards and practices of the geophysical survey industry. The results and interpretations that are presented are based on professional judgment and are as accurate as can reasonably be achieved. However, no geophysical equipment can accurately depict all subsurface features due to the geology and environmental conditions of the subsurface. Any intrusive work in proximity to identified anomalies should be carefully considered and cross-referenced with all available site-specific documentation. Coastal is not liable for the use, interpretation, or application of the data and information in this report.

# PHOTOS & GPR SCREENSHOTS

**Photo 1 – Photo of the concrete walkway between Elliot 4 and the playground area. This area contained multiple utilities including storm drainage, electrical, and water lines. There was also a possible steam line leading from Elliot 4 towards Elliot 1, though this area was marked out later in pink as a trench to avoid during drilling activities.**



**GPR Screenshot 1 – GPR screenshot showing multiple scans of the series of utility lines within the trench. Due to the proximity of the water, steam, electrical, and other lines to eachother, the entire trench was marked out to avoid.**

**Photo 2 – Additional view of the playground area with the electrical lines within the trench marked out (highlighted for clarity).**

**Photo 3 – Photo of a manhole containing a sanitary line leading off the west side of the Elliot Center. The grass area in the background was investigated and shown to be absent of any evidence of utilities.**

**Photos 4 & 5 – Photos of the proposed soil borings located in the Elliot Center basement. All locations were cleared of all utilities.**

Integrated Analytical Laboratories LLC

# *ANALYTICAL DATA REPORT*

HK Engineering & Geology, D.P.C.
1600 Route 22 East
Union, NJ 07083

Project Name: **HK2661.2**
IAL Case Number: **E23-05066**

These data have been reviewed and accepted by:

Michael H. Lefkin, Ph.D.
Laboratory Director

273 Franklin Road
Randolph, NJ 07869
Phone: 973 361 4252

IAL is a NELAP accredited lab (TNI01284) and maintains certification in Connecticut (PH-0699), New Jersey (14751), New York (11402) and Pennsylvania (68-00773).

# SAMPLE DELIVERY GROUP CASE NARRATIVE

## SDG#: E23-05066

Integrated Analytical Laboratories, LLC. received twenty-three (23) samples** from HK Engineering & Geology, D.P.C. (IAL SDG# **E23-05066**, Project: HK2661.2) on November 17, 2023 for the analysis of :

( 4 ) Low Level TCL VO for 8260+8011 + 15
( 15 ) TCL VO + 15
( 15 ) TCL BNA + 15
( 4 ) TCL BNA + SIMS + 15
( 19 ) TCL PCB
( 19 ) TCL Pesticides
( 19 ) Cyanide, Total
( 23 ) TAL Metals (6020B/7471B) by SGS Dayton

**Number of samples listed above may be greater than what is listed on the chain of custody. Any samples that require in-house filtration or splitting will be counted as separate samples.

Samples were received in good condition with documentation in order.
Cooler temperature was acceptable at 4 ± 2 degree C.

| **Volatiles By SW 8260D** | **Batch: 231122-01** | **Matrix: Aqueous** |

The result reported for 1,2-Diphenylhydrazine is also representative of Azobenzene. 1,2-Diphenylhydrazine rapidly decomposes to Azobenzene when exposed to water or heat. Analytical results from analysis of 1,2-Diphenylhydrazine will be directly compared to the applicable criteria for Azobenzene and/or 1,2-Diphenylhydrazine.

**Method: 6020B/7471B** **Matrix: Soil, Aqueous**

**QC** - Some analyses did not meet QC criteria. See subcontracted report case narrative.

**E23-05066** - Please see Case Narrative of Subcontracted Report.

Integrated Analytical Laboratories has subcontracted part or all of the results in this report. The laboratory performing the subcontracted work is listed above. These analyses were performed by a NELAP/TNI accredited laboratory, unless otherwise specified. This work was placed with a laboratory accredited for TNI standards for the tests to be performed OR with a laboratory that meets applicable statutory and regulatory requirements for performing the tests and submitting the results of tests performed. Integrated Analytical Laboratories will keep a copy of the subcontractor's report on file.
*TNI, The NELAC Institute, is a nationally recognized laboratory accreditation program. The TNI Standard is intended as an application of ISO/IEC 17025:2005(E), General Requirements for the Competence of Testing and Calibration Laboratories. While individual states and entities offer certification, TNI standards foster the generation of environmental data of known and documented quality through an open, inclusive, and transparent process that is responsive to the needs of the community.

A review of the QA/QC measures for the analysis of the sample(s) contained in this report has been performed by:

# CASE NARRATIVE / CONFORMANCE SUMMARY

**Client:** Integrated Analytical Lab **Job No:** JD77365

**Site:** Integrated Analytical Lab, Randolph, NJ **Report Date** 12/1/2023 8:11:50 AM

On 11/21/2023, 19 sample(s), 0 Trip Blank(s), 0 Equip. Blank(s) and 0 Field Blank(s) were received at SGS North America Inc. (SGS) at a temperature of 0.6 °C. The samples were intact and properly preserved, unless noted below. An SGS Job Number of JD77365 was assigned to the project. The lab sample ID, client sample ID, and date of sample collection are detailed in the report's Results Summary.

Specified quality control criteria were achieved for this job except as noted below. For more information, please refer to the analytical results and QC summary pages.

## Metals Analysis By Method SW846 6010D

**Matrix:** AQ **Batch ID:** MP43317

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JD77367-1MS, JD77367-1MSD, JD77367-1SDL were used as the QC samples for the metals analysis.
- The serial dilution RPD(s) for Aluminum, Arsenic, Beryllium, Copper, Selenium, Silver, Vanadium, Zinc are outside control limits for sample MP43317-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).
- MP43317-SD1 for Zinc: Serial dilution indicates possible matrix interference.

**Matrix:** SO **Batch ID:** MP43322

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JD77365-2MS, JD77365-2MSD, JD77365-2PS, JD77365-2SDL were used as the QC samples for the metals analysis.
- The matrix spike (MS) recovery(s) of Aluminum, Antimony, Potassium are outside control limits. Spike recovery indicates possible matrix interference and/or sample nonhomogeneity.
- The matrix spike duplicate (MSD) recovery(s) of Antimony, Potassium are outside control limits. Probable cause due to matrix interference.
- The serial dilution RPD(s) for Antimony, Arsenic, Beryllium, Cadmium, Silver are outside control limits for sample MP43322-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).

## Metals Analysis By Method SW846 7470A

**Matrix:** AQ **Batch ID:** MP43408

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JD77458-4FMS, JD77458-4FMSD were used as the QC samples for the metals analysis.

## Metals Analysis By Method SW846 7471B

| Matrix: SO | Batch ID: MP43401 |
|---|---|

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JD77365-1MS, JD77365-1MSD were used as the QC samples for the metals analysis.
- The matrix spike (MS) recovery(s) of Mercury are outside control limits. Probable cause due to matrix interference.

## General Chemistry By Method SM2540 G 18TH ED MOD

| Matrix: SO | Batch ID: GN48524 |
|---|---|

- Sample(s) JD77365-1DUP were used as the QC samples for the Solids, Percent analysis.

SGS certifies that data reported for samples received, listed on the associated custody chain or analytical task order, were produced to specifications meeting SGS's Quality System precision, accuracy and completeness objectives except as noted.

Estimated non-standard method measurement uncertainty data is available on request, based on quality control bias and implicit for standard methods. Acceptable uncertainty requires tested parameter quality control data to meet method criteria.

SGS is not responsible for data quality assumptions if partial reports are used and recommends that this report be used in its entirety. This report is authorized by SGS indicated via signature on the report cover.

## DATA QUALIFIERS AND FLAGS

**B** Indicates the analyte found in the associated method blank and in the sample due to potential lab contamination.
**C** Indicates analyte is a common laboratory contaminant.
**D** Indicates analyte was reported from diluted analysis.
**E** Identifies a compound concentration that exceeds the upper level of the calibration range of the instrument
**J** Indicates an estimated value either when the concentration in the sample is less than the RL or for qualification of TICs
**J1** Indicates an estimated value when ICC or CCV did not meet the criteria.
**M** Indicates matrix interference
**N** Presumptive evidence of a compound from the use of GC/MS library search.
**T** Sample analyzed outside of holding time
**X** Indicates samples analyzed for total and dissolved metals differ at ≤20% RPD.
**Y** Indicates DO depletion in the BOD blank is >0.20ppm
**Z** Indicates internal standard failure. Sample results are either biased high or biased low.
**$** Value outside NJDEP DKQP Limits
***** Result outside of QC limits

## PROJECT NOTES

- All results for soils, solids, and sludges are reported on a dry-weight basis except where noted
- All test results and QC are compliant with TNI or other applicable state agency requirements/guidance unless otherwise notated in the case narrative and/or project information page.
- The case narrative for this SDG should be consulted to determine any non-conformances.
- Any samples with 15-minute or "analyze immediately" holding times (e.g. pH, Dissolved Oxygen, Sulfite, etc.) which are analyzed in the laboratory are considered out of holding time.
- IAL is a NELAP/TNI certified laboratory (TNI ID# TNI01284). IAL retains certification in Connecticut (PH-0699), New Jersey (14751), New York (11402), and Pennsylvania (68-00773).
- Certification is not required to perform analyses in the following states: AL, CO, DE, GA, HI, ID, IN, KY, MD, MI, MS, MO, MT, NE, NM, SD and TN. IAL can perform all analyses, except Drinking Water, within its scope of capabilities in these states.

## ACRONYMS AND ABBREVIATIONS

| | | | |
|---|---|---|---|
| **CFU** | Colony Forming Unit | **ND** | Indicates analyte was analyzed for but not detected at MDL or RL (only if MDL is not used) |
| **CCB** | Continuing Calibration Blank | | |
| **CCV** | Continuing Calibration Verification | **NTU** | Nephelometric Turbidity Units |
| **DF** | Dilution Factor | **ppb** | Parts per billion. Reported as µg/L or µg/kg |
| **DL** | Attached as a suffix to a diluted sample | **ppm** | Parts per million. Reported as mg/L, µg/mL or mg/kg |
| **DUP** | Duplicate | **QC** | Quality Control |
| **ICB** | Initial Calibration Blank | **% Rec** | Percent Recovery |
| **ICC** | Initial Calibration Curve | **RL** | Reporting Limit. The RL is typically determined by the concentration of the lowest standard in the calibration curve |
| **ICV** | Initial Calibration Verification | | |
| **kg** | kilogram | | |
| **L** | Liter | **RPD** | Relative Percent Difference |
| **LCS** | Laboratory Control Sample | **RSD** | Relative Standard Deviation |
| **LCSD** | Laboratory Control Sample Duplicate | **RT** | Retention Time |
| **MDL** | Method Detection Limit as determined according to 40 CFR Part 136 Appendix B | **SU** | Standard Units |
| | | **TIC** | Tentatively Identified Compound AKA Library Search Compounds |
| **MF** | Membrane Filter | | |
| **mg** | milligram (1000mg = 1g) | **TNI** | The NELAC (National Environmental Laboratory Accreditation Council) Institute |
| **µg** | microgram (1000µg = 1mg) | | |
| **ml** | milliliter (1000ml = 1L) | **TNTC** | Too numerous to count |
| **µl** | microliter (1000µl = 1ml) | ***** | When attached to a compound name, indicates this analyte was analyzed by Method SW-846 8270 SIM |
| **µmhos** | Conductivity units - resistance expressed in ohms | | |
| **MPN** | Most Probable Number | **^** | When attached to a compound name, indicates this analyte was analyzed by Method SW-846 8011 or EPA 504.1 |
| **MS** | Matrix Spike | | |
| **MSD** | Matrix Spike Duplicate | | |
| **NA** | Not applicable | **<** | Less than; In conjunction with a numerical value, indicates a concentration less than the RL or MDL |
| **NC** | Not calculated | | |

ND = Analyzed for but Not Detected at the MDL
J = Indicates an estimated value either when the concentration in the sample is greater than MDL and less than RL, or for qualification of TICs
All qualifiers on individual Volatiles & Semivolatiles are carried down through summation.
C = Common Laboratory and/or Bottle Contaminant.
N = Presumptive evidence of a compound from the use of GC/MS library search.

ND = Analyzed for but Not Detected at the MDL

J = Indicates an estimated value either when the concentration in the sample is greater than MDL and less than RL, or for qualification of TICs

D = The compound was reported from the Diluted analysis

All qualifiers on individual Volatiles & Semivolatiles are carried down through summation.

C = Common Laboratory and/or Bottle Contaminant.

N = Presumptive evidence of a compound from the use of GC/MS library search.

Total Target Compounds (69): 0

D --- Dilution Performed
J --- Value Less than RL & greater than MDL
E --- Exceeds upper level of Calibration curve

* - RL & MDL from SIM run
** - represents the total of 3+4-Methylphenol
B --- Compound detected in Blank
C --- Common laboratory contamination

| NJ, CT, PA | NY |
|---|---|
| ☐ Results Only (Level I) | ☒ ASP Category A |
| ☐ Reduced (Level II/III) | ☐ ASP Category B* |
| ☐ Regulatory/ Full* (Level IV) | |

## EDDs

☐ NJ SRP
☐ NYSDEC EQuIS
☐ lab approved custom EDD
☒ NO EDD REQ'D

## Concentrations Expected:

Low Med High

Known Hazard:
☐ YES ☐ NO
Describe:

## Turn-Around Time (TAT)

5 Day TAT Hard Copy and Verbal

Hard Copy: Standard 3 week  Other - call for price

## Petroleum Hydrocarbons - Selection is REQUIRED

☐ NJ EPH-DRO - Category 1
TAT for PHC, if other than 2 weeks:
☐ NJ EPH-C40 - Category 2
☐ CT ETPH
☐ NJ EPH-Fractionated - Cat 2
☐ DRO-8015

## Regulatory Requirement

| New Jersey | New York |
|---|---|
| ☐ GWQS | ☐ AWQS (TOGS Table 1) |
| ☐ 2017 SRS/IGW | ☐ GWEL (TOGS Table 5) |
| ☐ 2021 SRS/MGW | ☒ Part 375-6.8(a) - Unrestricted |
| ☐ Ecological | ☒ Part 375-6.8(b) - Restricted |
| ☐ DW | ☐ CP-51 Table 2 or 3 (selection required) |
| ☐ SPLP | |

Other States / Criteria
☐ Pennsylvania Act 2
☐ CT RCSA 22a-133k1-k3
☐ TSCA PCBs
OTHER Regulatory Requirements - specify in comments
Sample Specific Notes:

## Sample Matrix

DW - Drinking Water
WW - Waste Water
GW - Groundwater
SW - Surface Water
LIQ - Liquid (specify)
M - Multiphasic
OI - Oil
S - Soil
SED - Sediment
SOL - Solid (specify)
SL - Sludge
W - Wipe

## SAMPLE INFORMATION

ANALYTICAL PARAMETERS (please note if contingent)

| Client ID | Depth (ft only) | Sampling Date | Sampling Time | Matrix | # containers | IAL # | TAL/TCL + 30 |
|---|---|---|---|---|---|---|---|
| SB10A | 0-2 | 11/16/2023 | 9:30 | S | 5 | 1 | X |
| SB10B | 10-12' | 11/16/2023 | 9:45 | S | 5 | 2 | X |

# PROJECT INFORMATION

## E23-05066: HK2661.2

**Project Notes:**

**NOTE 1 taken by kfalconer on 11/20/2023 09:37**
CLIENT WAS NOTIFIED VIA E-MAIL THAT METALS ANALYSES WILL BE SUBCONTRACTED TO SGS DAYTON.

**NOTE 5 taken by kfalconer on 11/20/2023 09:41**
3 ENCORS RECEIVED - 1 INTO MEOH/2 INTO H2O

**NOTE 6 taken by kim on 11/20/2023 11:17**
COMPARE SOIL RESULTS TO NY Part 375-6.8(UUSCO+RUSCO).

COMPARE GW RESULTS TO NY TOGS Tbl1 (AWQS).

Soil samples reported on a dry weight basis unless otherwise indicated on result page.

# CASE NARRATIVE / CONFORMANCE SUMMARY

| | | | |
|---|---|---|---|
| **Client:** | Integrated Analytical Lab | **Job No:** | JD77365 |
| **Site:** | Integrated Analytical Lab, Randolph, NJ | **Report Date** | 12/1/2023 8:11:50 AM |

On 11/21/2023, 19 sample(s), 0 Trip Blank(s), 0 Equip. Blank(s) and 0 Field Blank(s) were received at SGS North America Inc. (SGS) at a temperature of 0.6 °C. The samples were intact and properly preserved, unless noted below. An SGS Job Number of JD77365 was assigned to the project. The lab sample ID, client sample ID, and date of sample collection are detailed in the report's Results Summary.

Specified quality control criteria were achieved for this job except as noted below. For more information, please refer to the analytical results and QC summary pages.

## Metals Analysis By Method SW846 6010D

**Matrix:** AQ **Batch ID:** MP43317

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JD77367-1MS, JD77367-1MSD, JD77367-1SDL were used as the QC samples for the metals analysis.
- The serial dilution RPD(s) for Aluminum, Arsenic, Beryllium, Copper, Selenium, Silver, Vanadium, Zinc are outside control limits for sample MP43317-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).
- MP43317-SD1 for Zinc: Serial dilution indicates possible matrix interference.

**Matrix:** SO **Batch ID:** MP43322

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JD77365-2MS, JD77365-2MSD, JD77365-2PS, JD77365-2SDL were used as the QC samples for the metals analysis.
- The matrix spike (MS) recovery(s) of Aluminum, Antimony, Potassium are outside control limits. Spike recovery indicates possible matrix interference and/or sample nonhomogeneity.
- The matrix spike duplicate (MSD) recovery(s) of Antimony, Potassium are outside control limits. Probable cause due to matrix interference.
- The serial dilution RPD(s) for Antimony, Arsenic, Beryllium, Cadmium, Silver are outside control limits for sample MP43322-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).

## Metals Analysis By Method SW846 7470A

**Matrix:** AQ **Batch ID:** MP43408

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JD77458-4FMS, JD77458-4FMSD were used as the QC samples for the metals analysis.

## Metals Analysis By Method SW846 7471B

| Matrix: | SO | Batch ID: | MP43401 |
|---|---|---|---|

- All samples were digested within the recommended method holding time.
- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JD77365-1MS, JD77365-1MSD were used as the QC samples for the metals analysis.
- The matrix spike (MS) recovery(s) of Mercury are outside control limits. Probable cause due to matrix interference.

## General Chemistry By Method SM2540 G 18TH ED MOD

| Matrix: | SO | Batch ID: | GN48524 |
|---|---|---|---|

- Sample(s) JD77365-1DUP were used as the QC samples for the Solids, Percent analysis.

SGS certifies that data reported for samples received, listed on the associated custody chain or analytical task order, were produced to specifications meeting SGS's Quality System precision, accuracy and completeness objectives except as noted.

Estimated non-standard method measurement uncertainty data is available on request, based on quality control bias and implicit for standard methods. Acceptable uncertainty requires tested parameter quality control data to meet method criteria.

SGS is not responsible for data quality assumptions if partial reports are used and recommends that this report be used in its entirety. This report is authorized by SGS indicated via signature on the report cover.

| Reference ID#: PO# | |

### REPORTING & BILLING

| | |
|---|---|
| Contact: | Kim James |
| Fax #: | |
| EMail to: | msimmons@ialonline.com |
| Report to: | Melissa Simmons |
| Address: | |
| Invoice to: | Brenda Barone |
| Address: | |

| Turnaround Time | Report Format |
|---|---|
| Verbal/Fax: 24 hr* 48 hr* 72 hr* 1 wk* 2 wk Other: 1 WEEK | Category A |
| Hard Copy: 72 hr* 1 wk* 2 wk* 3 wk Other: | Special Requirements |
| *Prior to sample arrival, Lab notification is required. | |

### ANALYTICAL PARAMETERS / PRESERVATIVES

Preservative: 1 = HCL; 2 = NaOH; 3 = $HNO_3$; 4 = $H_2SO_4$; 5 = MeOH; 6 = Other

### SAMPLE INFORMATION

| | Sample ID | Sample Depth (in Feet) | Sampling Date | Sampling Time | Matrix | # of Containers | TAL Metals (6020B/7471B) | 123 456 |
|---|---|---|---|---|---|---|---|---|
| 17 | E23-05066-021_TWP4 FILT | | 11/16/23 | 10:20 | Aqueous | 1 | Run | |
| 18 | E23-05066-022_TWP2 FILT | | 11/16/23 | 10:00 | Aqueous | 1 | Run | |
| 19 | E23-05066-023_TWP5 FILT | | 11/16/23 | 14:00 | Aqueous | 1 | Run | |

Please print legibly and fill out completely. Samples cannot be processed and the turnaround time will not start until any ambiguities have been resolved.

COOLER TEMP. 0.6 °C

Concentrations Expected: LOW MED HIGH

Known Hazard: yes no

Describe:

Note: 1 WEEK TAT

SAMPLES 020 - 023 ARE FIELD FILTERED VOLUME OF SAMPLES 016 - 019.

# SGS Sample Receipt Summary

**Job Number:** JD77365 **Client:** INTEGRATED ANALYTICAL LABORATOR **Project:** E23-05066

**Date / Time Received:** 11/21/2023 9:50:00 AM **Delivery Method:** CLIENT **Airbill #'s:**

**Cooler Temps (Raw Measured) °C:** Cooler 1: (0.6);

**Cooler Temps (Corrected) °C:** Cooler 1: (0.6);

| **Cooler Security** | Y | or | N | | Y | or | N |
|---|---|---|---|---|---|---|---|
| 1. Custody Seals Present: | ☑ | | ☐ | 3. COC Present: | ☑ | | ☐ |
| 2. Custody Seals Intact: | ☑ | | ☐ | 4. Smpl Dates/Time OK | ☑ | | ☐ |

| **Cooler Temperature** | Y | or | N |
|---|---|---|---|
| 1. Temp criteria achieved: | ☑ | | ☐ |
| 2. Cooler temp verification: | | | |
| 3. Cooler media: | Ice (Bag) | | |
| 4. No. Coolers: | 1 | | |

| **Quality Control Preservatio** | Y | or | N | N/A |
|---|---|---|---|---|
| 1. Trip Blank present / cooler: | ☐ | | ☑ | ☐ |
| 2. Trip Blank listed on COC: | ☐ | | ☑ | ☐ |
| 3. Samples preserved properly: | ☑ | | ☐ | |
| 4. VOCs headspace free: | ☐ | | ☐ | ☑ |

| **Sample Integrity - Documentation** | Y | or | N |
|---|---|---|---|
| 1. Sample labels present on bottles: | ☑ | | ☐ |
| 2. Container labeling complete: | ☑ | | ☐ |
| 3. Sample container label / COC agree: | ☑ | | ☐ |

| **Sample Integrity - Condition** | Y | or | N |
|---|---|---|---|
| 1. Sample recvd within HT: | ☑ | | ☐ |
| 2. All containers accounted for: | ☑ | | ☐ |
| 3. Condition of sample: | Intact | | |

| **Sample Integrity - Instructions** | Y | or | N | N/A |
|---|---|---|---|---|
| 1. Analysis requested is clear: | ☑ | | ☐ | |
| 2. Bottles received for unspecified tests | ☐ | | ☑ | |
| 3. Sufficient volume recvd for analysis: | ☑ | | ☐ | |
| 4. Compositing instructions clear: | ☐ | | ☐ | ☑ |
| 5. Filtering instructions clear: | ☐ | | ☐ | ☑ |

## Metals Analysis

### QC Data Summaries

Includes the following where applicable:

- Instrument Runlogs
- Initial and Continuing Calibration Blanks
- Initial and Continuing Calibration Checks
- High and Low Check Standards
- Interfering Element Check Standards
- Method Blank Summaries
- Matrix Spike and Duplicate Summaries
- Blank Spike and Lab Control Sample Summaries
- Serial Dilution Summaries

Integrated Analytical Laboratories LLC

# *EPA Method TO-15 Table of Contents*

# Laboratory Acronyms

*The following is a list of laboratory acronyms commonly used in EPA Method TO-15 testing:*

| Acronym | Definition |
|---|---|
| BLK | Blank/Method Blank |
| BFB | 4-Bromofluorobenzene (Tuning Standard) |
| CAS Number | Chemical Abstract Service Registry Number |
| cc | cubic centimeters |
| CCCVS | Closing Calibration Check Verification Standard |
| COC | Chain of Custody |
| DCVS | Daily Calibration Verification Standard |
| DF | Dilution Factor |
| EPA | U. S. Environmental Protection Agency (aka USEPA) |
| "Hg | Inches of Mercury |
| IA | Indoor Air |
| IASL | Indoor Air Screening Level |
| ICAL | Initial Calibration |
| ICVSS | Initial Calibration Verification Standard |
| ISTD | Internal Standard |
| GC | Gas Chromatography |
| GC/MS | Gas Chromatography/Mass Spectrometry |
| LCS | Laboratory Control Sample/Spike |
| LLTO-15 | Low Level TO-15 |
| MDL | Method Detection Limit |
| MDLV | Method Detection Limit Verification |
| ml | milliliters |
| ND | Not Detected (at or above RL) |
| NJDEP | New Jersey Department of Environmental Protection |
| PM | Project Manager |
| ppbv | parts per billion, volume-to-volume ratio |
| PQL | Practical Quantitation Limit - MDLx3 |
| QA | Quality Assurance |
| QC | Quality Control |
| RAL | Rapid Action Limit |
| RL | Reporting Limit |
| RLLCS | Reporting Limit Laboratory Control Sample |
| RPD | Relative Percent Difference |
| RRF | Relative Response Factor |
| RSD | Relative Standard Deviation |
| SDG | Sample Delivery Group |
| SGSL | Soil Gas Screening Levels |
| SS | Sub Slab |
| TAT | Turnaround Time |
| TIC | Tentatively Identified Compound |
| µg/m3 | micrograms per cubic meter |

White and yellow - lab copies; Pink - client copy

Use appropriate care with IAL sampling equipment when sampling and packing for shipment. The client is responsible for all damage incurred to IAL equipment. Notify IAL if equipment is damaged upon receipt. Holding time before sampling is 15 days, after sampling is 30 days; failure to follow these times may result in data rejection by regulatory agencies. The lab will contact you if your COC is not clear, incomplete, or if discrepancies exist. The use of initials is not permitted on the COC except when correcting errors. 06.2014

*Pre-sampling and Post-sampling Flow Controller calibration check RPD ≤ 20%

Flow Controller Note: none

***Sample Receipt:*** Samples were received in good condition. Documentation was in order.
Samples were received at IAL by: Joseph Walukiewicz

***Sample Preparation:*** None required.

***Sample Analysis:***
*Hold Time:* All within recommended hold times.
*Instrument Calibration:* Meets method criteria.
*Analysis performed by:* jjw
*SDG Non-Conformances:* none

# CASE NARRATIVE

**Integrated Analytical Laboratories, LLC** — **Randolph, NJ 07869**
**Project #: HK2661** — **NJDEP (Primary AB) Certification#: 14751**
**SDG #: E23-05047** — **NY ELAP Certification #: 11402**
**CT DPH Certification#: PH-0699**
**Analytical Method: EPA Method TO-15** — **PADEP Certification#: 68-00773**

**Date of first sample receipt: 11/16/2023** — **Date of last sample receipt: 11/16/2023**

**Client: HK Engineering+Geology, D.P.C.**
**Project/Site: HK2661 / NY**

*Tentatively Identified Compounds:* Tentatively Identified Compounds (TICs) are determined using a NIST library search. TICs are reported at 10% of the applicable internal standard. Dilution factors are calculated into the final reported result. Since the compounds found are tentatively identified, the conversion from ppbv to ug/m3 may not be made.

*Canister-to-Canister dilutions:* none

*Dilutions:* Dilutions, if necessary, will be conducted directly on the instrument up to a 500x dilution. When dilutions of 1000x or higher are necessary, the laboratory must inject a volume of sample into another certified clean canister and add humidified Z-1 zero air to the remainder of the canister volume. Tedlar bags are not used for dilutions.

If a sample is received with historically high levels of analytes, a 100x can-to-can dilution my be used from the start. A 100x canister-to-canister dilution may be also be used at the analyst's discretion.

*On-instrument dilutions are conducted as follows:*

| Dilution Factor | Sample Volume Injected (cc) |
|---|---|
| 1 | 500 |
| 2.5 | 200 |
| 5 | 100 |
| 10 | 50 |
| 20 | 25 |
| 25 | 20 |
| 50 | 10 |
| 100 | 5 |
| 200 | 2.5 |
| 250 | 2 |
| 500 | 1 |

*Canister-to-canister dilutions are conducted as follows:*

A certified clean canister is obtained and evacuated to approximately -30"Hg. Both the clean/dilution canister and sample canister are fitted with a ¼" Swagelok® nut fitting equipped with septa. Depending on dilution factor necessary, a sample aliquot is removed from the canister and injected into the clean canister using 30cc Multifit gas-tight syringe. Once the correct sample aliquot has been transferred, the dilution canister should be connected to the humidified Z-1 zero air supply and filled to ambient pressure (0"Hg).

| Dilution Factor | Sample Aliquot | Z-1 Make-up Added |
|---|---|---|
| 100 | 60ml | 5940ml |
| 1000 | 6ml | 5994ml |

# CASE NARRATIVE

**Integrated Analytical Laboratories, LLC** — **Randolph, NJ 07869**
**Project #: HK2661** — **NJDEP (Primary AB) Certification#: 14751**

**Date of first sample receipt: 11/16/2023** — **Date of last sample receipt: 11/16/2023**

**Client: HK Engineering+Geology, D.P.C.**
**Project/Site: HK2661 / NY**

If further dilutions need to be made from the dilution canister, they may be made on-instrument. Using a 100x dilution canister, the following on-instrument dilutions can be produced:

| Dilution Factor | Sample Volume Injected |
|---|---|
| 100 | 500ml |
| 250 | 200ml |
| 500 | 100ml |
| 1000 | 50ml |
| 2000 | 25ml |
| 2500 | 20ml |
| 5000 | 10ml |

Using a 1000x dilution canister, the following on-instrument dilutions can be produced:

| Dilution Factor | Sample Volume Injected |
|---|---|
| 1000 | 500ml |
| 2500 | 200ml |
| 5000 | 100ml |
| 10,000 | 50ml |
| 20,000 | 25ml |
| 25,000 | 20ml |
| 50,000 | 10ml |

If further dilutions need to be made from the dilution canister, beyond 50,000x, a subsequent canister-to-canister dilution must be made using the above prescribed protocol.

***GC Column and ID:*** RTX-1 SN 1119138, RTX-VMS SN 1586881, or equivalent

***Calibration Standards:*** Only gas phase standards were used. Primary and second-source standards provided by Scott Specialty Gases or Airgas Specialty Gases/ Air Liquide

***Working Standards:*** Primary source standards* are created from:
- Airgas Specialty Gases #EB0103704, valid 1/18/2021 through 12/30/2024, @ approximately 100ppb per compound, with exception of m&p-xylenes @ 200ppb. Standard is directly introduced into the instrument for all calibration standard concentrations. Dilutions are made accordingly, on instrument. The 10ppbv standard is also used for the Daily Calibration Verification Standard (DCVS), the Laboratory Control Sample (LCS) and Closing Calibration Verification Standard (CCCVS).

The second source standard*, used as the Initial Calibration Verification Standard (ICVSS), is introduced into the instrument in the same manner as the primary source standard, using:

# CERTIFICATE OF ANALYSIS

## Grade of Product: CERTIFIED HYDROCARBON

| | | | |
|---|---|---|---|
| Customer: | INTEGRATED ANALYTICAL LABS | | |
| Part Number: | X76NI99C15AC001 | Reference Number: | 160-402744241-1 |
| Cylinder Number: | EB0116272 | Cylinder Volume: | 146.0 CF |
| Laboratory: | 124 - Plumsteadville - PA | Cylinder Pressure: | 2050 PSIG |
| Analysis Date: | May 12, 2023 | Valve Outlet: | 350SS |
| Lot Number: | 160-402744241-1 | Expiration Date: | May 12, 2025 |

Traceability Statement: Hydrocarbon Process standards are NIST traceable either directly by weight or by comparison to Airgas laboratory standards that are directly NIST traceable by weight.

### CERTIFIED CONCENTRATIONS

| Component | Requested Concentration | Reported Mole % | Accuracy |
|---|---|---|---|
| 1,1 DICHLOROETHANE | 100.000 PPB | 100.000 PPB | +/- 10% |
| 1,1 DICHLOROETHYLENE | 100.000 PPB | 100.000 PPB | +/- 10% |
| 1,1,1 TRICHLOROETHANE | 100.000 PPB | 104.000 PPB | +/- 10% |
| 1,1,2 TRICHLORO ETHANE | 100.000 PPB | 101.000 PPB | +/- 10% |
| 1,1,2,2 TETRACHLOROETHANE | 100.000 PPB | 104.000 PPB | +/- 10% |
| 1,2 DIBROMO ETHANE | 100.000 PPB | 103.000 PPB | +/- 10% |
| 1,2 DICHLORO PROPANE | 100.000 PPB | 103.000 PPB | +/- 10% |
| 1,2 DICHLOROBENZENE | 100.000 PPB | 101.000 PPB | +/- 10% |
| 1,2 DICHLOROETHANE | 100.000 PPB | 102.000 PPB | +/- 10% |
| 1,2,4 TRICHLOROBENZENE | 100.000 PPB | 100.000 PPB | +/- 10% |
| 1,2,4 TRIMETHYLBENZENE | 100.000 PPB | 102.000 PPB | +/- 10% |
| 1,3 BUTADIENE | 100.000 PPB | 106.000 PPB | +/- 10% |
| 1,3 DICHLORO BENZENE | 100.000 PPB | 105.000 PPB | +/- 10% |
| 1,3,5 TRIMETHYL BENZENE | 100.000 PPB | 103.000 PPB | +/- 10% |
| 1,4 DICHLOROBENZENE | 100.000 PPB | 100.000 PPB | +/- 10% |
| 1,4 DIOXANE | 100.000 PPB | 113.000 PPB | +/- 10% |
| 2 CHLOROTOLUENE | 100.000 PPB | 107.000 PPB | +/- 10% |
| 3 CHLOROPROPYLENE | 100.000 PPB | 106.000 PPB | +/- 10% |
| 4 ETHYL TOLUENE | 100.000 PPB | 106.000 PPB | +/- 10% |
| ACETONE | 100.000 PPB | 108.000 PPB | +/- 10% |
| ACROLEIN | 100.000 PPB | 105.000 PPB | +/- 10% |
| BENZENE | 100.000 PPB | 103.000 PPB | +/- 10% |
| BENZYL CHLORIDE | 100.000 PPB | 102.000 PPB | +/- 10% |
| BROMO DICHLORO METHANE | 100.000 PPB | 112.000 PPB | +/- 10% |
| BROMOFORM | 100.000 PPB | 113.000 PPB | +/- 10% |
| CARBON DISULFIDE | 100.000 PPB | 95.000 PPB | +/- 10% |
| CARBON TETRACHLORIDE | 100.000 PPB | 107.000 PPB | +/- 10% |
| CHLORO DIBROMO METHANE | 100.000 PPB | 110.000 PPB | +/- 10% |
| CHLOROBENZENE | 100.000 PPB | 104.000 PPB | +/- 10% |
| CHLOROFORM | 100.000 PPB | 106.000 PPB | +/- 10% |
| CIS 1,2 DICHLOROETHYLENE | 100.000 PPB | 102.000 PPB | +/- 10% |
| CIS 1,3 DICHLOROPROPENE | 100.000 PPB | 94.000 PPB | +/- 10% |
| CUMENE | 100.000 PPB | 106.000 PPB | +/- 10% |
| CYCLOHEXANE | 100.000 PPB | 109.000 PPB | +/- 10% |
| ETHANOL | 100.000 PPB | 98.000 PPB | +/- 10% |
| ETHYL ACETATE | 100.000 PPB | 104.000 PPB | +/- 10% |
| ETHYL BENZENE | 100.000 PPB | 105.000 PPB | +/- 10% |
| ETHYL CHLORIDE | 100.000 PPB | 104.000 PPB | +/- 10% |

Where:
MDL is defined as the higher of the MDL Spike and MDL Blank
PQL is MDLx3
RL is defined as the lowest point of the calibration curve
ppbv is parts per billion by volume and is how results come off the instrument
µg/m$^3$ = ppbv x molecular weight / 24.45

Location of this file: P:\PAL Reports\LLTO-15 and TO-15 Common Files\Agilent MDL

Instrument used for Clean Canister Certification Analysis? YES

Michael Leftin, Ph.D.
Laboratory Director

**RPD must be <25% for all laboratory duplicate samples. Laboratory duplicate samples are run once daily.**

**NC = The RPD could not be calculated since the compound was only detected in either the parent or duplicate sample.**

Qualifiers:
E=Concentration exceeds upper level of calibration range for instrument.
D=Extra dilution required for this compound. X=Duplicate samples do not met RPD criteria.
U=Compound ND or under reporting limit.

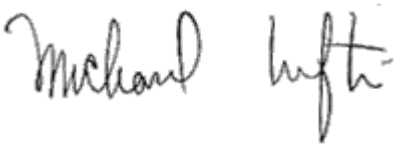
E23-05047-05
E23-05047-06

Samples for this analysis were received in good condition with a chain of custody.

All work recorded herein has been done in accordance with normal professional standards using accepted testing methodologies, quality assurance and quality control procedures except where otherwise agreed to by the client and testing company in writing. Once analysis has been performed on canisters that meets regulatory criteria, samples are recycled for future use, unless other provisions have been made by the client.



Michael H. Leftin, Ph.D.
